

Medicare-Medicaid Enrollee Information State of Arizona, 2009

Figure 1. Total Medicare, Medicaid, and Medicare-Medicaid Dually Enrolled Populations: Arizona, 2009

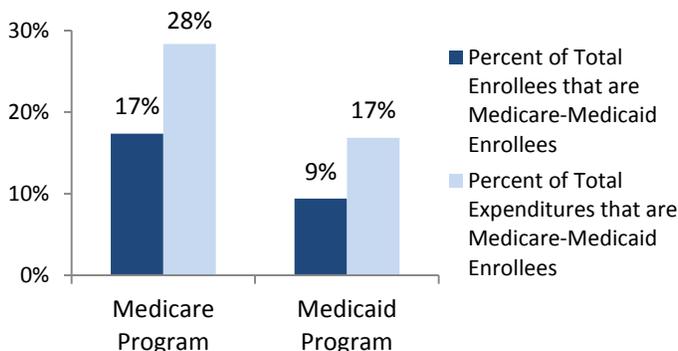

In the State of Arizona, in 2009:

- There were 163,269 persons dually enrolled in Medicare & Medicaid at any given point in time over the year.
 - 17% of Medicare Enrollees were co-enrolled in Medicaid.
 - 9% of Medicaid Enrollees were co-enrolled in Medicare.

** Includes Medicaid-expansion Children’s Health Insurance Program (CHIP)*

Figure 2. Medicare-Medicaid Enrollees’ Percentage of Total Medicare & Medicaid Enrollees and their Relative Share of Program Expenditures: Arizona, 2009

In the State of Arizona, in 2009:

- Medicare-Medicaid enrollees made up 17% of the Medicare population and 28% of Total Medicare expenditures.
- Medicare-Medicaid enrollees made up 9% of State Medicaid enrollees and 17% of Medicaid expenditures.

The following figures are based on data for Fee-For-Service (FFS) enrollees only.

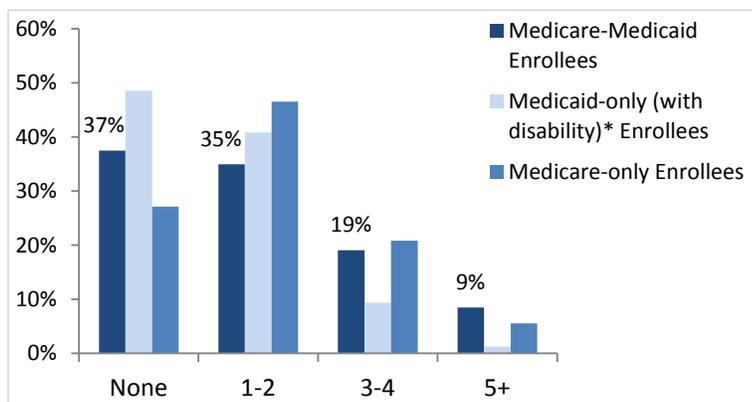

Figure 3. Among Full & Partial Benefit Medicare-Medicaid Enrollees, the Proportion Enrolled in FFS Long-Term Care (LTC), Paid for by Medicare or Medicaid, and their Relative Share of FFS Program Expenditures: Arizona, 2009[^]

NOTE: Figure 3 has been suppressed for the State of Arizona due to the very high proportion of Medicare-Medicaid enrollees who are enrolled in managed care.

Medicare-Medicaid Enrollee Information State of Arizona, 2009

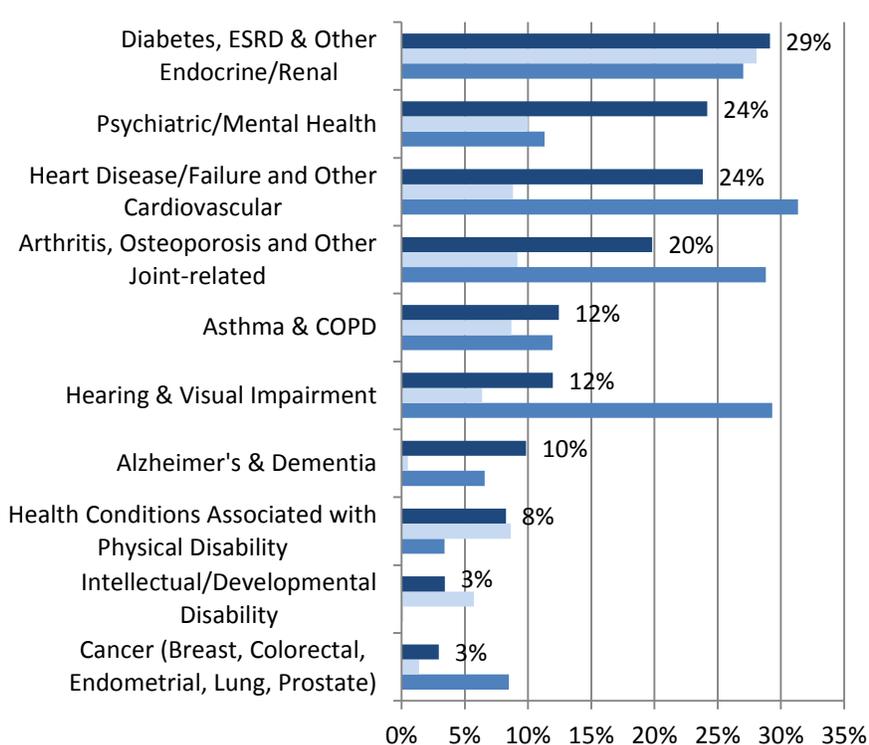

Figure 4. Number of Chronic Conditions by Enrollment Type, FFS Enrollees only: Arizona, 2009[^]

In the State of Arizona, in 2009:

- Out of 24 chronic health conditions studied, 28% of Medicare-Medicaid FFS enrollees had three or more chronic health conditions.
- This compares to 27% of Medicare-only FFS enrollees and 10% of Medicaid-only FFS enrollees (with disability) having three or more conditions.

Figure 5. Health Condition Categories by Enrollment Type, FFS Enrollees only: Arizona, 2009[^]

■ Medicare-Medicaid Enrollees
 ■ Medicaid-only (with disability)* Enrollees
 ■ Medicare-only Enrollees

In the State of Arizona, in 2009, among Medicare-Medicaid FFS enrollees:

- 29% had diabetes, ESRD or another endocrine or renal disorder;
- 24% had a psychiatric (i.e., mental health) disorder; and
- 24% had heart disease/failure or another cardiovascular-related disorder (excluding hypertension).

[^]**Note:** These analyses were performed using FFS data and therefore may or may not be relevant to the entire State's total FFS and managed care enrolled Medicare-Medicaid population. On average, 47% of all Medicare-Medicaid enrollees in the State of Arizona, were enrolled exclusively in managed care.

^{*}**Note:** This Medicaid-only comparison group includes only those Medicaid enrollees who qualified for Medicaid based on disability.
