Acronyms

1115 = Medicaid Research and Demonstration Projects
1915(c) = Medicaid Home and Community-based Services Waivers
AIDS = acquired immunodeficiency syndrome
BHP = behavioral health plan
CLTC = community long-term care
CMS-1500 = standard claim form used by a non-institutional provider or supplier
CPT = Current Procedural Terminology code
DME = durable medical equipment
DRG = diagnosis related group
DSH = disproportionate share - hospital
DSYCF = Department of Services for Children, Youth, and their Families
DYFS = Division of Youth and Family Services
DX = diagnosis code
EDB = Medicare Enrollment Database
EMC = Electronic Media Claim
EPSDT = Early Periodic Screening, Diagnosis, and Treatment program
FFS = fee-for-service
FP = family planning
FQHC = Federally Qualified Health Center
FY = fiscal year
HCBS = home- and community-based services
HCPC = Health Care Common Procedure Code
HCPCS = Health Care Common Procedure Coding System
HIO = health insuring organization
HIPAA = Health Insurance Portability and Accountability Act
HIV = human immunodeficiency virus
HMO = health maintenance organization
ICD-9 = International Statistical Classification of Diseases and Related Health Problems

ICF/DD = intermediate care facility for people with developmental disabilities

ICF/MR = intermediate care facility for the mentally retarded

ICN = internal control number

ILTC = institutional long-term care

MC+ = managed care plus waiver

MCCN = Managed Care Community Networks

MDDDB = Medi-Span Master Drug Database

MFP = Money Follows the Person program

MH = mental hospital

MH/MR = mental hospital for people with mental retardation

MR/DD = mental retardation/developmental disability

MPAP = Maryland Pharmacy Assistance Program

MPDP = Maryland Pharmacy Discount Program

MSIS = Medicaid Statistical Information System

NDC = National Drug Code

NF = nursing facility

OPD = Outpatient department

OT = other, non-institutional claims file; occupational therapy

PACE = Program of All-Inclusive Care for the Elderly

PAHP = Prepaid Ambulatory Health Plans

PASRR = Pre-admission Screening and Resident Review

PCCM = primary care case management

PGM = Program

PHP = prepaid health plan

PIHP = prepaid inpatient health plan

PSARR = Pre-admission Screening and Resident Review

PS = Person Summary file

Psych = Psychiatric

PT/OT = physical therapy/occupation therapy

RBF = restricted benefits flag

RHC = Rural Health Clinic

RX = prescription drug claims file

S-CHIP = State Children's Health Insurance Program

SED = serious emotional disturbance

SNF = skilled nursing facility

TBI = traumatic brain injury

TCM = targeted case management

TOS = type of service

TPL = Third-Party Liability

UB; UB92; UB-04; UB-9 = uniform billing form code

All-State Table 1. All-State Anomaly Notes

Record Type	Topic	Issue
All	Adjustment	Several states submit separate claims for services provided by long-term care facilities that are not part of the bundled rate. Some of these claims have an Adjustment Indicator of Debit.
All	Adjustment	Some claims could not be properly adjusted as the source MSIS files did not include the ICN that helps link the original claim with its adjustments. The ICN will be included in MSIS and this problem will be fixed in MAX 2009.
All	Capitation	Plan IDs on capitation claims are 8-filled during MAX processing. It will be corrected in MAX 2008.
All	CHIP	Some states included claims for S-CHIP services in the source MSIS files. All claims for people enrolled only in S-CHIP are excluded from MAX. They are included in MAX for people with any months of Medicaid enrollment. M-CHIP claims are included as they are for services paid for by Medicaid.
All	Crossover Claims	A claim is flagged as a non-crossover if the Medicare Coinsurance & Deductible fields are 8-filled, otherwise it is flagged as a crossover.
All	Crossover Claims	Crossover claims are missing many key data elements that are present on non-crossover claims. Procedure and service codes, UB-92 Revenue Codes, Quantity, and Place of Service are often not reported.
All	Crossover Claims	The percentage of claims that are crossovers varies by state and over time due to changes in state reimbursement methodologies for Medicare-covered services.
All	Crossover Claims	The Medicaid Payment Amount on crossover claims is dependent on the state's reimbursement methodology for Medicare-covered services, which varies by state. The decision was made not to contact all states to obtain their Medicare reimbursement methodologies so the quality of crossover reimbursement data in MAX has not been assessed.
All	Crossover Claims	There is a difference between the definition of EDB duals and crossover claims. An EDB dual is identified by the Medicare Dual Code (Annual) on the PS file. An EDB dual can have crossover and non-crossover claims. A crossover claim is a claim that was paid in part by Medicare. The claim should not used to define an EDB dual.
All	Encounter Claims	Encounter claims in the source MSIS files have not been evaluated for completeness or data quality. Several states do not submit encounter claims for all services and often they do not submit any, even if they have people enrolled in managed care. The encounter claims reported by the states that submit a large number of encounter claims cannot be relied upon to be complete or accurate without an independent evaluation.
All	Medicaid Payment Amount	FFS claims with \$0 Medicaid Payment Amount are excluded.
All	MSIS ID	States are supposed to submit all records in the MSIS files using a unique, permanent MSIS ID across record types and years. However for a variety of reasons this does not always happen. Some people have different MSIS IDs in the claims and eligibility files and therefore their claims and eligibility data are not linked. Cross-reference files are requested from such states and the files for most states can be corrected.

