The Survey Health Status and Functioning file includes data about the sample person's health
including height and weight, self-assessments of vision and hearing, history of medical conditions,
functioning, among others.

This file started in 1997 when the facility instrument was converted to a Computer-Assisted
Personal Interviewing format.  It contains one record for each person who completed a facility
interview.  From 1992 through 1996, similar data may be found in RIC 2.
