

Race, Ethnicity, and Language Preference in the Health Insurance Marketplaces 2017 Open Enrollment Period

Paul Guerino, M.S., and Cara James, Ph.D.

Introduction

Following the conclusion of each Marketplace Open Enrollment Period (OEP), the Centers for Medicare & Medicaid Services (CMS) releases a Final Enrollment Report. These reports summarize enrollment-related activity in the individual Marketplaces during each OEP for all 50 states and the District of Columbia (DC). The current data highlight complements the most recent 2017 OEP Final Enrollment Report^[1] by – for the first time ever – examining Marketplace enrollment activity stratified by the detailed racial and ethnicity categories specified in Department of Health and Human Services (HHS) data collection standards^[2] as well as detailed spoken and written language preference.

The HealthCare.gov eligibility and enrollment platform includes data on the distribution of plan selections by certain demographic characteristics, including self-reported race and ethnicity. This data highlight focuses on the 39 states utilizing the HealthCare.gov platform,ⁱ which comprise 69.09% of the U.S. resident population ages 18-64 (hereafter “adults”). This highlight includes Qualified Health Plan (QHP) plan selections made on the HealthCare.gov Marketplace platform and does not include data for the Small Business Health Options Program (SHOP) or states that run their own Marketplace platforms. It covers all activity during the 2017 OEP, which spanned from November 1, 2016 through January 31, 2017.

ⁱ In the 2017 OEP, five State-based Marketplaces ran their own exchange but used the HealthCare.gov platform for eligibility determinations and enrollment and other related functions: Arkansas, Kentucky, Nevada, New Mexico, and Oregon.

Key Findings:

- Over one-third (36.54%) of consumers ages 18-64 in HealthCare.gov states did not attest to a specific racial group. Of those who did, the most frequently selected race was White (76.00%), followed by Black (11.80%) and Asian (10.01%).
- About one in ten consumers ages 18-64 in HealthCare.gov states (10.37%) attested to a Hispanic ethnicity. Of those consumers who attested to a Hispanic ethnicity, the most frequently selected subgroups were Mexican (44.00%) and “Other” (33.25%).
- One-quarter of consumers ages 18-64 in HealthCare.gov states (25.56%) did not select a spoken language. Of those who did, the most frequently selected spoken language was English (89.93%), followed by Spanish (8.36%). This pattern is similar to adult Marketplace consumer written language preferences.

Table 1. 2017 OEP Adult Marketplace Consumer Race and Ethnicity Selections

Race	2017 Open Enrollment Period Consumers	
	Percent	Percent with known race
Unknown	36.54	--
White	48.23	76.00
Black	7.49	11.80
American Indian or Alaska Native	0.37	0.58
Asian	6.36	10.01
Asian Indian	1.54	2.43
Chinese	1.08	1.71
Filipino	0.29	0.45
Japanese	0.08	0.12
Korean	0.70	1.10
Vietnamese	1.63	2.57
Other Asian	0.95	1.49
Two or more Asian subgroups	0.09	0.15
Native Hawaiian or Other Pacific Islander	0.09	0.14
Native Hawaiian	0.01	0.02
Guamanian or Chamorro	0.01	0.01
Samoan	0.01	0.01
Other Pacific Islander	0.07	0.10
Two or more NHOPI subgroups	*	*
Two or more races	0.93	1.47

Ethnicity	Percent	Percent of Hispanic
Not Hispanic	89.63	--
Hispanic	10.37	100.00
Cuban	1.38	13.26
Mexican	4.56	44.00
Puerto Rican	0.84	8.11
Other Hispanic Ethnicity	3.45	33.25
Two or More Hispanic subgroups	0.14	1.39

-- Not Applicable

* Rounds to zero

NOTE: Limited to Marketplace consumers ages 18-64. Limited to the 39 states utilizing the HealthCare.gov platform. Detail may sum to greater than 100 percent due to rounding.

