1. Introduction

This document describes the general methodology to calculate plan-level estimates produced by the Out-of-Pocket Cost (OOPC) Model and available on the 2012 Medicare Plan Finder website. The 2013 estimates produced by the OOPC Model are calculated in the same way as 2012 except that 2013 Model estimates use submitted 2013 PBP and formulary data. While the Medicare Plan Finder displays OOPCs according to self-reported health status of beneficiaries; the OOPC Model used to determine meaningful difference for Part C and Part D plans and total beneficiary cost for Part C plans are based on the data submitted in each Plan Benefit Package (PBP). The OOPC Model reports OOPCs by PBP-based service category at the plan level. The detailed description of how the OOPC Model is structured, and how plan data are input into the PBP, is provided in the CY2013 OOPC Model User's Guide, dated April 2012. This User's Guide also describes the format of the output data generated by the model for each plan.

The Centers for Medicare & Medicaid Services (CMS) defined and developed the process, data sources, and algorithms necessary to populate the 2012 Medicare Plan Finder (MPF) Out-of-Pocket Cost (OOPC) database for Original Medicare (OM), Medicare Advantage with Prescription Drug (MA-PD), Medicare Advantage Only (MA-Only) and Medigap plans. Working with the Center for Medicare (CM), Center for Strategic Planning (CSP), and the Office of the Actuary (OACT), Fu Associates, Ltd. defined a cohort of OM individuals based on the 2006 and 2007 Medicare Current Beneficiary Surveys (MCBS).

This nationally representative cohort provides the basis used to identify the utilization measures and OOPC estimates. The Medicare Current Beneficiary Survey (MCBS) events and claims for the designated cohort were reviewed to develop the beneficiaries' utilization measures and estimate OOPCs under plan-submitted benefit structures.

Where necessary the out-of-pocket costs reflect the 2012 costs using inflation factors provided by OACT; in general, costs were inflated using service-based inflation factors. Part D outpatient drug calculations applied average prices from the Medicare Prescription Drug Event (PDE) claims data (2011). Plans use their Contract Year (CY) 2013 Plan Benefit Packages (PBPs) to determine the OOPCs associated with each CY 2013 plan.

The OOPC model provides estimates for as many PBP Medicare-Covered and Mandatory Supplemental benefits as possible. As described below, the OOPC calculations are derived from the actual events and claims data taken from the MCBS data. The OOPC calculations include several Mandatory Supplemental benefits because the MCBS data includes claims/charges for these items. These benefits include:

- Additional days for Inpatient Acute Care, Inpatient Mental Health, and SNF,
- Non-Medicare-covered stays for Inpatient Acute Care, Inpatient Mental Health, and SNF,
- Preventive and Non-Medicare-covered Comprehensive Dental Costs, and
- Non-covered Prescription Drugs.

However, Medicare Advantage plans offer other benefits that are not included in the out-of-pocket costs calculations because claims data are insufficient or do not exist. Some examples of these benefits are:

- Foreign Travel Emergency Transportation Acupuncture,
- Hearing services not usually covered by Medicare (including Hearing Aids),
- Vision services not usually covered by Medicare (including Eye Wear due to the absence of claims)),
- Chiropractic services not usually covered by Medicare, and
- Podiatry services not usually covered by Medicare.

2. Selection of the MPF Cohort Based on the 2006 and 2007 MCBS

Fu Associates, Ltd. reviewed the variables in the 2006 and 2007 MCBS files and used this information to develop an Original Medicare (OM) cohort for the MPF. The OM cohort provides the baseline from which the MPF OOPC database was developed. Appendix A provides a basic description and record counts for the MCBS files used.

2.1 Screening Process

Certain criteria were used to either include or exclude beneficiaries in the OM cohort. Assignment to a particular cell was based on the beneficiary's health status. The following screening criteria were used to establish the final cohort. As development of accurate out-of-pocket estimates require the availability of all utilization during the year, beneficiaries who did not meet certain criteria **were excluded** from the final cohort:

1. Beneficiaries who did not complete at least one survey interview; beneficiaries newly enrolled in Medicare during the year were not included in the final cohort. They may have generated Medicare claims during the year, but they were not part of the survey process; their survey data had to be imputed using data for beneficiaries who were enrolled during the entire year. The data for these new enrollees; therefore, do not represent their utilization but rather the utilization of other beneficiaries. As a result, these beneficiaries were not included in the calculation of OOPCs;
2. Beneficiaries interviewed in a facility were excluded from the cohort due to potentially insufficient utilization data;
3. Beneficiaries, whose health status was missing, were excluded from the cohort because they could not be mapped into a health status category;
4. Beneficiaries who were not enrolled in Medicare Parts A & B for all twelve months in 2006 or 2007 respectively, or until death, were excluded from the cohort due to potentially insufficient utilization data;
5. Beneficiaries with one or more months of Medicare Managed Care enrollment were excluded from the cohort due to potentially insufficient utilization data;
6. Beneficiaries with a Medicare status of End-Stage Renal Disease (ESRD) were excluded from the cohort due to the inability to join an MA-PD or MA plan;
7. Beneficiaries with hospice utilization were excluded from the cohort since the payment for these beneficiaries is based on excess savings and not a capitated rate;
8. Beneficiaries who did not complete the entire survey were excluded from the cohort due to potentially insufficient data;
9. Beneficiaries with Veterans Administration (VA) insurance were excluded from the cohort due to potentially insufficient utilization data; and
10. "Ghosts," or beneficiaries newly enrolled in Medicare in 2006 or 2007 with claims and imputed survey data, were excluded from the cohort because their utilization duplicated that of other beneficiaries included in the cohort.

In contrast, beneficiaries who died during the year, but who met all other screening criteria **were included** in the final cohort. These beneficiaries, who tend to have higher than average utilization, have important effects on average OOPC calculations for MA plans.

2.2 Screening Results

The number of beneficiaries excluded from each cohort as a result of the screening criteria is provided in the following tables.

TABLE 2.1 - SCREENING RESULTS 2006 MCBS	
Screening Criteria	Number of Beneficiaries Excluded
1. Beneficiaries who did not complete at least one survey interview	1,722
2. Beneficiaries interviewed in a facility	790
3. Beneficiaries with a health status other than E, VG, G, F, and P	60
4. Beneficiaries with less than 12 months of Part A/B enrollment	897
5. Beneficiaries with some MA-PD or MA coverage	3,069
6. Beneficiaries with ESRD status	107
7. Beneficiaries with one or more hospice payments	186
8. Beneficiaries with an incomplete survey	1,003
9. Beneficiaries with VA insurance	689
10. Ghost beneficiaries	696
Total number of beneficiaries excluded	4,791*

TABLE 2.2 - SCREENING RESULTS 2007 MCBS	
Screening Criteria	Number of Beneficiaries Excluded
1. Beneficiaries who did not complete at least one survey interview	2,654
2. Beneficiaries interviewed in a facility	697
3. Beneficiaries with a health status other than E, VG, G, F, and P	64
4. Beneficiaries with less than 12 months of Part A/B enrollment	817
5. Beneficiaries with some MA-PD or MA coverage	3,646
6. Beneficiaries with ESRD status	92
7. Beneficiaries with one or more hospice payments	208
8. Beneficiaries with an incomplete survey	907
9. Beneficiaries with VA insurance	675
10. Ghost beneficiaries	627
Total number of beneficiaries excluded	5,188*

* Note: Beneficiaries could have qualified for more than one screening criteria, in which case, the criteria used to screen beneficiaries from the final MPF cohort may NOT be mutually exclusive.

2.2.1 Final MPF Original Medicare Cohort

Of the 11,048 beneficiaries in the 2006 MCBS file, 6,257 were retained in the final cohort that populates the five health status cells in the MPF OOPC database. Of the 11,081 beneficiaries in the 2007 MCBS file, 5,893 beneficiaries were used to populate the five health status cells in the OOPC database. Combined, the final FFS cohort thus consists of 12,150 beneficiaries. The following table shows the number of beneficiaries in the 2006/2007 Medicare OM cohort by health status.

TABLE 2.3 – 2006/2007 ORIGINAL MEDICARE BENEFICIARIES IN COHORT BY HEALTH STATUS						
Health Status	Excellent*	Very Good	Good*	Fair	Poor*	TOTAL
Number of Beneficiaries	1,645	3,303	3,958	2,297	947	12,150

* Note: The three health status groups with the asterisks are used for display on the MPF.

Data for all 12,150 beneficiaries in the OM cohort was used to develop the baseline MPF utilization measures and OOPC estimates. According to past CMS analysis, the OM cohort is large enough to be nationally representative of the Medicare population in the MCBS (e.g., beneficiaries who are enrolled in both Parts A and B; beneficiaries who are not enrolled in Medicare Advantage plans).

3. Development of Out-of-Pocket Cost Estimates

The following assumptions were made as a result of ongoing analysis of MCBS and PBP data, Medigap policies and plans, and CMS requirements to design and develop OOPC estimates for the MPF. These assumptions provide a baseline of the out-of-pocket model and will be modified as the process is refined.

3.1 General Assumptions

1. Actual OOPC estimates are displayed in dollar values.
2. OOPC estimates are displayed as “Monthly” and were calculated based on the number of months enrolled for each beneficiary in the cohort.
3. MCBS events and claims for the designated cohort were reviewed to develop the beneficiaries' utilization measures and estimate OOPCs.
4. MCBS sample weights were applied to each of the beneficiaries included in the final cohort as part of the development of the OOPCs.
5. The 2006 and 2007 costs for Physician/Supplier events were inflated to 2012 costs using Berenson-Eggers Type of Service (BETOS) code inflation factors; all Health Care Procedure Codes (HCPCs) within a BETOS code are inflated by that same BETOS rate. These inflation factors were provided by OACT.
6. Long-term care costs were not included in the development of the OOPC estimates.
7. Multiple records exist in the Record Identification Code (RIC) files that contain the same values for all data fields. According to CMS/ORDI, one of the elements of a medical expenditure survey, such as the MCBS, is that the interview is frequently most demanding for those who are the sickest, since the interview length is dependent upon the amount of medical utilization reported. To reduce the reporting

burden, the MCBS design allows individuals to report repeated utilization in a summary manner. For example, if an individual has physical therapy multiple times a week for several weeks, MCBS captures the utilization in summary form. This summary data was used to generate the correct number of events as part of the back-end processing. Often events generated from summary data appear to be duplicates, since each event will have the same begin and end date. These records are not mistakes; rather, they demonstrate how repeat utilization was collected and processed. As such, the information was included in the analysis.

