## Introduction:

This document contains general implementation guidance for reporting 2014 Physician Quality Reporting System (PQRS) measures groups. Measures groups include reporting on a group of clinically-related measures identified by CMS for use in PQRS through a registry-based submission process. Twenty-five measures groups have been established for 2014 PQRS: Diabetes, Chronic Kidney Disease (CKD), Preventive Care, Coronary Artery Bypass Graft (CABG), Rheumatoid Arthritis (RA), Perioperative Care, Back Pain, Hepatitis C, Heart Failure (HF), Coronary Artery Disease (CAD), Ischemic Vascular Disease (IVD), HIV/AIDS, Asthma, Chronic Obstructive Pulmonary Disease (COPD), Inflammatory Bowel Disease (IBD), Sleep Apnea, Dementia, Parkinson's Disease, Hypertension (HTN), Cardiovascular Prevention, Cataracts, Oncology, Total Knee Replacement (TKR), General Surgery, and Optimizing Patient Exposure to Ionizing Radiation (OPEIR).

There are two reporting periods available for eligible professionals to report 2014 PQRS measures groups: a) 12-month reporting period from January 1 through December 31, 2014 OR b) a 6-month reporting period from July 1 through December 31, 2014. The 6-month reporting period allows those eligible professionals who may have decided to participate later in the year to begin reporting. Measures groups containing a measure with a 0% performance rate will not be counted as satisfactorily reporting the measures group. This document provides strategies and information to facilitate satisfactory reporting by each eligible professional who wishes to pursue this alternative.

The *2014 Physician Quality Reporting System (PQRS) Measures Groups Specifications Manual*, which can be found at <http://www.cms.gov/Medicare/Quality-Initiatives-Patient-Assessment-Instruments/PQRS/MeasuresCodes.html>, contains detailed descriptions for each quality measure within each measures group. Denominator coding has been modified from the original individual measure as specified by the measure developer to allow for implementation as a measures group. To get started, review the *2014 Physician Quality Reporting System (PQRS) Measures Groups Specifications* manual to determine if a particular measures group is applicable to Medicare services the practice provides.

**Note:** This document applies to PQRS for becoming 2014 incentive eligible as well as avoiding the 2016 payment adjustment. Those who report satisfactorily for the 2014 program year and receive an incentive will also avoid the 2016 PQRS payment adjustment. Additional information on how to avoid future PQRS payment adjustments can be found through supporting documentation on the CMS website at <http://www.cms.gov/Medicare/Quality-Initiatives-Patient-Assessment-Instruments/PQRS>.

Participants of programs that allow for PQRS credit, such as the Medicare Shared Savings Program (MSSP) or the Comprehensive Primary Care Initiative (CPCI) should refer to their respective program's guidance on PQRS.

## Measures Groups Participation Strategy:

1. Plan and implement processes within the practice to ensure satisfactory reporting of measures groups.
2. Become familiar with the registry-based submission method for satisfactory reporting of measures groups:
 

**20 Patient Sample Method via registry** – 12-month or 6-month reporting period

  - A participating eligible professional must report on all applicable measures within the selected measures group for a minimum sample of 20 unique patients, a majority (11) of which must be Medicare Part B FFS patients, who meet patient sample criteria for the measures group. If the eligible professional does not have at least 20 unique patients (a majority of which must be Medicare Part B FFS patients) who meet patient sample criteria for the measures group, the eligible professional will need to choose another measures group or choose another reporting option. Please refer to the *2014 Physician Quality Reporting System (PQRS) Participation Decision Tree* located in the *2014 PQRS Implementation Guide*.
  - All applicable measures within the group must be reported at least once for each patient within the sample population seen by the eligible professional during the reporting period (January 1 through December 31, 2014 OR July 1 through December 31, 2014) for each of the 20 unique patients in which a majority are Medicare Part B FFS patients.
  - Measures groups containing a measure with a 0% performance rate will not be counted as satisfactorily reporting the measures group.
3. Determine the patient sample based on the patient sample criteria. The following table contains patient sample criteria (common codes) that will qualify an eligible professional's patient for inclusion in the measures group analysis.

**Note:** International Classification of Diseases, Tenth Revision, Clinical Modification (ICD-10-CM) diagnosis codes have been incorporated into the *2014 PQRS Measures Group Specifications* manual. These codes are to be used for reporting purposes beginning 10/01/2014. Until the 10/01/2014 date, the ICD-10-CM codes are considered REFERENCE ONLY and ICD-9-CM codes should be used to determine eligible patients for the 2014 program year. Reporting ICD-10-CM will **not** count toward satisfactorily reporting the measures groups within the PQRS for 2014 until 10/01/2014. Reporting ICD-9-CM codes after 09/30/2014 will **not** count toward satisfactorily reporting the measures groups within the PQRS for 2014.

- G9234: I intend to report the Total Knee Replacement (TKR) Measures Group
- G9237: I intend to report the General Surgery Measures Group
- G9238: I intend to report the Optimizing Patient Exposure to Ionizing Radiation Measures Group Measures Group (OPEIR)

5. Report all applicable measures for the measure group on each denominator-eligible patient included in the patient sample for each individual eligible professional. Report the appropriate numerator option as instructed in the *2014 Physician Quality Reporting System (PQRS) Measures Groups Specifications* manual on all applicable measures within the measures group for each patient included in the sample population for each individual eligible professional. Only one instance of reporting for each patient included in the sample population will be used in PQRS analysis to calculate reporting and performance rates for each measure within a group.

The composite Quality Data Code (QDC) has been maintained for use by registries that utilize claims data. However, it is not necessary to submit this composite QDC for registry-based submissions. Refer to the *2014 Physician Quality Reporting System (PQRS) Measures Groups Specifications* manual for detailed instructions about how to report the numerator options for each of the measures groups at <http://www.cms.gov/Medicare/Quality-Initiatives-Patient-Assessment-Instruments/PQRS/MeasuresCodes.html>.

An eligible professional is only required to report numerator options on those individual measures in the measures group that meet the criteria (e.g., age, gender, etc.) according to the *2014 Physician Quality Reporting System (PQRS) Measures Groups Specifications* manual. For example, if an eligible professional is reporting the Preventive Care Measures Group for a 52-year old female patient, only 6 measures out of 9 apply. See the Preventive Measures Group Demographic Criteria table below.

Preventive Measures Group Demographic Criteria		
Age	Measures for Male Patients	Measures for Female Patients
