

IRF-PAI Data Specifications

07/31/2006

Files Included in the Data Specifications

This document and several accompanying documents describe CMS's data specifications for submitting IRF-PAI data from an inpatient rehabilitation facility to the National Assessment Collection Database. Below is a list of the documents included with these specifications:

IRFDS101A_Rev_2.pdf, a "readme" document that lists the different documents available with Version 1.01A Revision 2.

IRFPAI101A_Rev_2.zip (614 K) a zip file containing the documents of the detailed specifications for the IRF Data Record for Version 1.01A Revision 2. Documents included in this zip file are:

DS101A_Rev_2.pdf, the IRF-PAI Data Specifications Notes for Version 1.01A Revision 2 (12 pages).

HD101A.pdf, the detailed data specifications for the IRF Header Record with Version 1.01A (7 pages).

HS101A.pdf, the abbreviated data specifications for the IRF Header Record with Version 1.01A (2 pages).

BD101A_Rev_2.pdf, the detailed data specifications for the IRF Body Record with Version 1.01A Revision 2 (89 pages).

BS101A_Rev_2.pdf, the abbreviated data specifications for the IRF Body Record with Version 1.01A Revision 2 (16 pages).

TD101A.pdf, the detailed data specifications for the IRF Trailer Record with Version 1.01A (1 page).

TS101A.pdf, the abbreviated data specifications for the IRF Trailer Record with Version 1.01A (1 page).

AppendixA.pdf, the RIC codes and associated impairment groups (3 pages).

ID101A.pdf, the detailed data specifications for the IRF Inactivation Record with Version 1.01A (5 pages).

IS101A.pdf, the abbreviated data specifications for the IRF Inactivation Record with Version 1.01A (1 page).

IRFPAIDB101A_Rev_2.zip (220 K) a zip file containing the Microsoft Access database named IRFPAI101A_Rev_2.mdb, the database can be used to generate the data specifications for the Header, Data, Inactivation and Trailer records for Version 1.01A, Revision 2. This file may be useful to programmers or others who need to work with the data specifications. The database contains four tables:

Header_Record_Definition - contains detailed specifications for the header record.

Body_Record_Definition - contains detailed specifications for the body record.

Inactivation_Record_Definition - contains detailed specifications for the inactivation record.

Trailer_Record_Definition - contains detailed specifications for the trailer record.
