## 2011-2012 Eligible Professional Clinical Quality Measures (CQMs)

Core CQMs: Report All 3 Measures *

| NQF \# | Title | Description |
| :--- | :--- | :--- |
| NQF 0013 | Hypertension: Blood Pressure <br> Measurement | Percentage of patient visits for patients aged 18 <br> years and older with a diagnosis of hypertension <br> who has been seen for at least 2 office visits, with <br> blood pressure (BP) recorded. |
| NQF 0028 | Preventive Care and Screening <br> Measure Pair: a) Tobacco Use <br> Assessment b) Tobacco Cessation <br> Intervention | a) Tobacco Use Assessment. <br> Description: Percentage of patients aged 18 years <br> and older who have been seen for at least 2 office <br> visits who were queried about tobacco use one or <br> more times within 24 months. <br> b) Tobacco Cessation Intervention <br> Description: Percentage of patients aged 18 years <br> and older identified as tobacco users within the <br> past 24 months and have been seen for at least 2 <br> office visits, who received cessation intervention. |
| NQF 0421 | Adult Weight Screening and <br> Follow-up | Percentage of patients aged 18 years and older <br> with a calculated BMI in the past six months or <br> during the current visit documented in the <br> medical record AND if the most recent BMI is <br> outside parameters, a follow-up plan is <br> documented. |

* If any of the $\mathbf{3}$ core measures are reported with zero values for the denominator, you are required to substitute an alternate core measure. For example if: NQF 0028 \& NQF 0421 are 0; report 2 measures from the alternate core measures. All values reported in the denominator of the measure should be the values produced by the certified EHR technology.

Alternate Core CQMs: Report 0-3 Measures *

| NQF \# | Title | Description |
| :--- | :--- | :--- |
| NQF 0024 | Weight Assessment and <br> Counseling for Children and <br> Adolescents | The percentage of patients 2-17 years of age who <br> had an outpatient visit with a Primary Care <br> Physician (PCP) or OB/GYN and who had <br> evidence of BMI percentile documentation, <br> counseling for nutrition and counseling for <br> physical activity during the measurement year. |
| NQF 0038 | Childhood Immunization Status | Percentage of children 2 years of age who had <br> four diphtheria, tetanus and acellular pertussis <br> (DTaP); three polio (IPV); one measles, mumps <br> and rubella (MMR); two H influenza type B (HiB); <br> three hepatitis B (Hep B); one chicken pox (VZV); <br> four pneumococcal conjugate (PCV); two <br> hepatitis A (Hep A); two or three rotavirus (RV); <br> and two influenza (flu) vaccines by their second <br> birthday. The measure calculates a rate for each <br> vaccine and two separate combination rates. |
| NQF 0041 | Preventive Care and Screening: <br> Influenza Immunization for <br> Patients $\geq 50$ Years Old | Percentage of patients aged 50 years and older <br> who received an influenza immunization during <br> the flu season (September through February). |
| Iffour |  |  |

* If you reported 0 for all 3 core measures, you must report on all 3 alternate core measures even if you will report zeroes for all $\mathbf{6}$ measures. If you reported a $\mathbf{0}$ for $\mathbf{2}$ core measures you will need to report 2 alternate core measures, likewise, if you reported 0 for 1 core measure you are required to report 1 of the 3 alternate core measures. Note: All values reported should be the values produced by the certified EHR technology.

## Additional CQMs: Report 3 Measures *

| NQF \# | Title | Description |
| :--- | :--- | :--- |
| NQF 0004 | Initiation and Engagement of <br> Alcohol and Other Drug <br> Dependence Treatment: a) <br> Initiation, b) Engagement | Percentage of adolescent and adult patients <br> with a new episode of alcohol and other drug <br> (AOD) dependence who initiate treatment <br> through an inpatient AOD admission, <br> outpatient visit, intensive outpatient <br> encounter or partial hospitalization within 14 <br> days of the diagnosis and who initiated <br> treatment and who had two or more <br> additional services with an AOD diagnosis <br> within 30 days of the initiation visit. |
| NQF 0012 | Prenatal Care: Screening for <br> Human Immunodeficiency Virus <br> (HIV) | Percentage of patients, regardless of age, who <br> gave birth during a 12-month period who <br> were screened for HIV infection during the <br> first or second prenatal care visit. |
| NQF 0014 | Prenatal Care: Anti-D Immune <br> Globulin | Percentage of D(Rh) negative, unsensitized <br> patients, regardless of age, who gave birth <br> during a 12-month period who received anti-D <br> immune globulin at 26-30 weeks gestation. |
| NQF 0018 | Controlling High Blood Pressure | The percentage of patients 18-85 years of age <br> who had a diagnosis of hypertension and <br> whose BP was adequately controlled during <br> the measurement year. |
| NQF 0032 | Cervical Cancer Screening | Percentage of women 21-64 years of age, who <br> received one or more Pap tests to screen for <br> cervical cancer. |
| NQF 0033 | Chlamydia Screening for Women | Percentage of women 15-24 years of age who <br> were identified as sexually active and who had <br> at least one test for Chlamydia during the <br> measurement year. |
| NQF 0052 0036 | Low Back Pain: Use of Imaging <br> Studies <br> Use of Appropriate Medications | Percentage of patients 5-50 years of age who <br> were identified as having persistent asthma <br> and were appropriately prescribed medication <br> during the measurement year. Report three <br> age stratifications (5-11 years, 12-50 years, <br> and total). |
| Percentage of patients with a primary <br> diagnosis of low back pain who did not have <br> an imaging study (plain x-ray, MRI, CT scan) <br> within 28 days of diagnosis. |  |  |