Results

Race and Ethnicity

As described above, over two-thirds (69.09%) of the U.S. resident population ages 18-64 lived in the 39 states utilizing the HealthCare.gov platform in 2015, the most recent year for which national data are available.^[3] Among racial and ethnic groups, approximately three-quarters (75.74%) of the Black adult resident population, 57.71% of the Hispanic population, and 46.35% of the Asian population lived in states utilizing the HealthCare.gov platform.ⁱⁱ These include racially and ethnically diverse states, such as Texas and Florida, and exclude others, such as New York and California. In 2015, the latter two states accounted for almost one-fifth (18.73%) of the U.S. resident population ages 18-64, over one-third (34.13%) of the Hispanic adult resident population, 41.53% of Asians, 30.37% of Native Hawaiians or Other Pacific Islanders (NHOPI), one-quarter (25.70%) of adults identifying as two or more races, and over one-fifth (21.88%) of American Indians or Alaska Natives (AIAN).

Table 1 presents the detailed racial selections of 2017 OEP Marketplace consumers ages 18-64 living in the 39 states utilizing the HealthCare.gov platform. Over one-third (36.54%) of adult consumers did not attest to a specific racial group. Of those adult consumers who attested to a racial group, over three-quarters (76.00%) indicated that they were White, 11.80% indicated they were Black, 10.01% indicated they were Asian, 1.47% indicated two or more races, 0.58% indicated they were AIAN, and 0.14% indicated they were NHOPI.

ⁱⁱ The authors examined the population growth among adults ages 18-64 between 2013 and 2015 to approximate unknown growth between 2015 and 2017. Even with population growth, the proportion of adults ages 18-64 residing in states utilizing the HealthCare.gov platform did not change significantly, nor did the makeup of race and ethnicity across states using the HealthCare.gov platform.

Table 2. 2017 OEP Adult Marketplace Consumer Detailed Asian and NHOPI Subgroup Selections

Race	Percent of Asian 2017 OEP consumers	Percent of NHOPI 2017 OEP consumers
Asian	100.00	-
Asian Indian	24.23	-
Chinese	17.03	-
Filipino	4.53	-
Japanese	1.18	-
Korean	11.00	-
Vietnamese	25.64	-
Other Asian	14.92	-
Two or more Asian subgroups	1.46	-
Native Hawaiian or Other Pacific Islander	-	100.00
Native Hawaiian	-	12.04
Guamanian or Chamorro	-	7.44
Samoan	-	6.53
Other Pacific Islander	-	72.29
Two or more NHOPI subgroups	-	1.71

- Not applicable

NOTE: Limited to Marketplace consumers ages 18-64. Limited to the 39 states utilizing the HealthCare.gov platform. Detail may sum to greater than 100 percent due to rounding.

selected by NHOPI Marketplace consumers ages 18-64 was Other Pacific Islander (72.29%),^{iv} followed by Native Hawaiian (12.04%), Guamanian or Chamorro (7.44%), and Samoan (6.53%). Some 1.71% of adult NHOPI consumers selected two or more NHOPI subgroups.

Appendix Table A1 lists by state the racial selections of 2017 OEP Marketplace consumers ages 18-64 living in the 39 states utilizing the HealthCare.gov platform.

Appendix Table A2 lists by state the ethnicity selections of 2017 OEP Marketplace consumers ages 18-64 living in the 39 states utilizing the HealthCare.gov platform.

Appendix Table A3 lists for each race and ethnicity the top three states in which 2017 OEP consumers ages 18-64 were located. Texas consumers made up the greatest proportion of about half of all racial groups. Consumers in Florida made up the greatest proportion of all Hispanic subgroups but Mexican.

ⁱⁱⁱ Based on [U.S. Census Bureau Working Paper Number 102](#), the most frequent other Hispanic ethnicities likely include Salvadoran, Dominican, Guatemalan, and Colombian.

