

CMS Manual System	Department of Health & Human Services (DHHS)
Pub 100-20 One-Time Notification	Centers for Medicare & Medicaid Services (CMS)
Transmittal 907	Date: June 14, 2011
	Change Request 7409

Transmittal 873, dated April 15, 2011 is being rescinded and replaced by Transmittal 907 Dated June 14, 2011. This Change Request (CR) replaces the year 2012 with 2011 in the Policy section, replaces the words “Edits Spreadsheet” with “Flat File” in cell B3 of Attachment 1 and cell B1 of Attachment 2, corrects the spelling of “alternate” in the header of Attachment 1 and Attachment 3, and corrects data omissions and typographical errors (which are dated 5-25-11 in the change log) in Attachment 1 and Attachment 2. All other information remains the same.

SUBJECT: Flat File Update for Institutional Claim Transaction 837I, Professional Claim Transaction 837P, and Claim Payment/Advice Transaction 835

I. SUMMARY OF CHANGES: This Change Request (CR) instructs contractors to update the Flat Files for Institutional Claims (837I), Professional Claims (837P), and Claim Payment/Advice (835) transactions in versions 5010A2 and 5010A1 respectively to accommodate for fractional units in the CAS segment.

EFFECTIVE DATE: July 1, 2011

IMPLEMENTATION DATE: July 5, 2011

Disclaimer for manual changes only: The revision date and transmittal number apply only to red italicized material. Any other material was previously published and remains unchanged. However, if this revision contains a table of contents, you will receive the new/revised information only, and not the entire table of contents.

II. CHANGES IN MANUAL INSTRUCTIONS: (N/A if manual is not updated)

R=REVISED, N=NEW, D=DELETED-Only One Per Row.

R/N/D	CHAPTER / SECTION / SUBSECTION / TITLE
N/A	

III. FUNDING:

For Fiscal Intermediaries (FIs), Regional Home Health Intermediaries (RHHIs) and/or Carriers:
Not Applicable.

For Medicare Administrative Contractors (MACs):

The Medicare Administrative Contractor is hereby advised that this constitutes technical direction as defined in your contract. CMS does not construe this as a change to the MAC Statement of Work. The contractor is not obligated to incur costs in excess of the amounts allotted in your contract unless and until specifically authorized by the Contracting Officer. If the contractor considers anything provided, as described above, to be outside the current scope of work, the contractor shall withhold performance on the part(s) in question and immediately notify the Contracting Officer, in writing or by e-mail, and request formal directions regarding continued performance requirements.

-------------	------------------	---------------------	----------------------

Transmittal 873, dated April 15, 2011 is being rescinded and replaced by Transmittal 907 Dated June 14, 2011. This Change Request (CR) replaces the year 2012 with 2011 in the Policy section, replaces the words “Edits Spreadsheet” with “Flat File” in cell B3 of Attachment 1 and cell B1 of Attachment 2, corrects the spelling of “alternate” in the header of Attachment 1 and Attachment 3, and corrects data omissions and typographical errors (which are dated 5-25-11 in the change log) in Attachment 1 and Attachment 2. All other information remains the same.

SUBJECT: Flat File Update for Institutional Claim Transaction 837I, Professional Claim Transaction 837P, and Claim Payment/Advice Transaction 835

Effective Date: July 1, 2011

Implementation Date: July 5, 2011

I. GENERAL INFORMATION

A. Background: Change Request (CR) 7202 – Transmittal 2090– published on November 10, 2010 instructed contractors to implement changes per its attached flat files for X12 transactions 837I, 837P, and 835. It has been brought to our attention that a specific segment (CAS) in all three flat files needs to be updated to accommodate fractional units. A recently implemented CR (7065) instructed contractors to accept and report fractional units for Ambulance services, and the flat files attached to CR 7202 for Institutional and Professional Claims and Remittance Advice do not support fractional units in the appropriate CAS fields. Contractors are instructed to implement the updated flat files as attached to this CR.

For the 835 transaction, the 4010A1 flat file for Part A will not be updated and will continue to report the whole units although the payment may be based on fractional units. The 4010A1 837I CAS flat file units fields and the 4010A1 837P CAS flat file units fields also will not be updated. Providers have already been notified through CR 7065’s Medicare Learning Network article that was revised on February 17, 2011 which now has the following note:

NOTE: The remittance advice for provider-based ambulance services will indicate whole units, rather than fractions, for providers that have not transitioned to the 5010 format. However, the payment reported on the remittance advice may be paid based off fractional mileages as reported on the institutional claim.