All-State Table 1. All-State Anomaly Notes

Record Type	Topic	Issue
All	MSIS ID	In some states, claims for care of the infant are filed under the mother's MSIS ID for the first few months of life.
All	Section 1915(c) waivers	Program type indicates certain special circumstances under which a claim was paid, including special Federal matching rates or coverage type. Values 6 and 7 identify services covered under home- and community-based care waivers (Section 1915(c) waivers), but the states did not always differentiate between values 6 and 7 so users should sum services with these values.
All	Service Tracking Claims	Expenditures submitted by the states as Service Tracking claims (lump sum payments to providers for more than 1 person and multiple services) are not included in MAX as they cannot be linked to specific beneficiaries. For the most part, these expenditures are for DSH payments, cost settlements, but they can also include adjustments, payments for waiver services, and capitation claims.
All	TPL	Third-Party Liability is not reported on individual claims in some states depending on its TPL collection process. Some states are 'pay and chase' states, sometimes TPL collection is included in managed care contracts, and sometimes it is not collected on an individual claim basis.
All	Type of Claim	Changes within states in the level and type of managed care has an impact on the distribution and number of FFS claims. These changes are often most noticeable in reported FFS service use and expenditures by TOS. States with a high percentage of their enrollees in comprehensive managed care often show an unusual distribution of service use because non-managed care enrollees often have quite different characteristics.
All	Type of Service	As described in more detail in the data element dictionary, several MAX TOS -- lab/x-ray (MAX TOS = 15), durable medical equipment/supplies (MAX TOS = 51), residential care (MAX TOS = 52), psychiatric services (MAX TOS = 53), and adult day care (MAX TOS = 54) -- differ from MSIS TOS categories that were reported by states. The original MSIS TOS is also available on each claim.
All	Type of Service	Claims submitted in the MSIS RX file without a valid NDC code are moved to the MAX OT file.
IP	Length of Stay	All claims for contiguous hospital days through the date of discharge are included in a stay record. Claims for new hospital stays that begin on the date of discharge from a previous stay are used to create a new stay record, even if the claims are for the same facility. This is because a person can be re-admitted to the same facility on the day of discharge. Some states submitted claims for additional payments for a hospital stay with the begin and ending dates of service the same as the discharge date. If these are submitted as original and not adjustment claims, there is no foolproof way to determine if they are an additional payment for the old stay or a new stay.
LT	Covered Days	The states use a variety of time periods for billing long-term care services ranging from weekly to monthly and sometimes reflecting the actual time period with covered days. This means that the number of covered days per claim varies between and within states. Some states erroneously report days on claims for supplemental services as well as the bundled rate claim. Also, days paid for by the patient as Patient Liability may be included on the claim. The level of institutionalization can be reported more easily by using months of institutional long term care, rather than days.

All-State Table 1. All-State Anomaly Notes

Record Type	Topic	Issue
LT	Crossover Claims	Only a small number of crossover claims in the long-term care file are expected because once a person transitions from a Medicare Skilled Nursing Facility to Medicaid, Medicare no longer is the first payer of services.
LT	TPL / Patient Liability	Patient liability and third party liability are not usually reported on bills for less than a month and are only reported on one bill during the month.
OT	Procedure Codes	The OT file contains fields for both a procedure code and a UB-92 revenue code as often outpatient hospital and home health claims are billed on a UB-92 form. Some claims have either a procedure code or UB-92 code, and a few states provide both.
OT	Type of Service	Other services (MAX TOS = 19) is a catch-all 'Other' category, where states report a wide range of services. Many of these services are recoded to more specific MAX TOS codes. However, a substantial number of claims (including many waiver services) are still reported to other services (MAX TOS = 19) in many states.
OT	Type of Service	Claims with procedure codes for lab or x-ray services are coded with the Type of Service of Lab/X-ray (MAX TOS = 15), even if they were reported into MSIS with another type of service such as Physician or Clinic.
OT	Type of Service	There were many state system changes to accommodate the implementation of HIPAA, especially during late 2002 and 2003. In some states, these changes have had a noticeable impact on the MAX files (and source MSIS files). One of the biggest changes is the switch to using national service codes for most claims instead of a mix of national and state-defined codes. This impacted the reporting of MAX TOS in some cases, as the national codes are not always as specific as the local codes.

PS Table 2. Total Persons, Total Expenditures, and Percent with Zero Expenditures Among Medicaid Enrollees in MAX 2007

State	Total Number of Enrollees	Total Medicaid Expenditures	Percent with Zero Expenditures by Basis of Eligibility			
			Aged ^a	Disabled ^a	Child ^a	Adult ^a
West Virginia	396,873	\$ 2,033,619,877	24.9	12.6	3.3	5.6
Wisconsin	1,039,668	\$ 4,481,052,048	16.8	5.7	5.7	10.1
Wyoming	77,782	\$ 468,100,951	22.0	13.6	15.9	16.7

Note: Excludes people with missing Medicaid eligibility information and people enrolled only in S-CHIP

^a Values above two standard deviations from the arithmetic mean are considered anomalous.

^b A large percentage of adults had no Medicaid expenditures in 2007. A vast majority were persons who only qualified for limited benefits.

^c ME was unable to accurately report their IP/LT/OT claims as they did not have a functioning MMIS. The MAX 2007 files only contain the RX and eligibility information.

