

## Medicare-Medicaid Enrollee Information State of Alaska, 2009

Figure 1. Total Medicare, Medicaid and Medicare-Medicaid Dually Enrolled Populations: Alaska, 2009

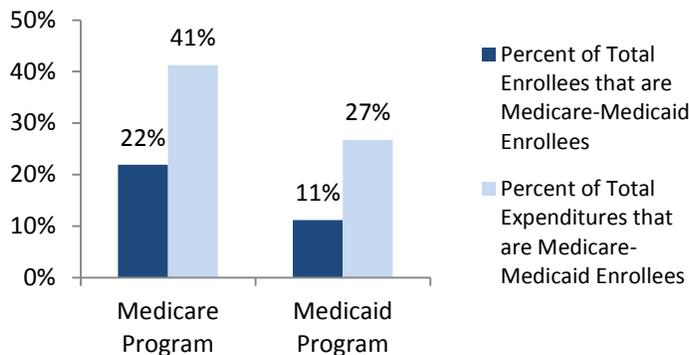

In the State of Alaska, in 2009:

- There were 14,522 persons dually enrolled in Medicare & Medicaid at any given point in time over the year.
  - 22% of Medicare Enrollees were co-enrolled in Medicaid.
  - 11% of Medicaid Enrollees were co-enrolled in Medicare.

\* Includes Medicaid-expansion Children’s Health Insurance Program (CHIP)

Figure 2. Medicare-Medicaid Enrollees’ Percentage of Total Medicare & Medicaid Enrollees and their Relative Share of Program Expenditures: Alaska, 2009

In the State of Alaska, in 2009:

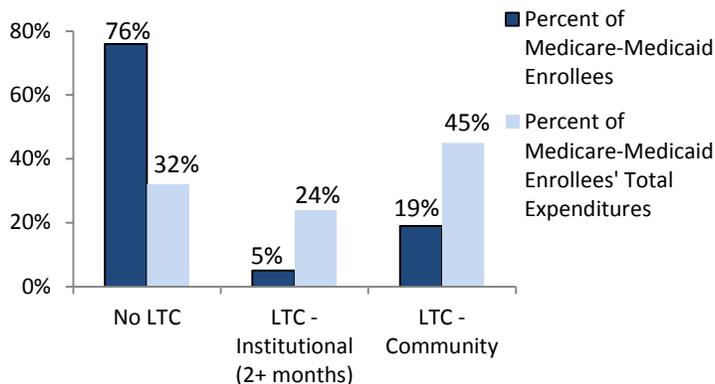

- Medicare-Medicaid enrollees made up 22% of the Medicare population and 41% of Total Medicare expenditures.
- Medicare-Medicaid enrollees made up 11% of State Medicaid enrollees and 27% of Medicaid expenditures.

---

*The following figures are based on data for Fee-For-Service (FFS) enrollees only.*

---

Figure 3. Among Full and Partial Benefit Medicare-Medicaid Enrollees, the Proportion Enrolled in FFS Long-Term Care (LTC), Paid for by Medicare or Medicaid, and their Relative Share of FFS Program Expenditures: Alaska, 2009^

In the State of Alaska, in 2009:

- Community LTC appears to be driving much of the high FFS costs attributable to Medicare-Medicaid enrollees. Specifically, the 5% of Medicare-Medicaid enrollees who resided in a LTC facility paid for by Medicare or Medicaid for two or more months accounted for 24% of total Medicare-Medicaid enrollee FFS expenditures.