8. The event-level data in the Medical Provider Event (MPE) file was not used because the previous data provided limited information for mapping an event to a PBP benefit.

3.3 Assumptions Related to the Calculation of MA-PD or MA Out-of-Pocket Cost Estimates

1. Where applicable, the calculations use the PBP cost shares for in-network services to calculate OOPC estimates for benefits.
2. If the PBP cost sharing used coinsurance (i.e., percentages), the coinsurance basis is the reported MCBS Total Amount.
3. The costs for Optional Supplemental benefits were not included in the calculation of OOPCs.
4. Information collected in the PBP Notes fields is not included in the calculation of OOPCs.
5. Utilization of Outpatient services, Physician/Supplier services, and DME benefits was mapped into a PBP service category based on the information provided on the bill. In most instances, services that occurred on the same day and appeared to be related were linked together into a single benefit.
6. The calculation applies the service-category deductibles to annualized costs.
7. For benefits with a minimum and maximum cost share, the minimum cost-share amount was used to calculate the OOPC estimate.
8. The calculation of the category cost equals the sum of the co-pay amount, plus the coinsurance amount, plus the category deductible. If there is a plan-maximum, this is taken into account as well by adjusting the amount covered by the plan versus non-covered costs.
9. If a plan indicates there is a service-category specific deductible amount, then that deductible amount is used to reduce the total costs for calculating the cost shares, and then added back in to determine the total cost for the category.
10. For plan-level deductible and maximum out-of-pocket costs, the In-Network values are used by the model. If no In-Network amount is specified but an In-and-Out-of-Network amount is, then the In-and-Out-of-Network amount is used in the calculations.
11. If a plan indicates that there is a service-category specific maximum enrollee out-of-pocket amount, then the calculated MA-PD or MA cost for that category was compared to the service category specific maximum, and the lesser of the two was used as the OOPC. Note that the service-category cost-sharing, deductibles, and maximum out-of-pocket values are applied first to each category before applying the plan level deductibles and maximums.
12. If a plan indicates that there is a plan-level maximum enrollee out-of-pocket amount applicable for *all* PBP service categories, then the calculated MA-PD or MA cost for the overall plan was compared to the plan-level maximum, and the lesser of the two was used as the OOPC. This calculation was applied to Medicare-covered and/or

all benefits, as designated by the plan. If a separate maximum amount was indicated for Medicare-covered benefits, then this amount was compared to the total costs for Medicare-covered benefits, and the lesser of the two was used.

13. If a plan indicates that there is a plan-level maximum enrollee out-of-pocket amount, applicable for a *designated subset* of PBP service categories, then the calculated MA-PD or MA cost for the subset of PBP service categories was compared to the plan-level maximum, and the lesser of the two was used as the OOPC for the designated subset of PBP service categories. That is, if a plan covers Non-Medicare benefits and has a maximum out-of-pocket limit for a subset of these, then the maximum is applied to those costs and the lesser of the two used. For example, if a plan offers preventive and comprehensive dental (but not Additional Days or Non-Medicare-covered stays), then the Non-Medicare-covered maximum will be compared to these costs.
14. If a plan indicates that there is a plan-level deductible amount, then this deductible amount is used to reduce the total amount for services that is subject to cost sharing, and the deductible (or portion used) is included in the out-of-pocket costs calculated for each beneficiary. For example, if the plan-level deductible applies to two Medicare-covered categories such as Lab and DME, then the comparisons and calculations use the costs for these categories.
15. For Medicare Medical Savings Account Plans (MSA), assume the CMS annual contribution amount is used towards meeting the deductible, and then the remainder (if available) is applied to Medicare eligible expenses (non-covered inpatient or SNF care, dental, and/or prescription drugs). Cost shares for Medicare-covered services are zero once the deductible is met.
16. If a service/benefit is covered by Medicare (“allowed”), then it is included in the calculation. If a service/benefit is not covered by Medicare (“denied”), then it is excluded from the calculation.
17. If a plan is a Dual Eligible Special Needs Plan (SNP), these plans may be run through the model but the estimated OOPCs are not to be considered reliable.
18. MA plans with Medicare-defined benefits have calculations carried out identically as for the OM plan.

3.3.1 Service Category Specific Assumptions for Calculation of Out-of-Pocket Cost Estimates Inpatient Hospital

The calculation of the OOPC estimate for the Inpatient Hospital-Acute and Inpatient Psychiatric Hospital Service Category benefits were based on the following assumptions:

1. Each event in the MCBS Inpatient Event (IPE) file is considered one hospital stay. If a plan charges a deductible according to benefit period rather than annually, the benefit period begins with the first stay in a year; a second or subsequent benefit period is defined if 60 days has elapsed from the last day of the previous stay.
2. MCBS events with a source of “Survey only” are excluded from the analysis.
3. Inpatient Psychiatric Hospital stays were identified using the Provider Number on the claim.
4. Inpatient Psychiatric Hospital costs were calculated separately in the MA-PD or MA OOPC estimates.
5. The MCBS Total Expenditures are equal to the total charge for the hospital stay.
6. Total Days were calculated as the Discharge Date minus the Admission Date. If the dates are the same, then Total Days are equal to one.

7. The MCBS Utilization Days were defined as the covered days (1-90) during a benefit period and any MCBS lifetime reserve days used during that stay.
8. Medicare Covered Days were calculated as Utilization Days minus the Lifetime Reserve Days.
9. Additional Days were calculated as Total Days minus the Utilization Days.
10. If Utilization Days were greater than zero, then the stay was considered Medicare covered.
11. If Additional Days were equal to zero, then the entire stay was considered Medicare covered.
12. Lifetime reserve days were considered Medicare covered under OM, but were priced as Additional Days or Non-Covered Days under MA.
13. Plan Maximum Additional Days were covered by the plan (but not by Medicare) and designated as unlimited days or as a specified number of days.
14. If Utilization Days are equal to zero, then the entire stay was considered non-covered and the non-covered cost was equal to the Total cost.
15. Non-Covered Days are equal to Additional Days minus the Plan Maximum Additional Days.
16. Inpatient Acute and Inpatient Psychiatric hospital tiering are incorporated into the model whereby the cost-sharing for the lowest-cost tier as identified by the plan is used in the calculations.

The MA-PD or MA calculation of the OOPC estimate for the Inpatient Hospital Service Category benefits is defined according to the following algorithms:

1. If the Maximum Enrollee OOPC amount was designated for a period other than a per stay cost, then it was converted to an annual cost.
2. If the Maximum Enrollee OOPC amount was based on a per stay cost, then the annual out-of-pocket expenses were equal to the Maximum Enrollee OOPC multiplied by the Number of Stays (i.e., events).
3. For Medicare covered stays, the cost shares were calculated in the following manner:
 - The Co-pay per Stay amount was added to the total of the Co-pay per Day multiplied by the Number of Medicare covered Days; and/or
 - The Coinsurance Percent per Stay was multiplied by the Total Amount, and added to the total of the Coinsurance Percent per Day multiplied by the Amount per Day (equal to the Total Amount divided by the Total Number of Days), and then multiplied by the Number of Medicare Covered Days.
4. For Additional Days, the cost shares were calculated in the following manner:
 - The Number of Additional Days was multiplied by the Additional Days Co-pay per Day; and/or
 - The Number of Additional Days was multiplied by the Additional Days Coinsurance Percent per Day, which was then multiplied by the Amount per Day for Additional Days (the number of days must be less than or equal to the Number of Plan Maximum Additional Days).
 - The Co-pay per Day for Additional Days was multiplied by the Number of Additional Days; and/or
 - The Coinsurance Percent per Additional Days was multiplied by the Amount per Day and then multiplied by the Number of Additional Days.
5. For Non-Covered Stays, if the benefit is not Mandatory, the total cost was calculated in the following manner:
 - The Number of Excess Non-Covered Days was multiplied by the Amount per Day.

6. For Non-Covered Stays, if the benefit is Mandatory, the cost shares were calculated in the following manner:
 - The Co-pay per Stay, plus the Co-pay per Day was multiplied by the Number of Days; and/or
 - The Coinsurance Percent per Stay was multiplied by the Total Amount and added to the total of the Coinsurance Percent per Day multiplied by the Amount per Day and then multiplied by the Number of Days.
7. Out-of-pocket expenses are equal to the Total Non-Covered Costs (including deductible) plus the minimum of either:
 - The Total Cost calculated using the Per Stay Amount plus the Per Day Amount; or
 - The Maximum Enrollee OOPC.

Prescription Drugs

The calculation of the OOPC estimates for the Part D outpatient drug category is based on the following assumptions and procedures. Appendix B provides a listing of assumptions used in the calculations for the basic type of MA-PD and PDP drug plans.

