REVISION HISTORY

10/10/2016 – Version 2.7

The MMP Technical Guide has been updated with version 2.7 to reflect the CMS November 2016 Software changes, as documented in the final CMS HPMS notice, dated September 9, 2016.

CMS will implement the November software changes on the November CPM cutoff date of Friday, November 11, 2016. The Infocrossing MBD eligibility updates, however, will not occur until after CMS provides an updated MBD eligibility file which is expected to occur on Tuesday, November 15, 2016.

Version 2.7 addresses the addition of the new fields pertaining to the beneficiaries' prior historical enrollments as well as the addition of the Enrollment Source code for the beneficiaries' current enrollment.

1. Section 1 (Medicare Eligibility Inquiry) of this document has been updated to include the new fields on the batch eligibility response file. These changes are highlighted in red beginning on page 28.
2. The web service layout has changed to accommodate the new plan enrollment fields. Refer to section 3 of this document for details beginning on page 71.
3. The Eligibility+ response file has been modified to include the new plan enrollment fields. Changes are described in section 5, beginning on page 82.
4. The PDF (Prospective Dual File) layout as described in section 8 has changed. Plan enrollment end dates have been added to the two prior historical occurrences. Changes are described beginning on page 98.
5. The PDF beneficiary selection criteria from the MBD eligibility file has changed. As of November 15, the PDF file selection of potential dual eligible beneficiaries will include people that show a current plan membership in a Medicare Advantage or Part D prescription plan than have any of the enrollment source code values of:
 - B** – Beneficiary election
 - D** – System-generated enrollment (Rollover)
 - G** – Point of sale (POS) submitted enrollments
 - I** – Assigned to plan submitted transactions with enrollment source other than any of the following: B, E, F, G, H, and blank
 - N** – Plan-submitted rollover enrollments

6. The new MBD field additions will also be reflected on the [Eligibility](http://www.medicare-solution.com) tab of the www.medicare-solution.com website.

06/16/2016 – Version 2.6

The MMP technical guide has been updated with version 2.6 to introduce a new service and an enhancement to the MBD eligibility batch process. The document has also been updated to address the CMS May 2016 Software release. These updates are described as follows:

List of Prospective Dual-Eligible individuals (Medicare-Medicaid) also known as Prospective Dual file

A new list of potential dual-eligible individuals (Prospective Dual File) is now available to State organizations and their enrollment brokers to assist with the on-going MMP passive enrollment efforts. This new file feed will automatically be available to all State organizations participating in the capitated financial alignment initiative (also known as the MMP demonstration) on a twice per month basis.

CMS updates the Medicare Eligibility database that is maintained in the Infocrossing data center twice per month, on the 1st and 15th of each calendar month. Soon after this update is completed, Infocrossing will automatically generate a new data file that will list potential dual-eligible individuals that may become eligible for passive enrollment into a Medicare-Medicaid Plan (MMP). The main benefit of this new service is that it will search and provide the individuals' Medicare start dates as far out as six months from the actual date the file is generated. For example, when the file is generated on June 1st, 2016, the system will look ahead up until November 2016 to find potential dual-eligible individuals that have Medicare Part A and B entitlements and who have been deemed for Federal Low Income subsidy (LIS).

The full list of selection criteria is as follows:

1. Beneficiary must be a resident of the State.
2. Beneficiary must be entitled to Medicare Part A and B.
3. Beneficiary must have a Deemed/Low Income subsidy status.
4. Beneficiary must be alive.
5. Beneficiary must not be incarcerated.

6. Beneficiary must be lawfully present in the United States.

When reviewing this Prospective Dual file, State organizations or their enrollment brokers must further validate the eligibility of all the beneficiaries for MMP passive enrollment by ensuring they have Medicaid eligibility and meet all State-specific MMP enrollment eligibility requirements.

The Prospective Dual File follows the similar layout as the Medicare eligibility response file that has been available for State organizations since the beginning of the MMP demonstration but there are new data field additions and the file length is 1700 bytes (detailed layout is available in section 8, pages 89-102 of this document). The Prospective Dual file will automatically be made available on the Infocrossing Web portal every time it gets created and State users can find the Prospective Dual file under the “MMP – Prospective Dual File Feed” section of the “File Transfer” tab. State organizations can also request to have this new file feed automatically forwarded to their own internal FTP server. Please contact the Infocrossing help desk if you wish to have this batch functionality enabled.