Estimates for this CR should include a breakdown as part of the Level of Effort (LOE) response, utilizing the following table to be included in the “Estimate-Specific Comments” portion of the LOE template, to follow the Investment Lifecycle Phases.

Investment Lifecycle Phase	Total Hours	Total Cost
Pre-Implementation/CR Review		
Design & Engineering Phase		
Development Phase		
Testing Phase		
Implementation Phase		

Pre-Implementation/CR Review costs will not be funded under the unique funding situation for the 5010/D.0 project, but instead out of the MAC’s pot of hours for Pre-Implementation/CR Review.

NOTE: Shared Systems shall charge their hours under the July HIPAA FIX CR 7292.

B. Policy: The Administrative Simplification provisions of HIPAA Regulations require the Secretary of HHS to adopt standard electronic transactions and code sets for administrative health care transactions. The Secretary may also modify these standards periodically. Centers for Medicare and Medicaid Services (CMS) will implement the new HIPAA standard (X12N version 5010) and any modifications and be ready for testing by January 1, 2011 and for production by April 1, 2011.

II. BUSINESS REQUIREMENTS TABLE

Use "Shall" to denote a mandatory requirement

Number	Requirement	Responsibility (place an "X" in each applicable column)									
		A / B M A C	D M E M A C	F I	C A R R I E R	R H I	Shared-System Maintainers				OTHER
					F I S S	M C S	V M S	C W F			
7409.1	Contractors shall implement the 837I flat file – Attachment 1	X					X				COBC /CEM
7409.2	Contractors shall implement the 837P flat file – Attachment 2	X						X	X		COBC /CEDI /CEM
7409.3	Contractors shall implement the 835 flat file – Attachment 3	X					X	X	X		CEDI CEM
7409.4	VMS shall update Medicare Remit Easy Print (MREP) per Attachment 3.								X		
7409.5	FISS shall update P.C. Print software per Attachment 3.						X				
7409.6	Shared Systems shall charge their hours under the July HIPAA FIX CR 7292. Any additional hours, if needed, shall be charged to October HIPAA FIX CR 7375.						X	X	X		
7409.7	FISS shall modify appropriately to move 5010 837I data element SV205 9(6)V9 to the claim record units field as a decimal value when revenue code is 0540 and as a whole number 9(7) otherwise.						X				
7409.8	FISS shall move the claim record units to the SVD05 as a decimal 9(6)V9 when creating the 5010 837I COB file.						X				

III. PROVIDER EDUCATION TABLE

Number	Requirement	Responsibility (place an "X" in each applicable column)									
		A / B M A C	D M E M A C	F I M A C	C A R R I E R	R H I I S S	Shared-System Maintainers				OTH ER

	None.										

IV. SUPPORTING INFORMATION

Section A: For any recommendations and supporting information associated with listed requirements, use the box below: N/A

Use "Should" to denote a recommendation.

X-Ref Requirement Number	Recommendations or other supporting information:

Section B: For all other recommendations and supporting information, use this space: N/A

V. CONTACTS

Pre-Implementation Contact(s): Matthew Klischer Matthew.Klischer@cms.hhs.gov 410.786.7488 for 837I

Pre-Implementation Contact(s): Brian Reitz Brian.Reitz@cms.hhs.gov 410.786.5001 for 837P

Pre-Implementation Contact(s): Sumita Sen Sumita.Sen@cms.hhs.gov 410.786.5755 for 835

Post-Implementation Contact(s): Contact your Contracting Officer's Technical Representative (COTR) or Contractor Manager, as applicable.

VI. FUNDING

Section A: For *Fiscal Intermediaries (FIs)*, *Regional Home Health Intermediaries (RHHIs)*, and/or *Carriers*:

N/A

Section B: For *Medicare Administrative Contractors (MACs)*, include the following statement:

The Medicare Administrative Contractor is hereby advised that this constitutes technical direction as defined in your contract. CMS does not construe this as a change to the MAC Statement of Work. The contractor is not obligated to incur costs in excess of the amounts allotted in your contract unless and until specifically authorized by the Contracting Officer. If the contractor considers anything provided, as described above, to be

outside the current scope of work, the contractor shall withhold performance on the part(s) in question and immediately notify the Contracting Officer, in writing or by e-mail, and request formal directions regarding continued performance requirements.