PS Table 4. Medicaid Long-Term Care Enrollment and Expenditures by Select Subgroups in MAX 2007

State	Institutional Long-Term Care (ILTC) ^a			Community Long-Term Care (CLTC) ^b			Section 1915(c) Waiver Enrollees				
	# Enrollees with Any ILTC Claims	% Enrollees with Any ILTC Claims	Average Medicaid Paid per ILTC Enrollee	# Enrollees with Any CLTC Claims	% Enrollees with Any CLTC Claims	Average Medicaid Paid per CLTC Enrollee	% Section 1915 (c) Waiver Enrollees with No Waiver Claim	% Section 1915 (c) Claim (Pgm Type=6,7) Recipients with No Waiver Enrollment	% Section 1915(c) Waiver Enrollees not Enrolled in HMO/HIO/PACE with No Waiver Claim	Average Medicaid Amount Paid per 1915(c) Enrollee	Average Waiver Paid (Pgm Type=6,7) per 1915(c) Waiver Enrollee
West Virginia	13,610	3.4	\$ 43,147	16,129	4.1	\$ 30,210	4.2	8.9	4.1	\$ 39,351	\$ 31,373
Wisconsin	34,955	3.4	\$ 32,872	32,027	3.1	\$ 34,915	0.0	100.0	0.0	\$ 0	\$ 0
Wyoming	2,973	3.8	\$ 42,457	4,224	5.4	\$ 37,892	3.2	0.2	3.2	\$ 37,356	\$ 26,185

Note: Excludes people with missing Medicaid eligibility information and people enrolled only in S-CHIP

^a ILTC includes people with claims for NF, ICF/MR, mental hospitals for the aged, and inpatient psychiatric facilities for individuals under age 21 (MAX TOS = 02, 04, 05, 07).

^b CLTC includes people with Section 1915(c) waiver services (Pgm Type = 6, 7) and non-waiver personal care, private duty nursing, adult day care, home health, and residential care services (MAX TOS = 13, 30, 38, 52, 54).

^c There were no FFS claims with a Program Type of Waiver Services in AZ in 2007 because AZ covers HCBS as part of managed care.

^d Waiver expenditures in AR in 2007 appear to be under-reported.

^e About 31 percent of 1915(c) waiver enrollees had no waiver claims (Program Type 6 and 7) in IL in 2007. However, waiver expenditures are 12 percent higher than those reported in Form 64 for FY 2007.

^f ME was unable to accurately report their IP/LT/OT claims as they did not have a functioning MMIS. The MAX 2007 files only contain the RX and eligibility information.

^g Total Medicaid paid increased substantially for 1915(c) waiver claims (Program Type 6 or 7) in MA in 2007.

^h Section 1915(c) expenditures in MI were 80 percent lower than those reported in Form 64 data for FY 2007.

ⁱ Many Section 1915(b)(c) enrollees were erroneously reported to be enrolled in both Section 1915(b)(c) and Section 1915(c) waivers in MN, and many enrollees have no waiver (Program Type 6 and 7) claims. The claims reporting is more reliable.

^j About 91 percent of 1915(c) waiver enrollees had no waiver claims (Program Type 6 and 7) in MO in 2007. However, HCBS expenditures (excluding CLTC codes 16-20) are only 23 percent lower than those reported in Form 64.

^k Expenditures for Section 1915(c) waiver claims (Program Type 6 and 7) in MT were almost 70 percent lower than those reported in Form 64 for FY 2007 and may be substantially under-reported.

^l Although 34 percent of 1915(c) waiver enrollees had no waiver claims in NY in 2007, waiver and total HCBS expenditures (excluding CLTC codes 16-20) were within 1 percent of those reported in Form 64 for FY 2007.

^m Section 1915(c) waiver claims (Program Type 6 and 7) were substantially under-reported in PA. Over half of 1915(c) waiver enrollees had no waiver claims in 2007.

ⁿ Section 1915(c) waiver claims (Program Type 6 and 7) were substantially under-reported in RI. Over half of 1915(c) waiver enrollees had no waiver claims and 1915(c) expenditures were 86 percent lower than those reported in Form 64 data for FY 2007.

^o Section 1915(c) expenditures in SC were 55 percent lower than those reported in Form 64 data for FY 2007. However, total HCBS expenditures (excluding CLTC codes 16-20) were within 3 percent of those reported in Form 64, suggesting that some waiver claims may be included but not identified by Program Type in MAX.

^p Although VT began covering HCBS under its 1115 Long-Term Care waiver in 2005, the state continued to report claims for Section 1915(c) waivers (Program Type 6 and 7) in 2007.

^q Seven agencies in WA administer waiver services, but some of them were unable to report individual claims for waiver services in 2007.

Note: Each person can be enrolled in up to four managed care plans in each month. In this table, we classified expenditures and enrollment in this way: (1) HMO/HIO/PACE capitation payments are based on TOS = 20 claims, and HMO enrollment is the number of months enrolled in HMO/HIO/PACE in the year. (2) PHP capitation payments are based on TOS = 21 claims, and PHP enrollment is the number of months enrolled in PHP in the year. (3) PCCM capitation payments are based on TOS = 22 claims, and PCCM enrollment is the number of months enrolled in PCCM in the year. This table excludes people with missing eligibility information, S-CHIP only, FP Only, Aliens with only restricted benefits, EDB duals with restricted benefits only, and prescription drug only enrollees.

