

## Medicare-Medicaid Enrollee Information State of Oregon, 2009

Figure 1. Total Medicare, Medicaid, and Medicare-Medicaid Dually Enrolled Populations: Oregon, 2009

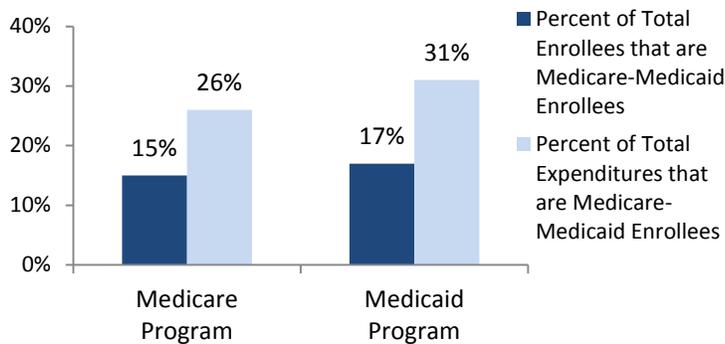

In the State of Oregon, in 2009:

- There were 96,327 persons dually enrolled in Medicare & Medicaid at any given point in time over the year..
  - 15% of Medicare Enrollees were co-enrolled in Medicaid.
  - 17% of Medicaid Enrollees were co-enrolled in Medicare.

\* Includes Medicaid-expansion Children's Health Insurance Program (CHIP)

Figure 2. Medicare-Medicaid Enrollees' Percentage of Total Medicare & Medicaid Enrollees and their Relative Share of Program Expenditures: Oregon, 2009

In the State of Oregon, in 2009:

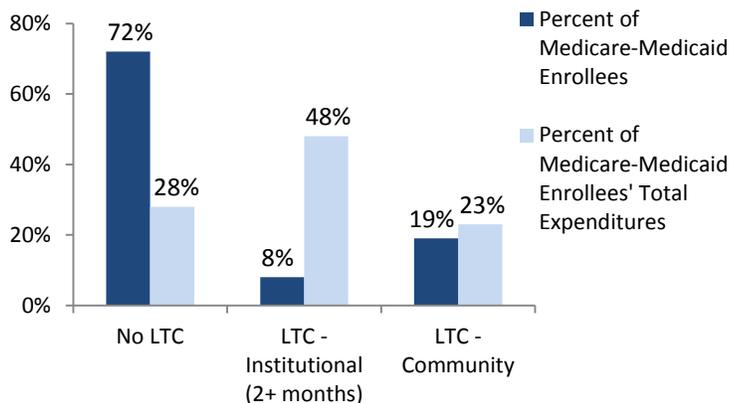

- Medicare-Medicaid enrollees made up 15% of the Medicare population and 26% of Total Medicare expenditures.
- Medicare-Medicaid enrollees made up 17% of State Medicaid enrollees and 31% of Medicaid expenditures.

---

*The following figures are based on data for Fee-For-Service (FFS) enrollees only.*

---

Figure 3. Among Full and Partial Benefit Medicare-Medicaid Enrollees, the Proportion Enrolled in FFS Long-Term Care (LTC), Paid for by Medicare or Medicaid, and their Relative Share of FFS Program Expenditures: Oregon, 2009<sup>^</sup>

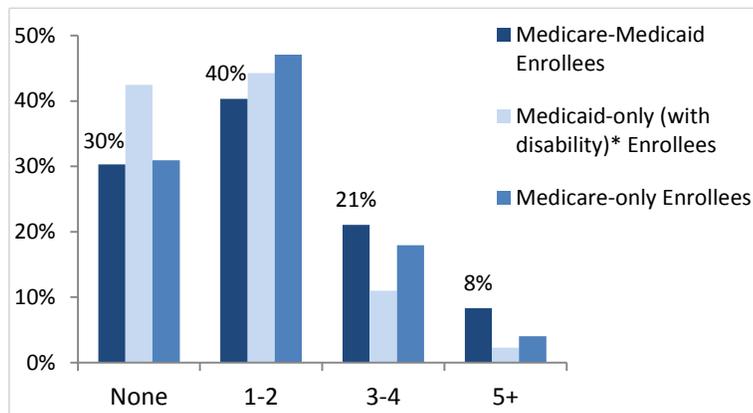

In the State of Oregon, in 2009:

- Institutional LTC appears to have been driving much of the high FFS costs attributable to Medicare-Medicaid enrollees. Specifically, the 8% of Medicare-Medicaid enrollees who resided in a LTC facility paid for by Medicare or Medicaid for two or more months accounted for 48% of total Medicare-Medicaid enrollee FFS expenditures.

