

Medicare-Medicaid Enrollee Information State of Tennessee, 2009

Figure 1. Total Medicare, Medicaid, and Medicare-Medicaid Dually Enrolled Populations: Tennessee, 2009

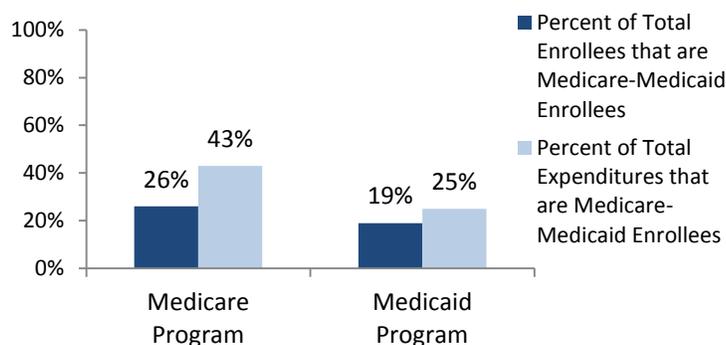

In the State of Tennessee, in 2009:

- There were 287,917 persons dually enrolled in Medicare & Medicaid at any given point in time over the year.
 - 26% of Medicare Enrollees were co-enrolled in Medicaid.
 - 19% of Medicaid Enrollees were co-enrolled in Medicare.

** Includes Medicaid-expansion Children’s Health Insurance Program (CHIP)*

Figure 2. Medicare-Medicaid Enrollees’ Percentage of Total Medicare & Medicaid Enrollees and their Relative Share of Program Expenditures: Tennessee, 2009

In the State of Tennessee, in 2009:

- Medicare-Medicaid enrollees made up 26% of the Medicare population and 43% of Total Medicare expenditures.
- Medicare-Medicaid enrollees made up 19% of State Medicaid enrollees and 25% of Medicaid expenditures.

The following figures are based on data for Fee-For-Service (FFS) enrollees only.

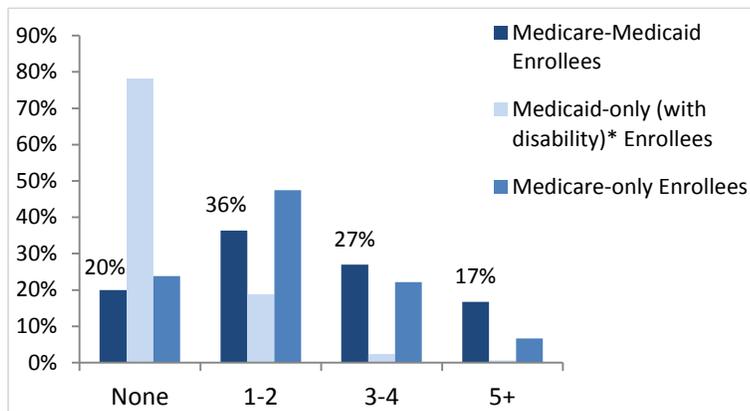

Figure 3. Among Full and Partial Benefit Medicare-Medicaid Enrollees, the Proportion Enrolled in FFS Long-Term Care (LTC), Paid for by Medicare or Medicaid, and their Relative Share of FFS Program Expenditures: Tennessee, 2009^

NOTE: Figure 3 has been suppressed for the State of Tennessee due to the very high proportion of Medicare-Medicaid enrollees who are enrolled in managed care.

Medicare-Medicaid Enrollee Information State of Tennessee, 2009

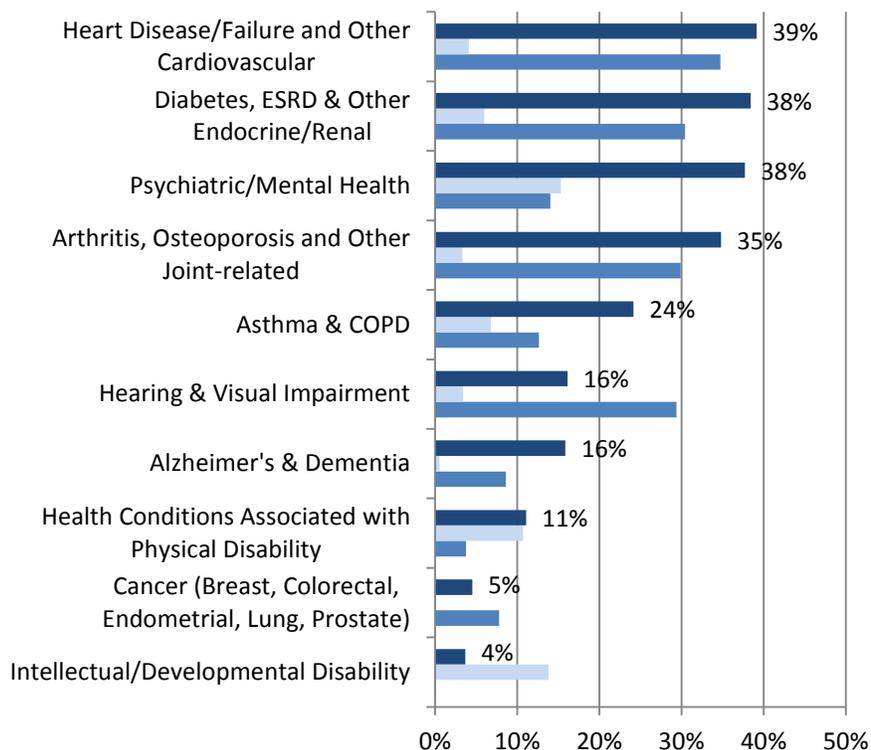

Figure 4. Number of Chronic Conditions by Enrollment Type, FFS Enrollees only: Tennessee, 2009[^]

In the State of Tennessee, in 2009:

- Out of 24 chronic health conditions studied, 44% of Medicare-Medicaid FFS enrollees had three or more chronic health conditions.
- This compares to 29% of Medicare-only FFS enrollees and 3% of Medicaid-only FFS enrollees (with disability) having three or more conditions.

Figure 5. Health Condition Categories by Enrollment Type, FFS Enrollees only: Tennessee, 2009[^]

In the State of Tennessee, in 2009, among Medicare-Medicaid FFS enrollees:

- 39% had heart disease/failure or another cardiovascular-related disorder (excluding hypertension);
- 38% had diabetes, ESRD or another endocrine or renal disorder; and
- 38% had a psychiatric (i.e., mental health) disorder.

[^]**Note:** These analyses were performed using FFS data and therefore may or may not be relevant to the entire State's total FFS and managed care enrolled Medicare-Medicaid population. On average, 19% of all Medicare-Medicaid enrollees in the State of Tennessee were enrolled exclusively in managed care.

^{*}**Note:** This Medicaid-only comparison group includes only those Medicaid enrollees who qualified for Medicaid based on disability.
