The mean dispensing fee of the NDCs listed above is \$1.73. This amount will be applied to each NDC included on the monthly claim. We will limit 1 dispensing fee per NDC per month. Providers should report the quantity in the smallest available unit. This is necessary because Medicare is using the mean per unit cost in calculating the outlier. For example, if the provider reports NDC 00054312041 Calcitriol 1 mcg/ml oral solution (15/ml/bottle) and uses the full 15 ml bottle, the quantity is reported as 15, not 1. This allows for the most accurate calculation for the outlier.

\* Anti-infective drugs do not qualify as an outlier service when used at home by a patient to treat an infection of the catheter site or peritonitis associated with peritoneal dialysis.

\*\* Automated Multi-Channel Chemistry tests only qualify as an outlier service when the 50/50 rule permits separate payment. More information regarding the 50/50 rule can be found in Pub. 100-02, Chapter 11, Section 30.2.2.