^a Most people are enrolled in managed care in AZ.

^b The ratio of PHP capitation payments to enrollment months in AZ in 2007 was above the expected range because AZ sometimes made multiple payments per person/month/plan to cover different plan services.

^c Due to an error in state reporting, PCCM enrollment was under-reported in FL in 2007, resulting in a high ratio of payments to member months.

^d ME was unable to accurately report their IP/LT/OT claims as they did not have a functioning MMIS. The MAX 2007 files only contain the RX and eligibility information.

^e From 1999-2007 NJ reported the dispensing fees paid to pharmacies as individual PHP capitation claims rather than Service Tracking claims. This will be corrected in FFY Q1 2008. All PHP capitation claims during this period were dispensing fees.

^f Total capitation claims and payments decreased substantially in SD in 2007. This was the result of corrections made to the claims reporting of dental managed care, which ended in late 2007.

^g UT reported their BHO capitation payments as Service Tracking claims in 2007 and therefore were not included in the MAX files.

^h There were no PCCM claims for UT in 2007 in the OT file as they were paid on a FFS basis as the service occurs.

ⁱ The ratio of PCCM capitation claims to person-month enrollment in WA in 2007 was below the expected range because not all PCCM capitation claims were submitted.

^j The PHP capitation rate was very high in WI in 2007 as it was used to cover managed care for aged and disabled beneficiaries.

Note: Excludes EDB Duals (EDB Dual = 50-59), people ever enrolled in HMO/HIOs or PACE, people with missing eligibility information, S-CHIP only, FP Only, Aliens with only restricted benefits, duals with restricted benefits only, and prescription drug only enrollees.

^a Other services only includes MAX TOS = 19. There are infrequently used services that are not reported in these tables.

^b Values greater or less than two standard deviations from the arithmetic mean are considered anomalous.

^c Total Medicaid expenditures for Psychiatric services decreased substantially in CO in 2007.

^d ME was unable to accurately report their IP/LT/OT claims as they did not have a functioning MMIS. The MAX 2007 files only contain the RX and eligibility information.

Note: Includes EDB duals (EDB Dual = 50-59) but excludes people ever enrolled in HMO/HIOs or PACE, people with missing eligibility information, S-CHIP only, FP Only, Aliens with only restricted benefits, duals with restricted benefits only, and prescription drug only enrollees.

^a Values greater or less than two standard deviations from the arithmetic mean are considered anomalous.

^b ME was unable to accurately report their IP/LT/OT claims as they did not have a functioning MMIS. The MAX 2007 files only contain the RX and eligibility information.

IP Table 1. IP Hospital Stays by Type of Claim and Missing Eligibility in MAX 2007

State	# IP Stays	Type of Claims					
		% FFS	% FFS Non-Crossover	% FFS Crossover ^a	% Encounter	% Supplemental	% Missing Eligibility ^b
West Virginia	35,149	100.0	86.9	13.1	0.0	0.0	0.8
Wisconsin	132,544	57.8	35.5	22.2	42.2	0.0	1.9
Wyoming	14,007	100.0	85.0	15.0	0.0	0.0	1.8

^a On crossover claims, Medicare coinsurance and/or Medicare deductible are greater than \$0, indicating that Medicaid paid the amount.

^b Values above two standard deviations from the arithmetic mean are considered anomalous.

^c There were few non-crossover FFS claims in AL as people not enrolled in Medicare Part A were enrolled in an IP managed care plan. In addition, pregnant women were in a separately administered non-risk plan. AL reported their global prenatal/delivery claims erroneously in the IP file instead of the OT file in 2007.

^d Most people were enrolled in managed care in AZ and more than half of the other Medicaid enrollees were enrolled in the Indian Health Service, so FFS distributions were unusual in 2007.

^e The number of IP crossover claims decreased substantially in HI in 2007.

^f ME was unable to accurately report their IP/LT/OT claims as they did not have a functioning MMIS. The MAX 2007 files only contain the RX and eligibility information.

^g NY reported Public Good Pool and Lombardi claims as supplemental claims in the IP and OT file in 2007, because they represent payments over and above the standard FFS payments.

^h A large percentage of IP claims in VA in 2007 were crossover claims, because most non-duals received their IP care under managed care.

IP Table 2. IP Hospital Stays: Reporting of Type of Service, Average Medicaid Paid, Average Length of Stay, and Percent with Third-Party Liability, Uniform Billing (UB) Codes, Family Planning, Diagnosis Code, Procedure Code, Diagnosis Related Group, and Maternal Indicator Among FFS Non-Crossover Claims in MAX 2007

^a Values greater or less than two standard deviations from the arithmetic mean are considered anomalous.

^b Values less than 95 percent are below the expected level and are considered anomalous.

^c Values above two standard deviations from the arithmetic mean are considered anomalous.

^d Values less than 50 percent are below the expected level and are considered anomalous.

^e A value of zero indicates missing DRG.

^f DRGs were not reported on IP claims because the state did not use DRGs for inpatient reimbursement.

^g Average Medicaid paid in AK in 2007 was higher than average. AK confirmed this was correct.

^h These states include IP claims that are billed on the Indian Health Service claim forms, which do not have UB-04 revenue codes.

ⁱ AR and CA reported a maximum of two diagnosis codes.