^{iv} Based on the U.S. Census Bureau Data Brief, [The Native Hawaiian and Other Pacific Islander Population: 2010](#), the most frequent Other Pacific Islander categories likely include Fijian, Tongan, and Marshalese.

Table 1 also displays the ethnicity selections of 2017 OEP Marketplace consumers ages 18-64 living in the 39 states utilizing the HealthCare.gov platform. Overall, 10.37% of adult consumers attested to a Hispanic ethnicity. The most common ethnic subgroup was Mexican (4.56%), followed by “Other” (3.45%),ⁱⁱⁱ Cuban (1.38%), Puerto Rican (0.84%), and two or more ethnic subgroups (0.14%). Of those consumers ages 18-64 who indicated that they were Hispanic, almost half (44.00%) were Mexican, one-third (33.25%) were “Other,” and 13.26% were Cuban. The remaining adult Hispanic consumers were Puerto Rican (8.11%) or two or more ethnic subgroups (1.39%).

Table 2 examines Asian and NHOPI consumers more closely. Of all Asian Marketplace consumers ages 18-64, the most common racial subgroups selected were Vietnamese (25.64%) and Asian Indian (24.23%), followed by Chinese (17.03%), Other Asian (14.92%), Korean (11.00%), Filipino (4.53%), and Japanese (1.18%). Some 1.46% of Asian consumers selected two or more Asian subgroups. The most common racial subgroup

Preferred Spoken and Written Language

Almost three-quarters (77.75%) of the U.S. population ages 18-64 spoke English at home in 2015, followed by Spanish (13.71%).^[4] Approximately three-quarters (73.04%) of English speaking adults ages 18-64 lived in the 39 states utilizing the HealthCare.gov platform in 2015. In addition, 58.33% of Spanish-speaking adults, 55.01% of adults speaking other Indo-European languages,^v 44.19% of adults speaking Asian or Pacific Island languages,^{vi} and 61.90% of adults speaking other languages lived in states utilizing the HealthCare.gov platform. California and New York, which as described above do not utilize the HealthCare.gov platform, accounted for 43.44% of adult speakers of Asian or Pacific Island languages in 2015, 34.00% of Spanish speakers, and 29.54% of speakers of other Indo-European Languages.

Table 3. 2017 OEP Adult Marketplace Consumer Preferred Spoken Language Selections

^v Includes most languages of Europe and the Indic languages of India. These include the Germanic languages, such as German, Yiddish, and Dutch; the Scandinavian languages, such as Swedish and Norwegian; the Romance languages, such as French, Italian, and Portuguese; the Slavic languages, such as Russian, Polish, and Serbo-Croatian; the Indic languages, such as Hindi, Gujarati, Punjabi, and Urdu; Celtic languages; Greek; Baltic languages; and Iranian languages.

^{vi} Includes Chinese; Korean; Japanese; Vietnamese; Hmong; Khmer; Lao; Thai; Tagalog or Pilipino; the Dravidian languages of India, such as Telugu, Tamil, and Malayalam; and other languages of Asia and the Pacific, including the Philippine, Polynesian, and Micronesian languages.

Table 3 presents the spoken language preferences of 2017 OEP Marketplace consumers ages 18-64 living in the 39 states utilizing the HealthCare.gov platform. One-quarter (25.56%) of adult consumers did not select a preferred spoken language. Two-thirds of adult consumers (66.94%) selected English as their preferred spoken language, followed by Spanish (6.22%). Some 1.00% of adult consumers chose an Asian or Pacific Island language, with Vietnamese (0.41%) being the most popular, followed by Chinese (0.34%) and Korean (0.17%).

Of those 2017 OEP Marketplace consumers ages 18-64 who selected a preferred spoken language, the far majority (89.93%) selected English, followed by Spanish (8.36%). Some 1.34% of adult consumers who had a preferred spoken language chose an Asian or Pacific Island language, with Vietnamese (0.55%) being the most popular, followed by Chinese (0.46%) and Korean (0.23%).