For the population who has Medicare-first (current Medicare beneficiaries who recently qualified for Medicaid), CMS is currently making system enhancements to include previous Medicare Advantage (Part C) and Prescription Drug (Part D) enrollment periods and the enrollment source code information into the Prospective Dual File which is scheduled for November 2016. With this system enhancement, this will save a step for States from excluding dual-eligible individuals who are currently in Medicare Advantage or Part D prescription drug plans that were enrolled by CMS-initiated auto-enrollment or reassignment in the current calendar year. The following are the acceptable values of the enrollment source code for States to select newly dual-eligible individuals for MMP passive enrollment who currently have Medicare Advantage or Part D prescription drug coverage:

- **B** – Beneficiary election
- **D** – System-generated enrollment (Rollover)
- **G** – Point of sale (POS) submitted enrollments
- **I** – Assigned to plan submitted transactions with enrollment source other than any of the following: B, E, F, G, H, and blank
- **N** – Plan-submitted rollover enrollments

Starting early December 2016, the Prospective Dual File will include a list of Medicare-first population that only show the above enrollment source code information. Until then, the files will only include individuals that do not show any membership in a current Medicare Advantage or Prescription Drug plan.

Enhancement to the MBD Batch Eligibility query process

The Medicare eligibility query process has been enhanced to incorporate an automatic BEQ request to CMS for those instances when a beneficiary match cannot be obtained on the Infocrossing MBD eligibility database.

Currently, when a plan sponsor sends a batch MBD eligibility file request to Infocrossing for processing, any beneficiary record that cannot be matched against the MBD eligibility database gets returned on the eligibility response file as unmatched, with the HICN Found/Not found field set with the value of "N" (HICN not found). No Medicare eligibility information is returned. A new optional service is now available to all Plan sponsors to automatically have all such unmatched records sent to the CMS Marx system in a BEQ file request.

Should a plan sponsor choose to have this service turned "on", Infocrossing will enable the following functionalities:

1. All HICN requests that cannot be matched against the MBD eligibility database will be returned on the eligibility response file with the value of "B" (BEQ Request initiated) in the HICN Found/Not Found field in position 26 of the response file. Section 1, page 22 of this document has been changed to reflect this new value.
2. Infocrossing will keep track of all BEQ pending requests and sweep its database three times per day at 08:00 A.M., 12:00 Noon and 04:00 P.M. PST. At the designated times and as needed, any pending unmatched HICN requests will be written into a CMS formatted BEQ file and sent to the CMS Marx system for processing.
3. Once BEQ response files are received from CMS, Infocrossing will automatically reformat the files into an MBD response file and make them available to Plans on the Infocrossing Web folder.

A new section named "Exception BEQ" on the Infocrossing Web portal under "File Transfer" will contain a new link named "BEQ Response File". This link can be used by plan sponsors to review the history of all BEQ exception file submissions to CMS. These files will have the name "MBDE.RESPONSE.Dyymmdd.Thhmmss".

The format of the MBDE.RESPONSE files will be exactly the same as the MBD response file as described in section 1 of this document, beginning on page 20.

You also have the option of having these new files automatically sent to your designated FTP file folder. Please contact the Infocrossing help desk to have this functionality enabled.

4. Plan sponsors currently have the option of using a field named "sequence number" on an MBD input request file to keep track of HICN query submissions (please refer to the MBD input file request layout on page 19 on this document for further details). This field is currently returned on MBD response files and will

also be carried through on all unmatched eligibility requests that will be sent to CMS as a BEQ query. This data field along with the HICN field can be used by Plans to reconcile all outstanding MBD requests against the original input file submissions.

State and MMP organizations are encouraged to contact the infocrossing help desk to obtain additional information regarding both of these valuable service enhancements.

CMS May 2016 Software Release

The MMP technical guide has been updated to reflect the CMS May 2016 Software changes, as documented in the final CMS HPMS notice, dated February 29, 2016. The corresponding Infocrossing edit changes were implemented on the May 2016 CMS Plan Data Due date which occurred on Friday May 13th, 2016.

The Creditable Coverage Flag value of “R” or “U” on a “61” enrollment transaction or “73” NUNCMO transaction will no longer be allowed. The remarks section for the Creditable Coverage Flag field on page 40 has been changed accordingly.

12/10/2015 – Version 2.5

The MMP technical guide has been updated with version 2.5 to reflect the CMS February 2016 Software changes, as documented in the final CMS HPMS notice, dated December 1, 2015.

Important notes:

CMS will implement the February software changes on the February 2016 CMS Plan Data Due date which will occur on Friday, February 5th, 2016. The Infocrossing MBD eligibility updates, however, will not occur until after CMS provides an updated MBD eligibility file on Monday February 15, 2016.

The CMS changes that are applicable to this interface document are as follows:

- CMS has added up to 10 occurrences of Medicare Plan Ineligibility start and end dates due to unlawful presence. These dates, along with a Medicare Plan ineligibility data occurrence field, have been added to the MBD response file layout as described in section 1, beginning on page 28 of this document.
- Take note that although CMS is also adding 10 occurrences of incarceration start and end dates to the CMS BEQ response file, these same updates will not be reflected on the Infocrossing MBD eligibility response file. CMS will add these data elements to the MBD eligibility file at a later date.

The exact date will be communicated to MMP and State organizations as soon as the information is made available by CMS.