03/23/2011	2430	CAS19	added redefines	CR7065
05/25/2011	2430	SVD05	updated start position	N/A
05/25/2011	2430	SVD06	updated start position	N/A

Element Identifier	This field contains the segment or element identifier
Description	This field indicates the element name or the industry name describing the element
COBOL PIC	This field indicates the the COBOL picture clause, which is an element in programming language that is used to indicate the item characteristics and size of the numeric data element.
ID	This field indicates the attributes of the data element (ie. ID, AN, R, TM, and DT) see rows 5-9 for definitions of each type
ID (identifier)	An identifier data element always contains a value from a predefined list of codes that is maintained by the ASC Committee or some other body recognized by the Committee. Trailing spaces must be suppressed unless they are necessary to satisfy a minimum length. An identifier is always left justified. The representation for this data element type is "ID".
AN (string)	A string data element is a sequence of any characters from the basic or extended character sets. The string data element must contain at least one non-space character. The significant characters shall be left justified. Leading spaces, when they occur, are presumed to be significant characters. Trailing spaces must be suppressed unless they are necessary to satisfy a minimum length. The representation for this data element type is "AN".
R (decimal)	A decimal data element may contain an explicit decimal point and is used for numeric values that have a varying number of decimal positions. This data element type is represented as "R". The decimal point always appears in the character stream if the decimal point is at any place other than the right end. If the value is an integer (decimal point at the right end), the decimal point must be omitted. For negative values, the leading minus sign (-) is used. Absence of a sign indicates a positive value. The plus sign (+) must not be transmitted. Leading zeros must be suppressed unless necessary to satisfy a minimum length requirement. Trailing zeros following the decimal point must be suppressed unless necessary to indicate precision. The use of triad separators (for example commas in 1,000,000) is expressly prohibited. The length of a decimal type element does not include the optional leading sign or decimal point.
TM (time)	A time data element is used to express the ISO standard time HHMMSSd.d format in which HH is the hour for a 24 hour clock (00-23), MM is the minute (00-59), SS is the second (00-59), and d.d is decimal seconds. The representation for this data element type is "TM". The length of the data element determines the format of the transmitted time.
DT (date)	A date data element is used to express the standard date is either YYMMDD or CCYYMMDD format in which CC is the first two digits of the calendar year, YY is the last two digits of the calendar year, MM is the month (01-12), and DD is the day in the month (01-31). The representation for this data element type is "DT".
Min. Max.	This field identifies the minimum and maximum size of a data element (ie. A value of 1-2 means the element can be either 1 byte or 2 bytes. A value of 5-5 means that the element must be 5 bytes).
Usage Reg.	The field indicates whether a segment or element is REQUIRED, SITUATIONAL, or NOT USED
Loop	This field contains the loop ID, if applicable.
Loop Repeat	This field contains the value indicating the number of times the loop may be repeated.
Values	This field contains the value or values which can be submitted in this element.
Loop ID	Loop ID (6 bytes) - This field contain positions 1 through 6 of the 18 byte record key used to identify the loop when used as a record key in a computer program (ie. "2010AA"). Left justify and space fill. Note: the total size of the record key is 18 bytes.
Loop Seq.	Loop Seq. (4 bytes) - This field contain positions 7 through 10 of the 18 byte record key used to identify the numeric sequence of the loop when used as a record key in a computer program (ie. "0001"). Right justify and zero fill. Note: the total size of the record key is 18 bytes.
Seg. ID	Seq. ID (4 bytes) - This field contains positions 11 through 14 of the 18 byte record key used to identify the segment when used as a record key in a computer program (ie."REF "). Left justify and space fill. Note: the total size of the record key is 18 bytes.

Seg. Seq.	Seg. Seq.(4 bytes) - This field contains positions 15 through 18 of the 18 byte record key used to identify the numeric sequence of the segment when used as a record key in a computer program (ie. "0001"). Right justify and zero fill. Note: the total size of the record key is 18 bytes.
Start	This field shows the data element's starting position within the record.
Length	This field shows the data element's length with the record.
Record Repeat	If the record repeats, this field indicates the number of times the record may repeat.