^j Short/Doyle (psychiatric) and Los Angeles waiver facilities did not use the UB-04 form and therefore do not have UB-04 revenue codes.

^k CA only reported a maximum of two procedures per claim in 2007.

^l DE pays for bundled IP services for the Department of Services for Children, Youth, and their Families. These claims do not have UB-04 revenue codes, patient status, or admission date.

^m Claims for partial hospitalizations in DC do not have UB-04 ancillary codes.

ⁿ The average length of stay in DC in 2007 was about 8 days, which is higher than average. DC confirmed this was correct.

^o There were some claims in DC in 2007 with an incorrect Procedure Coding Indicator.

^p There were no Family Planning claims in IA in 2007, because they were billed separately on CMS 1500 forms.

^q ME was unable to accurately report their IP/LT/OT claims as they did not have a functioning MMIS. The MAX 2007 files only contain the RX and eligibility information.

^r MD included claims from some long-term specialty hospitals in their IP file in 2007. These claims were typically for longer lengths of stay and therefore had higher average Medicaid paid.

^s There were some per diem hospitals in MD that did not report the UB-04 Revenue Codes because the claims were reimbursed on a daily rate.

^t The number of maternal delivery claims decreased substantially in NE in 2007.

^u Twenty percent of the IP claims in NM in 2007 did not report DRGs, because they were Indian Health Service claims that were reimbursed on a per diem basis.

^v NY did not use the UB-04 form for IP services in 2007. Instead they used the Electronic Media Claim form and their own rate codes.

^w NY used a DRG reimbursement methodology in 2007, except for certain psychiatric and rehabilitative service providers that were paid on a per diem basis.

^x There was only one UB-04 revenue code reported in the RI claims system in 2007. Most claims had one accommodation code and no ancillary codes.

^y VA had a 21-day limit on adult IP care in 2007.

Wyoming	11,902	91.7	5.4	1.6	0.6

^a The percentage of claims with a patient status of 'still a patient' was higher than average in CA in 2007 due to the inclusion of the Short/Doyle (psychiatric) and Los Angeles waiver hospitals.

^b ME was unable to accurately report their IP/LT/OT claims as they did not have a functioning MMIS. The MAX 2007 files only contain the RX and eligibility information.

^c There were no claims with a Patient Status of 'still a patient' in OR and SC in 2007, because they did not bill until the patient is discharged.

^a On crossover claims, Medicare coinsurance and/or Medicare deductible are greater than \$0, indicating that Medicaid paid the amount.

^b Values above two standard deviations from the arithmetic mean are considered anomalous.

^c Most people were enrolled in managed care in AZ and more than half of the other Medicaid enrollees were enrolled in the Indian Health Service, so FFS distributions were unusual in 2007.

^d FFS crossover claims increased substantially in CO and MA in 2007.

^e ME was unable to accurately report their IP/LT/OT claims as they did not have a functioning MMIS. The MAX 2007 files only contain the RX and eligibility information.

^a Values greater or less than two standard deviations from the arithmetic mean are considered anomalous.

^b Values less than 90 percent are below the expected level and are considered anomalous.

^c Leave days vary by state as there are different state Medicaid rules concerning how many leave days are covered and under what circumstances. For these tables, values less than two percent are below the expected level and are considered anomalous.

^d Values less than 10 percent are below the expected level and are considered anomalous.

^e Values less than 10 percent are below the expected level and are considered anomalous.

^f Relatively few Medicaid enrollees had NF claims in AK in 2007 because AK has a small elderly population and an active HCBS waiver program. They also had a state-operated Pioneers Home System, not included in Medicaid, that provided services to many people who otherwise might be covered by Medicaid.

^g Average Medicaid paid for NF claims in AK in 2007 was about two times higher than average but was consistent across years.

^h There were no FFS claims in AZ in 2007 because AZ covered most LTC under managed care.

ⁱ ME was unable to accurately report their IP/LT/OT claims as they did not have a functioning MMIS. The MAX 2007 files only contain the RX and eligibility information.

^j MD did not report leave days in 2007 even though the state covers leave days under many situations.

^k MA did not report leave days in 2007 even though the state covers up to 35 leave days per year.

^l The bundled NF rate in NY and WA in 2007 included maintenance drugs. Therefore claims for these drugs were not available in the RX files.

^m Covered days were not reported on most claims for Inpatient Psychiatric Facility Services for Individuals under age 21 in SD in 2007.

ⁿ Some LT claims in UT in 2007 contained a diagnosis code with the first 2 characters equal to spaces.

LT Table 3. Other Reporting Issues Among LT Claims in MAX 2007

State	Covered Days	Program Type	Managed Care	TPL/Patient Liability	Other	Notes
Alabama						
Alaska						
Arizona						
Arkansas				X		AR did not report patient liability on LT claims.
California						
Colorado						
Connecticut						
Delaware						
District of Columbia						
Florida						
Georgia						
Hawaii						
Idaho						
Illinois						
Indiana						
Iowa						
Kansas	X					If KS did not pay for all the covered days submitted by the provider on a claim, the covered days field was not corrected, only the payment amount.
Kentucky						
Louisiana						
Maine						
Maryland						
Massachusetts						
Michigan						
Minnesota						
Mississippi						
Missouri						
Montana				X		TPL was combined with Patient Liability due to a system reporting constraint in MT.