## Medicare-Medicaid Enrollee Information State of Alaska, 2009

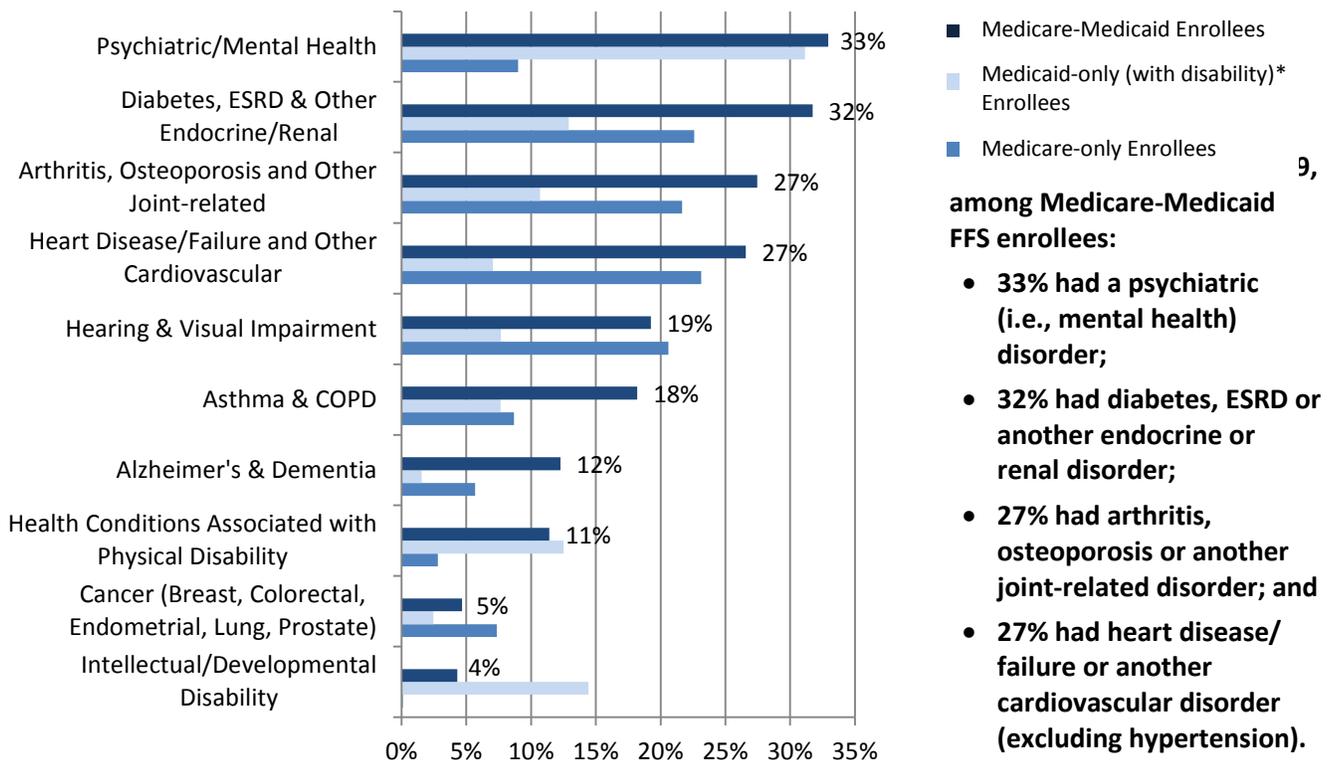

**Figure 4. Number of Chronic Conditions by Enrollment Type, FFS Enrollees only: Alaska, 2009<sup>^</sup>**

**In the State of Alaska, in 2009:**

- Out of 24 chronic health conditions studied, 36% of Medicare-Medicaid FFS enrollees had three or more chronic health conditions.
- This compares to 18% of Medicare-only FFS enrollees and 14% of Medicaid-only FFS enrollees (with disability) having had three or more conditions.

**Figure 5. Health Condition Categories by Enrollment Type, FFS Enrollees only: Alaska, 2009<sup>^</sup>**

**among Medicare-Medicaid FFS enrollees:**

- 33% had a psychiatric (i.e., mental health) disorder;
- 32% had diabetes, ESRD or another endocrine or renal disorder;
- 27% had arthritis, osteoporosis or another joint-related disorder; and
- 27% had heart disease/failure or another cardiovascular disorder (excluding hypertension).

<sup>^</sup>**Note:** In the State of Alaska, all Medicare-Medicaid enrollees were included in the analysis for Figures 3-5 because zero percent were enrolled exclusively in Medicare and Medicaid managed care.

<sup>\*</sup>**Note:** This Medicaid-only comparison group includes only those Medicaid enrollees who qualified for Medicaid based on disability.
