

**State Demonstrations to Integrate Care for Dual Eligible Individuals
Design Contracts
Summary of State's Initial Design Concepts
May 2011**

State: Colorado

Overview of Proposed Approach	Colorado proposes to enroll dual eligibles into Colorado's Accountable Care Collaborative, which is a hybrid of a primary care medical home and an accountable care organization.	
Target Population (All duals/full duals/subset/etc.)	Individuals enrolled in Medicare (A, B, C, and/or D), and also eligible for the full array of benefits under Colorado's Medicaid State plan.	
Estimated Enrollment (in 2012 and at full implementation)	Colorado proposes to make enrollee participation voluntary. Very conservatively, the State anticipates roughly half of Colorado's dual eligibles, or at least 30,000 participants. Colorado expects full implementation to ramp up quickly, prior to the end of 2012.	
Planned Geographic Service Area (Statewide or listing of pilot service areas)	Statewide	
Planned Stakeholder Process	Colorado plans to establish an advisory committee with broad participation by various stakeholders as well as to engage stakeholders in a series of meetings throughout the State of Colorado.	
Proposed Implementation Date and Related Milestones (Any implementation milestones are pending CMS Approval)	<p>June 2011: First large Stakeholder Forum: Regional Care Collaboration Organization kick-off meeting; obtain Medicare claims data on Colorado dual eligibles</p> <p>November 2011: Second large Stakeholder forum</p> <p>December 2011: Integrated data complete on Colorado dual eligibles and within our Statewide Data Analytics Contractor</p> <p>January 2011: Legislative changes proposed</p> <p>May 2012: Marketing materials approved</p> <p>June 2012: Submit plan to CMS</p>
