D0300 must equal the sum of the values of the following nine items: D0200A2, D0200B2, D0200C2, D0200D2, D0200E2, D0200F2, D0200G2, D0200H2, D0200I2. These are referred to as the "items in Column 2", below.

The following rules describe the computation of the sum that is placed in D0300. Note that these rules apply only if D0100=[1]. If D0100=[0,-,^], then Edit -3703 applies instead. These rules consider the "number of missing items in Column 2" which is the number of items in Column 2 that are equal to [-] or that are skipped and are therefore equal to [^].

a) If all of the items in Column 2 have valid values [0,1,2,3], then D0300 must equal the simple sum of those values.

b) If any of the items in Column 2 are equal to [-,^], then count their values as zero in computing the sum.

c) If the number of missing items in Column 2 (as defined above) is equal to one, then compute the simple sum of the eight items in Column 2 that have valid values, multiply the sum by 9/8 (1.125), and place the result rounded to the nearest integer in D0300 (see edit -9013 for rounding rules).

d) If the number of missing items in Column 2 (as defined above) is equal to two, then compute the simple sum of the seven items in Column 2 that have valid values, multiply the sum by 9/7 (1.286), and place the result rounded to the nearest integer in D0300 (see edit -9013 for rounding rules).

e) If the number of missing items in Column 2 (as defined above) is equal to three or more and at least
 one of the items in Column 2 is not equal to [-], then D0300 must equal [99].

f) If all of the items in Column 2 are equal to [-], then D0300 must equal [-].

The MDS Submission System will recalculate the value in D0300. If the recalculated value differs from the submitted value, a fatal error message will be issued and the record will be rejected.

Formatting of ICD Items

If the ICD-9 item is active, it must be submitted as an 8 character, fixed-format string with all blanks replaced with ^, and with a decimal point as the 6th character. The only exception to this rule is that

an entirely blank ICD-9 item must be submitted as a single ^.

For example:
  -The ICD-9 code "123.4" would be submitted as [^^123.4^].
  -The ICD-9 code "123." would be submitted as [^^123.^^].
  -The ICD-9 code "E123.4" would be submitted as [^E123.4^].
  -The ICD-9 code "V12.3" would be submitted as [^^V12.3^]
  -An entirely blank ICD-9 code would be submitted as [^].

Other formatting rules are as follows:
 a) Character 1 must be [^].
 b) Character 2 must be [E,^].
 c) If character 2 is [^], then character 3 can be [V,0-9]. If character 2 is [E], then character 3 must be
[0-9].
 d) Characters 4 through 5 must be [0-9].
 e) Character 6 must be a decimal point.
 f) Characters 7 and 8 must be [0-9,^].
 g) If character 7 is a [^], then character 8 must be a [^].

Note that ICD-10 codes are formatted differently from ICD-9 codes and are not accepted at this time.

-3607   Consistency   Fatal   The Item Subset Code (ISC) is a two- or three-character code that indicates the type of record that is being submitted. The set of active items is controlled by the ISC. The characters of the ISC are defined as follows:

Character 1 indicates the type of provider and is based upon the value of A0200, as follows:

a) If A0200 is equal to [1] (nursing home record), then character 1 of the ISC is equal to [N].

b) If A0200 is equal to [2] (swing bed record), then character 1 of the ISC is equal to [S].

ID	Type	Severity	Text/Items

Characters 2 and 3 indicate the type of record and are based upon the values of the Reason For Assessment (RFA) items A0310A, A0310B, A0310C, A0310D, and A0310F. The "Item Subset Code (ISC) Report" that accompanies the data specs lists all possible combinations of the RFA items and their associated ISCs. If the ISC that is listed in the report is equal to dashes, then the combination of RFA items is not allowed. If a record is submitted with one of these invalid RFA combinations, a fatal error will occur and it will be rejected.

The ISC_VAL table that is contained in the data specifications Access database is used to generate the
 ISC report and can be used by programmers as a lookup table. In addition, an appendix of the overview document that accompanies these data specifications contains source code for a Visual Basic function (GetISC()) that can be used to determine the ISC that is associated with any combination of the RFA items.

For a more complete explanation of the meaning and use of the ISC codes, please refer to the documentation that accompanies these data specifications.