- The addition of the Medicare ineligibility start and end dates will not increase the MBD response record size. It remains at 1,300 bytes. All new data fields have been added at the end of the layout by using existing filler. This will allow ample time for MMP and State organizations to prepare for the new Medicare ineligibility data. However, please take note that the next MBD response layout change that CMS will implement to reflect the Medicare ineligibility due to incarceration **will** require an increase in record layout size in the MBD response file. Please plan accordingly for this impact on a future software change implementation.
- A new error code 76 will be generated on a new enrollment transaction if the effective date of the enrollment falls during a Medicare Plan Ineligibility period. Section 2.5, page 55 of this document has been changed to reflect this new error code.
- The web service layout has changed to accommodate the Medicare ineligibility start and end dates due to unlawful presence. Refer to section 3 of this document for details.
- The ELIGIBILITY+ response file has been modified to include the unlawful presence Medicare Ineligibility data. Changes are described in section 5, beginning on page 80.
- States and MMP sponsors must be prepared to accept and process new Transaction Reply Codes (TRCs) as described in Attachment C, figure 1 of the CMS February Software release document. CMS will also generate a new disenrollment reason code of 71 on involuntary disenrollments due to a not lawfully present period (refer to Attachment C, figure 2 of the CMS February 2016 Software release). The newly introduced TRCs are:
 - TRC 348 (Enrollment Rejected – Not Lawfully Present Period)
 - TRC 349 (Disenrollment due to Not Lawfully Present Period)

Direct access to the CMS memo publication can be obtained by following this link:

<https://www.cms.gov/Research-Statistics-Data-and-Systems/CMS-Information-Technology/mapdhelpdesk/Downloads/Announcement-of-the-February-2016-Software-Release.pdf>

08/31/2015 – Version 2.4

The MMP technical guide has been updated with version 2.4 to reflect the CMS November 2015 Software changes, as documented in the final CMS HPMS notice, dated August 28, 2015. The Infocrossing edit changes will be implemented on the November 2015 CMS Plan Data Due date which will occur on Friday November 6th, 2015. The actual implementation time will be right after 08:00 P.M. Eastern Time.

As part of the November software changes, CMS will require the PBP# field on “51” disenrollment and “81” disenrollment cancellation transactions.

- Section 2.1 (Medicare Transaction Processing) and section 2.6 (Medicare Transaction matrix) of this document have been changed as follows:

The PBP# field on the batch enrollment/disenrollment/cancellation record on page 31 has been updated to indicate that it is a required field on “51” and “81” transaction types. Section 2.6 (Medicare Transaction matrix) has been modified on pages 53 and 54 to indicate that the PBP# is required on “51” and “81” transactions.

- Infocrossing edits will reject “51” and “81” transactions that do not include the PBP# field when required with existing error code: “51 - PBP# REQUIRED. VALUE MUST BE NUMERIC”
- MMP organizations will be able to test this new CMS requirement with the Infocrossing application system beginning on Monday, September 14, 2015.

Another small change that is unrelated to the CMS November software changes will be implemented to improve consistency and clarity: the text description for error code “48” will be changed from the existing message of “*Signature Date Invalid*” to the new message: “*Application Receipt Date Invalid*”. Section 2.5 - *Transaction Error Codes* on page 49 has been changed accordingly.

With August 2015 CMS software release, MMPs and States can now request CMS address data on a batch basis using the MARx Batch Eligibility Query (BEQ) file exchange process. The August 27, 2015 CMS HPMS memo entitled “*Batch Eligibility Query (BEQ) Enhancement – Mailing and Residence Address Data Available Through MARx BEQ Response File*” explains the new capability and introduces the newly formatted BEQ response file layout. For more details about the BEQ request file/response file layouts, please see section F.6 and F.7 (pages F-47 thru F-59) in the PCUG Appendices located under the Download section in this webpage:

https://www.cms.gov/Research-Statistics-Data-and-Systems/CMS-Information-Technology/mapdhelpdesk/Plan_Communications_User_Guide.html

06/08/2015 – Version 2.3**Involuntary Disenrollment Due to Confirmed Incarceration Status – New Transaction Reply Codes and Disenrollment Reason Code**

CMS has recently published the August 2015 Software Release document. Section 5 of the document, which is titled “*Eligibility for Enrollment and Involuntary Disenrollment due to incarceration Status*” is of primary concern for the MMP program. States and MMP sponsors must be prepared to accept and process new Transaction Reply Codes (TRCs):

- TRC 345 (Enrollment Rejected – Confirmed Incarceration)
- TRC 346 (Disenrollment due to Confirmed Incarceration)
- TRC 347 (Reenrollment due to Closed Incarceration Period)

CMS will start producing these new TRCs on the daily TRR files once the August Software changes are implemented on the week-end of Friday, August 7, 2015.