1. Each event in the 2006 and 2007 MCBS PME (i.e., Drug) file was considered one drug prescription. For MCBS events linked to PDE data, use the NDC reported on the PDE claim. For MCBS events reported in the MCBS survey, drug prescriptions are adjusted using OACT-provided survey underreporting of drug prescription counts to estimate total drug usage in 2012.¹
2. Each MCBS prescription was mapped by its drug name to a National Drug Code (NDC). Then, using a 2013 NDC-RXCUI (RxNorm Concept Unique Identifier) crosswalk, the MCBS drugs were mapped to the 2013 Formulary Reference File (FRF). MCBS drugs that could not be mapped to an NDC associated with an 2013 FRF RXCUI code) were considered over-the-counter, non-prescription drugs and their costs were not included in OOPCs.
3. 2011 Prescription Drug Event (PDE) claims data were used to determine a representative average price for each prescription according to its 2013 FRF RXCUI code.
4. MCBS drugs were mapped to plan formularies via the 2013 RXCUIs and the benefit packages to obtain tiering and cost-sharing information. For MA-PD and PDP plans, the RXCUI code in the lowest cost-share tier was selected for each MCBS drug that was mapped to a plan's formulary.
5. The full cost of Part D-covered MCBS drugs not found on a plan's formulary was added to a plan's OOPC estimate.
6. Generic substitution information was utilized to replace brand prices and associated cost-sharing with those of their generic substitutes.
7. The applicable/non-applicable drug status of MCBS drugs at the RXCUI level was determined using Food and Drug Administration (FDA) drug approval information, for purposes of coverage gap cost-sharing estimates.

¹ The prescription utilization adjustment for 2006 and 2007 MCBS data includes an initial underreporting adjustment and subsequent adjustments for increased usage up to the estimate year of 2012. The 2006-2012 utilization adjustment is: 1.20; the 2007-2012 utilization adjustment is 1.16.

8. The cost-sharing (deductible and drug cost) for each beneficiary in any of the four Part D plan types (DS, BA, EA, AE) using PBP data was applied. Additional assumptions for MA-PD and PDP Plans:
 - Calculations were for a one-month supply of either an In-Network Pharmacy (INPh) or In-Network Preferred Pharmacy (INPPh).
 - Low-income cost sharing was not included in the calculations.
9. The Medicare Drug Plan Finder protocols for sorting drugs and assigning cost sharing at the various thresholds (deductible, initial coverage limit (ICL), catastrophic) were followed. This includes incorporating gap coverage and the legislated 2013 discount for brand drugs and standard benefit for brand and generic drugs in the gap.
10. For MA-Only (and OM plans), apply 2011 PDE average prices to MCBS prescription counts to calculate total non-covered drug cost.
11. Each beneficiary's out-of-pocket costs were estimated under OM, MA-Only, and each MA-PD or PDP plan in the PBP data.
12. Finally, costs were averaged across health group for each plan and the Part D premium (if applicable) for each plan was added.

Dental

The calculation of the OOPC estimate for the Dental Service Category benefits was based on the following assumptions.

1. Each event in the MCBS Dental Utilization Events (DUE) file was considered to be one visit.
2. All DUEs in this file were considered to be non-Medicare covered.
3. Each DUE is mapped to a PBP dental benefit, and the appropriate benefit cost share is applied:
 - Exam = Oral Exam;
 - Filling = Restorative;
 - Extraction and Root Canal = Endodontics;
 - Crown, Bridge, Ortho, and Other = Prosthodontics;
 - Cleaning = Cleaning; and
 - X-rays = X-rays.
4. If the plan offers dental benefits as a Mandatory benefit, then the PBP co-pay and coinsurance cost-share amounts were applied to the appropriate utilization.
5. If the plan's dental benefit was an Optional benefit, or if the plan did not offer a dental benefit (i.e., it is missing in the PBP data), then the total charge is equal to the Total Expenditures.
6. Preventive Dental benefits include oral exams, cleanings, and X-rays.
7. Comprehensive Dental benefits include restorative, endodontics, and prosthodontics.
8. If an event includes more than one Dental service, then the cost per service equals the Total Amount, divided by the number of services.
9. If a plan does not cover a particular Dental service (e.g., cleaning), then the cost of that service equals the calculated cost per service.
10. If the plan has a Maximum Enrollee Cost amount for Preventive Dental services, then the beneficiary cost equals the minimum of the sum of the non-Medicare covered costs or the Maximum Enrollee Cost Amount.
11. If there was no Maximum Enrollee Cost amount, then the beneficiary cost is equal to the sum of the Preventive and Comprehensive Dental costs.

Skilled Nursing Facility (SNF)

The calculation of the OOPC estimate for the SNF Service Category benefits was based on the following assumptions.

1. Each event in the MCBS Skilled Nursing Home Utilization file was considered one SNF stay.
2. MCBS events that have a source of "Survey only" were excluded from the analysis.
3. The MCBS Total Expenditures equal the total charge for the SNF stay.
4. Total Days were calculated as the Discharge Date minus the Admission Date. If the dates were the same, then Total Days equal one.
5. The MCBS Utilization Days were defined as covered days (1-100) during a benefit period.
6. Medicare covered Days were calculated as Utilization Days.
7. Additional Days were calculated as the Total Days minus the Utilization Days.
8. If Utilization Days were greater than zero, then the stay was considered Medicare covered.
9. If Additional Days were equal to zero, then the entire stay was considered Medicare covered.
10. Plan Maximum Additional Days are days that are covered by the Plan (but not by Medicare), and were designated by the plan as Unlimited Days or a plan specified number of days.
11. If Utilization Days equal zero, then the entire stay was considered non-covered and the non-covered cost equals the Total Cost.
12. Non-covered days equal Additional Days minus the number of Plan Maximum Additional Days.

The MA-PD or MA calculation of the OOPC estimate for the SNF Service Category benefits was defined according to the following algorithms:

1. If the Maximum Enrollee OOPC is not a per-stay cost, it was converted to an annual cost.
2. If the Maximum Enrollee OOPC is based on per stay, then the annual out-of-pocket expenses equal the Maximum Enrollee OOPC, multiplied by the Number of Stays.
3. For Medicare Covered Stays, if Utilization Days are greater than zero, then the cost shares were calculated in the following manner:
 - The Co-pay per Stay plus the Co-pay per Day was multiplied by the Number of Medicare covered Days; and/or
 - The Coinsurance Percent per Stay was multiplied by the Total Amount, and added to the total of the Coinsurance Percent per Day multiplied by the Amount per Day (equal to the Total Amount divided by the Total Number of Days), which was then multiplied by the Number of Medicare covered Days.
4. For Additional Days, the cost shares were calculated in the following manner:
 - The Number of Additional Days was multiplied by the Additional Days Co-pay per Day; and/or
 - The Number of Additional Days was multiplied by the Additional Days Coinsurance Percent per Day, and then multiplied by the Amount per Day.
5. For Additional Days, if Additional Days are less than or equal to the Number of Plan Maximum Additional Days, then the cost shares were calculated in the following manner:

- The Co-pay per Day for Additional Days was multiplied by the Number of Additional Days; and/or
 - The Coinsurance Percent per Additional Day was multiplied by the Amount per Day, and then multiplied by the Number of Additional Days.
6. For Non-Covered Stays, if the benefit is not Additional or Mandatory, then the total cost was calculated in the following manner:
 - The Number of Excess Non-Covered Days was multiplied by the Amount per Day.
 7. For Non-Covered Stays, if the benefit is Additional or Mandatory, then the cost shares were calculated in the following manner:
 - The Co-pay per Stay plus the Co-pay per Day was multiplied by the Number of Days; and/or
 - The Coinsurance Percent per Stay was multiplied by the Total Amount, and added to the total of the Coinsurance Percent per Day multiplied by the Amount per Day, and then multiplied by the Number of Days.
 8. Out-of-Pocket expenses equal Total Non-Covered Costs (including deductible), plus the minimum of either:
 - The total cost calculated using the per stay amount plus the per day amount; or
 - The Maximum Enrollee OOPC.

4. Utilization-to-Benefits Linking Approach

The conceptual approach to linking MCBS/MPE data to the services/benefits in the PBP was based on the understanding that the majority of MA-PD or MA organizations cost their benefits and services based on the Type of Service and/or the Place of Service. For the purpose of estimating OOPCs, this has been referred to as a “Day-Door Theory.” This theory assumes that all the benefits/services received by a beneficiary when he/she enters a “single door” (i.e., the facility or location where the services are provided) on a single day are bundled together for a single co-pay amount (e.g., an outpatient surgery that includes lab tests and X-rays would all be provided for a single co-pay amount).

The following steps represent the basic approach taken to link claims and/or line items in the Outpatient, DME, Home Health, and Physician/Supplier file to PBP services/benefits. This approach does not apply to Dental or Prescription Drug event files where the linking was self-contained to specific procedures or records. In the case of the Dental event file, procedure-based dental events were linked to PBP services/benefits directly. Prescription Drugs were also independent of the line item-to-PBP linking approach; it was assumed that there is one record per drug event.

The approach for linking utilization-to-PBP services/benefits includes the following steps:

1. All of the utilization files (Outpatient, Physician/Supplier, Home Health, and DME) were subset to include only the records for the beneficiaries in the MPF cohort.
2. The claims in the Outpatient file were subset based on the specifications provided below and assigned to each applicable PBP service/benefit.
 - All claims were assigned based on Bill Type code or Revenue Center code, depending upon prioritization (e.g., Bill Type code is equal to Ambulatory Surgical Center; Revenue Center code is equal to Emergency Room).
3. The line items in the DME file were subset based on the specifications provided below and assigned to each applicable PBP service/benefit.
 - All line items were assigned based on the BETOS code (e.g., BETOS code is equal to Hospital bed).
4. The line items in the Physician/Supplier file were subset based on the specifications provided below and assigned to each applicable PBP service/benefit.
 - All line items were assigned based on one or more BETOS codes, Physician Specialty Codes, Service Type, and/or Place of Service, depending upon prioritization (e.g., BETOS code is equal to Ambulance).
5. All other line items that occur on the same date were extracted.
6. The entire set of same day line items were reviewed to:
 - Identify and map line items to the specified Service Category (e.g., Ambulance);
 - Identify and map related line items that occurred on the same day and were bundled into the same service, but for which no separate MA-PD or MA cost will be calculated (e.g., Physician Specialty is equal to Ambulance Service Suppliers and BETOS code is equal to Local or Undefined Codes);
 - Identify and map line items to another PBP Service Category (e.g., all line items that fall within the admission and discharge dates for an Inpatient Hospital stay and where PLACE OF SERVICE code is equal to Inpatient Hospital will be bundled into the PBP 1a - Inpatient Hospital Service Category); and
 - Determine if any line items should be reclassified.
7. The mapping identification for each line item in the file was maintained.