Table 4 presents the written language preferences of 2017 OEP Marketplace consumers ages 18-64 living in the 39 states utilizing the HealthCare.gov platform. Like spoken language above, one-quarter (25.55%) of adult consumers did not select a preferred written language. Two-thirds of adult consumers (67.22%) selected English as their preferred written language, followed by Spanish (6.13%). Some 0.88% of adult consumers chose an Asian or Pacific Island language, with Vietnamese (0.36%) being the most popular, followed by Chinese (0.31%) and Korean (0.16%).

Of those 2017 OEP Marketplace consumers ages 18-64 who selected a preferred written language, the far majority (90.29%) selected English, followed by Spanish (8.23%). Some 1.18% of consumers who had a preferred written language chose an Asian or Pacific Island language, with Vietnamese (0.48%) being the most popular, followed by Chinese (0.42%) and Korean (0.22%).

Table 5. OEP Adult Marketplace Consumer Preferred Spoken and Written Asian and Pacific Island Language Selections

Race	Percent of all Marketplace consumers selecting a preferred spoken Asian or Pacific Island Language	Percent of all Marketplace consumers selecting a preferred written Asian or Pacific Island Language
Asian and Pacific Island Languages	100.00	100.00
Chinese	34.17	35.20
Gujarati	4.09	3.17
Hindi	1.76	1.09
Korean	17.20	18.39
Tagalog	0.77	0.60
Urdu	1.29	0.69
Vietnamese	40.72	40.87

NOTE: Limited to Marketplace consumers ages 18-64. Limited to the 39 states utilizing the HealthCare.gov platform. Detail may sum to greater than 100 percent due to rounding.

SOURCE: CMS Multi-Dimensional Insurance Data Analytics System (MIDAS). 2017

language (not shown). The gap between written and spoken was largest for consumers whose preferred spoken language was Urdu – 2.14 times more adult consumers indicated Urdu as a preferred spoken language than as a preferred written language. The difference was smallest for Spanish, for whom 1.02 times more adult consumers indicated Spanish as a preferred spoken language than as a preferred written language. For all languages other than English, the number of consumers indicating a given language as a preferred spoken language was greater than the number of consumers indicating that language as a preferred written language.

Appendix Table A6 lists for each spoken and written language the top three states where 2017 OEP consumers ages 18-64 were located. Among the 17 spoken language categories, Florida had the highest percentage of consumers of that spoken language (8 languages), followed by Texas (5 languages). A similar pattern holds for preferred written language.

Table 5 examines preferred spoken and preferred written Asian and Pacific Island languages more closely. Of those consumers ages 18-64 who preferred a spoken Asian or Pacific Island language, almost three-quarters preferred either Vietnamese (40.72%) or Chinese (34.17%), followed by Korean (17.20%), Gujarati (4.09%), Hindi (1.76%), Urdu (1.29%), and Tagalog (0.77%). Adult consumer preference for written Asian or Pacific Island languages followed the same pattern as for spoken language.

The appendix lists by state the preferred spoken language (Table A4) and written language (Table A5) of 2017 OEP Marketplace consumers ages 18-64 living in states utilizing the HealthCare.gov platform. Of note, 0.41% more adult consumers preferred English as a written language compared to English as a spoken

Conclusion

Using 2017 OEP Marketplace enrollment data, this highlight examined Marketplace enrollment activity for consumers ages 18-64 stratified by the detailed racial and ethnicity categories specified in HHS's data collection standards. It also examined enrollment activity by spoken and written language preference. Findings can be used to assist with both Marketplace outreach and enrollment. To review, we found that:

