

## Medicare-Medicaid Enrollee Information State of Maine, 2009

Figure 1. Total Medicare, Medicaid, and Medicare-Medicaid Dually Enrolled Populations: Maine, 2009

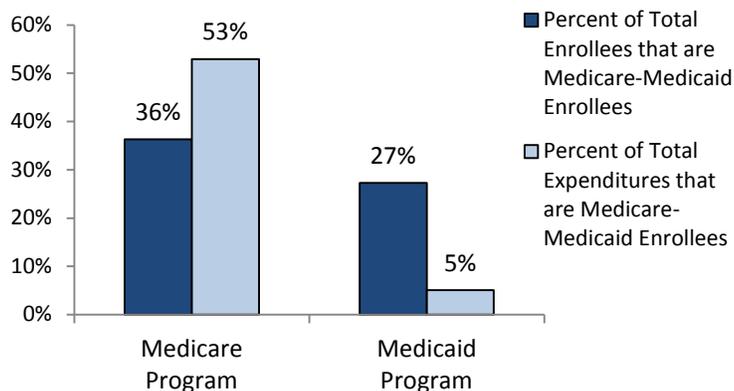

In the State of Maine, in 2009:

- There were 99,241 persons dually enrolled in Medicare & Medicaid at any given point in time over the year.
  - 36% of Medicare Enrollees were co-enrolled in Medicaid.
  - 27% of Medicaid Enrollees were co-enrolled in Medicare.

*\* Includes Medicaid-expansion Children’s Health Insurance Program (CHIP)*

Figure 2. Medicare-Medicaid Enrollees’ Percentage of Total Medicare & Medicaid Enrollees and their Relative Share of Program Expenditures: Maine, 2009

In the State of Maine, in 2009:

- Medicare-Medicaid enrollees made up 36% of the Medicare population and 53% of Total Medicare expenditures.
- Medicare-Medicaid enrollees made up 27% of State Medicaid enrollees and 5% of Medicaid expenditures.

*Note: Maine Medicaid data was limited to prescription data resulting in underreported expenditures.*

---

*The following figures are based on data for Fee-For-Service (FFS) enrollees only.*

---

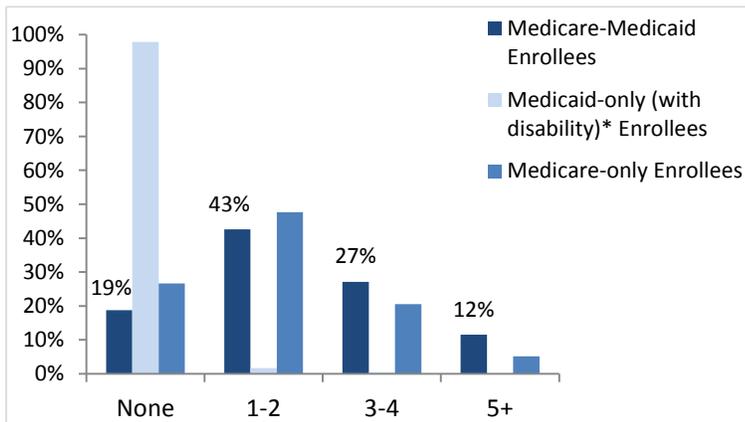

Figure 3. Among Full and Partial Benefit Medicare-Medicaid Enrollees, the Proportion Enrolled in FFS Long-Term Care (LTC), Paid for by Medicare or Medicaid, and their Relative Share of FFS Program Expenditures: Maine, 2009^

- Medicaid long term care administrative data from the State of Maine was not available for 2009, therefore this figure has been suppressed.

