Table 1 specifies the standard record format to be used for electronic cost reporting. Each electronic cost report submission (file) has three types of records. The first group (type one records) contains information for identifying, processing, and resolving problems. The text used throughout the cost report for variable line labels (e.g., Worksheet A) and variable column headers (Worksheet B-1) is included in the type two records. Refer to Table 5 for cost center coding. The data detailed in Table 3 are identified as type three records. The encryption coding at the end of the file, records 1, 1.01, and 1.02, are type 4 records.

The medium for transferring cost reports submitted electronically to contractors is CD, flash drive, or contractor-approved form such as electronic mail, or secured website. The character set must be ASCII. You must seek approval from your *contractor* regarding alternate methods of submission to ensure that the method of transmission is acceptable. An ECR file sent electronically must be a compressed or self-extracting file.

The following are requirements for all records:

- 1. All alpha characters must be in upper case.
- 2. For micro systems, the end of record indicator must be a carriage return and line feed, in that sequence.
- 3. No record may exceed 60 characters.
- 4. The "Usage" column in all tables specifies the format of each data item as follows:
 - *Numeric, greater than or equal to zero.*
 - *Numeric, may be either greater than or less than zero.*
 - *Numeric, greater than zero, with x or fewer significant digits to the left of* 9(x).9(y)the decimal point, a decimal point, and exactly y digits to the right of the decimal point.
 - X Character.

This is a cost report file submitted by CCN 01P002 for the period from October 1, 2014 (2014274) through September 30, 2015 (2015273). It is filed on the Form CMS-216-94. It is prepared with vendor number A99's PC based system, version number 1. Position 38 changes with each new test case and/or re-approval and is an alpha character. Positions 39 and 40 will remain constant for approvals issued after the first test case. This file is prepared by the OPO on

> November 16, 2015 (2015320). The electronic cost report specifications, dated October 1, 2014 (2014274), are used to prepare this file.

FILE NAMING CONVENTION

Name each cost report *ECR* file in the following manner:

- OPNNPNNN.YYL*C*, where
 1. OP (OPO *and Histocompatibility Lab e*lectronic *c*ost *r*eport) is constant;
- NNXXNN is the 6 digit CCN consisting of two digits and a P, followed by three digits for an OPO or an OPO based Tissue Typing Lab, and two digits and an HL, followed by two digits for a Histocompatibility Lab.
- YY is the year in which the cost reporting period ends; and
- L is a character variable (A-Z) to enable separate identification of files from OPO/HL with two or more cost reporting periods ending in the same calendar year.
- C is the number of times this original cost report is being filed.

Name each cost report PI file in the following manner:

PINNNNNN.YYLC, where

- PI (Print Image) is constant;
- NNXXNN is the 6 digit CMS Certification Number;
- YY is the year in which the provider's cost reporting period ends; and
- L is a character variable (A -Z) to enable separate identification of files from OPOs with two or more cost reporting periods ending in the same calendar year.
- C is the number of times this original cost report is being filed.

| b. | Column Headings Statistical Basis & Code | 10 | X | 21-30 | Alphanumeric, left justified |

The type 2 records contain both the text that appears on the pre-printed cost report and any labels added by the preparer. Of these, there are three groups: (1) Worksheet A cost center names (labels); (2) column headings for stepdown entries; and (3) other text appearing in various places throughout the cost report.

A Worksheet A cost center label must be furnished for every cost center with cost or charge data anywhere in the cost report. The line and subline numbers for each label must be the same as the line and subline numbers of the corresponding cost center on Worksheet A. The columns and subcolumn numbers are always set to zero.

33-506 Rev. 6

Column headings for the General Service cost centers on Worksheets B and B-1 are supplied once. They consist of one to three records. Each statistical basis shown on Worksheet B-1 is also to be reported. The statistical basis consists of one or two records (lines 4-5). Statistical basis code is supplied only to Worksheet B-1 columns and is recorded as line 6. The statistical code must agree with the statistical bases indicated on lines 4 and 5, i.e., code 1 = square footage, code 2 = dollar value, and code 3 = all others. Refer to Table 2 for the special worksheet identifier to be used with column headings and statistical basis, and to Table 3 for line and column references.