Direct access to the CMS memo publication can be obtained by following this link:

<http://www.cms.gov/Research-Statistics-Data-and-Systems/CMS-Information-Technology/mapdhelpdesk/Downloads/Announcement-of-the-August-2015-Software-Release.pdf>

System Enhancements to Batch Eligibility Query (BEQ) Response File and MARx eligibility screen (M232)

On May 10, 2015, CMS has expanded the record length of the BEQ response file from 750 to 1500 positions and added four extra data elements:

- **Plan Benefit Package (PBP) Number,**
- **Plan Type Code,**
- **Employer Group Health Plan (EGHP) Indicator, and**
- **End Stage Renal Disease (ESRD) Indicator.**

These new data fields allow states to select the right dual-eligible individuals and determine anyone who are found ineligible prior to submitting MMP passive enrollment transactions to CMS. This will help state's passive notice mailings go to the targeted passive enrollment population. In addition to MMA/TBQ file exchanges, States are highly encouraged to use this batch eligible query/file exchange process since it provides more real-time Medicare eligibility information.

Also, with the May 10th 2015 CMS system release, State Medicaid Agency staffs and their brokers may notice the new **Plan Type Code and Description** to the MARx eligibility screen (M232). This was added for the state users and enrollment brokers to better determine MMP enrollment eligibility of the dual-eligible individual.

See Section 1 of the CMS May 2015 Software Release document for more information:
<http://www.cms.gov/Research-Statistics-Data-and-Systems/CMS-Information-Technology/mapdhelptdesk/Downloads/Announcement-of-the-May-2015-Software-Release.pdf>

Section 6 of the MMP technical guide documents an enrollment reconciliation tool that is available to all State and MMP organizations.

The enrollment reconciliation tool can be used to research any Medicare transaction for a given MMP contract within a specific time frame. You can validate the date and time of any Medicare transaction that was sent to CMS and match it against all the CMS Transaction Reply responses. This information can be used to identify any potential discrepancies and help determine the necessary corrective actions.

There are two ways to access this tool from the www.medicare-solution.com website:

1. From the Main Menu – choose “Enroll Recon” tab. This allows you to research Medicare transactions within a limited time period of three months at a time. The information displayed is high level and meant to serve as a first validation step on a case by case scenario. For a more in-depth reconciliation process involving a much larger time period and volume of data, you can choose the second available option as described below.
2. From the Main Menu – choose “File Transfer” tab. Locate the following section:

Enrollment - Enrollment Reconciliation Report

[Enrollment Recon Extract Request](#)

[Enrollment Recon Report Download](#)

[Enrollment Recon Data Download](#)

To place a request, click on the “Enrollment Recon Extract Request” link. Choose any date range that could span over several months or years for a given contract.

Once your selection is submitted, the system will provide the results in two formats:

1. A detail report with summary statistic totals can be retrieved under the “*Enrollment Recon Report Download*” link.

2. A data file can be retrieved under the “*Enrollment Recon Data Download*” link. This file can be loaded into your internal application systems. The layout of the reconciliation file is described in section 6 of this document.

The Infocrossing MBD File response layout and Web service will be modified and implemented on Saturday, August the 15th, 2015 to incorporate the CMS BEQ changes that were implemented on May 10, 2015.

1. The MBD eligibility file response layout is now being updated with the same changes. Section 1 of this document has been updated as follows (all changes are highlighted in red within this document for ease of reference):
 - Note that the MBD file response layout size (as described in section 1 of this document) does not change and remains at 1,300 bytes. However, the EGHP indicator value in position 213 and the plan enrollment related fields (positions 478 to 525) have changed as follows:

Position 213 of the MBD response file is now defined as FILLER. This change occurs on page 17. The EGHP indicator is now defined for each one of the two plan membership occurrences for the beneficiary as follows:

Two occurrences of plan enrollment information now include the PBP ID, the EGHP INDICATOR and the PLAN TYPE CODE. Please reference the MBD response file layout in section 1 of this document, beginning on page 20.

- Note that the ESRD STATUS indicator continues to be reported on the MBD response layout with no changes.
2. The MBD eligibility file+ response layout is also being updated with the same changes as described above for section 1. Section 5 of this document, beginning on page 67 has also been updated accordingly.
 3. The web service section (section 3, beginning on page 59) of this document has been changed to accommodate the new field additions and changes as follows:
 - The eghplnd field has been removed from the “Eligibility Query Return Data” portion and added to the “Enrollment Data” section.
 - The pbpld and planType fields have been added to the “Enrollment Data” section.
 4. These MBD field additions and changes will also be reflected on the Eligibility tab of the www.medicare-solution.com website

01/30/2015 – Version 2.2

These software changes will be implemented on Monday March 2nd, 2015.