8. The analysis by Service Category was repeated to map all possible line items. Line items were reclassified, as required.

4.1 PBP Service Categories to DME Line Item Mapping

The following PBP services/benefits were addressed as part of this analysis: Physician Specialist, Outpatient Labs, Outpatient X-Rays, Outpatient Hospital, Durable Medical Equipment (DME), Prosthetics/Orthotics, Medical/Surgical Supplies, Renal Dialysis, Part B Medicare-Covered Drugs, and Part B Chemotherapy Drugs. The mappings for these PBP services/benefits (the number in the parentheses identifies the PBP service category) to line items in the DME file are presented in this section.

Physician Specialist (7d)

All line items where the BETOS code is equal to “Specialist-Ophthalmology”, “Minor Procedures-Musculoskeletal,” “Minor Procedures-Other,” “Office visit – established,” “Office visits – new,” or “Consultations” were mapped to the Physician Specialist (7d) service category.

Outpatient Labs (8a)

All line items where the BETOS code is equal to “Lab tests – other (non-Medicare fee schedule)” were mapped to the Outpatient Labs (8a) service category.

Outpatient X-Rays (8b1) [Selected Services]

All line items where the BETOS code is equal to “Standard imaging - chest” or “Standard imaging – musculoskeletal” were mapped to the Outpatient X-Ray (8b1) service category.

Outpatient Hospital (9a)

All line items where the BETOS code is equal to “Hospital visit – initial” or “Hospital visit – subsequent” were mapped to the Outpatient Hospital (9a) service category.

Durable Medical Equipment (DME) (11a)

All line items where the BETOS code is equal to “Hospital Beds,” “Oxygen and Supplies,” “Wheelchairs,” “Other DME,” or “Enteral and Parental” were mapped to the Durable Medical Equipment (DME) (11a) service category.

Prosthetics/Orthotics (11b)

All line items where the BETOS code is equal to “Orthotic Devices” were mapped to the Prosthetics, and Orthotics (11b) service category.

Medical/Surgical Supplies (11b)

All line items where the BETOS code is equal to “Medical/surgical supplies,” “Oncology-other,” or “Lab tests – glucose” were mapped to the Medical/Surgical supplies (11b) service category.

Other line items where the BETOS code is equal to local codes and undefined codes and Other non-Medicare fee schedule were excluded from this analysis as these items could not be mapped into a specific PBP category/benefit.

Renal Dialysis (12)

All line items where the BETOS code is equal to “Dialysis Services” were mapped to the Renal Dialysis (12) service category.

Part B Medicare-Covered Drugs (15)

All line items where the BETOS code is equal to “Other Drugs” were mapped to the Part B Medicare-Covered Drugs (15) service category. The cost share for Medicare-covered Part B non-chemotherapy drugs was used.

Part B Chemotherapy Drugs (15)

All line items where the BETOS code is equal to “Chemotherapy Drugs” were mapped to the Drugs (15) service category. The cost share for Medicare-covered Chemotherapy drugs was used.

4.2 PBP Service Categories to Outpatient Claim Mapping

The following twenty-one PBP services/benefits were addressed as part of this analysis: Primary Care Physician (PCP), Renal Dialysis, Ambulatory Surgical Center (ASC), Emergency Care, Ambulance, Outpatient Hospital, Urgently Needed Care, Mental Health, Physical Therapy/Speech, Occupational Therapy (OT), Immunizations, Cardiac Rehabilitation, Therapeutic Radiation, Physician Specialist, Diagnostic Radiological Services, Diagnostic Tests/Procedures, Outpatient Labs, Hearing Exams, Pulmonary Rehabilitation, Diabetes Education, and Medical/Surgical Supplies. The mapping of claims in the Outpatient file to the PBP service/benefit categories is done according to a particular order of priority. The presentation of the categories below follows that order of priority.

Primary Care Physician (PCP) (7a)

All claims where the BILL TYPE code is equal to “Clinic-Rural” were mapped to the Primary Care Physician (PCP) (7a) service category.

Renal Dialysis (12)

All claims where the BILL TYPE code is equal to “Clinic ESRD-Hospital Based” were mapped to the Renal Dialysis (12) service category.

Ambulatory Surgical Center (ASC) (9b)

All claims where the BILL TYPE code is equal to “Special Facility Hospital Outpatient (ASC)” or “Critical Access Hospital” were mapped to the Ambulatory Surgical Center (ASC) (9b) service category.

Emergency Care (4a)

All previously unmapped outpatient claims where at least one REVENUE CENTER code on the claim is equal to “Emergency Room” were mapped to the Emergency Care (4a) service category.

Ambulance (10a)

All previously unmapped outpatient claims where at least one REVENUE CENTER code on the claim is equal to “Ambulance” were mapped to the Ambulance (10a) service category.

Renal Dialysis (12)

All previously unmapped outpatient claims where at least one REVENUE CENTER code on the claim is equal to “Lab-Non-Routine Dialysis” or “Hemodialysis” were mapped to the Renal Dialysis (12) service category.

Outpatient Hospital (9a)

All previously unmapped outpatient claims where at least one REVENUE CENTER code on the claim is equal to “Operating Room Services – General Classification,” “Operating Room Services – Minor Surgery,” or “Operating Room Services – Other Operating Room Services” were mapped to the Outpatient Hospital (9a) service category.

Urgently Needed Care (4b)

All previously unmapped outpatient claims where at least one REVENUE CENTER code on the claim is equal to “Clinic-Urgent Care Clinic” were mapped to the Urgently Needed Care (4b) service category.

Mental Health (7e)

All previously unmapped outpatient claims where at least one REVENUE CENTER code on the claim is equal to “Clinic-Psychiatric,” “Medical Social Services,” “Psychiatric/Psychological Treatments,” or “Psychiatric/Psychological Services” were mapped to the Mental Health (7e) service category.

Physical Therapy/Speech (7i)

All previously unmapped outpatient claims where at least one REVENUE CENTER code on the claim is equal to “Physical Therapy” or “Speech Language Pathology” were mapped to the Physical Therapy/Speech (7i) service category.

Occupational Therapy (OT) (7c)

All previously unmapped outpatient claims where at least one REVENUE CENTER code on the claim is equal to “Occupational Therapy” were mapped to the Occupational Therapy (7c) service category.

Immunizations (14b) - Flu Shot

All previously unmapped outpatient claims where at least one REVENUE CENTER code on the claim is equal to “Preventative care services-Vaccine Administration,” or “Drugs requiring specific identification-detailed coding” were mapped to the Immunizations (14b) - Flu Shot service category. These items are assumed to be for influenza vaccinations; however, there is no cost allowed for the influenza vaccine.

Cardiac Rehabilitation (3)

All previously unmapped outpatient claims where at least one REVENUE CENTER code on the claim is equal to “Other Therapeutic Services-Cardiac Rehabilitation” were mapped to the Cardiac Rehab (3) service category.

Therapeutic Radiation (8b2)

All previously unmapped outpatient claims where at least one REVENUE CENTER code on the claim is equal to “Radiology-Therapeutic” or “Nuclear Medicine-Therapeutic” were mapped to the Therapeutic Radiation (8b2) service category.

Physician Specialist (7d)

All previously unmapped outpatient claims where at least one REVENUE CENTER code on the claim is equal to “Oncology” were mapped to the Physician Specialist (7d) service category.

Diagnostic Radiological Services (8b3) [selected services]

All previously unmapped outpatient claims where at least one REVENUE CENTER code on the claim is equal to “CT scan,” “MRT/MRI,” “MRT,” “MRT/MRA,” “PET,” or “Nuclear Medicine” were mapped to the Diagnostic Radiological Services (8b3) service category.

Ambulatory Surgical Center (ASC) (9b)

All previously unmapped outpatient claims where at least one REVENUE CENTER code on the claim is equal to “Ambulatory surgical care” were mapped to the Ambulatory Surgical Center (ASC) (9b) service category.

Outpatient Hospital (9a)

All previously unmapped outpatient claims where at least one REVENUE CENTER code on the claim is equal to “Gastro-Intestinal (GI) Services,” “Cardiology—Cardiac Cath, Lab,” or “Lithotripsy” were mapped to the Outpatient Hospital (9a) service category.

Diagnostic Tests/Procedures (8a) [selected services]

All previously unmapped outpatient claims where at least one REVENUE CENTER code on the claim is equal to “Cardiology” were mapped to the Clinical/Diagnostic Tests/Procedures (8a) service category.

Diagnostic Radiological Services (8b1) [selected services]

All previously unmapped outpatient claims where at least one REVENUE CENTER code on the claim is equal to “Radiology Diagnostic” or “Other Imaging Services” were mapped to the Diagnostic Radiological Services (8b1) service category.

Outpatient Labs (8a)

All previously unmapped outpatient claims where at least one REVENUE CENTER code on the claim is equal to “Laboratory” were mapped to the Outpatient Labs (8a) service category.

Diagnostic Tests/Procedures (8a) [selected services]

All previously unmapped outpatient claims where at least one REVENUE CENTER code on the claim is equal to “EKG/ECG” or “EEG” were mapped to the Clinical/Diagnostic Tests/Procedures (8a) service category.

Hearing Exams (18a)

All previously unmapped outpatient claims where at least one REVENUE CENTER code on the claim is equal to “Audiology” were mapped to the Hearing Exams (18a) service category.