Coding of A0410 depends upon the resident's status on the target date for the assessment. The target date is defined as follows:

a) If A0310F is equal to [01], then the target date is equal to A1600 (entry date).

ID	Type	Severity	Text/Items

b) If A0310F is equal to [10,11,12], then the target date is equal to A2000 (discharge date).

c) If A0310F is equal to [99], then the target date is equal to A2300 (assessment reference date)..

Given the target date, the following rules apply:

a) If the resident is on a Medicare/Medicaid certified unit on the target date for the assessment, then
A0410 must be equal to [3] (federal required submission).

b) If the resident is on a unit that is not Medicare/Medicaid certified on the target date and if the State
requires MDS submission for individuals on the resident's unit, then A0410 must be equal to [2] (state
but not federal required submission).

c) If the facility is completing the assessment for another purpose (other than to satisfy Federal or State requirements), then A0410 must be equal to [1] (neither federal nor state required submission).

If A0410 is equal to [2,3], then the assessment MUST be submitted to the MDS Submission System.
If A0410 is equal to [1], then the assessment MUST NOT be submitted to the MDS Submission System.

NOTE: It is a violation of a resident's right to privacy to submit data to CMS's data systems when the data are not required.

-3698 Consistency Fatal Consistency between therapy minutes and days.

Compute the sum of minutes in O0400C1, O0400C2, and O0400C3. When computing this sum, if any of these items is coded with [-], count the number of minutes for that item as zero. The following rules apply based upon the computed sum:

If the sum is greater than zero, then the following rules apply:
a) The sum must be greater than or equal to O0400C4*15.
b) If O0400C4>[0], then the sum must be less than or equal to O0400C4*1440 (there are 1440 minutes in a day).
c) If O0400C4=[0], then the sum must be less than or equal to [0098] (if there are 99 or more minutes across 7 days, then at least one of the days must have 15 minutes or more).

The following rules describe allowable spans between pairs of dates. Each rule applies if both date items in the pair are active and contain valid dates (not dashes or other special values). Violation of these rules will result in warnings.

a) Z0500B (completion date) - A2300 (assessment reference date) <= 14 days.

b) If A0310A is equal to [03,04,05], then V0200B2 (CAA process signature date) - A2300 (assessment reference date) <= 14 days.

c) V0200C2 (CAA care plan signature date) - V0200B2 (CAA process signature date) <= 7 days.

d) If A0310A is equal to [01], then Z0500B (completion date) - A1600 (entry date) <= 13 days.

e) If A0310A is equal to [01], then V0200B2 (CAA process signature date) - A1600 (entry date) <= 13 days.

-3762	Consistency	Warning	***NOTE: THIS EDIT HAS BEEN SUSPENDED AND WILL NOT BE APPLIED TO SUBMITTED RECORDS UNTIL FURTHER NOTICE.

If O0250B is active and contains a valid date (is not equal to [-,^]), then it should contain a date that is in the appropriate date range, as defined below. Determination of the appropriate date range depends upon the target date for the assessment. The target date is defined as follows:

a) If A0310F is equal to [01], then the target date is equal to A1600 (entry date).

b) If A0310F is equal to [10,11,12], then the target date is equal to A2000 (discharge date).
c) If A0310F is equal to [99], then the target date is equal to A2300 (assessment reference date).

Given the target date, the following rules apply:

a) If the target date falls within an ongoing influenza season, then the value of O0250B should be greater than or equal to the starting date of the current influenza season and less than or equal to the target date.

b) If the target date falls outside of an ongoing influenza season, then the edit described above in (a) will be suspended and no warning will be issued based upon the value of O0250B.

Note that the dates that define the "current influenza season" will be defined each year by CMS and will be published in updates to the MDS user's manual. Note also that violation of the consistency rule described in this edit will result in a warning.

a) If A0310A is equal to [02,06,99], then A1550A through A1550Z must equal [^].
b) If the resident's age is 22 years of age or older and A0310A is equal to [01], then A1550A through A1550Z must not equal [^].
c) If the resident's age is 22 years of age or older and A0310A is not equal to [01], then A1550A through A1550Z must equal [^].
d) If the resident's age is 21 years of age or younger and A0310A is equal to [01,03,04,05], then A1550A through A1550Z must not equal [^].