## Additional CQMs: Report 3 Measures *

| NQF \# | Title | Description |
| :--- | :--- | :--- |
| NQF 0075 | Ischemic Vascular Disease (IVD): <br> Complete Lipid Panel and LDL <br> Control | Percentage of patients 18 years of age and <br> older who were discharged alive for acute <br> myocardial infarction (AMI), coronary artery <br> bypass graft (CABG) or percutaneous <br> transluminal angioplasty (PTCA) from January <br> 1-November1 of the year prior to the <br> measurement year, or who had a diagnosis of <br> ischemic vascular disease (IVD) during the <br> measurement year and the year prior to the <br> measurement year and who had a complete <br> lipid profile performed during the <br> measurement year and whose LDL-C<100 <br> mg/dL. |
| NQF 0575 | Diabetes: HbA1c Control (<8\%) | The percentage of patients 18-75 years of age <br> with diabetes (type 1 or type 2) who had <br> HbA1c <8.0\%. |
| NQF 0059 | Diabetes: HbA1c Poor Control | Percentage of patients 18-75 years of age with <br> diabetes (type 1 or type 2) who had <br> hemoglobin A1c > 9.0\%. |
| NQF 0389 | Prostate Cancer: Avoidance of <br> Overuse of Bone Scan for <br> Staging Low Risk Prostate <br> Cancer Patients | Percentage of patients, regardless of age, with <br> a diagnosis of prostate cancer at low risk of <br> recurrence receiving interstitial prostate <br> brachytherapy, OR external beam <br> radiotherapy to the prostate, OR radical <br> prostatectomy, OR cryotherapy who did not <br> have a bone scan performed at any time since <br> diagnosis of prostate cancer. |
| NQF 0043 | Pneumonia Vaccination Status <br> for Older Adults | Percentage of patients 65 years of age and <br> older who have ever received a pneumococcal <br> vaccine. |
| NQF 0031 0034 | Breast Cancer Screening | Percentage of women 40-69 years of age who <br> had a mammogram to screen for breast <br> cancer. |
| Colorectal Cancer Screening | Percentage of adults 50-75 years of age who <br> had appropriate screening for colorectal <br> cancer. |  |

Additional CQMs: Report 3 Measures *

| NQF \# | Title | Description |
| :--- | :--- | :--- |
| NQF 0027 | Smoking and Tobacco Use <br> Cessation, Medical assistance: a) <br> Advising Smokers and Tobacco <br> Users to Quit, b) Discussing <br> Smoking and Tobacco Use <br> Cessation Medications, c) <br> Discussing Smoking and Tobacco <br> Use Cessation Strategies | Percentage of patients 18 years of age and <br> older who were current smokers or tobacco <br> users, who were seen by a practitioner during <br> the measurement year and who received <br> advice to quit smoking or tobacco use or <br> whose practitioner recommended or <br> discussed smoking or tobacco use cessation <br> medications, methods or strategies. |
| NQF 0055 | Diabetes: Eye Exam | Percentage of patients 18-75 years of age with <br> diabetes (type 1 or type 2) who had a retinal <br> or dilated eye exam or a negative retinal exam <br> (no evidence of retinopathy) by an eye care <br> professional. |
| NQF 0062 | Diabetes: Urine Screening | Percentage of patients 18-75 years of age with <br> diabetes (type 1 or type 2) who had a <br> nephropathy screening test or evidence of <br> nephropathy. |
| NQF 0086 | Primary Open Angle Glaucoma <br> (POAG): Optic Nerve Evaluation | Percentage of patients aged 18 years and <br> older with a diagnosis of POAG who have <br> been seen for at least two office visits who <br> have an optic nerve head evaluation during <br> one or more office visits within 12 months. |
| NQF 0056 | Diabetes: Foot Exam | The percentage of patients aged 18 -75 years <br> with diabetes (type 1 or type 2) who had a <br> foot exam (visual inspection, sensory exam <br> with monofilament, or pulse exam). |
| NQF 0088 | Diabetic Retinopathy: <br> Documentation of Presence or <br> Absence of Macular Edema and <br> Level of Severity of Retinopathy | Percentage of patients aged 18 years and <br> older with a diagnosis of diabetic retinopathy <br> who had a dilated macular or fundus exam <br> performed which included documentation of <br> the level of severity of retinopathy and the <br> presence or absence of macular edema during <br> one or more office visits within 12 months. |
| NQ89 | Diabetic Retinopathy: <br> Communication with the <br> Physician Managing Ongoing <br> Diabetes Care | Percentage of patients aged 18 years and <br> older with a diagnosis of diabetic retinopathy <br> who had a dilated macular or fundus exam <br> performed with documented communication <br> to the physician who manages the ongoing <br> care of the patient with diabetes mellitus <br> regarding the findings of the macular or <br> fundus exam at least once within 12 months. |