- Version 2.2 reflects changes that are meant to improve the processing and turnaround of both enrollment and eligibility files. Currently, when MMP Plan Sponsors and State organizations submit data files containing invalid or missing header record information, the Infocrossing edits abort the process and the help desk notifies the end-user that the file must be corrected and resubmitted. As of March the 2nd, both automated FTP and manual Web upload file submissions will automatically reject all detail transactions when invalid header record information is submitted.
 1. For eligibility files, the HICN Found/Not Found field in position of 26 of the eligibility response file will have a new value of “F” (Failed) populated for all detail transactions. No eligibility match will be attempted against the Medicare beneficiary database.
 2. For enrollment file submissions, all detail transactions will be rejected with a new error code of “60”. The file must be corrected to contain a valid header record and resubmitted for processing.
- The edit requirement for the TC 90 Implementation date to be at least 30 days after the Notification date has been removed. The corresponding error code “3A” has been disabled.

The editing of a 4RX TC 72 effective date has been improved by ensuring that the date falls within valid enrollment periods for the given contract. The historical CMS TRRs will be reviewed as necessary to accomplish this and help ensure that CMS does not generate a TRC “209” rejection response. Infocrossing will reject 72 transactions that do not show a valid enrollment period with a new error code of “59”.

05/03/2014 – Version 2.1

The Remarks section for the Application Receipt date field in Section 2.1 Medicare Transaction Processing – All transaction types except “76” and “90” has changed. For passive MMP enrollments, the old description of: “The Application Receipt date field is the 1st day of the 2nd month prior to the actual month of enrollment. For example, if the enrollment month is June 1, 2013, the application receipt date is April 1, 2013.” has been removed and replaced with: “The Application Receipt date field is the date the transaction is submitted to CMS (which must be no later than 60 days before the effective date).”

01/06/2014 – Version 2.0

- This document has been updated to reflect the CMS February 2014 Software changes. All relevant changes will be implemented on the February 2014 CMS Plan Data Due date which will be on Friday February the 7th, 2014. The actual implementation will occur after 08:00 P.M. Eastern Time.
 1. Section 2.3. Medicare Transaction Processing – “90” Reporting Identified Drug Overutilizers on page 37 has been added to document the record layout and field definitions for the new Transaction Code 90.
 2. Section 2.4 Medicare Transaction response has been modified to accommodate the new Tran code 90 data fields. It is important to note that positions 214 through 245 of the response file are shared by both Tran code 76 residential address change and the new Tran Code 90 data fields. You must keep track of the Transaction Code value shown in positions 14 through 15 (data values “76” or “90”) of the response record to determine whether Tran Code 90 or Tran Code 76 data field values are reported.
 3. The new Transaction Code “90” requires the addition of new transaction batch response error codes. As a result, we are now producing alphanumeric error codes (Errors “1A” through “9A”). See section 2.5 Transaction Error Codes to review the new error codes. It is important to adjust your internal application systems to accommodate an alphanumeric data type.
 4. Section 2.6 – Matrix of Required/Optional fields – has been updated to add the new Tran Code 90.
 5. Section 4.4 CMS Transaction Transmission Data File Layout has been changed to accommodate the new Tran Code 90 data fields.
 6. A batch processing edit enhancement will be implemented alongside the Tran Code 90 changes. Currently the entire batch enrollment file is rejected if it contains any blank records. As of February 7, 2014, blank records will be rejected with error code “78 - Invalid Record Type. Record Bypassed”. This will allow for the entire file to process and have all its valid records accepted and sent to CMS as quickly as possible.
 7. Section 2.5 Transaction Error Codes, has been changed to update error code 98. This error is not applicable to MMP processing and has been changed from “MEMBER MUST BE ENROLLED IN PART B WITH NO PART A ENTITLEMENT” to: “RESERVED FOR FUTURE USE”.

8. Section 2.1 has been updated to allow the submission of an EGHP or Employer subsidy Enrollment Override flag. Refer to the remarks section of each data field for instructions.

09/09/2013 – Version 1.4

The allowable value for the Premium Payment Option/ Part C-D field in position 77 of the Medicare input transaction layout has changed. The previous guidance provided for this field was to initialize the field to spaces. The correct value should be “N” (No Premium Applicable). Please see page 27 of the document for details.

06/24/2013 – Version 1.3

Version 1.3 changes reflect the latest CMS directive to remove the Part D Opt-Out Transaction code 79. This document has been updated to remove all references to the “79” transaction code.

05/06/2013 – Version 1.2

Version 1.2 changes will be implemented on Monday, May the 27th, 2013.

The Transaction tracking ID is now a required field for all MMP transaction processing. State or MMP submitted Medicare transactions (enrollments, disenrollments or changes) must contain the Infocrossing assigned account# in the first 7 positions of the 15 digit Transaction tracking ID. Positions 8 through 15 are free form and optional. Infocrossing edits will automatically populate your account number on the transaction if positions 1 through 7 are blank. The transaction will reject with a new error code of “73” if invalid data is found. The remarks section of the Transaction Tracking ID field has been updated accordingly on page 29 and 32 of this document.