For the rules above, age should be computed in the following way using A0900 (birth date) and A2300 (assessment reference date):

a) If only the year is submitted in A0900, then replace the month and day with "0702" (July 2, the midpoint of the year) for the purpose of calculating age.
b) If only the year and month are submitted in A0900, replace the day with "15", (the midpoint of the month) for the purpose of calculating age.
c) Provisionally compute age (in years) by subtracting the year in A0900 (as modified above, if necessary) from the year in A2300.
d) If the month in A2300 is less than the month in A0900, then subtract 1 from the provisional age computed in (c) above.
e) If the month in A2300 is equal to the month in A0900 and if the day in A2300 is less than the day in A0900, then subtract 1 from the provisional age computed in (c) above.

---b1) O0420 must contain a value that is greater than or equal to the largest value in O0400A4, O0400B4, and O0400C4. When determining this value, if any of the items O0400A4, O0400B4, and O0400C4 is coded with [-,^], count the number of days for that item as zero.

---b2) O0420 must contain a value that is less than or equal to sum of the days in O0400A4, O0400B4, and O0400C4. When computing this sum, if any of the items O0400A4, O0400B4, and O0400C4 is coded with [-,^], count the number of days for that item as zero.

-3851 Consistency Fatal Date Item Consistency Rules
Date items fall into three groups, designated Group A, B, and C below. Each group has its own consistency rules.

GROUP A RULES (Edit –3851a)

Group A items are listed below. Each active item in this list that contains a valid date (not blank or dashes) must be in the specified order:

A1600 (entry date) <=
A2300 (assessment reference date) = A2000 (discharge date) <=

GROUP B (Edit –3851b)

Group B items are listed below. Each active item in this list that contains a valid date (not blank or dashes) must obey all of the following rules:

1. Each Group B date must be greater than or equal to A0900 (birthdate).

2. Each Group B date must be less than or equal to A2300 (assessment reference date) if A2300 is active.

3. If A0310F is equal to [10,11,12] (if A2000 discharge date is completed), then each Group B date must be less than or equal to A2000.

4. For start/end date pairs shown below, the start date must be less than or equal to the end date.

5. Otherwise, the Group B dates may be in any order.

-9015 Information None Items V0100A through V0100C are used to identify a prior OBRA or PPS assessment if one has been performed since the resident's most recent entry. If such an assessment exists, the values in V0100D, V0100E, and V0100F are used in the triggering logic for CAAs that depend upon values from a prior assessment.

Items:

V0100A	Prior OBRA reason for assessment
V0100B	Prior PPS reason for assessment
V0100C	Prior assessment reference date
V0100D	Prior assessment BIMS summary score
V0100E	Prior asmt PHQ res: total mood severity score
V0100F	Prior asmt PHQ staff: total mood score

-9016 Information None V0100A through V0100F should be completed only if there is a prior assessment (if A0310E=[0]) and if the following is true for the most recent prior assessment: A0310A is equal to [01,02,03,04,05,06] OR A0310B is equal to [01,02,03,04,05,06].

The purpose of V0100D through V0100F is to supply previous score values that are used for calculating some of the CATs. The purpose of V0100A through V0100C is to document the prior assessment that contained those values.

Items:

V0100A	Prior OBRA reason for assessment
V0100B	Prior PPS reason for assessment
V0100C	Prior assessment reference date
V0100D	Prior assessment BIMS summary score

-9017 Information None The target date is defined as follows:

a) If A0310F is equal to [01], then the target date is equal to A1600 (entry date).
b) If A0310F is equal to [10,11,12], then the target date is equal to A2000 (discharge date).
c) If A0310F is equal to [99], then the target date is equal to A2300 (assessment reference date)..

Items: TARGET_DATE   Target date

-9018 Information None ***BEGINNING WITH V1.02.0, THIS INFORMATIONAL EDIT HAS BEEN DISCONTINUED. PREVIOUSLY, IT APPLIED TO EFFECTIVE_DATE WHICH HAS BEEN CONVERTED TO FILLER (ITEM_FILLER_003).
