1. Introduction

The Centers for Medicare & Medicaid Services (CMS) is committed to collecting health care quality data and using it to improve care in the Medicare Advantage (MA) program. Under 1862(e) of the Social Security Act MA organizations are required to collect, analyze, and report data that permit measurement of health outcomes and other indices of quality. Since 1998, CMS has been requiring health contracts to collect and report quality of care performance measures from Healthcare Effectiveness Data and Information Set (HEDIS^{®1}). The HEDIS is a widely-used set of quality measures in the managed care industry, which the National Committee for Quality Assurance (NCQA) developed and continually audits and maintains for providers.

The CMS oversees the annual data collection and management of the HEDIS Patient Level Detail Data (PLD) Collection for MA organizations. The HEDIS PLD data are used in the CMS MA Star Ratings and the MA Quality Bonus Payments program. The file specifications are published on CMS's Medicare Advantage/Part D Contract and Enrollment Data page.

Scope Infotech, Inc. (Scope Infotech) has been contracted to oversee the annual data collection and management of the collection of HEDIS PLD for MA organizations for the CMS. Scope Infotech creates, maintains, and documents technical support software applications and tools that support the processing of HEDIS patient-level data files. Scope Infotech ensures that all the data submission processes always protect beneficiary confidentiality and that they comply with all federal regulations regarding data privacy and security. Scope Infotech provides technical support and assistance to individual Medicare contracts as they submit patient-level data according to Medicare requirements.