Primary Care Physician (PCP) (7a)

All previously unmapped outpatient claims where at least one REVENUE CENTER code on the claim is equal to “Clinic,” “Professional Fees,” “Preventative Care Services—General,” or “Treatment or Observation Room,” or “Free-standing clinic” were mapped to the Primary Care Physician (PCP) (7a) service category.

Diagnostic Tests/Procedures (8a) [selected services]

All previously unmapped outpatient claims where at least one REVENUE CENTER code on the claim is equal to “Respiratory Services” were mapped to the Diagnostic Tests/Procedures (8a) service category.

Therapeutic Radiation (8b2)

All previously unmapped outpatient claims where at least one REVENUE CENTER code on the claim is equal to “Other Therapeutic Services” were mapped to the Therapeutic Radiation (8b2) service category.

Pulmonary Rehab (3)

All previously unmapped outpatient claims where at least one REVENUE CENTER code on the claim is equal to “Pulmonary function-general classification,” or “Pulmonary function-other” were mapped to the Pulmonary Rehab (3) service category.

Diabetes Education (14e)

All previously unmapped outpatient claims where at least one REVENUE CENTER code on the claim is equal to “Other Therapeutic Services-Education/Training” were mapped to the Diabetes Education (14e) service category.

Diagnostic Tests/Procedures (8a) [selected services]

All previously unmapped outpatient claims where at least one REVENUE CENTER code on the claim is equal to “Other Therapeutic Services – Education/Training” were mapped to the Diagnostic Tests/Procedures (8a) service category.

Medical/Surgical Supplies (11b)

All previously unmapped outpatient claims where at least one REVENUE CENTER code on the claim is equal to “Medical/surgical supplies” were mapped to the Medical/surgical supplies (11b) service category.

The remaining claims in the file, comprising less than 1% of the total outpatient claims for the cohort, were excluded from the analysis.

4.3 PBP Service Categories to Physician/Supplier Line Item Mapping

The following PBP services/benefits were addressed as part of this analysis: Inpatient Hospital (Acute) and Inpatient Psychiatric Hospital, Skilled Nursing Facility (SNF), Emergency Care, Urgently Needed Care, Primary Care Physician (PCP), Chiropractic, Occupational Therapy (OT), Physician Specialist, Mental Health, Podiatry, Other Healthcare Professionals, Psychiatry, Physical Therapy (PT)/Speech Therapy, Diagnostic Procedures/Tests, Outpatient Labs, Diagnostic Radiological Services, Therapeutic Radiological Services, Outpatient X-rays, Outpatient Hospital, Ambulatory Surgical Center (ASC), Ambulance, Durable Medical Equipment (DME), Medical/Surgical Supplies, Renal Dialysis, Immunizations, Chemotherapy, Part B Medicare-Covered Drugs, Comprehensive Dental, Eye Exams, and Hearing Exams. All other PBP services/benefits not listed were not addressed as part of this analysis.

The methodology for linking Inpatient Hospital and SNF events to line items in the Physician/Supplier file is based on matching the line item last expense date with the Inpatient/SNF Admission and Discharge dates. These benefits/services were considered part of the Inpatient stay, and thus did not generate a separate cost.

The methodology for linking Outpatient services/benefits to line items in the Physician/Supplier file includes selecting all related line items for Outpatient claims mapped to each designated PBP category; that is, line items that occurred on the same day as the Outpatient bill and are related to the service/benefit. These line items were bundled under the designated Outpatient service/benefit.

For the remaining line items that do not link to Inpatient Hospital, SNF, or Outpatient claims, the mapping methodology for these PBP services/benefits to line items in the Physician Supplier file is implemented in a particular order of priority. This section summarizes the mapping by PBP category.

Inpatient Hospital - Acute (1a) and Inpatient Psychiatric Hospital (1b)

1. All line items where the Date of the Service is on or within the Inpatient event Admission and Discharge dates that match psychiatric records if provider is Psychiatric Hospital or the PLACE OF SERVICE code is equal to "Inpatient Psychiatric Facility" or "Inpatient Comprehensive Rehab Facility" were bundled under Inpatient Psychiatric Hospital.
2. All line items where the Date of the Service is on or within the Inpatient event Admission and Discharge dates that match inpatient records if provider is NOT Psychiatric Hospital or the PLACE OF SERVICE code is equal to "Inpatient Hospital" or "ER-Hospital" were bundled under Inpatient Hospital - Acute.

Skilled Nursing Facility (SNF) (2)

1. All line items where the Date of the Service is on or within the SNF event Admission and Discharge dates and the PLACE OF SERVICE code is equal to "Inpatient Hospital," "ER-hospital," "Nursing Facility" or "SNF," or the BETOS code is equal to "Nursing Home Visit" were bundled under the SNF category.

Emergency Care (4a)

1. All line items that occurred on the same day as an Outpatient ER visit, where the BETOS code is equal to “ER - visit,” or the PLACE OF SERVICE is equal to “Inpatient Hospital,” “Outpatient Hospital,” or “ER,” were bundled under Emergency Care.

Urgently Needed Care (4b)

1. All line items that occurred on the same day as an Outpatient Urgent Care visit were bundled under the Urgently Needed Care visit.

Primary Care Physician (PCP) (7a)

1. All line items that occurred on the same day as an Outpatient Clinic (independent or rural health) visit, excluding the “Billing Clinical Laboratory” were bundled under the PCP category.
2. All line items that occurred on the same day as an Outpatient Clinic (pediatric, treatment, preventative, or professional) visit, where the PLACE OF SERVICE is equal to “Inpatient Hospital,” “Outpatient Hospital,” “ER,” “ASC,” “Birthing Center,” “Military Treatment Facility,” “Nursing Facility,” or “Other Unlisted Facility” and where the PHYSICIAN SPECIALTY code is NOT equal to the “Independent Billing Clinical Laboratory” were bundled under the Primary Care Physician (PCP) category.
3. **a)** All line items where the BETOS code is equal to “Office Visit” (e.g., new or established) or “Consultations,” and where the PHYSICIAN SPECIALTY code is equal to “General Practice,” “Family Practice,” “Internal Medicine,” or “Public Health or Welfare” were mapped as a PCP office visit.
b) All other line items that occurred on the same day (i.e., related items) for a PCP were bundled under the PCP office visit.
4. **a)** All previously unmapped line items where the BETOS code is equal to “Hospital Visit,” “Nursing Home or Home Visit,” or “ER Visit,” and where the PHYSICIAN SPECIALTY code is equal to “PCP” were mapped as PCP office visit.
b) All other line items that occurred on the same day (i.e., related items) for a PCP office visit were bundled under the PCP visit.
5. **a)** All previously unmapped line items where the BETOS code is equal to “Major Procedures,” “Minor Procedures,” “Ambulatory Procedures,” “Eye Procedures,” “Endoscopy,” or “Specialist,” and where the PHYSICIAN SPECIALTY code is equal to “PCP” were mapped as a PCP office visit.
b) All other line items that occurred on the same day (i.e., related items) for a PCP were bundled under the PCP office visit.
6. All previously unmapped line items where the BETOS code is equal to “Other - Medicare Fee Schedule,” “Other - Non-Medicare Fee Schedule,” “Local Codes,” or “Undefined Codes,” and where the PHYSICIAN SPECIALTY code is equal to “PCP” (specified above) or “Public Health or Welfare Agencies” were mapped as a PCP office visit.
7. All line items where the BETOS code is equal to “Anesthesia,” and the PHYSICIAN SPECIALTY code is equal to PCP (specified above), were bundled under the PCP office visit.
8. All previously unmapped line items where the BETOS code is equal to “Office Visit” or “Consultations” and where the PHYSICIAN SPECIALTY code is equal to “Diag Lab (GPPP)” or “Diag X-ray” were mapped as a PCP office visit.
9. All line items where the PHYSICIAN SPECIALTY code is equal to “Nurse Practitioner” or “Internal Medicine” were mapped as a PCP office visit.

Chiropractic (7b)

1. All line items where the PHYSICIAN SPECIALTY code is equal to “Chiropractic” were mapped as a Chiropractic visit.
2. All other line items that occurred on the same day (i.e., related items) for Chiropractic were bundled under the Chiropractic visit.

Occupational Therapy (OT) (7c)

1. All line items where the PHYSICIAN SPECIALTY code is equal to “Occupational Therapist” or “Occupational Therapy (GPPP)” were mapped as an Occupational Therapy visit.
2. All other line items that occurred on the same day (i.e., related items) for an Occupational Therapist were bundled under Occupational Therapy.

Physician Specialist (7d)

1. All line items that occurred on the same day as an Outpatient Specialist visit, and the PLACE OF SERVICE is equal to “Inpatient Hospital,” “Outpatient Hospital,” “ER,” “ASC,” “Birthing Center,” “Military Treatment Facility,” “Nursing Facility,” or “Other Unlisted Facility,” were bundled under the Physician Specialist visit.
2. **a)** All line items where the BETOS code is equal to “Office Visit” (e.g., new or established) or “Consultations,” and where the PHYSICIAN SPECIALTY code is equal to “Specialist,” “Critical Care (Intensivists),” “Addiction Medicine,” or “Rheumatology,” were mapped as a Physician Specialist office visit.
b) All other line items that occurred on the same day (i.e., related items) for a Specialist were bundled under the Physician Specialist office visit.
3. **a)** All previously unmapped line items where the BETOS code is equal to “Hospital Visit,” “Nursing Home or Home Visit,” or “ER Visit,” and where the PHYSICIAN SPECIALTY code is equal to “Specialist” (Rheumatology), were mapped as a Physician Specialist office visit.
b) All other line items that occurred on the same day (i.e., related items) for a Specialist were bundled under the Physician Specialist office visit.
4. **a)** All previously unmapped line items where the BETOS code is equal to “Major Procedures,” “Minor Procedures,” “Ambulatory Procedures,” “Endoscopy,” “Eye Procedures,” or “Specialist,” and where the PHYSICIAN SPECIALTY code is equal to “Specialist” (“Rheumatology,” “Critical Care (intensive),” “Addiction Medicine,” “Certified Registered Nurse Anesthetist (CRNA)”), were mapped as a Physician Specialist office visit.
b) All other line items that occurred on the same day (i.e., related items) for a Specialist were bundled under the Physician Specialist office visit.
5. All previously unmapped line items where the BETOS code is equal to “Oncology – Other” and PLACE is equal to “Office” and TYPE OF SERVICE is NOT equal to “Therapeutic Radiology” were mapped as a Physician Specialist office visit.
6. All previously unmapped line items where the BETOS code is equal to “Other - Medicare Fee Schedule,” “Other - Non-Medicare Fee Schedule,” “Local Codes,” or “Undefined Codes,” and where the PHYSICIAN SPECIALTY code is equal to “Specialist” (“Rheumatology,” “Critical Care (intensivists),” “Certified Registered Nurse Anesthetist (CRNA)”), were mapped as a Physician Specialist office visit.
7. All line items where the BETOS code is equal to “Anesthesia” and the PHYSICIAN SPECIALTY code is equal to “Specialist” were bundled under Physician Specialist.