^a On crossover claims, Medicare coinsurance and/or Medicare deductible are greater than \$0, indicating that Medicaid paid the amount.

^b Values above two standard deviations from the arithmetic mean are considered anomalous.

^c Most people in AZ were enrolled in managed care.

^d Average Medicaid paid increased substantially in AZ for HMO capitation payments in 2007 due to the inclusion of HMO and LTC managed care claims.

^e It often takes up to a year before dental capitation payments in CA are finalized. Therefore, the MAX OT file may not include all dental capitation claims.

^f CO purchased private health insurance for some enrollees in 2007. The premium payments were reported with a Type of Claim of Capitation and a Type of Service of Other Services

^g FFS crossover claims increased substantially in DC in 2007.

^h GA reported BHP (PSARR) capitation claims as PCCM in 2007, resulting in a higher average Medicaid paid per PCCM capitation claim than expected.

ⁱ In January 2007, IL implemented a new PCCM plan.

^j In July 2007, KS implemented two new PCCM plans.

^k ME was unable to accurately report their IP/LT/OT claims as they did not have a functioning MMIS. The MAX 2007 files only contain the RX and eligibility information.

^l From 1999-2007 NJ reported the dispensing fees paid to pharmacies as individual PHP capitation claims rather than Service Tracking claims. This will be corrected in FFY Q1 2008. All PHP capitation claims during this period are dispensing fees.

^m NY incorrectly reported their LT managed care capitation claims as HMO, rather than PHP, in 2007.

ⁿ Some encounter claims in OK and WA in 2007 were erroneously reported with type of service of PHP or HMO.

^o Global payments to managed care plans for deliveries were billed as PHP capitation claims in PA in 2007. This was a supplemental payment.

^p Capitation payments increased substantially in PA in 2007.

^q In May 2007, SC began reporting claims for its new non-emergency transportation plan, which caused a large increase in the number of enrollees with capitated payments and associated expenditures.

^r Total capitation claims and payments decreased substantially in SD in 2007. This was the result of corrections made to the claims reporting of dental managed care, which ended in late 2007.

^s In 2007, two HMO plans in TN switched to risk-based managed care. The claims for risk-based services were submitted as encounter claims, and the non-risk-based services were submitted as FFS. This switch affected many FFS measures.

^t Capitation claims for LT managed care in UT in 2007 were reported as HMO as these plans included comprehensive services in addition to LT services.

OT Table 2. OT Service Claims: Reporting of Percent with Place of Service, Third-Party Liability, Diagnosis Code, Procedure Code, and Procedure-Coding System, Percent of Claims by Select Program Type, and Average HCBS Waiver Amount Paid Among FFS Non-Crossover Claims in MAX 2007

^a Values less than 80 percent are below the expected level and are considered anomalous.

^b Values less than 95 percent are below the expected level and are considered anomalous.

^c Claims with state-defined procedure codes in AK in 2007 were incorrectly reported with a Procedure Code Indicator of HCPSC.

^d AZ did not have an FQHC program.

^e There were no FFS claims with a Program Type of Waiver Services in AZ in 2007 because AZ covered HCBS as part of managed care.

^f Lab and X-Ray claims in CO in 2007 have diagnosis codes as reported by providers.

^g Procedure codes were not reported on Home Health, Waiver, Hospice and Outpatient Hospital claims in CO in 2007 as they were reported only on the UB-04 form.

^h DE did not report RHC claims.

ⁱ There were some claims in DC in 2007 with an incorrect Procedure Coding Indicator.

^j RHC and FQHC claims increased substantially in IL in 2007.

^k KY reported all claims for people enrolled in waivers as waiver services, including non-waiver services, in 2007. To correct this problem, any LT claim with a Program Type of 6 or 7 was changed to Program Type '0'. However, non-waiver services for waiver enrollee in the OT and RX files can not be identified and corrected.

^l ME was unable to accurately report their IP/LT/OT claims as they did not have a functioning MMIS. The MAX 2007 files only contain the RX and eligibility information.

^m Place of service was missing mostly on Outpatient Hospital and Lab/Xray claims in MA in 2007.

ⁿ Total Medicaid paid for 1915(c) waiver claims (Program Type 6 or 7) increased substantially in MA in 2007.

^o FP claims increased substantially in MS in 2007.

^p NY used local procedure codes or bill rate codes in 2007.

^q ND has some state-defined procedure codes that are a single letter (e.g. M, L, E) in 2007.

^r TN reported very few FQHC claims in 2007.

^s Place of Service of Emergency Room was under-reported in WI in 2007 as it can only be reported on a UB-04 form.

OT Table 3. Percent of FFS Non-Crossover OT Service Claims by Select MAX Type of Service (08, 09, 10, 11, 12, 13, 15, 16, 26) in MAX 2007

State	# FFS Non-Crossover Claims	Physician Services (MAX TOS=08)	Dental Services (MAX TOS=09)	Other Practitioner Services (MAX TOS=10)	Outpatient Services (MAX TOS=11)	Clinic Services (MAX TOS=12)	Home Health Services (MAX TOS=13)	Lab/Xray Services (MAX TOS=15)	Prescription Drugs (MAX TOS=16)	Transportation Services (MAX TOS=26)

^a Dental services increased substantially in AR in 2007.

^b AR and DC reported transportation capitation claims as FFS.