## Additional CQMs: Report 3 Measures *

| NQF \# | Title | Description |
| :--- | :--- | :--- |
| NQF 0074 | Coronary Artery Disease (CAD): <br> Drug Therapy for Lowering LDL- <br> Cholesterol | Percentage of patients aged 18 years and <br> older with a diagnosis of CAD who was <br> prescribed a lipid-lowering therapy (based on <br> current ACC/AHA guidelines). |
| NQF 0064 |  <br> Control | Percentage of patients 18-75 years of age with <br> diabetes (type 1 or type 2) who had LDL-C < <br> 100 mg/dL. |
| NQF 0084 | Heart Failure (HF): Warfarin <br> Therapy Patients with Atrial <br> Fibrillation | Percentage of all patients aged 18 years and <br> older with a diagnosis of heart failure and <br> paroxysmal or chronic atrial fibrillation that <br> were prescribed warfarin therapy. |
| NQF 0073 | Ischemic Vascular Disease (IVD): <br> Blood Pressure Management | Percentage of patients 18 years of age and <br> older who were discharged alive for acute <br> myocardial infarction (AMI), coronary artery <br> bypass graft (CABG) or percutaneous <br> transluminal coronary angioplasty (PTCA) <br> from January 1-November 1 of the year prior <br> to the measurement year, or who had a <br> diagnosis of ischemic vascular disease (IVD) <br> during the measurement year and the year <br> prior to the measurement year and whose <br> recent blood pressure is in control (<140/90 <br> mmHg). |
| NQF 0068 | Ischemic Vascular Disease (IVD): | Percentage of patients 18 years of age and <br> older who were discharged alive for acute <br> myocardial infarction (AMI), coronary artery <br> bypass graft (CABG) or percutaneous <br> transluminal coronary angioplasty (PTCA) <br> from January 1-November 1 of the year prior <br> to the measurement year, or who had a <br> diagnosis of ischemic vascular disease (IVD) <br> during the measurement year and the year <br> prior to the measurement year and who had <br> documentation of use of aspirin or another <br> antithrombotic during the measurement year. |
| NQF 0061 | Diabetes: Blood Pressure <br> Management | Percentage of patients 18-75 years of age with <br> diabetes (type 1 or type 2) who had blood <br> pressure <140/90 mmHg. |

Additional CQMs: Report 3 Measures *

Additional CQMs: Report 3 Measures *

| NQF \# | Title | Description |
| :--- | :--- | :--- |
| NQF 0385 | Oncology Colon Cancer: <br> Chemotherapy for Stage III <br> Colon Cancer Patients | Percentage of patients aged 18 years and <br> older with Stage IIIA through IIIC colon <br> cancer who are referred for adjuvant <br> chemotherapy, prescribed adjuvant <br> chemotherapy, or have previously received <br> adjuvant chemotherapy within the 12 month <br> reporting period. |
| NQF 0083 | Heart Failure (HF): Beta-Blocker <br> Therapy for Left Ventricular <br> Systolic Dysfunction (LVSD) | Percentage of patients aged 18 years and <br> older with a diagnosis of heart failure who <br> also have LVSD (LVEF < 40\%) and who were <br> prescribed beta-blocker therapy. |
| NQF 0105 | Anti-depressant medication <br> management: (a) Effective Acute <br> Phase Treatment, (b) Effective <br> Continuation Phase Treatment | Percentage of patients 18 years of age and <br> older who were diagnosed with a new episode <br> of major depression, treated with <br> antidepressant medication, and who <br> remained on an antidepressant medication <br> treatment. |
| * Select any 3 measures that apply to your practice. It is acceptable to have zero for the <br> denominator if that is the value produced by the certified EHR technology. Three additional <br> measures are required for a total of 6-9 measures depending on the number of core and <br> alternate core measures. |  |  |