8. All previously unmapped line items where the BETOS code is equal to “Chiropractic” and where the PHYSICIAN SPECIALTY code is equal to “Specialist” were mapped as a Physician Specialist office visit.
9. All line items where the PHYSICIAN SPECIALTY code is equal to “Anesthesiology” or “Neuro-surgery” were mapped as a Physician Specialist office visit.
10. All line items where the PHYSICIAN SPECIALTY code is “Otolaryngology,” “Cardiology,” “Nuclear Medicine,” “Nephrology,” “Cardiac Surgery,” “Hematology/Oncology,” or “Medical Oncology” were mapped as a Physician Specialist office visit.

Mental Health (7e)

1. All line items that occurred on the same day as an Outpatient Mental Health visit, where the PHYSICIAN SPECIALTY code is equal to “Psychiatry,” “Psychiatry Neurology,” “Psychologist,” “Clinical Psychologist,” “Psycho-Therapist,” or “Licensed Clinical Social Worker” are bundled under the Outpatient Mental health visit.
2. All previously unmapped line items where the PHYSICIAN SPECIALTY code is equal to “Psychologist (billing independently),” “Clinical Psychologist,” or “Licensed Clinical Social Worker” were mapped as a Mental Health visit.
3. All other line items that occurred on the same day (i.e., related items) for Psychologist were bundled under the Mental Health visit.

Podiatry (7f)

1. **a)** All line items where the BETOS code is equal to “Office Visit” (e.g., new or established), “Consultations,” or “Nursing Home or Home Visit,” and where the PHYSICIAN SPECIALTY code is equal to “Podiatry,” were mapped as a Podiatry office visit.
b) All other line items that occurred on the same day (i.e., related items) for Podiatry were bundled under the Podiatry office visit.
2. **a)** All previously unmapped line items where the BETOS code is equal to “Major Procedures,” “Minor Procedures,” “Ambulatory Procedures,” “Endoscopy,” or “Specialist,” and where the PHYSICIAN SPECIALTY code is equal to “Podiatry,” were mapped as a Podiatry office visit.
b) All other line items that occurred on the same day (i.e., related items) for Podiatry were bundled under the Podiatry office visit.
3. All previously unmapped line items where the BETOS code is equal to “Other - Medicare Fee Schedule,” “Other - Non-Medicare Fee Schedule,” “Local Codes,” or “Undefined Codes,” and where the PHYSICIAN SPECIALTY code is equal to “Podiatry,” were mapped as a Podiatry office visit.
4. All previously unmapped line items where the BETOS code is equal to “Hospital Visit-initial,” and where the PHYSICIAN SPECIALTY code is equal to “Podiatry,” were mapped as a Podiatry office visit.

Other Healthcare Professionals (7g)

1. **a)** All line items where the BETOS code is equal to “Office Visit” (e.g., new or established) or “Consultations,” and where the PHYSICIAN SPECIALTY code is equal to “Certified Nurse Midwife,” “Certified Registered Nurse Anesthetist (CRNA),” “Anesthesia Assistant,” “Nurse Practitioner,” “Certified Clinical Nurse Specialist,” “Preventive Medicine,” or “Physician Assistant,” were mapped as an Other Healthcare Professionals office visit.
b) All other line items that occurred on the same day (i.e., related items) for these

- Physicians were bundled under the Other Healthcare Professionals office visit.
2. **a)** All previously unmapped line items where the BETOS code is equal to “Hospital Visit,” “Nursing Home or Home Visit,” or “ER Visit,” and where the PHYSICIAN SPECIALTY code is equal to “Nurse Practitioner,” “Critical Care (intensivist),” “Preventive Medicine,” “Certified Clinical Nurse Specialist,” “Physician Assistant” were mapped as an Other Healthcare Professionals office visit.
b) All other line items that occurred on the same day (i.e., related items) for Other Healthcare Professionals were bundled under the Other Healthcare Professionals office visit.
 3. **a)** All previously unmapped line items where the BETOS code is equal to “Major Procedures,” “Minor Procedures,” “Ambulatory Procedures,” “Endoscopy,” “Eye Procedures,” or “Specialist,” and where the PHYSICIAN SPECIALTY code is equal to “Other Healthcare Professionals” (specified above), were mapped as an Other Healthcare Professionals office visit.
b) All other line items that occurred on the same day (i.e., related items) for Other Healthcare Professionals were bundled under Other Healthcare Professionals office visit.
 4. All previously unmapped line items where the BETOS code is equal to “Other - Medicare Fee Schedule,” “Other - Non-Medicare Fee Schedule,” “Local Codes,” or “Undefined Codes,” and where the PHYSICIAN SPECIALTY code is equal to “All Other, e.g. Drug and Department Stores,” “Physician Assistant,” or “Nurse Practitioner” were mapped as an Other Healthcare Professionals office visit.
 5. All line items where the BETOS code is equal to “Anesthesia” and the PHYSICIAN SPECIALTY code is equal to “Certified Registered Nurse Anesthetist (CRNA)” were bundled under Other Healthcare Professionals office visit.
 6. All line items where the BETOS code is equal to “Specialist” and the PHYSICIAN SPECIALTY is equal to “Certified Clinical Nurse Specialist” were mapped as the Other Healthcare Professionals.

Psychiatry (7h)

1. **a)** All line items where the BETOS code is equal to “Office Visit” (e.g., new or established) or “Consultations,” and where the PHYSICIAN SPECIALTY code is equal to “Psychiatry,” “Psychiatry, Neurology,” or “Neuropsychiatry,” were mapped as a Psychiatry office visit.
b) All other line items that occurred on the same day (i.e., related items) for a Psychiatrist were bundled under the Psychiatry office visit.
2. **a)** All previously unmapped line items where the BETOS code is equal to “Hospital Visit,” “Nursing Home or Home Visit,” or “ER Visit,” and where the PHYSICIAN SPECIALTY code is equal to “Psychiatry” or “Psychiatry, Neurology” were mapped as a Psychiatry office visit.
b) All other line items that occurred on the same day (i.e., related items) for a Psychiatrist were bundled under the Psychiatry office visit.
3. **a)** All previously unmapped line items where the BETOS code is equal to “Major Procedures,” “Minor Procedures,” “Ambulatory Procedures,” or “Specialist” and where the PHYSICIAN SPECIALTY code is equal to “Psychiatry” (specified above), were mapped as a Psychiatry office visit.
b) All other line items that occurred on the same day (i.e., related items) for a Psychiatrist were bundled under the Psychiatry office visit.
4. **a)** All previously unmapped line items where the BETOS code is equal to “Other - Medicare Fee Schedule,” “Other - Non-Medicare Fee Schedule,” “Local Codes,” or “Undefined Codes,” and where the PHYSICIAN SPECIALTY code is equal to

“Psychiatry,” “Psychiatry, Neurology,” or “Neuro-psychiatry” were mapped as a Psychiatry office visit.

b) All other line items that occurred on the same day (i.e., related items) for Psychiatry were bundled under the Psychiatry visit.

5. All line items where the BETOS code is equal to “Other Medicare fee schedule,” “Other non-Medicare fee schedule,” “Local Code,” “Undefined Codes,” and where the PHYSICIAN SPECIALTY code is equal to “Psychiatry,” “Psychiatry, Neurology,” “Neuro-psychiatry” were mapped as a Psychiatry visit.

Physical Therapy (PT)/Speech Therapy (7i)

1. **a)** All line items where the PHYSICIAN SPECIALTY code is equal to “Practicing Physical Therapist” or “Physiotherapy, GPPP” were mapped as a Physical Therapy visit.

b) All other line items that occurred on the same day (i.e., related items) for this Physical Therapy (PT) were bundled under the Physical Therapy visit.

2. **a)** All previously unmapped line items where the BETOS code is equal to “Major Procedures,” “Minor Procedures,” “Ambulatory Procedures,” “Endoscopy,” “Eye Procedures,” or “Specialist,” and the PHYSICIAN SPECIALTY code is equal to “Independent Physiological Laboratory,” were mapped as a Physical Therapy visit.

b) All other line items that occurred on the same day for this Physical Therapy were bundled under the Physical Therapy visit.

3. All previously unmapped line items where the BETOS code is equal to “Other - Medicare Fee Schedule,” “Other - Non-Medicare Fee schedule,” “Local codes,” or “Undefined codes,” and where the PHYSICIAN SPECIALTY code is equal to “Independent Physiological Laboratory,” were mapped as a Physical Therapy visit.

Diagnostic Procedures/Tests (8a)

1. All previously unmapped line items where the PHYSICIAN SPECIALTY code is equal to “Independent Diagnostic Testing Facility” and the BETOS code is equal to “Major Procedure-cardio”, “Minor Procedure”, “Ambulatory procedure”, or “Local codes” were mapped as a Diagnostic Procedures/Tests.

