2014 Physician Quality Reporting System Qualified Registries

CMS is pleased to announce the 2014 qualified registries. These entities have self-nominated and indicated that they meet the requirements as outlined by CMS in the 2014 Physician Fee Schedule final rule. The 2014 qualified registries are able to report quality measure data to CMS, on behalf of individual eligible professionals (EPs) and Group Practice Reporting Organization (GPRO) group practices, for the 2014 Physician Quality Reporting System (PQRS) program year.

In the table below, each of the self-nominated 2014 qualified registries has provided detailed information regarding the services they offer their clients, as well as the cost incurred by their clients. If the qualified registries are supporting individual measures, they have attested that they can report on at least 9 measures covering 3 National Quality Strategy (NQS) domains for at least 50 percent of an EP's/GPRO's Medicare Part B Fee For Service patients. If the vendors are supporting measures groups, they have attested that they can report at least 1 measures group on behalf of an EP for at least a 20-patient sample, a majority of which (at least 11 out of 20) must be Medicare Part B FFS patients.

EPs and GPRO group practices, wishing to participate in 2014 PQRS through a qualified registry, may contact the entities listed below for additional details.

> *Disclaimer: Each vendor has reviewed their organization's information below and provided confirmation of accuracy. Information included in this document was accurate at the time posting; however CMS cannot guarantee that these services will be available or that the vendor will be successful uploading their files during the submission period. CMS cannot guarantee an eligible professionals success in providing data for the program. Successful submission is contingent upon following the PQRS program requirements, the timeliness, quality, and accuracy of the eligible professionals data provided for reporting, and the timeliness, quality, and accuracy of the XML programming of the vendor.*

We offer a full range of data collection, analysis and submission services that have helped thousands of providers earn millions in incentives. Our services are typically offered on a fee per provider basis ranging from $150 to $350 depending on the level of data collection and clinical consulting efforts required. These fees cover the entire program year including consulting, data submission, incentive payment verification and communications with CMS if needed. Please contact us to discuss your practice's specific needs for Registry, ACO or GPRO reporting to CMS. Email us at PQRS@amhitech.com or visit our website at http://www.amhitech.com.

ICLOPS Registry solutions support clinical integration, PQRS, ACOs, and population health. ICLOPS fosters collaboration with clients in PQRS reporting, including services to optimize the cost-quality score used to calculate the Quality Tier under the Value-Based Payment Modifier. Our work draws on extensive experience as one of the first registries to aggregate data from disparate sources, making it easier to focus physicians on outcomes and not data collection. Platform pricing is based on volume, with per-provider equivalents ranging from $130 for large groups to $900 for small groups, along with a one-time setup fee. Please contact partnering@iclops.com for more information.