^c HI was unable to submit FFS dental claims in time for the initial set of MAX 2007 files. In March 2011, Hawaii submitted the dental claims, and we regenerated the OT and PS files. These statistics are based on the new files.

^d Clinic services increased substantially in IL in 2007.

^e ME was unable to accurately report their IP/LT/OT claims as they did not have a functioning MMIS. The MAX 2007 files only contain the RX and eligibility information.

^f Physician services decreased substantially in MO in 2007.

^a The coding of Rehabilitation Services varies by state. It is an optional rather than a mandatory service. Also some states report community mental services with an MSIS Type of Service of Rehabilitation.

^b Other services only includes MAX TOS = 19. There are infrequently used services that are not reported in these tables.

^c Targeted Case Management services decreased substantially in FL in 2007.

^d Psychiatric services decreased in FL in 2007 as enrollment in behavioral health managed care increased.

^e Psychiatric services increased substantially in IA in 2007.

^f ME was unable to accurately report their IP/LT/OT claims as they did not have a functioning MMIS. The MAX 2007 files only contain the RX and eligibility information.

^g MD's Medicaid program is mostly managed care with a FFS carve out for mental health services. As a result, a very high percentage of FFS claims were for psychiatric services.

^h Other services increased substantially in MI in 2007 because the state reported missing waiver claims to this Type of Service.

ⁱ Adult Day Care services decreased substantially in MN in 2007 due to the switch to the new HIPAA HCPCS national procedure codes.

^j Personal Care services decreased substantially in NE in 2007 due to a decrease in one state-specific procedure code because it is now reported with a more general HCPCS code that does not map to this Type of Service.

^k Psychiatric services decreased substantially in NC and PA in 2007.

^l Rehabilitation services decreased substantially in OR in 2007.

^m Rehabilitation services increased substantially in PA in 2007 as a frequent CPT code is now being reported as Rehabilitation instead of PT/OT/Speech/Hearing therapy.

ⁿ Targeted Case Management decreased substantially in UT in 2007.

OT Table 5. Average Medicaid Paid per FFS Non-Crossover OT Service Claims by Select MAX Type of Service (08, 09, 10, 11, 12, 13, 15, 16, 26) in MAX 2007

^a Other services only includes MAX TOS = 19. There are infrequently used services that are not reported in these tables.

^b Values greater or less than two standard deviations from the arithmetic mean are considered anomalous.

^c Average Medicaid paid for Psychiatric services decreased substantially in CO in 2007.

^d ME was unable to accurately report their IP/LT/OT claims as they did not have a functioning MMIS. The MAX 2007 files only contain the RX and eligibility information.

^e Average Medicaid paid for Rehabilitation services increased substantially in MN in 2007.

^f Average Medicaid paid for Psychiatric services decreased substantially in PA in 2007.

OT Table 7. Other Reporting Issues Among OT Service Claims in MAX 2007

State	Capitation	Program Type	Plan ID	Managed Care	Procedure Code/TOS	Other	Notes
Alabama							
Alaska							
Arizona					X		The percentage of crossover claims reporting a Procedure Code is below the expected range.
Arkansas			X				The Plan IDs on the PS file did not link with the Plan IDs on the capitation claims.
California							
Colorado			X				The last 4 bytes of the PS Plan IDs need to be dropped in order to link to the Plan IDs on capitation and encounter claims.
Connecticut							
Delaware							
District of Columbia			X				The last byte of the PS Plan IDs needs to be dropped in order to link to the Plan IDs on capitation claims.
Florida							
Georgia				X			The increase in HMO enrollment caused the decrease in the use of FFS services.
Hawaii							
Idaho							
Illinois			X				The 11th byte of the PS Plan IDs needs to be dropped in order to link to the Plan IDs on capitation claims.
Indiana							
Iowa							
Kansas							
Kentucky							
Louisiana		X			X		LA paid a fixed rate for FOHC and RHC services. LA submitted summary claims for bundled services and provided the Medicaid payment amount but it did not provide the detailed services. In 2006, the LA legislature expanded the services that can be billed by nurses in the state resulting in an increase in nurse practitioner services and a decrease in nurse mid-wife services in both 2006 and 2007.
Maine							
Maryland							
Massachusetts							
Michigan					X		There were several shifts in total claims and expenditures by MAX TOS. MI changed MMIS systems at the end of 2007 and according to the states have made corrections/changes in classifying Type of Service in the new system.
Minnesota							
Mississippi						X	The state submitted capitation payments for disease management as service tracking claims in 2007.
Missouri							
Montana							