2. All line items where the BETOS code is equal to “Specialist” and the SERVICE TYPE is equal to “Diagnostic Laboratory” were mapped as a Diagnostic Procedures/Tests.

3. All line items where the BETOS code is equal to “Minor Procedures” and the PLACE OF SERVICE is equal to “Office” and the PHYSICIAN SPECIALTY code is equal to “Diagnostic Laboratory, GPPP” and the SERVICE TYPE is equal to “Diagnostic Laboratory” were mapped as a Diagnostic Procedures/Tests.

4. All line items where the BETOS code is equal to “Initial Hospital Visit” were mapped as a Diagnostic Procedures/Tests.

Outpatient Labs (8a)

1. All line items that occurred on the same day as an Outpatient lab service, and the PLACE OF SERVICE is equal to “Inpatient Hospital,” “Outpatient Hospital,” “ER,” “ASC,” “Birthing Center,” “Military Treatment Facility,” “Nursing Facility,” or “Other Unlisted Facility” were bundled under the Outpatient lab service.

2. All previously unmapped line items where the PHYSICIAN SPECIALTY code is equal to “Clinical Lab (Billing Independently)” were mapped as a Lab service.

3. All previously unmapped line items where the BETOS code is equal to “Lab Tests” or “Other Tests” were mapped as an Outpatient lab service.

4. All previously unmapped line items where the BETOS code is equal to “Local codes” or “Specialist,” and the SERVICE TYPE is equal to “Diagnostic Laboratory,” were mapped as a Lab service.
5. All line items where the SERVICE TYPE is equal to “Diagnostic Laboratory” were mapped as an Outpatient Labs service.

Diagnostic Radiological Services (8b1) [selected services]

1. All line items that occurred on the same day as an Outpatient complicated X-ray visit, where the BETOS code is equal to “Standard Imaging,” “Advanced Imaging,” “Echography,” or “Imaging/Procedure,” and the PLACE OF SERVICE is equal to “Inpatient Hospital,” “Outpatient Hospital,” “ER,” “ASC,” “Birthing Center,” “Military Treatment Facility,” “Nursing Facility,” or “Other Unlisted Facility,” were bundled under the Diagnostic Radiological Services visit.
2. All previously unmapped line items where the BETOS code is equal to “Advanced Imaging” and where the PHYSICIAN SPECIALTY code is equal to “Diagnostic Radiology” and where the SERVICE TYPE is “Diagnostic Radiology” were mapped as a Diagnostic Radiological Services visit. The maximum cost share will be applied to these services.
3. All line items where the BETOS code is equal to “Ambulatory Procedures” or “Minor Procedures” and where the PLACE OF SERVICE is “Office”, the “PHYSICIAN SPECIALTY code is equal to “Diagnostic X-ray, GPPP”, and the “SERVICE TYPE is “X-ray” were mapped as Diagnostic Radiological Services.
4. All line items where the SERVICE TYPE is equal to “Diagnostic radiology” were mapped as Diagnostic Radiological Services.

Therapeutic Radiological Services (8b2)

1. All line items that occurred on the same day as an Outpatient Radiation Therapy visit, where the BETOS code is equal to “Oncology,” were bundled under the Outpatient Therapeutic Radiation visit.
2. All previously unmapped line items where the BETOS code is equal to “Oncology” were mapped as a Therapeutic Radiation visit.
3. All line items where the BETOS code is equal to “Oncology Radiation Therapy” were mapped as a Therapeutic Radiation visit.

Outpatient X-rays (8b3) [selected services]

1. All line items that occurred on the same where the BETOS code is equal to “Imaging,” and the PLACE OF SERVICE is equal to “Inpatient Hospital,” “Outpatient Hospital,” “ER,” “ASC,” “Birthing Center,” “Military Treatment Facility,” “Nursing Facility,” or “Other Unlisted Facility” were bundled under the Outpatient X-ray visit.
2. All previously unmapped line items where the PHYSICIAN SPECIALTY code is equal to “Portable X-ray Supplier” were mapped as an Outpatient X-ray visit.
3. All previously unmapped line items where the BETOS code is equal to “Standard imaging,” “Echography,” “Advanced Imaging,” or “Imaging/Procedure” were mapped as an Outpatient X-ray visit.
4. All previously unmapped line items where the BETOS code is equal to “Standard imaging,” “Echography,” “Advanced Imaging,” or “Imaging/Procedure” and PLACE OF SERVICE is equal to “inpatient Hospital,” “Out-patient Hospital,” “ER,” “ASC,” “Birthing Center,” “Military Treat,” “Nursing Facility,” “Other Unlisted Facility” were mapped as an Outpatient X-ray visit.

5. All previously unmapped line items where the PHYSICIAN SPECIALTY code is equal to “Diagnostic X-ray” were mapped as an Outpatient X-ray visit.

Outpatient Hospital (9a)

1. All line items that occurred on the same day as an Outpatient Hospital visit, and where the PLACE OF SERVICE is equal to “Inpatient Hospital,” “Outpatient Hospital,” “ER,” “ASC,” “Birthing Center,” “Military Treatment Facility,” “Nursing Facility,” or “Other Unlisted Facility,” were bundled under the Outpatient Hospital visit.
2. All previously unmapped line items where the BETOS code is equal to “Oncology-Other” and PLACE OF SERVICE is equal to “Outpatient Hospital” and TYPE OF SERVICE is equal to “Surgery” were mapped as an Outpatient Hospital service.
3. All previously unmapped line items where the BETOS code is equal to “Anesthesia” and the PLACE OF SERVICE is equal to “Outpatient Hospital” were bundled under Outpatient Hospital service.

Ambulatory Surgical Center (ASC) (9b)

1. All line items that occurred on the same day as an Outpatient ASC visit, excluding those where the BETOS code is equal to “Office Visit” or “Consultation” with PLACE OF SERVICE equal to “Office,” were bundled under the ASC visit.
 - a) All line items where the BETOS code is equal to “Major Procedures,” “Minor Procedures,” “Ambulatory Procedures,” “Endoscopy,” “Eye Procedure,” or “Specialist,” and where the PHYSICIAN SPECIALTY code is equal to “Ambulatory Surgical Center,” were mapped as an Ambulatory Surgical Center (ASC) visit.
 - b) All other line items that occurred on the same day (i.e., related items) as the ASC visit were bundled under the ASC visit.
2. All line items where the BETOS code is equal to “Anesthesia” were mapped as an Ambulatory Surgical Center (ASC) visit.

Ambulance (10a)

1. All line items that occurred on the same day as an Outpatient ambulance service, where the PHYSICIAN SPECIALTY code is equal to “Ambulance Server Supplier,” or the PLACE OF SERVICE code is equal to “Ambulance-Land” or “Ambulance-Air or Water,” or the SERVICE TYPE code is equal to “Ambulance,” were bundled under the Outpatient Ambulance service.
2. All previously unmapped line items where the PHYSICIAN SPECIALTY code is equal to “Ambulance Server Supplier,” or the PLACE OF SERVICE code is equal to “Ambulance-Land” or “Ambulance-Air or Water,” or the SERVICE TYPE code is equal to “Ambulance,” were mapped as an Ambulance service.

Durable Medical Equipment (DME) (11a)

1. All line items where the BETOS code is equal to “Medical/Surgical Supplies,” “Hospital Beds,” “Oxygen and Supplies,” “Wheelchairs,” “Other DME,” or “Orthotic Devices” were mapped as a Durable Medical Equipment (DME) benefit.

Medical/Surgical Supplies (11b)

1. All line items where the BETOS code is equal to “Medical/Surgical Supplies” were mapped as a Medical supplies benefit.

Renal Dialysis (12)

1. All line items that occurred on the same day as an Outpatient Dialysis visit, where the BETOS code is equal to “Dialysis services,” were bundled under Renal Dialysis service.
2. All previously unmapped line items where the BETOS code is equal to “Dialysis Services” were mapped as a Renal Dialysis service.

Immunizations (14a)

Influenza

1. Medicare policy is that the co-pay for influenza immunizations is equal to \$0.
2. All line items where the BETOS code is equal to “Immunizations/Vaccinations” were mapped to the Immunizations (14a) service category.

Pneumococcal

1. Medicare Policy is that the co-pay for pneumococcal immunizations is equal to \$0.
2. All line items where the SERVICE TYPE code is equal to “Vaccine” were mapped to the Immunizations (14a) service category.

Chemotherapy (15)

1. **a)** All line items where the BETOS code is equal to “Chemotherapy” were mapped as Chemotherapy.
b) All other line items that occurred on the same day (i.e., related items) for Chemotherapy were bundled under Chemotherapy.

Part B Medicare-Covered Drugs (15)

1. **a)** All previously unmapped line items where the BETOS code is equal to “Other drugs,” were mapped as a Part B Medicare-covered Drugs benefit.
b) All other line items that occurred on the same day (i.e., related items) for Other drugs were bundled under the Part B Medicare-Covered Drugs category.

Comprehensive Dental (16b)

1. **a)** All line items where the BETOS code is equal to “Office Visit” (e.g., new or established) or “Consultations,” and where the PHYSICIAN SPECIALTY code is equal to “Oral Surgery (Dentists Only),” were mapped as a Dental office visit.
b) All other line items that occurred on the same day (i.e., related items) for Oral Surgery (Dentists Only) were bundled under the Dental office visit.
2. **a)** All previously unmapped line items where the BETOS code is equal to “Major Procedures,” “Minor Procedures,” “Ambulatory Procedures,” “Endoscopy,” or “Specialist” and where the PHYSICIAN SPECIALTY code is equal to “Oral Surgery (Dentist only)” were mapped as a Dental office visit.
b) All other line items that occurred on the same day (i.e., related items) for Oral Surgery (Dentists Only) were bundled under the Dental office visit.
3. All previously unmapped line items where the BETOS code is equal to “Other - Medicare Fee Schedule,” “Other - Non-Medicare Fee Schedule,” “Local Codes,” or “Undefined Codes,” and where the PHYSICIAN SPECIALTY code is equal to “Oral Surgery (Dentists Only),” were mapped as a Dental office visit.

