Medicare-Medicaid Enrollee Information
State of New Hampshire, 2009

Figure 1. Total Medicare, Medicaid, and Medicare-Medicaid Dually Enrolled Populations: New Hampshire, 2009

- There were 30,399 persons dually enrolled in Medicare & Medicaid at any given point in time over the year.
  - 13% of Medicare Enrollees were co-enrolled in Medicaid.
  - 19% of Medicaid Enrollees were co-enrolled in Medicare.

* Includes Medicaid-expansion Children’s Health Insurance Program (CHIP)

Figure 2. Medicare-Medicaid Enrollees’ Percentage of Total Medicare & Medicaid Enrollees and their Relative Share of Program Expenditures: New Hampshire, 2009

- Medicare-Medicaid enrollees made up 13% of the Medicare population and 26% of Total Medicare expenditures.
- Medicare-Medicaid enrollees also made up 19% of State Medicaid enrollees and 45% of Medicaid expenditures.

The following figures are based on data for Fee-For-Service (FFS) enrollees only.

Figure 3. Among Full and Partial Benefit Medicare-Medicaid Enrollees, the Proportion Enrolled in FFS Long-Term Care (LTC), Paid for by Medicare or Medicaid, and their Relative Share of FFS Program Expenditures: New Hampshire, 2009

- Institutional LTC appears to have been driving much of the high FFS costs attributable to Medicare-Medicaid enrollees. Specifically, the 22% of Medicare-Medicaid enrollees who resided in a LTC facility paid for by Medicare or Medicaid for two or more months accounted for 45% of total Medicare-Medicaid enrollee FFS expenditures.
Figure 4. Number of Chronic Conditions by Enrollment Type, FFS Enrollees only: New Hampshire, 2009

In the State of New Hampshire, in 2009:
- Out of 24 chronic health conditions studied, 49% of Medicare-Medicaid FFS enrollees had three or more chronic health conditions.
- This compares to 28% of Medicare-only FFS enrollees and 8% of Medicaid-only FFS enrollees (with disability) having three or more conditions.

Figure 5. Health Condition Categories by Enrollment Type, FFS Enrollees only: New Hampshire, 2009

In the State of New Hampshire, in 2009, among Medicare-Medicaid FFS enrollees:
- 53% had a psychiatric (i.e., mental health) disorder;
- 35% had diabetes, ESRD or another endocrine or renal disorder; and
- 32% had heart disease/failure or another cardiovascular–related disorder (excluding hypertension).

*Note: In the State of New Hampshire, all Medicare-Medicaid enrollees were included in the analysis for Figures 3-5 because zero percent were enrolled exclusively in Medicare and Medicaid managed care.

*Note: This Medicaid-only comparison group includes only those Medicaid enrollees who qualified for Medicaid based on disability.