OT Table 7. Other Reporting Issues Among OT Service Claims in MAX 2007

State	Capitation	Program Type	Plan ID	Managed Care	Procedure Code/TOS	Other	Notes
Nebraska							
Nevada							
New Hampshire							
New Jersey							
New Mexico			X				The first byte of the PS Plan IDs needs to be dropped in order to link to the Plan IDs on capitation claims.
New York			X				The last 2 bytes of the PS Plan IDs need to be dropped in order to link to the Plan IDs on capitation and encounter claims.
North Carolina							
North Dakota							
Ohio				X			The increase in HMO enrollment has changed the distribution of FFS services.
Oklahoma							
Oregon			X				The Plan IDs on the PS file did not link with the Plan IDs on the capitation claims.
Pennsylvania			X				The last 10 bytes of the PS Plan ID need to be dropped in order to link to the Plan ID on capitation claims.
Rhode Island					X		There were no claims for PT/OT/Speech/Hearing services because these services were not covered by the state plan.
South Carolina							
South Dakota							
Tennessee							
Texas						X	TX has a large number of state agencies responsible for the administration and processing of Medicaid claims for different parts of the state plan making it difficult for them to collect and report Medicaid services uniformly in MSIS.
Utah							
Vermont						X	In 2005, a new 1115 waiver in Vermont turned their federal Medicaid reimbursement into a block grant, giving the state the flexibility to modify Medicaid coverage to pay for non-Medicaid covered services. Although the state considers itself to be a managed care organization under this waiver, since they pay providers on a FFS basis, services and enrollment were not classified as managed care.
Virginia							
Washington							
West Virginia							
Wisconsin				X			Since capitation claims were paid prospectively, the state changed the date of payment to the first date they were applicable.
Wyoming

Wyoming	497,885	100.0	0.0	0.0	0.1

^a There are no crossover RX claims.

^b Values above two standard deviations from the arithmetic mean are considered anomalous.

^c Most people were enrolled in managed care in AZ and more than half of the other Medicaid enrollees were enrolled in the Indian Health Service, so FFS distributions were unusual in 2007.

RX Table 2. RX Claims: Reporting of Type of Service, Average Medicaid Paid, and Percent with Prescriber ID, Medispan Classification Code, Prescription Date, Over-the-Counter Drug Classification, Prescription Drug Classification, Quantity, and Days Supply Among FFS Non-Crossover Claims in MAX 2007

RX Table 2. RX Claims: Reporting of Type of Service, Average Medicaid Paid, and Percent with Prescriber ID, Medispan Classification Code, Prescription Date, Over-the-Counter Drug Classification, Prescription Drug Classification, Quantity, and Days Supply Among FFS Non-Crossover Claims in MAX 2007

State	# FFS Non-Crossover Claims	% RX (MAX TOS=16)	% Durable Medical Equipment (MAX TOS=51)	Average Medicaid Paid ^a	% with Prescriber ID ^b	% with Medi-Span Classification Code ^c	% with Prescribed Date ^d	% with Over-the- Counter Drug Classification	% with Prescription Drug Classification	% with Quantity ^e	% with Days Supply ^f
Utah	2,075,283	100.0	0.0	\$ 68	100.0	99.6	0.0	6.4	93.4	98.9	100.0
Vermont	2,130,912	100.0	0.0	\$ 51	100.0	99.6	0.0	9.4	90.5	100.0	100.0
Virginia	4,150,051	100.0	0.0	\$ 54	25.5	99.5	0.0	26.9	73.0	99.9	100.0
Washington	10,263,395	100.0	0.0	\$ 39	1.1	99.7	100.0	15.2	84.8	99.0	100.0
West Virginia	5,781,228	100.0	0.0	\$ 63	100.0	99.7	100.0	5.4	94.6	99.1	100.0
Wisconsin	6,040,236	100.0	0.0	\$ 58	100.0	99.5	100.0	5.0	94.7	100.0	100.0
Wyoming	497,885	100.0	0.0	\$ 69	99.9	98.4	100.0	8.5	91.1	99.0	100.0

^a Values greater or less than two standard deviations from the arithmetic mean are considered anomalous.

^b Values less than 95 percent are below the expected level and are considered anomalous.

^c Medi-Span drug classifications are available only to users with proper authorization to the Medi-Span Master Drug Database by Wolters Kluwer Health. This measure is included because it indicates how well the NDC is linking to the Medi-Span database.

^d Values of 0 percent are missing the prescription date on all of the claims and are considered anomalous.

^e Values less than 95 percent are below the expected level and are considered anomalous.

^f Values less than 95 percent are below the expected level and are considered anomalous.

^g Some drugs were included in the LTC rate in DE in 2007, so specific information on such drugs is not available.

^h Average Medicaid paid increased substantially in HI in 2007.

ⁱ The percentage of claims with Quantity decreased substantially in HI in 2007.

RX Table 3. Other Reporting Issues Among RX Claims in MAX 2007

State	National Drug Code	Program Type	Managed Care	Other	Notes
Alabama					
Alaska					
Arizona					
Arkansas					
California					
Colorado					
Connecticut					
Delaware					
District of Columbia					
Florida					
Georgia					
Hawaii					
Idaho					
Illinois					
Indiana					
Iowa					
Kansas					
Kentucky					
Louisiana					
Maine					
Maryland					
Massachusetts					
Michigan					
Minnesota					
Mississippi					
Missouri					
Montana					

RX Table 3. Other Reporting Issues Among RX Claims in MAX 2007

State	National Drug Code	Program Type	Managed Care	Other	Notes
Nebraska					
Nevada					
New Hampshire					
New Jersey					
New Mexico					
New York					
North Carolina					
North Dakota					
Ohio					
Oklahoma					
Oregon					
Pennsylvania					
Rhode Island					
South Carolina					
South Dakota					
Tennessee					
Texas					
Utah					
Vermont					
Virginia	X				VA did not have the capacity to use HCPCS on pharmacy claims for supplies and DME that did not have an NDC. The NDC field is '9' filled when this occurs.
Washington					
West Virginia					
Wisconsin	X				Prior authorization drugs were reported as '8' filled in the NDC field.
Wyoming