- The Part D Opt Out transaction code 79 has been added. The Part D Opt Out flag has also been modified to now optionally allow beneficiaries to opt out of Part D if they already have a third party insurance that covers drugs. Please refer to the CMS MMP Enrollment and Disenrollment guidance document, section 30.1.4, Passive Enrollment, section E. Opt-Out for further guidance.
- This document contains some errors which are not relevant to MMP transaction processing. These errors have been identified with the description “(CAN BE IGNORED BY MMP PROCESSING)”. The errors in question are Errors 24, 33, 34, 37, 39, 41, 45, 53, 82, 86, 87 and 88 as

documented in section 2.4 - Transaction Error codes beginning on page 36.

- The previously defined MMP enrollment source code of "M" has been removed from the remarks section of the Enrollment Source code field on page 28.
- New error codes are now in effect. Some existing errors previously labeled as "Reserved for future use" will now be generated based on conditions found as shown below (note that error codes 24 and 82 are new but not relevant to MMP processing):

03 – *Trans type not applicable to MMP* (this error is generated if an MMP or State organization submits any of the 74 EGHP, 75 Payment Option, 77 Segment ID and 80 cancellation transactions which are not applicable to MMP processing).

73 – *MMP Tracking-ID must begin with HCF#* (error is generated when an MMP or State organization populates the first 7 positions of the transaction tracking ID field with the wrong value)

84 – *EGHP flag not applicable to MMP* (error is generated when an MMP or State organization submits a 61 enrollment with the EGHP flag populated).

91 – *Premium Pymt Opt not applicable to MMP* (error is generated when an MMP or State organization submits a 61 enrollment with a value in the premium payment option field).

12/10/2012 – Version 1.1

- Section 2.4 (Transaction Error Codes) of this document has been revised to provide additional information. Each error code is now mapped to the relevant transaction type and input data field.

Two unused errors have been retired and their descriptions have been changed to "Reserved for future use". These errors used to be defined as:

03 – Middle Init MBD membership Mismatch

24 – Member currently enrolled

General Description

This document describes the interface to the Infocrossing applications for Medicare Eligibility verification and Enrollment submission to the CMS MARx systems. There are 3 ways to interface with the Infocrossing systems: 1) manually upload a batch file via the Infocrossing secure web site 2) automated file transfer of a Pretty Good Privacy (PGP) encrypted input file or 3) a programmatic call of a Web service.

1. Manual upload of a batch file via the Infocrossing secure web site where the user logs in and selects the menu option to transfer a file. Users will be able to select a file from their workstation to upload to the Infocrossing server. Refer to the Batch Eligibility Layout and Batch Enrollment Layout as described in this document for more information.
2. File Transfer (FTP - File transfer Protocol) of a PGP encrypted input file. Infocrossing and the client will need to exchange public keys for the encryption. This process can use either a customer's FTP site or the Infocrossing FTP site. Files are processed at a predetermined frequency specified by the customer. The File transfer process can be fully automated. Refer to the Batch Eligibility Layout and Batch Enrollment Layout as described in this document.
3. A Web Service is provided for doing real time Medicare Eligibility inquiry. This Simple Object Access Protocol (SOAP) based interface allows for programmable access to the Infocrossing Eligibility Inquiry service. Eligibility Information is queried using the Medicare HICN (Health Insurance Claim Number) and the first 6 characters of a beneficiary's last name. Alternatively, the HICN and the beneficiary Date of Birth can be used as key fields to retrieve Medicare eligibility entitlement information. A Web Service Descriptor Language (WSDL) file containing the web service description is available. The Web Service section (Section 3) of this document provides you with more detailed information regarding this process.

1. MEDICARE ELIGIBILITY INQUIRY

The Medicare Eligibility query service can be used when States or Medicare/Medicaid Plan personnel have selected a beneficiary for Medicare enrollment and there is a need to ensure that the person meets all Medicare eligibility criteria. This query eligibility verification process must be completed before any enrollment activity occurs and applies whether a given beneficiary has elected to enroll or whether the State agency has made the selection as a passive enrollment.

The eligibility response that is provided will help verify and confirm Medicare Eligibility entitlements and other related information.

