

HIPAA Eligibility Transaction System (HETS) User Interface (UI) R2013Q200 Release Summary

Document Version: 1-0 FINAL
Implementation Date: April 2013

R2013Q200 HETS User Interface (UI) Release Summary of Impact on Trading Partners

The purpose of this summary document is to inform users of upcoming changes to the HIPAA Eligibility Transaction System (HETS) User Interface (UI). The R2013Q200 HETS UI release will address modifying the display of data elements on the HETS UI application. Please refer to the following details for additional information.

Hospice/Home Health Tab

The HETS UI application is being modified to display each unique Hospice Period. Currently, a beneficiary's Hospice periods for the same Provider are combined into a single Hospice period when the termination date of the prior period is within one day of the effective date of the next period.

Effective with the R2013Q200 release, the HETS UI will return individual Hospice periods within the requested date/date range regardless of the number of days between periods.