## Medicare-Medicaid Enrollee Information State of Maine, 2009

**Figure 4. Number of Chronic Conditions by Enrollment Type, FFS Enrollees only: Maine, 2009<sup>^</sup>**

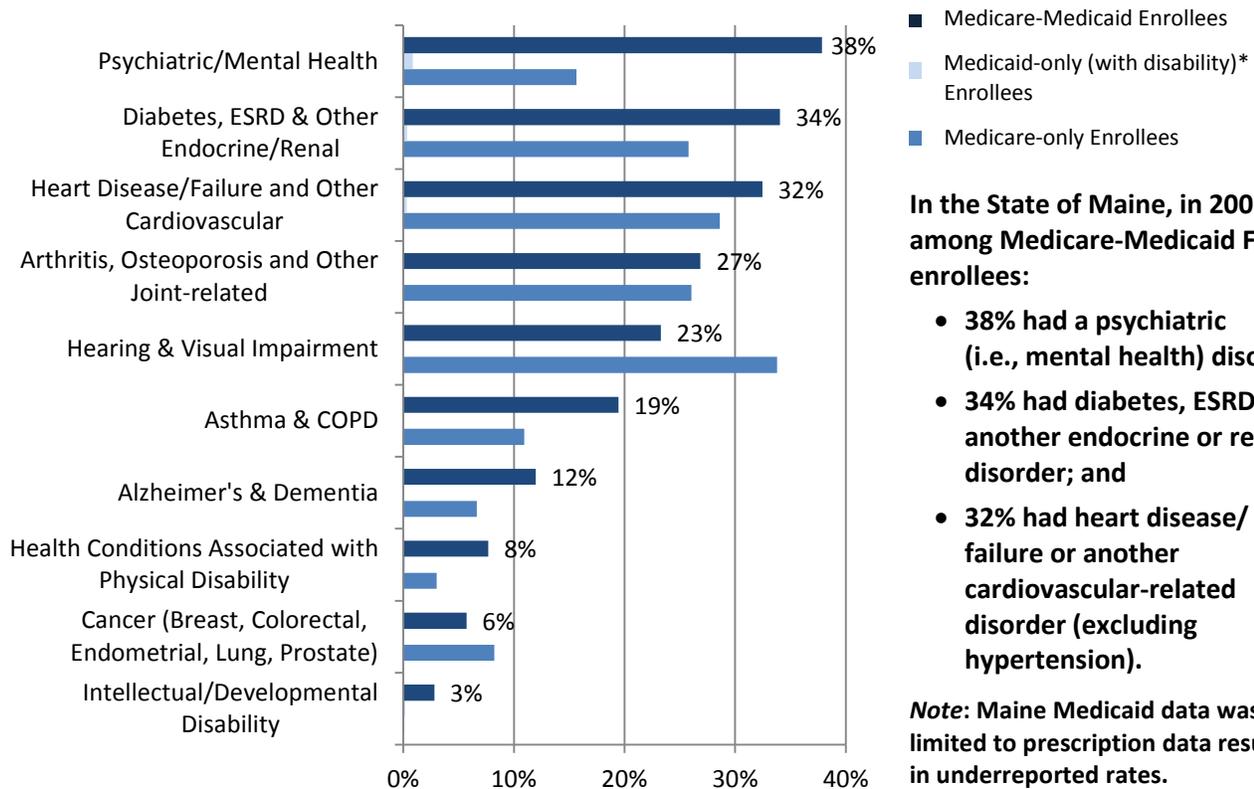

In the State of Maine, in 2009:

- Out of 24 chronic health conditions studied, 39% of Medicare-Medicaid FFS enrollees had three or more chronic health conditions.
- This compares to 26% of Medicare-only FFS enrollees and less than 1% of Medicaid-only FFS enrollees (with disability) having three or more conditions.

*Note: Maine Medicaid data was limited to prescription data resulting in underreported rates.*

**Figure 5. Health Condition Categories by Enrollment Type, FFS Enrollees only: Maine, 2009<sup>^</sup>**

In the State of Maine, in 2009, among Medicare-Medicaid FFS enrollees:

- 38% had a psychiatric (i.e., mental health) disorder;
- 34% had diabetes, ESRD or another endocrine or renal disorder; and
- 32% had heart disease/failure or another cardiovascular-related disorder (excluding hypertension).

*Note: Maine Medicaid data was limited to prescription data resulting in underreported rates.*

<sup>^</sup>**Note:** In the State of Maine, all Medicare-Medicaid enrollees were included in the analysis for Figures 3-5 because zero percent were enrolled exclusively in Medicare and Medicaid managed care.

**\*Note:** This Medicaid-only comparison group includes only those Medicaid enrollees who qualified for Medicaid based on disability.