INPUT RECORD LAYOUT FOR BATCH ELIGIBILITY INQUIRY

RECORD FORMAT = FB (Fixed Block) RECORD LENGTH = 80

HEADER RECORD

| FIELD NAME | SIZE | POSITION | FORMAT | COMMENT |
|------------------|------|----------|---------|---|
| RECORD TYPE | 01 | 1 – 1 | Char | 'H' – Required field used to uniquely identify the record as a header. Value must always be set to 'H'. |
| ACCOUNT | 08 | 2 – 9 | Char | Account number Assigned by Infocrossing – Required field |
| TRANSACTION DATE | 08 | 10 – 17 | Numeric | CCYYMMDD |
| FILLER | 63 | 18 – 80 | Char | Spaces |

DETAIL INPUT RECORD

| FIELD NAME | SIZE | POSITION | FORMAT | COMMENT |
|-----------------|------|----------|--------|--|
| RECORD TYPE | 01 | 1 – 1 | Char | 'D' – Required field. Each detail record in the file must have the value of "D" in position 1. |
| HICN | 12 | 2 – 13 | Char | Required field – Beneficiary's Health Insurance Claim Number |
| LAST NAME | 12 | 14 – 25 | Char | Required field –Beneficiary's Last Name |
| SEQUENCE NUMBER | 32 | 26 – 57 | Char | Optional – Free form custom field that can be used to track HICN query submissions. |
| FILLER | 13 | 58 – 70 | Char | Spaces |
| DATE OF BIRTH * | 08 | 71 – 78 | Char | Optional – Beneficiary's Date of Birth in CCYYMMDD format (See additional information supplied below). |
| FILLER | 02 | 79 – 80 | Char | Spaces |

* The eligibility process will first attempt to find a match by using the HICN and the last name provided. If no match is obtained and the optional Date of Birth field is provided, a second attempt will be made by using the HICN and the Date of Birth fields.

If prior match attempts using the HICN are unsuccessful, one more attempt will be made to match the HICN and last name fields against the Medicare Beneficiary Database XREF (Cross Reference) HICN field. The XREF HICN represents any prior HICN number that might have been assigned to a beneficiary in the past.

OUTPUT RECORD LAYOUT FOR BATCH ELIGIBILITY INQUIRY

RECORD FORMAT = FB (Fixed Block)

LENGTH = 1300

HEADER RECORD

The output header record is in the same format as the input header record except for the addition of two MBD (Medicare Beneficiary Database) related data fields and an expanded record layout to 1,300 bytes.

| FIELD NAME | SIZE | POSITION | FORMAT | COMMENT |
|---|------|-----------|---------|--|
| RECORD TYPE | 01 | 1 – 1 | Char | 'H' (copied from input header record) |
| ACCOUNT | 08 | 2 – 9 | Char | Infocrossing supplied Account number (copied from input header record) |
| TRANSACTION DATE | 08 | 10 – 17 | Numeric | CCYYMMDD |
| MBD (Medicare beneficiary Database) LOAD EFF DATE | 08 | 18 – 25 | Numeric | CCYYMMDD – Date MBD data is refreshed by CMS and loaded on Infocrossing database |
| POTENTIAL UNCOV MONTHS EFF DATE | 06 | 26 – 31 | Numeric | CCYYMM – Payment month MBD data is received from CMS |
| FILLER | 1269 | 32 – 1300 | Char | Spaces |

DETAIL OUTPUT RECORD

For a successful match, the full user supplied HICN must be found on the Eligibility database and the first 6 bytes of the user supplied last name must match the first 6 bytes of the beneficiary last name as found on the Eligibility database. Note that the Date of Birth could also be supplied and used to match the Eligibility database beneficiary record. The Date of Birth will be used as a second match attempt only if a last name match is unsuccessful.

IMPORTANT NOTES:

Once an HICN match is found, the MBD response data will be categorized as follows:

1. Eligibility response Inquiry Type field in position 476 of the output file is set to 'E': in such cases, the beneficiary does not show membership in the requesting Medicare contract or Plan ID (For purposes of clarification, the terms "Contract" and "Plan ID" are interchangeable). Note that each Infocrossing account number is assigned to its authorized Medicare contract number(s). The response record is considered to be an eligibility inquiry and the Inquiry Type field value is set to "E".
2. Membership response Inquiry Type field in position 476 of the output file is set to 'M': beneficiary is enrolled in the requesting plan. The beneficiary shows active enrollment in one of two Plan ID response fields supplied in positions 478 and 492. The response record is considered to be a membership inquiry and the Inquiry Type field value is set to "M".
3. MBD Eligibility data is released when both the HICN found and Name/DOB found fields are set to "Y" or a match is obtained against the CMS XREF Claim Number field and the HICN found flag is set to "X".

