Medicare-Medicaid Enrollee Information
District of Columbia, 2009

Figure 1. Total Medicare, Medicaid, and Medicare-Medicaid Dually Enrolled Populations: District of Columbia, 2009

In the District of Columbia, in 2009:
- There were 23,683 persons dually enrolled in Medicare & Medicaid.
  - 29% of Medicare Enrollees were co-enrolled in Medicaid.
  - 14% of Medicaid Enrollees were co-enrolled in Medicare.

* Includes Medicaid-expansion Children’s Health Insurance Program (CHIP)

Figure 2. Medicare-Medicaid Enrollees’ Percentage of Total Medicare & Medicaid Enrollees and their Relative Share of Program Expenditures: District of Columbia, 2009

In the District of Columbia, in 2009:
- Medicare-Medicaid enrollees made up 29% of the Medicare population and 53% of Total Medicare expenditures.
- Medicare-Medicaid enrollees made up 14% of State Medicaid enrollees and 36% of Medicaid expenditures.

The following figures are based on data for Fee-For-Service (FFS) enrollees only.

Figure 3. Among Full and Partial Benefit Medicare-Medicaid Enrollees, the Proportion Enrolled in FFS Long-Term Care (LTC), Paid for by Medicare or Medicaid, and their Relative Share of FFS Program Expenditures: District of Columbia, 2009

In the District of Columbia, in 2009:
- Institutional LTC appears to have been driving much of the high FFS costs attributable to Medicare-Medicaid enrollees. Specifically, the 13% of Medicare-Medicaid enrollees who resided in a LTC facility paid for by Medicare or Medicaid for two or more months accounted for 31% of total Medicare-Medicaid enrollee FFS expenditures.
Figure 4. Number of Chronic Conditions by Enrollment Type, FFS Enrollees only: District of Columbia, 2009^  

In the District of Columbia, in 2009:  
- Out of 24 chronic health conditions studied, 43% of Medicare-Medicaid FFS enrollees had three or more chronic health conditions.  
- This compares to 29% of Medicare-only FFS enrollees and 18% of Medicaid-only FFS enrollees (with disability) having three or more conditions.

Figure 5. Health Condition Categories by Enrollment Type, FFS Enrollees only: District of Columbia, 2009^  

In the District of Columbia, in 2009, among Medicare-Medicaid FFS enrollees:  
- 46% had diabetes, ESRD or another endocrine or renal disorder;  
- 36% had heart disease/failure or another cardiovascular-related disorder (excluding hypertension);  
- 26% had hearing and visual impairment; and  
- 26% had a psychiatric (i.e., mental health) disorder.

^Note: In the District of Columbia, all Medicare-Medicaid enrollees were included in the analysis for Figures 3-5 because zero percent were enrolled exclusively in Medicare and Medicaid managed care.  

*Note: This Medicaid-only comparison group includes only those Medicaid enrollees who qualified for Medicaid based on disability.
