Chapter	Section	Page	Change
4	4.10	4-16	NOTE: Each of the following descriptions of the Twenty Care Areas includes a table listing the Care Area Trigger (CAT) logical specifications. For those MDS items that require a numerical response, the logical specifications will reference the numerical response that triggered the Care Area. For those MDS items that require a check mark response (e.g. H0100, J0800, K0510, etc.), the logical specifications will reference this response in numerical form when the check box response is one that triggers a Care Area. Therefore, in the tables below, when a check mark has been placed in a check box item on the MDS and triggers a Care Area, the logical specifications will reference a value of "1." Example: "H0100A=1" means that a check mark has been placed in the check box item H0100A. Similarly, the Care Area logical specifications will reference a value of "0" (zero) to indicate that a check box item is not checked. Example: "I4800=0" means that a check mark has not been placed in the check box item I4800.
4	4.10	4-17 to 4-24	When this CAA is triggered, nursing home staff should follow their facility's chosen protocol or policy for performing the CAA. This CAA is triggered if the resident is exhibiting a worsening or an acute change in mental status. Page length changes.
4	4.10	4-25	4. Staff assessment of daily and activity preferences did not indicate that resident prefers participating in favorite activities: F0800Q = 0not checked
4	4.10	4-26 to 4-28	Page length change.
4	4.10	4-29	4. Any 6 items for staff assessment of activity preference item L through T are not checked as indicated by: Any 6 of F0800L through F0800T = 0not checked
4	4.10	4-29	11. Falls When this CAA is triggered, nursing home staff should follow their facility's chosen protocol or policy for performing the CAA. This CAA is triggered when the resident has had recent history of falls and balance problems.
4	4.10	4-30	7. Resident received antidepressant medication on one or more of the last 7 days or since admission/entry or reentry as indicated by: N0410C> = 1 AND N0410C<=7