Notes:

1. The first STC was generated by the CEM for claim being out of balance. This is not found by the COTS translator.
2. Second and third STC were generated from the STC records passed to the CEM from the COTS translator.

IEA02	Interchange Control Number	9(9)	N0	9-9	R						24	9			

Element Identifier	This field contains the segment or element identifier
Description	This field indicates the element name or the industry name describing the element
COBOL PIC	This field indicates the the COBOL picture clause, which is an element in programming language that is used to indicate the item characteristics and size of the numeric data element.
ID	This field indicates the attributes of the data element (ie. ID, AN, R, TM, and DT) see rows 5-9 for definitions of each type
ID (identifier)	An identifier data element always contains a value from a predefined list of codes that is maintained by the ASC Committee or some other body recognized by the Committee. Trailing spaces must be suppressed unless they are necessary to satisfy a minimum length. An identifier is always left justified. The representation for this data element type is "ID".
AN (string)	A string data element is a sequence of any characters from the basic or extended character sets. The string data element must contain at least one non-space character. The significant characters shall be left justified. Leading spaces, when they occur, are presumed to be significant characters. Trailing spaces must be suppressed unless they are necessary to satisfy a minimum length. The representation for this data element type is "AN".
R (decimal)	A decimal data element may contain an explicit decimal point and is used for numeric values that have a varying number of decimal positions. This data element type is represented as "R". The decimal point always appears in the character stream if the decimal point is at any place other than the right end. If the value is an integer (decimal point at the right end), the decimal point must be omitted. For negative values, the leading minus sign (-) is used. Absence of a sign indicates a positive value. The plus sign (+) must not be transmitted. Leading zeros must be suppressed unless necessary to satisfy a minimum length requirement. Trailing zeros following the decimal point must be suppressed unless necessary to indicate precision. The use of triad separators (for example commas in 1,000,000) is expressly prohibited. The length of a decimal type element does not include the optional leading sign or decimal point.
TM (time)	A time data element is used to express the ISO standard time HHMMSSd.d format in which HH is the hour for a 24 hour clock (00-23), MM is the minute (00-59), SS is the second (00-59), and d.d is decimal seconds. The representation for this data element type is "TM". The length of the data element determines the format of the transmitted time.
DT (date)	A date data element is used to express the standard date is either YYMMDD or CCYYMMDD format in which CC is the first two digits of the calendar year, YY is the last two digits of the calendar year, MM is the month (01-12), and DD is the day in the month (01-31). The representation for this data element type is "DT".

Min. Max.	This field identifies the minimum and maximum size of a data element (ie. A value of 1-2 means the element can be either 1 byte or 2 bytes. A value of 5-5 means that the element must be 5 bytes)
Usage Reg.	The field indicates whether a segment or element is REQUIRED, SITUATIONAL, or NOT USED
Loop	This field contains the loop ID, if applicable.
Loop Repeat	This field contains the value indicating the number of times the loop may be repeated.
Values	This field contains the value or values which can be submitted in this element.
Loop ID	Loop ID (6 bytes) - This field contain positions 1 through 6 of the 18 byte record key used to identify the loop when used as a record key in a computer program (ie. "2010AA"). Left justify and space fill. Note: the total size of the record key is 18 bytes.
Loop Seq.	Loop Seq. (4 bytes) - This field contain positions 7 through 10 of the 18 byte record key used to identify the numeric sequence of the loop when used as a record key in a computer program (ie. "0001"). Right justify and zero fill. Note: the total size of the record key is 18 bytes.
Seg. ID	Seq. ID (4 bytes) - This field contains positions 11 through 14 of the 18 byte record key used to identify the segment when used as a record key in a computer program (ie."REF "). Left justify and space fill. Note: the total size of the record key is 18 bytes.
Seg. Seq.	Seg. Seq.(4 bytes) - This field contains positions 15 through 18 of the 18 byte record key used to identify the numeric sequence of the segment when used as a record key in a computer program (ie. "0001"). Right justify and zero fill. Note: the total size of the record key is 18 bytes.
Start	This field shows the data element's starting position within the record.
Length	This field shows the data element's length with the record.
Record Repeat	If the record repeats, this field indicates the number of times the record may repeat.

