

# CJR PRO Performance Year 6 Data Submission Overview

For successful submission of Comprehensive Care for Joint Replacement (CJR) patient-reported outcomes (PRO) data in performance year (PY) 6, hospitals must submit post-operative data for patients who received elective primary total hip arthroplasty and/or total knee arthroplasty (THA/TKA) in PY 5 **and** pre-operative and risk variable data for patients undergoing an elective primary THA/TKA in PY 6.

All pre- and post-operative PRO data submitted in PY 6 should be entered into the **PY 6 CJR PRO Data Collection Template** and submitted using Managed File Transfer (MFT) between **July 1, 2022 and August 31, 2022**.

## POST-OPERATIVE DATA TO SUBMIT IN PY 6

Hospitals should submit post-operative data for procedures performed **during the PY 5 performance window** (July 1, 2019 to June 30, 2020).

- Data should be submitted for **at least 80% or at least 200** of the eligible primary THA/TKA procedures performed during PY 5.

Post-operative data must be submitted on **the same patients** for whom hospitals submitted pre-operative PRO and risk variable data in PY 5 so that:

- Hospitals have submitted **matched pre- and post-operative data** for at least 80% or at least 200 of the eligible primary THA/TKA procedures performed during the PY 5 timeframe, July 1, 2019 to June 30, 2020.

Post-operative data should be **collected 270 to 425 days after the procedure**.

## PRE-OPERATIVE DATA TO SUBMIT IN PY 6

Hospitals should submit pre-operative data for procedures performed **during the PY 6 performance window** (July 1, 2021 and June 30, 2022).

- Data should be submitted for **at least 80% or at least 300** of the eligible primary THA/TKA procedures performed during PY 6.

Hospitals are strongly encouraged to collect pre-operative and risk variable data for **more** procedures than the required minimum. Doing so will increase a hospital's chances of success:

- In PY 6 (in case a submitted procedure does not meet eligibility requirements).
- In PY 7 (in case a hospital is not able to obtain post-operative data for all procedures for which they submit pre-operative data in PY 6).

Pre-operative data should be **collected 90 to 0 days prior to the procedure**.

For more detailed information, please refer to the most recent versions of the following documents posted on the PY 6 CJR Resources on [CMMI Connect](#)-> Files -> CJR Connect -> CJR PRO Data Collection folder.
