I. GENERAL INFORMATION

A. Background: This instruction informs the A/B MACs, the HHH MACs and the Fiscal Intermediary Shared System (FISS) that the I/OCE is being updated for January 1, 2014. The I/OCE routes all institutional outpatient claims (which includes non-OPPS hospital claims) through a single integrated OCE, which eliminates the need to update, install, and maintain two separate OCE software packages on a quarterly basis. The attached Recurring Update Notification applies to 100-04, Chapter 4, section 40.1.

B. Policy: This notification provides the Integrated OCE instructions and specifications for the Integrated OCE that will be utilized under the OPPS and Non-OPPS for hospital outpatient departments, community mental health centers, all non-OPPS providers, and for limited services when provided in a home health agency not under the Home Health Prospective Payment System or to a hospice patient for the treatment of a non-terminal illness. The I/OCE specifications will be posted to the CMS Website and can be found at http://www.cms.gov/OutpatientCodeEdit/.

DEFINITIONS

- A blank in a field indicates ‘no change’

- The “old” column describes the attribute prior to the change being made in the current update, which is indicated in the “new” column. If the effective date of the change is the same as the effective date of the new update, ‘old’ describes the attribute up to the last day of the previous quarter. If the effective date is retroactive, then ‘old’ describes the attribute for the same date in the previous release of the software.

- “Unassigned”, “Pre-defined” or “Placeholder” in APC or HCPCS descriptions indicates that the APC or HCPCS code is inactive. When the APC or HCPCS code is activated, it becomes valid for use in the OCE, and a new description appears in the “new description” column, with the appropriate effective date.

- Activation Date (ActivDate) indicates the mid-quarter date of FDA approval for a drug, or the mid-quarter date of a new or changed code resulting from a National Coverage Determination (NCD). The Activation Date is the date the code becomes valid for use in the OCE. If the Activation Date is blank, then the effective date takes precedence.

- Termination Date (TermDate) indicates the mid-quarter date when a code or change becomes inactive. A code is not valid for use in the OCE after its termination date.

- For codes with SI of “Q1, Q2, and Q3”, the APC assignment is the standard APC to which the code would be assigned if it is paid separately.