Eye Exams (17a)

1. **a)** All line items where the BETOS code is equal to “Office Visit” (e.g., new or established) or “Consultations,” and where the PHYSICIAN SPECIALTY code is equal to “Optometry,” were mapped as an Eye Exams visit.
b) All other line items that occurred on the same day (i.e., related items) for Optometry were bundled under the Eye Exams visit.
2. **a)** All previously unmapped line items where the BETOS code is equal to “Hospital Visit,” “Nursing Home or Home Visit,” or “ER Visit,” and where the PHYSICIAN SPECIALTY code is equal to “Optometry” were mapped as an Eye Exam visit.
b) All other line items that occurred on the same day (i.e., related items) for Optometry were bundled under the Eye Exams visit.
3. **a)** All previously unmapped line items where the BETOS code is equal to “Major Procedures,” “Minor Procedures,” “Ambulatory Procedures,” “Endoscopy,” “Eye Procedures,” or “Specialist,” and the PHYSICIAN SPECIALTY code is equal to “Optometry Independent Diagnostic Testing Facility” were mapped as an Eye Exams visit.
b) All other line items that occurred on the same day (i.e., related items) for Optometry were bundled under the Eye Exam visit.
4. All previously unmapped line items where the BETOS code is equal to “Specialist,” and the PHYSICIAN SPECIALTY code is equal to “Independent Diag Testing Facility,” and SERVICE TYPE is equal to “Vision items/services” and PLACE is equal to “Office” were mapped as an Eye Exams visit.

Hearing Exams (18a)

1. **a)** All line items where the PHYSICIAN SPECIALTY code is equal to “Audiologist (billing independently)” were mapped as a Hearing Exams visit.
b) All line items that occurred on the same day as an Outpatient service for Hearing Exams is bundled under the Hearing Exams service.
2. All line items where the BETOS code is equal to “Lab Tests-Other (Medicare fee schedule)” and the SERVICE TYPE is equal to “Hearing” were mapped as the Hearing Exams visit.

Appendix A: 2006 and 2007 MCBS Documentation

The MCBS is a continuous, multipurpose survey of a representative national sample of the Medicare population, conducted by the Office of Strategic Planning (OSP) of CMS through a contract with Westat. The central goals of the MCBS are: to determine expenditures and sources of payment for all services used by Medicare beneficiaries, including co-payments, deductibles, and non-covered services; to ascertain all types of health insurance coverage and relate coverage to sources of payment; and to track processes over time, such as changes in health status, spending down to Medicaid eligibility, and the impacts of program changes.

There are approximately 11,000 beneficiaries in every year of the survey. There are 21 survey files, identified by a RIC code. There are also seven claims files that are linked to the survey respondents by a unique identification number.

Of the 21 survey files, there are 12 files that contain information related to the survey respondent and survey information, health status and functioning, health insurance, household composition, facility characteristics (if in a facility), interview information, timeline of events, and survey weights. There are seven files that contain “event” level health care utilization information; they are: Dental, Facility, Inpatient, Institutional, Medical Provider, Outpatient Hospital, and Prescription Drug. There are two utilization summary files, one at the service level (seven categories and home health and hospice) and one at the person level. The event file records are linked to a claim by a claim identification number when there is a claim-generated event or when a survey event can be linked to the claim.

A.1 Cohort Selection

These MCBS files provide the beneficiary information used to screen and select the cohort.

RIC “A” File

Number of records (2007): 11,995
Number of records (2006): 11,984

This is the Administrative Summary file. This file contains historical information from the CMS Medicare enrollment database necessary to establish beneficiary status.

RIC “PS” File

Number of records (2007): 13,039
Number of records (2006): 11,984

This is the Person Summary file. This file summarizes the utilization and expenditures by type of service and the expenditures by payer, yielding one record per person.

RIC “X” File

Number of records (2007): 11,995 (One for each sample person.)
Number of records (2006): 11,984 (One for each sample person.)

This is the Survey Cross-Sectional Weights file. This file contains cross-sectional weights, including general-purpose weights and a series of replicate weights.

RIC “K” File

Number of records (2007): 11,995 (One for each person who completed an interview.)
Number of records (2006): 11,984 (One for each person who completed an interview.)

This is the Key Record file. The Unique Person Identification Number (BASEID) identifies the person interviewed. This file contains the type of interview conducted and other variables for classifying the beneficiary.

RIC “2” File

Number of records (2007): 12,123 (One for each person who completed a community interview.)
Number of records (2006): 11,048 (One for each person who completed a community interview.)

This is the Survey Health Status and Functioning file. This file contains standard measures of Activities of Daily Living (ADLs) and Instrumental Activities of Daily Living (IADLs) as well as information about the sample person’s health, including:

- Self-reported height and weight;
- Self-assessment of vision and hearing;
- Use of preventive measures such as immunizations and mammograms;
- Avoidable risk factors such as smoking; and
- History of medical conditions.

RIC “4” File

Number of records (2007): 11,995 (One for each person who completed an interview.)
Number of records (2006): 11,984 (One for each person who completed an interview.)

This is the Survey Health Insurance file. This file summarizes the health insurance information provided by the sample people including both annual and monthly indicators of health insurance coverage by Medicare, Medicaid, Health Maintenance Organizations (HMOs), Premium Hospital Insurance (PHI), and other public plans.

RIC “8” File

Number of records (2007): 33,572 (One for each interview.)
Number of records (2006): 33,230 (One for each interview.)

This is the Survey Interview file. This file summarizes the characteristics of the interview, including type of questionnaire, duration, and whether or not the interview was conducted with a proxy respondent.

RIC “9” File

Number of records (2007): 11,995 (One for each sample person.)

Number of records (2006): 11,984 (One for each sample person.)

This is the Residence Time Line file. This file tracks the movement of individuals between community, facility, and skilled nursing facility settings. While the majority of respondents have only one setting throughout the year, the records allow for up to twenty occurrences of movement between a community and a facility setting.

A.2 Claims Files Linked to the 2006 and 2007 MCBS

Seven Version I claims files are linked to the MCBS survey respondents by a unique identification number. These bill records represent services provided during calendar years 2006 and 2007 and processed by CMS. Four of the seven files were used in the development of the MPF OOPC calculations. These MCBS files provide the utilization information for the beneficiaries in the survey. Each of the four Version I claims files used to develop the MPF OOPCs are described next.

Home Health Bill

Number of records (2007): 2,120

Number of records (2006): 2,015

This is the Home Health Bill file, which contains the home health bills for the MCBS population. Home health agencies generally bill on a cycle (e.g., monthly).

Outpatient Bill

Number of records (2007): 55,325

Number of records (2006): 43,011

This is the Outpatient Bill file, which contains the outpatient bills for the MCBS population. These bills are generally Part B services that are delivered through the outpatient department of a hospital (traditionally, a Part A provider).

Physician/Supplier Bill

Number of records (2007): 453,588

Number of records (2006): 449,502

This is the Physician/Supplier Bill file, which contains the Medicare Part B (physician, other practitioners, and suppliers including DME) claims for the MCBS population. These records reflect services such as doctor visits, laboratory tests, X-rays and other types of radiological tests, surgeries, inoculations, other services and supplies, and the use or purchase of certain medical equipment.

DME Bill

Number of records (2007): 37,726

Number of records (2006): 37,962

This is the DME file, which contains the Medicare Part B claims for the MCBS population that involve the use or purchase of certain medical equipment.

A.3 Cost and Use Data Linked to the 2006 and 2007 MCBS

There are sixteen types of records in the Cost and Use portion of the MCBS. These records provide use and cost information about goods and services that the beneficiaries used in calendar year 2006 and 2007, the costs associated with those services, and the share of the costs borne by all payers. Four of the sixteen records were used in the development of the MPF-OOPC calculations. Each of the four cost and use records that were used to develop the MPF-OOPCs are described next.

RIC “DUE” File

Number of records (2007): 12,395
Number of records (2006): 12,249

This is the Dental Events file, which contains individual dental events for the MCBS population.

RIC “IPE” File

Number of records (2007): 4,645
Number of records (2006): 4,563

This is the Inpatient Hospital Events file, which contains individual inpatient hospital events for the MCBS population.

RIC “IUE” File

Number of records (2007): 1,124
Number of records (2006): 1,056

This is the Institutional Events file, which contains the individual short-term facility (usually SNF) stays for the MCBS population that were reported during a community interview or created through Medicare claims data.

RIC “PME” File

Number of records (2007): 495,023
Number of records (2006): 449,428

This is the Prescribed Medicine Event file, which contains individual outpatient prescribed medicine events for the MCBS population.

Appendix B: Inflation Factors

To inflate the 2006/2007 costs on the MCBS event files and the Medicare claims to 2012 dollars, CMS provided the following inflation factors.

APPENDIX B TABLE 1			
FISCAL YEAR	RICIPE	RICIUE	RICDUE
	(INPATIENT HOSPITAL)	(SNF)	(DENTAL PRICES)
2007	3.4%	3.1%	5.1%
2008	3.3%	3.3%	5.2%
2009	3.6%	3.4%	3.0%
2010	1.9%	-1.1%	2.17%
2011	-0.6%	1.7%	2.6%
2012	1.4%	1.4%	2.9%

APPENDIX B TABLE 2			
CALENDAR YEAR	RICPME		
	(DRUGS)		
	PRICE	UTILIZATION & INTENSITY PER CAPITA	TOTAL
2007	1.7%	2.0%	3.7%
2008	2.5%	-0.4%	2.1%
2009	3.4%	1.0%	4.4%
2010	2.6%	1.0%	3.6%
2011	3.6%	1.3%	4.9%
2012	1.5%	1.8%	3.3%