The following type 2 cost center descriptions are to be used for all Worksheet A standard cost center lines.

RECORD NAME: Type 4 Records - File Encryption

This type 4 record consists of 3 records: 1, 1.01, and 1.02. These records are created at the point in which the ECR file has been completed and saved to disk and insures the integrity of the file.

ELECTRONIC REPORTING SPECIFICATIONS FOR FORM CMS-216-94 TABLE 2 - WORKSHEET INDICATORS

This table contains the worksheet indicators that are used for electronic cost reporting. A worksheet indicator is provided for only those worksheets for which data are to be provided.

The worksheet indicator consists of seven digits in positions 2-8 of the record identifier. The first two digits of the worksheet indicator (positions 2 and 3 of the record identifier) always show the worksheet. The third digit of the worksheet indicator (position 4 of the record identifier) is used to identify Supplemental Worksheet A-5-1. For Worksheets A-4 and A-5, if there is a need for extra lines on multiple worksheets, the fifth and sixth digits of the worksheet indicator (positions 6 and 7 of the record identifier) identify the page number. The seventh digit of the worksheet indicator (position 8 of the record identifier) represents the worksheet or worksheet part.

ELECTRONIC REPORTING SPECIFICATIONS FOR FORM CMS-216-94 TABLE 2 - WORKSHEET INDICATORS

FOOTNOTES:

(a) Multiple Worksheets for Reclassifications Before Stepdown

The fifth and sixth digits of the worksheet indicator (positions 6 and 7 of the record) are numeric from 01-99 to accommodate reports with more lines on Worksheets A-4. For reports that do not need additional worksheets, the default is 01. For reports that do need additional worksheets, the first page is numbered 01. The number for each additional page of the worksheet is incremented by 1.

(b) Multiple Worksheets A-2

This worksheet is used for kidney, liver, heart, pancreas, lung and other organ acquisition costs. The fourth digit of the worksheet indicator (position 5 of the record) is an alpha character of K for kidney, L for liver, H for heart, P for pancreas, U for lung and O for other. When more than one "other organ" is identified the 7th digit of the worksheet indicator will be (1 to 9). The first "other organ" indicator will always be zero. Two or more "other organ" indicators will be (1 to 9) (i.e. A200000, A200001).

This table identifies those data elements necessary to calculate an OPO or Lab cost report. It also identifies some figures from a completed cost report. These calculated fields (e.g., Worksheet B, column 11) are needed to verify the mathematical accuracy of the raw data elements and to isolate differences between the file submitted by the OPO or Lab complex and the report produced by the fiscal intermediary. Where an adjustment is made, that record must be present in the electronic data file. For explanations of the adjustments required, refer to the cost report instructions.

Consistency in line numbering (and column numbering for general service cost centers) for each cost center is essential. The sequence of some cost centers does change among worksheets.

Table 3 refers to the data elements needed from a standard cost report. When a standard line is subscripted, the subscripted lines must be numbered sequentially with the first subline number displayed as "01" or "1" (with a space preceding the 1) in field locations 14-15. It is unacceptable to format in a series of 10, 20, or skip subline numbers (i.e., 01, 03), except for skipping subline numbers for prior year cost center(s) deleted in the current period or initially created cost center(s) no longer in existence after cost finding. Exceptions are specified in this manual. For Other (specify) lines, i.e., Worksheet settlement series, all subscripted lines should be in sequence and consecutively numbered beginning with subscripted line number 01. Automated systems should reorder these numbers where providers skip or delete a line in the series.

Drop all records with zero values from the file. Any record absent from a file is treated as if it were zero.

All numeric values are presumed positive. Leading minus signs may only appear in data with values less than zero that are specified in Table 3 with a usage of "-9". Amounts that are within preprinted parentheses on the worksheets, indicating the reduction of another number, are reported as positive values.
