Impact of Dual Eligible Status on WellCare HEDIS & Medication Adherence Measure Performance

September 19, 2014

# Table of Contents

Methodology Comments

- Time Period: Unless otherwise stated, all data is for CY 2013 (= HEDIS 2014 and STARs Plan Year 2015).

- Measure Inclusions / Exclusions: All PY 2015 HEDIS STAR measures are included except for Plan All-Cause Readmission (due to measure complexity) and Care of and Care of Older Adult Measures (as these are all Dual members).
  The three Medication Adherence measures are also included.

- Definition of Dual Eligible: Dual Eligible members were identified based on LIS Cost-Sharing Levels. The following categories were considered to be Dual Eligibles:

    - Category Code 1: Full Subsidy-Non-Full Benefit Dual Eligible Individuals (income at or below 135% FPL)

    - Category Code 2: Full Subsidy-Full Benefit Dual Eligible Individuals (non-institutionalized; income up to or at 100% FPL)

    - Category Code 3: Full Subsidy-Full Benefit Dual Eligible Individuals (institutionalized beneficiaries)

  If the co-pay category changed within 2013, the last one was used.

- Comment on Non DSNP States: Although WellCare does not offer Dual Special Needs Plans (DSNP) in Arizona and New Jersey, there are Dual Eligible members who elect to join our Non DSNP plans.

- Medication Adherence: Member months were not included in the calculation for these measures. Therefore, each member was equally weighted.

WellCare Dual Mix by State (for Reference)

Dual Eligibles as a % of Total Members as of 12/31/2013

State	%
Florida	48%
California	44%
New York	61%
Georgia	67%
Texas	60%
Illinois	50%
Hawaii	88%
Connecticut	88%
Lousiana	74%
Ohio	59%
Kentucky	73%
Missouri	68%
Arizona	17%
New Jersey	36%
Windsor	60%

WellCare Measure-Level Performance (by State): Non Duals vs. Duals   [Non Dual Rate / Dual Rate - 1]

🟩	= Non Dual Rate > Dual Rate by at least 5%.
🟥	= Dual Rate > Non Dual Rate by at least 5%.
🟦	= Difference between Dual and Non Dual Rate is statistically significant (p < .05).

Detailed Data Table: Dual vs. Non Dual Rates (by Measure, by State)

🟩	= Non Dual Rate > Dual Rate by at least 5%.	
🟥	= Dual Rate > Non Dual Rate by at least 5%.	
🟦	= Difference between Dual and Non Dual Rate is statistically significant.