09/09/2010 Changed value in GS08 to 005010X222A1
09/09/2010 Changed 2010BA NM108 usage from R to S
09/09/2010 Changed 2010BA NM109 usage from R to S
09/09/2010 Changed 2010BA N4 usage from R to S
09/09/2010 Changed 2010BB N4 usage from R to S
09/09/2010 Added new 2010CA REF segment Property & Casualty Patient Identifier
09/09/2010 Changed 2330A N4 usage from R to S
09/09/2010 Changed 2330B N4 usage from R to S
09/09/2010 Added qualifiers EN, EO, HI, UK, UP to LIN02
09/09/2010 Changed 2420E N4 usage from R to S
10/20/10 Updated +PR and +CR REF segments per copybook concept

3/24/11 Updated COBOL picture clauses for 2320 CAS04, CAS07, CAS10, CAS13, CAS16, & CAS19 to S9(7)v999

3/24/11 Updated COBOL picture clauses for 2430 CAS04, CAS07, CAS10, CAS13, CAS16, & CAS19 to S9(7)v999
Added REF04-1, REF04-2, REF04-3, REF04-4, REF04-5, and REF04-6 to the 2010CA REF PROPERTY AND

5/25/11 CASUALTY PATIENT IDENTIFIER per copybook concept

Notes:

1. The first STC was generated by the CEM for claim being out of balance. This is not found by the COTS translator.
2. Second and third STC were generated from the STC records passed to the CEM from the COTS translator.

835 Flat File Change Log

<u>Date</u>	<u>Loop</u>	<u>Data Element</u>	<u>Change</u>	<u>Reason for Change</u>
6/9/08	-	ISA 11	1. Change Description 2. No Value	Changed in 5010. Repetition Separator is a delimiter and not a data element
6/9/08	-	GS08	One line instead of two	
6/9/08	-	PLB03-2 PLB05-2 PLB07-2 PLB09-2 PLB11-2 PLB13-2	Add Treasury Telephone #	Providers are to call the Treasury directly if there is any Treasury withholding for Federal Debt
6/30/08	2000	TS301	Min-Max changed to 1-50 from 1--60	Per IG Max is 50
8/5/08	2100	MOA03-MOA07	Min-Max changed to 1-50 from 1--30	Per IG Max is 50
9/17/08	2100	MOA03-MOA07 and MIA20-MIA23	Pic Clause X(5) added	To reflect Medicare decision
10/28/08		ISA12	005010	To reflect current version
10/28/08	2100/2110	All REF02 fields are same length	50	Consistency
10/28/08	2100/2110	All PER 04/06/08 are same length	256	Consistency
10/28/08		LX01 values added to cover MCS	Added 1 and 0	Correction per MCS
10/28/08	2100	CLP 06	"MB" added as a possible value	To cover Part B
10/28/08	2110	CLP 08	The description changed	To cover Part B
1/23/2009		ISA12	00501 from 005010	Field length is only 5
1/23/2009		BPR05-BPR16	Values in the "Start" column changed	To reflect the field lengths correctly
1/23/2009	1000A	PER - Payer Web Site	Values added under field length column for PER02, PER05, PER06, PER07, and PER08 although they are not used	To be consistent with other PER segments within 835
1/23/2009	2100	CLP07	Field length changed to 50 from 30	Max is 50 in 5010
1/23/2009	2100	CLP08-CLP13	Values in the "Start" column changed	As a result of changing the field length for CLP05 to 50
1/23/2009		PLB12-PLB14	Values in the "Start" column changed	To reflect the field lengths correctly
2/9/2009	1000A	PER - Payer Web Site/PER01	Value changed from 1C to IC	To reflect the value correctly per TR3
7/21/09	2100	Inpatient Adjudication Information	Length changed from 18 and 15 to 15 and 18 for MIA01 and MIA02 respectively.	To follow the max length in the TR3
4/13/2010		ST03	Added ST03 - a Not Used field	To be consistent with other segments within 835
4/13/2010		TRN04	Length changed from 30 to 50	TR3 has expanded this field size to 50
5/7/2010		TRN04	The length updated to 50	
7/27/2010	2000	TS216	COBOL PIC clause - S9(3)V9999- added	It was missing
7/27/2010		PLB03-1/PLB05-1/PLB07-1/PLB09-1/PLB11-1/PLB13-1	Qualifier TL added - for HITECH recoupment per OFM request	TL - assigned for HITECH related adjustment
7/27/2010			Note for amount field changed	To be consistent with other flat files

