

Home Health Quality Measures Archive

CMS usually updates the HH QRP claims-based measure results every year. However, due to the COVID-19 Public Health Emergency HHQRP data submission requirements for the Q4 2019, Q1 2020, and Q2 2010 quarters were exempted. The missing data for Q1 2020 and Q2 2020 will impact what is displayed on Care Compare; therefore, public reporting of home health agencies' data will freeze after the October 2020 refresh. This means that following the October 2020 refresh, the data publicly reported will be held constant for all refreshes in 2021, including October 2021. You can find detailed specifications for the claims-based measures in the **Downloads** section below.
