

# STATE PLAN MANAGEMENT SYSTEMS

The following chart indicates the system in which issuers seeking certification of qualified health plans (QHPs) should file applications and supporting data for Plan Year 2017.

**HIOS:** Issuers filing applications via the Health Insurance Oversight System (HIOS) should follow the timeline and process established in CMS’s “2017 Letter to Issuers in the Federally-facilitated Marketplace (FFM).”<sup>1</sup> Questions about HIOS can be directed to the HIOS Help Desk at 1-877-343-6507 or [insuranceoversight@hhs.gov](mailto:insuranceoversight@hhs.gov).

**SERFF:** Issuers filing applications via the System for Electronic Rate and Form Filing (SERFF) should follow state guidance on the timeline and process for submission. Current SERFF users can access the Plan Management functionality at <https://login.serff.com> using their existing ID and password. Questions related to the SERFF functionality should be directed to the SERFF Help Desk at [serffhelp@naic.org](mailto:serffhelp@naic.org).

**State System:** Contact the state regulator and follow state guidance on the timeline and process for submission.

State	System for Collecting QHP Applications – Individual Market	System for Collecting QHP Applications – SHOP Market

*\*These states currently do not have the authority to enforce or are not otherwise enforcing the Affordable Care Act market reform provisions pursuant to 45 CFR 150.101. Issuers in these states should refer to 2016 Form Filing Instructions and Health Insurance Oversight System (HIOS) Technical Assistance for Plan Year 2017 unless instructed otherwise.<sup>2</sup>*

**Note:** All issuers seeking to offer QHPs must also submit the Unified Rate Review Template (URRT) to CMS via HIOS according to the same timeline referenced in the 2017 Letter to Issuers. Under the Uniform Timeline for submitting the URRT for on and off-Marketplace single risk pool coverage for the 2017 plan year, issuers will enter their submissions into the HIOS Rate Review Module for both their single risk pool QHPs and non-QHPs at the same time.
