

2014 eCQM Flow
Measure Identifier: CMS148v3
NQF 0060: Hemoglobin A1c Test for Pediatric Patients

*Please refer to the specific section of the eCQM to identify the QDM data elements and associated value sets for use in reporting this eCQM.

Performance Rate =

SAMPLE CALCULATION:

Numerator (a = 9 patients) / Denominator (b = 10 patients) – Denominator Exclusions (N/A) – Denominator Exceptions (N/A) = 90.00%

2014 eCQM Flows
Measure Identifier: CMS148v3
NQF 0060: Hemoglobin A1c Test for Pediatric Patients

Please refer to the specific section of the eCQM to identify the QDM data elements and associated value sets for use in reporting this eCQM.

1. Start Initial Patient Population
2. Check Patient Characteristic Birthdate:
 - a. If the QDM data element, BIRTH DATE, is greater than or equal to 5 years and less than 17 years starts before start of measurement period equals NO, do not include in Initial Patient Population. Stop Processing.
 - b. If the QDM data element, BIRTH DATE, is greater than or equal to 5 years and less than 17 years starts before start of measurement period equals YES, proceed to check Diagnosis Active.
3. Check Diagnosis Active:
 - a. If Occurrence A of the QDM data element, DIABETES, starts before or during Most Recent Occurrence A of Encounter Performed QDM data element, DIABETES VISIT, during measurement period, but does not end before start of Occurrence A of Encounter Performed QDM data element DIABETES VISIT, equals Yes, proceed to check Encounter Performed.
 - b. If Occurrence A of the QDM data element, DIABETES, starts before or during Most Recent Occurrence A of Encounter Performed QDM data element, DIABETES VISIT, during measurement period, but does not end before start of Occurrence A of Encounter Performed QDM data element DIABETES VISIT equals No, do not include in Initial Patient Population. Stop Processing.
4. Check Encounter Performed:
 - a. If QDM data element, DIABETES VISIT, greater than or equal to 12 months starts before start of Occurrence A of QDM data element, DIABETES VISIT, equals Yes, include in the Initial Patient Population and continue on to the Denominator.
 - b. If QDM data element, DIABETES VISIT, greater than or equal to 12 months starts before start of Occurrence A of QDM data element, DIABETES VISIT, equals No, do not include in the Initial Patient Population. Stop Processing.
5. Start Denominator
 - a. Denominator equals the Initial Patient Population. Denominator is represented by letter B in the sample calculation listed at the end of this document. Letter B equals 10 patients in the sample calculation.
6. Start Numerator
7. Check Laboratory Test Result:
 - a. If the QDM data element, HBA1C LABORATORY TEST (result), during measurement period equals Yes, include in Numerator Count. Numerator is represented by letter A in the sample calculation listed at the end of this document. Letter A equals 9 patients in the sample calculation.

- b. If the QDM data element, HBA1C LABORATORY TEST (result), during measurement period equals No, include in the No/Missing Data Submitted count. Stop Processing.

SAMPLE CALCULATION:

Performance Rate =

Numerator (a= 9 patients)

÷

Denominator (b=10 patients) – *Denominator Exclusions (N/A)* – *Denominator Exceptions (N/A)*

= **90.00%**