Element Identifier	This field contains the segment or element identifier
Description	This field indicates the element name or the industry name describing the element
COBOL PIC	This field indicates the the COBOL picture clause, which is an element in programming language that is used to indicate the item characteristics and size of the numeric data element.
ID	This field indicates the attributes of the data element (ie. ID, AN, R, TM, and DT) see rows 5-9 for definitions of each type
ID (identifier)	An identifier data element always contains a value from a predefined list of codes that is maintained by the ASC Committee or some other body recognized by the Committee. Trailing spaces must be suppressed unless they are necessary to satisfy a minimum length. An identifier is always left justified. The representation for this data element type is "ID".
AN (string)	A string data element is a sequence of any characters from the basic or extended character sets. The string data element must contain at least one non-space character. The significant characters shall be left justified. Leading spaces, when they occur, are presumed to be significant characters. Trailing spaces must be suppressed unless they are necessary to satisfy a minimum length. The representation for this data element type is "AN".
R (decimal)	A decimal data element may contain an explicit decimal point and is used for numeric values that have a varying number of decimal positions. This data element type is represented as "R". The decimal point always appears in the character stream if the decimal point is at any place other than the right end. If the value is an integer (decimal point at the right end), the decimal point must be omitted. For negative values, the leading minus sign (-) is used. Absence of a sign indicates a positive value. The plus sign (+) must not be transmitted. Leading zeros must be suppressed unless necessary to satisfy a minimum length requirement. Trailing zeros following the decimal point must be suppressed unless necessary to indicate precision. The use of triad separators (for example commas in 1,000,000) is expressly prohibited. The length of a decimal type element does not include the optional leading sign or decimal point.
TM (time)	A time data element is used to express the ISO standard time HHMMSSd.d format in which HH is the hour for a 24 hour clock (00-23), MM is the minute (00-59), SS is the second (00-59), and d.d is decimal seconds. The representation for this data element type is "TM". The length of the data element determines the format of the transmitted time.
DT (date)	A date data element is used to express the standard date is either YYMMDD or CCYYMMDD format in which CC is the first two digits of the calendar year, YY is the last two digits of the calendar year, MM is the month (01-12), and DD is the day in the month (01-31). The representation for this data element type is "DT".
Min. Max.	This field identifies the minimum and maximum size of a data element (ie. A value of 1-2 means the element can be either 1 byte or 2 bytes. A value of 5-5 means that the element must be 5 bytes).
Usage Reg.	The field indicates whether a segment or element is REQUIRED, SITUATIONAL, or NOT USED
Loop	This field contains the loop ID, if applicable.
Loop Repeat	This field contains the value indicating the number of times the loop may be repeated.
Values	This field contains the value or values which can be submitted in this element.
Loop ID	Loop ID (6 bytes) - This field contain positions 1 through 6 of the 18 byte record key used to identify the loop when used as a record key in a computer program (ie. "2010AA"). Left justify and space fill. Note: the total size of the record key is 18 bytes.
Loop Seq.	Loop Seq. (4 bytes) - This field contain positions 7 through 10 of the 18 byte record key used to identify the numeric sequence of the loop when used as a record key in a computer program (ie. "0001"). Right justify and zero fill. Note: the total size of the record key is 18 bytes.
Seg. ID	Seq. ID (4 bytes) - This field contains positions 11 through 14 of the 18 byte record key used to identify the segment when used as a record key in a computer program (ie. "REF "). Left justify and space fill. Note: the total size of the record key is 18 bytes.
Seg. Seq.	Seg. Seq.(4 bytes) - This field contains positions 15 through 18 of the 18 byte record key used to identify the numeric sequence of the segment when used as a record key in a computer program (ie. "0001"). Right justify and zero fill. Note: the total size of the record key is 18 bytes.
Start	This field shows the data element's starting position within the record.
Length	This field shows the data element's length with the record.
Record Repeat	If the record repeats, this field indicates the number of times the record may repeat.
