## The CMS Innovation Center's Approach to Person-Centered Care Commitment to Patient Partnership

Across the Model Lifecycle

March 31, 2023

Center for Medicare and Medicaid Innovation

## Housekeeping and Logistics

### This session is being recorded. All participants will be muted besides those providing verbal comments.

**Closed captioning** is available on the bottom of your screen.

Please submit comments via the Q&A on the bottom of your screen. Your comment may be read aloud, unless you indicate to not share.

### Vision: What's to Come Over the Next 10 Years

## Partner to Achieve System Transformation

PARTNER TO ACHIEVE SYSTEM TRANSFORMATION

- Aim: Align priorities and policies across CMS and aggressively engage payers, purchasers, states, and beneficiaries to improve quality, achieve equitable outcomes, and reduce health care costs
- Impact on Beneficiaries: Closer engagement with beneficiaries, caregivers, and patient groups across the lifecycle of models will help ensure that models are meeting people's needs
- Measuring Progress:
  - 100% of new models, where applicable, that make multi-payer alignment available
  - 100% of models that engaged patients/beneficiaries, caregivers, and patient groups through the model lifecycle

**Opening Remarks** 

**Patient & Caregiver Strategy Update**

## Achieving Person-Centered Care in Model Development and Testing

Improve care quality for beneficiaries

AIMS

- Improve experience for patients and caregivers
- Drive better health care outcomes for beneficiaries

Operationalize Feedback

### **KEY 2023 FOCUS AREAS**

### PATIENT AND CAREGIVER INCLUSIVITY

Ensure that we are capturing the range of patient and caregiver perspectives reflective of the healthcare ecosystem

#### **PATIENT PARTNERSHIP**

Promote a partnership approach for understanding patient experiences for two-way communication, real world feedback, and ongoing improvement

#### TRANSPARENCY

Communicate how the Center is using patient and caregiver feedback to drive future programs and Center decision-making to address unmet needs

## How the Innovation Center Integrates Patients' Perspectives Across the Model Lifecycle

- How does the theory of action align with patients' priorities?
- How can model capture real-world patient experience?
- How does the model impact affordability for all patients?
- Will the model increase equitable access to health care across demographic and socioeconomic profiles?

### RECRUITMENT & RULEMAKING

177

- What kind of information about a model do patients want or need to understand?
- How can CMMI communicate the intended benefits of receiving care under the model to patients?

### APPLICATION

- Does model applicant distribution provide equitable access to care for all potential patients in the applicant's area?
- Are the model applicants equitably reaching patients?
- What communication tools are best for patients?

## IMPLEMENTATION & EVALUATION

- How are patients
   experiencing the changes in care delivery?
- How are patients experiencing changes in their health outcomes/quality of life?
- What is the impact of the model on the patient across the different populations served?
- How are we mitigating adverse impact on patients?

### SCALABILITY

- How will scaling the model affect patients?
- How do we ensure that the benefits that patients have gained are sustained once the model period ends?

## CMMI Strategy Roadmap: Models, Initiatives, and Engagement

# Journey Mapping Strategies at the Innovation Center

## Journey Mapping Strategies to Promote Patient Partnership & Improve Beneficiary Experience

### What Does Journey Mapping Look Like at the Innovation Center?

Understanding what patients and caregivers experience along the care continuum via interviews, focus groups, and other sources of experience information to identify gaps and opportunities for addressing those pain points in our models.

## Potential Uses for Journey Mapping Across the Model Lifecycle

	Concept & Design	<ul> <li><b>IDEATION AND DEVELOPMENT</b></li> <li>Understand patient and caregiver needs and broader equity considerations</li> <li>Identify gaps in meeting patient and caregiver needs</li> <li>Solicit feedback from patients, caregivers, and their advocates</li> </ul>
X	Solicit & Build	<ul> <li>PARTICIPANT RECRUITMENT AND APPLICATION</li> <li>Educate stakeholders on intended model impacts on patients and caregivers</li> <li>Enhance recruitment</li> <li>Build partnerships with patient organizations</li> </ul>
	Run, Evaluate, & Expand	<ul> <li>IMPLEMENTATION, EVALUATION, AND SCALABILITY</li> <li>Solicit real-time patient and caregiver feedback</li> <li>Identify opportunities for quality improvement and share best practices</li> <li>Identify strategies for patient and caregiver engagement</li> </ul>
		<ul> <li>Support models to improve patient/caregiver experience and outcomes</li> <li>Inform model evaluation</li> <li>Inform the development of new models and/or measures</li> </ul>

## Journey Mapping In Action: Understanding the Experiences of People with Serious Illness and Their Caregivers

### OVERVIEW

The Innovation Center is using journey mapping to capture the perspectives of **patients with serious illness and their caregivers**, understand challenges/gaps and identify opportunities for improving outcomes, experience, and equity

### **KEY TAKEAWAYS**

Caregivers and patients lack support (e.g., timely, comprehensive, individualized care planning) early in the serious illness care journey, creating significant, downstream effects on their experience.

The caregiver's role is integral to better outcomes. However, many people living with serious illness may not have a caregiver, and often caregivers lack support.

Inadequate support for family caregivers and the lack of a caregiver for some patients exacerbates health disparities.

Clinical guidance for serious illness care, including definitions of various care programs and providers, lack clarity.

## What We Are Hearing from Patients with Serious Illness, Their Caregivers, and Their Advocates

- Monitor value-based purchasing for unintended consequences
- Break down barriers for receiving hospice/palliative care
- Create clear, consistent definitions for concepts and services related to serious illness
- Increase access to respite care and other services to reduce caregiver burden

• Leverage technology to enable and better care coordination

patients and caregivers

• Enhance provider education on culturally appropriate discussions with patients and their caregivers

- Improve communication about model
   development
- Engage patients, caregivers, and their advocates in the design of programs
- Solicit input from patients and caregivers from historically marginalized and underrepresented populations
- Include patients, caregivers, and their advocates in the governance of model participant organizations

**Opening Remarks** 

Patient & Caregiver Strategy Update

Discussion

Closing

## Our Guest Speakers

### **Edith Clifton**

Board Member and Chair of SEMATAC Steering Committee, Coalition to Transform Advanced Care (C-TAC) **Aza Nedhari** Co-Founder & Executive Director, Mamatoto Village

### Erin Mackay

Managing Director for Health Justice, National Partnership for Women & Families

### Libby Hoy

Founder & CEO, Patient & Family Centered Care Partners (PFCCpartners)

### **Dennis Heaphy**

Health Justice Advocate and Researcher, Disability Policy Consortium

Discussion Questions In relation to the following areas including...

- Serious Illness
- Primary and Specialty Care Coordination
- Maternal Health

1) What are patient and caregiver <u>needs and goals</u> around access, coordination, care experience, partnership, and communication?

2) What recommendations do you have for **<u>building</u> <u>engagement and partnership</u>** at the patient and community level? What are the best ways to identify and engage the trusted partners/organizations at the community level?

3) What kinds of <u>CMS supports</u> would accelerate your work?

## Poll

### QUESTION

What are the top two priorities that you would like to see addressed by the Innovation Center?

- A. Equitable access to care and support services
- B. Overall coordination of care by a primary care provider/team member
- C. Better two-way communication between providers and patients/caregivers
- D. Better coordination and communication between primary care providers and specialists
- E. More collaborative care planning and decision-making with patients and caregivers
- F. Other (write in your answer using the Q&A function)
