

Inpatient Rehabilitation Facility Quality Reporting Program (IRF QRP)

Overview of Data Elements Used for Reporting Assessment-Based Quality Measures and Standardized Patient Assessment Data Elements Affecting FY 2025 Annual Increase Factor Determination

Page 1 of 12

The Centers for Medicare & Medicaid Services' (CMS) Inpatient Rehabilitation Facility Quality Reporting Program (IRF QRP) requires IRFs to submit quality measure and standardized patient assessment data elements to CMS. For a given data submission period, the Inpatient Rehabilitation Facility-Patient Assessment Instrument (IRF-PAI) submitted by an IRF must meet the Annual Increase Factor (AIF) minimum data completion threshold of no less than 95 percent of the IRF-PAI assessments having 100 percent completion of the required IRF QRP data elements. These are the standardized patient assessment data elements and the data elements needed to calculate the IRF QRP quality measures. Successful assessment completion means that the assessment does not contain non-informative responses, i.e., “dash” (–) for required data elements. **Please note that while the coding of a “dash” is an optional response value for many of the data elements listed in this table, its use does not count toward meeting the AIF minimum data completion threshold.** Failure to meet the minimum threshold may result in a two (2) percentage point reduction in the IRF's AIF.

The FY 2024 IRF PPS final rule revised the IRF-PAI data elements used in determining the AIF minimum data completion threshold for the FY 2025 IRF QRP determination. Below is an updated table indicating the IRF-PAI data elements for the current and final quarter of the FY 2025 IRF QRP determination. The last column under “Data Collection Periods (CY 2023)” reflect the changes finalized in the FY 2024 IRF PPS final rule. Specifically, IRFs would no longer be required to report at least one Self-Care Discharge Goal (that is, GG0130, Column 2) or a Mobility Discharge Goal (that is, GG0170, Column 2) on the IRF-PAI beginning with assessments with a target date of October 1, 2023. CMS will remove the Self-Care Discharge Goals (that is, GG0130, Column 2) and Mobility Discharge Goals (that is, GG0170, Column 2) with the next release of the IRF-PAI. However, IRFs will continue to receive an AIF warning if an IRF-PAI is submitted to iQIES without at least one self-care or mobility discharge goal. **IRFs can ignore this warning and proceed with submitting their assessment.**

An “X” in the table below indicates the valid assessment type and data collection reporting periods. For detailed measure specifications, please refer to the documents listed under “References” below.

Note: This table is limited to the data elements that are used for determining IRF QRP compliance and are included in the AIF data completion threshold. There are additional data elements used to risk adjust the quality measures used in the IRF QRP. Failure to submit all data elements used to calculate and risk adjust a quality measure can affect your IRF's quality measure calculations that are displayed on the Compare website.

Page 12 of 12

⁺For the GG0130 – Self-care and GG01070 Mobility discharge goal items, at least one goal is required to be coded to fulfill requirements of the IRF QRP in Q1, Q2, and Q3 2023. A “-“ dash is allowed for any remaining goal items, as long as at least one GG0130 - Self-Care or GG0170 – Mobility discharge goal item is coded with a valid code (i.e., 01, 02, 03, 04, 05, 06, 07, 09, 10, or 88). Beginning October 1, 2023, a goal is not required to be coded to fulfill requirements of the IRF QRP. CMS will remove the Self-Care Discharge Goals (that is, GG0130, Column 2) and Mobility Discharge Goals (that is, GG0170, Column 2) with the next release of the IRF-PAI. However, IRFs will continue to receive an AIF warning if an IRF-PAI is submitted to iQIES without at least one self-care or mobility discharge goal. **IRFs can ignore this warning and proceed with submitting their assessment.**
