SUBJECT: Update to the Fiscal Year (FY) 2012 List of Codes Exempt from Reporting Present on Admission (POA)

EFFECTIVE DATE: October 1, 2011

IMPLEMENTATION DATE: July 2, 2012

I. GENERAL INFORMATION

A. Background: Section 5001(c) of Deficit Reduction Act of 2005 requires the Secretary to identify conditions that are: (a) high cost or high volume or both, (b) result in the assignment of a case to a Diagnosis Related Group (DRG) that has a higher payment when present as a secondary diagnosis, and (c) could reasonably have been prevented through the application of evidence-based guidelines.

For discharges occurring on or after October 1, 2008, hospitals will not receive additional payment for cases in which one of the selected conditions was not present on admission. That is, the case would be paid as though the secondary diagnosis was not present.

CMS also requires hospitals to report present on admission indicators for both primary and secondary diagnoses when submitting claims for discharges on or after October 1, 2007. Some diagnosis codes are exempt from POA reporting.

The purpose of this change request is to update the list of International Classification of Diseases, 9th Edition, Clinical Modification (ICD-9-CM) codes exempt from POA reporting.

B. Policy: The following ICD-9-CM codes have either been added to or deleted from the list of diagnosis codes exempt from reporting a POA indicator effective October 1, 2011. Hospitals that received reason code 34931 shall report a POA indicator of ‘W’ (should they choose) as a workaround until the POA exempt list is updated.

CMS has provided the converted ICD-10-CM codes for the additional codes only. Existing ICD-9-CM codes contained in the POA exempt list will be converted in a future release of the Fiscal Intermediary Shared System (FISS) conversion project.
