

## Medicare-Medicaid Enrollee Information State of New York, 2009

Figure 1. Total Medicare, Medicaid, and Medicare-Medicaid Dually Enrolled Populations: New York, 2009

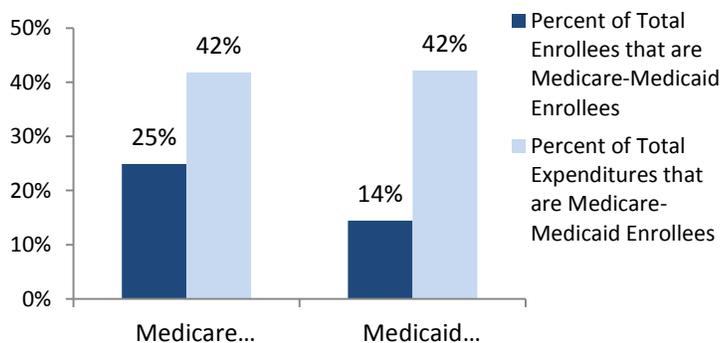

In the State of New York, in 2009:

- There were 768,175 persons dually enrolled in Medicare & Medicaid at any given point in time over the year.
  - 25% of Medicare Enrollees were co-enrolled in Medicaid.
  - 14% of Medicaid Enrollees were co-enrolled in Medicare.

\* Includes Medicaid-expansion Children's Health Insurance Program (CHIP)

Figure 2. Medicare-Medicaid Enrollees' Percentage of Total Medicare & Medicaid Enrollees and their Relative Share of Program Expenditures: New York, 2009

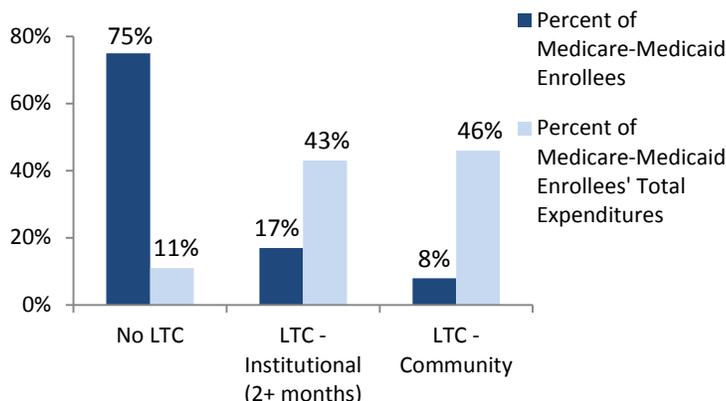

In the State of New York, in 2009:

- Medicare-Medicaid enrollees made up 25% of the Medicare population and 42% of Total Medicare expenditures.
- Medicare-Medicaid enrollees made up 14% of State Medicaid enrollees and 42% of Medicaid expenditures.

*The following figures are based on data for Fee-For-Service (FFS) enrollees only.*

Figure 3. Among Full and Partial Benefit Medicare-Medicaid Enrollees, the Proportion Enrolled in FFS Long-Term Care (LTC), Paid for by Medicare or Medicaid, and their Relative Share of FFS Program Expenditures: New York, 2009^

In the State of New York, in 2009:

- Community-based LTC appears to have been driving much of the high FFS costs attributable to Medicare-Medicaid enrollees. Specifically, the 8% of Medicare-Medicaid enrollees who used Community LTC accounted for 46% of total Medicare-Medicaid enrollee FFS expenditures.

## Medicare-Medicaid Enrollee Information State of New York, 2009

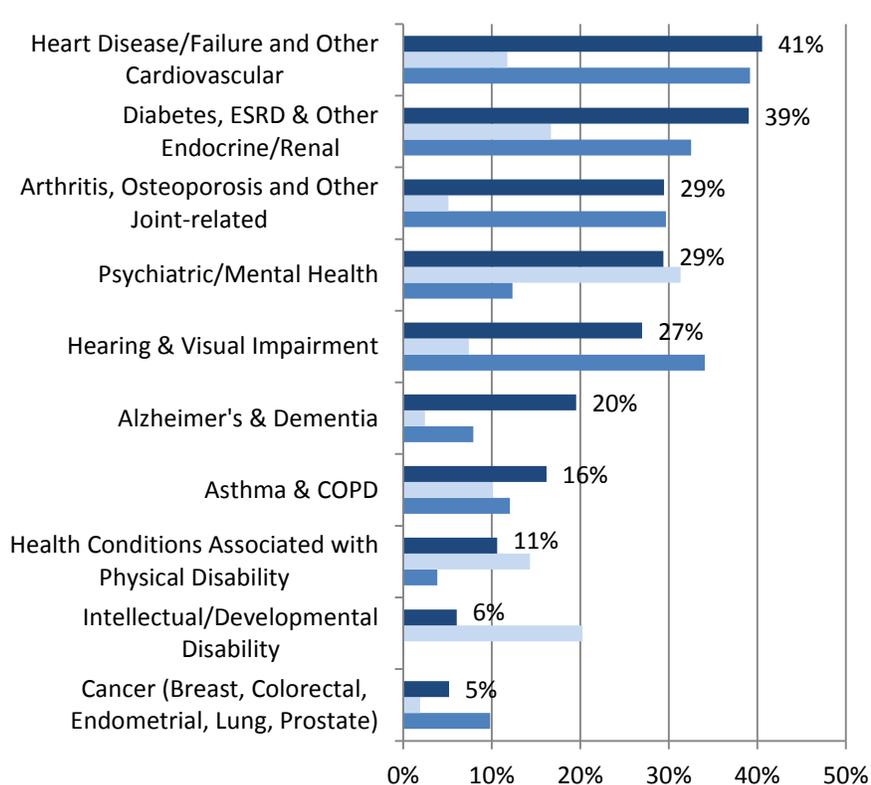

**Figure 4. Number of Chronic Conditions by Enrollment Type, FFS Enrollees only: New York, 2009<sup>^</sup>**

**In the State of New York, in 2009:**

- Out of 24 chronic health conditions studied, 44% of Medicare-Medicaid FFS enrollees had three or more chronic health conditions.
- This compares to 33% of Medicare-only FFS enrollees and 17% of Medicaid-only FFS enrollees (with disability) having three or more conditions.

**Figure 5. Health Condition Categories by Enrollment Type, FFS Enrollees only: New York, 2009<sup>^</sup>**

- Medicare-Medicaid Enrollees
- Medicaid-only (with disability)\* Enrollees
- Medicare-only Enrollees

**In the State of New York, in 2009, among Medicare-Medicaid FFS enrollees:**

- 41% had heart disease/failure or another cardiovascular –related disorder (excluding hypertension);
- 39% had diabetes, ESRD or another endocrine or renal disorder;
- 29% had arthritis, osteoporosis or another joint-related disorder; and
- 29% had a psychiatric (i.e., mental health) disorder.

<sup>^</sup>**Note:** These analyses were performed using FFS data and therefore may or may not be relevant to the entire State's total FFS and managed care enrolled Medicare-Medicaid population. On average, only 4% of all Medicare-Medicaid enrollees in the State of New York were enrolled exclusively in managed care..

<sup>\*</sup>**Note:** This Medicaid-only comparison group includes only those Medicaid enrollees who qualified for Medicaid based on disability.