- Over two-thirds (69.09%) of the U.S. adult resident population ages 18-64 lived in the 39 states utilizing the HealthCare.gov platform in 2015.
- Among racial and ethnic groups, approximately three-quarters (75.74%) of the Black adult resident population ages 18-64, 57.71% of the Hispanic population, and 46.35% of the Asian population lived in states utilizing the HealthCare.gov platform.
- Approximately three-quarters (73.04%) of English-speaking adults ages 18-64 and over half (58.33%) of Spanish-speaking adults lived in states utilizing the HealthCare.gov platform.
- Over one-third (36.54%) of consumers ages 18-64 in HealthCare.gov states did not attest to a specific racial group. Of those who did, the most frequently selected race was White (76.00%), followed by Black (11.80%) and Asian (10.01%). Of Asian consumers with known race, the most common selections were Vietnamese (25.64%) and Asian Indian (24.23%).
- About one in ten consumers ages 18-64 in HealthCare.gov states (10.37%) attested to a Hispanic ethnicity. Of those consumers who attested to a Hispanic ethnicity, the most frequently selected ethnic subgroups were Mexican (44.00%) and "Other" (33.25%).
- One-quarter of consumers ages 18-64 in HealthCare.gov states (25.56%) did not select a spoken language. Of those who did, the most frequently selected spoken language was English (89.93%), followed by Spanish (8.36%). This pattern is similar to adult Marketplace consumer written language preferences.

Definitions

Adult Population

The U.S. population ages 18-64.

Adult Resident Population

All people ages 18-64 currently residing in the United States.

HealthCare.gov States

States that use the HealthCare.gov eligibility and enrollment platform. The 39 HealthCare.gov states are: Alabama, Alaska, Arizona, Arkansas, Delaware, Florida, Georgia, Hawaii, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Michigan, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, South Carolina, South Dakota, Tennessee, Texas, Utah, Virginia, West Virginia, Wisconsin, and Wyoming.

States Not Utilizing the HealthCare.Gov Platform

States that use their own Marketplace eligibility and enrollment platforms (i.e., State-Based Marketplaces). These 12 states are not examined in this highlight but include: California, Colorado, Connecticut, the District of Columbia, Idaho, Maryland, Massachusetts, Minnesota, New York, Rhode Island, Vermont, and Washington.

Data Sources and Methods

This report adheres to the CMS cell size suppression policy to protect consumer privacy. This policy stipulates that no cell of 10 or less may be displayed, which may require the use of complimentary cell suppression. Also, no use of percentages or other mathematical formulas may be used if they result in the display of a cell of 10 or less.

2017 OEP Marketplace Consumer Data

2017 OEP Marketplace consumer data on race, ethnicity, preferred spoken language, and preferred written language come from the CMS Multi-Dimensional Insurance Data Analytics System (MIDAS). MIDAS provides mission-critical functionality that CMS requires to implement and manage many provisions of the Affordable Care Act (ACA), including the Federally-facilitated Marketplaces. In order to complete and sustain the various tasks mandated by ACA, CMS created MIDAS to support and inform these enterprise functions. It is a data repository and analytics solution for capturing, aggregating, and analyzing health insurance and related information to support improved decision making, improved business processes, and improved services to consumers, states, issuers, and other stakeholders.

National race and ethnicity data

The most recent national-level data on race and ethnicity data come from 2015 U.S. Census Bureau projections based on the 2010 decennial census.

Limitations

The current highlight focuses on the 39 states utilizing the HealthCare.gov platform and excludes a discussion of the 12 states utilizing their own eligibility and enrollment platforms (i.e., State-Based Marketplaces), which comprise 30.91% of the adult population ages 18-64. The highlight only represents the consumers who selected a plan under the Marketplace. Please note that the Marketplace is not generalizable to the overall U.S. population, as not everyone is eligible for a Qualified Health Plan (QHP). Eligibility criteria may be confounded with race, ethnicity, preferred spoken language, and preferred written language. Spoken and written language are only populated for the person who submits the application. Any remaining consumers on the application will have an unknown spoken and written language. Of note, however, is that the majority of plan selections (69.34%) had a single applicant applying for QHP coverage.