## Medicare-Medicaid Enrollee Information State of Oregon, 2009

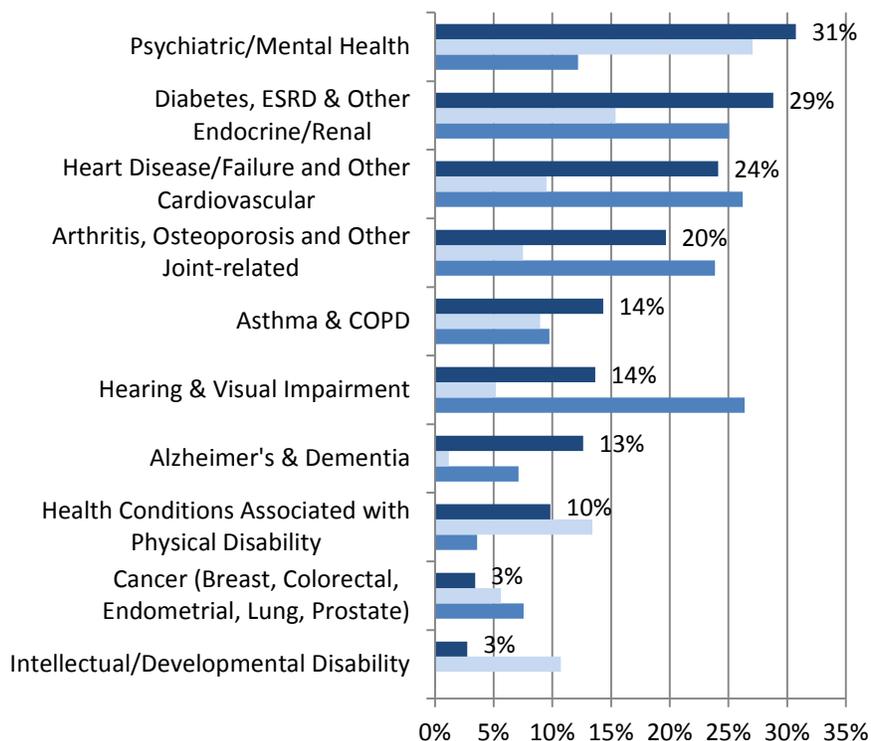

**Figure 4. Number of Chronic Conditions by Enrollment Type, FFS Enrollees only: Oregon, 2009<sup>^</sup>**

**In the State of Oregon, in 2009:**

- Out of 24 chronic health conditions studied, 29% of Medicare-Medicaid FFS enrollees had three or more chronic health conditions.
- This compares to 22% of Medicare-only FFS enrollees and 13% of Medicaid-only FFS enrollees (with disability) having three or more conditions.

**Figure 5. Health Condition Categories by Enrollment Type, FFS Enrollees only: Oregon, 2009<sup>^</sup>**

**In the State of Oregon, in 2009, among Medicare-Medicaid FFS enrollees:**

- 31% had a psychiatric (i.e., mental health) disorder;
- 29% had diabetes, ESRD or another endocrine or renal disorder; and
- 24% had heart disease/failure or another cardiovascular-related disorder (excluding hypertension).

<sup>^</sup>**Note:** These analyses were performed using FFS data and therefore may or may not be relevant to the entire State's total FFS and managed care enrolled Medicare-Medicaid population. On average, 32% of all Medicare-Medicaid enrollees in the State of Oregon were enrolled exclusively in managed care.

<sup>\*</sup>**Note:** This Medicaid-only comparison group includes only those Medicaid enrollees who qualified for Medicaid based on disability.