When a successful match is obtained, all applicable response data fields starting from position 28 are populated with MBD data.

| FIELD NAME | SIZE | POSITION | FORMAT | COMMENT |
|--|------|-----------|---------|---|
| RECORD TYPE | 1 | 1 – 1 | Char | 'D' – User supplied, copied from input file |
| HICN CLAIM NUMBER | 12 | 2 – 13 | Char | User supplied HICN – copied from input file |
| LAST NAME | 12 | 14 – 25 | Char | User supplied Last Name – copied from input file |
| HICN FOUND/NOT FOUND | 01 | 26 – 26 | Char | Y= found, N= not found X= Match on XREF HICN found B= Not found on MBD, BEQ requested F= Failed – Cannot process records |
| NAME or BIRTHDATE FOUND/NOT FOUND | 01 | 27 – 27 | Char | Y= found, N= not found |
| Medicare Eligibility and entitlement data follows: | | | | |
| LAST NAME | 40 | 28 – 67 | Char | |
| FIRST NAME | 30 | 68 – 97 | Char | |
| MIDDLE INIT | 01 | 98 – 98 | Char | |
| GENDER | 01 | 99 – 99 | Char | Gender ('F' or 'M') |
| BIRTHDATE | 08 | 100 – 107 | Numeric | CCYYMMDD |
| PART A ENTITLEMENT DATE | 08 | 108 – 115 | Numeric | CCYYMMDD. The Entitlement Start Date of the beneficiary's most recent or active Medicare Part A entitlement period. |
| PART A ENTITLEMENT END DATE | 08 | 116 – 123 | Numeric | CCYYMMDD. The Entitlement End Date of the beneficiary's most recent or active Medicare Part A entitlement period. |
| PART B ENTITLEMENT DATE | 08 | 124 – 131 | Numeric | CCYYMMDD. The Entitlement Start Date of the beneficiary's most recent or active Medicare Part B entitlement period. |
| PART B ENTITLEMENT END DATE | 08 | 132 – 139 | Numeric | CCYYMMDD. The Entitlement End Date of the beneficiary's most recent or active Medicare Part B entitlement period. |

**Potential Uncovered Months

Important Note: The Number of Uncovered months (number of months in which a Medicare eligible beneficiary did not have creditable drug coverage for a continuous period of 63 days or more) is an important rule of the Medicare Prescription Drug program. Although the Medicare & Medicaid Plan enrollment (MMP) program is subject to the Medicare Prescription Drug rules, beneficiaries that become eligible to enroll in the MMP program will get any prior number of uncovered months reset as soon as their low income subsidy eligibility status is established. As such, while this field should not be considered in the initial enrollment of beneficiaries in the demonstration program, it could have a potential use in identifying payment reconciliation issues.

** As of November 9, 2007, when applicable, CMS requires plans to submit the latest incremental number of uncovered months, rather than the cumulative process that used to be in place.

The Infocrossing new potential incremental uncovered months is reported as follows:

The Potential Uncovered Months field represents the latest calculated incremental number of months for which the beneficiary was NOT enrolled in a Part D or Retiree Drug Subsidy plan. We subtracted the latest Part D end date from the uncovered months effective date. If there are no Part D dates, then, the end of the beneficiary's Part D ICP date, or May, 2006, whichever is later, is used.

Example 1:

If the beneficiary is currently enrolled in a Part D plan, then the potential incremental uncovered months is zero. If the latest Part D end date is zeros, then uncovered months is zero.

Example 2:

If the beneficiary terminated membership in a Part D plan on October 31, 2007 and the uncovered months effective date is December 1, 2008, then this is less than 63 days from the calculation date and the uncovered months is set to zero.

Example 3:

If the beneficiary terminated membership in Part D plan August 31, 2007 and uncovered months effective date is December 1, 2008, which is greater than 63 days, the number of uncovered months is 3 months.

2. MEDICARE TRANSACTION PROCESSING

BATCH TRANSACTION PROCESSING

Clients that wish to do batch transaction processing should contact an Infocrossing customer service representative at Infocrossing by calling 1-877-833-3499. The Infocrossing help desk personnel can assist you in assigning an account number which is needed to submit both Eligibility and Enrollment files and assist with any questions that you might have.

A batch job will be implemented to automatically process client submitted Medicare transaction files. Infocrossing will process the transactions within 5 to 15 minutes of upload.

Whether a batch job is run after-hours or during the day, the system will generate error/response data in report and/or data formats, ready for downloading. The client's input data file will be deleted by the batch job.

The transaction file supplied by the customer must contain one header record followed by Medicare transactions. The following pages explain the format of the data and individual field positions. The record length is 300 bytes. All applicable fields are validated against the MBD eligibility database.

2.1 MEDICARE TRANSACTION PROCESSING – ALL TRANSACTION TYPES EXCEPT “76” AND “90”

This document is intended for readers to use as a supplement to the CMS literature and should primarily be used as a guide to build the Infocrossing required record layout.

Batch Enrollment/Disenrollment/Change/Cancellation transactions Header Record

| Data Element | Size | Format | Position | Remarks |
|-----------------------------|------|--------|----------|---|
| Record type | 1 | Num | 1 | '1' Header record |
| Account | 7 | Char | 2-8 | Account number assigned by Infocrossing. |
| Filler | 1 | Char | 9 | Space |
| Planid | 5 | Char | 10-14 | Plan id (contract) supplied by CMS |
| Filler | 1 | Char | 15 | Space |
| Batch-Number | 6 | Num | 16-21 | Any Numeric Value identifying the group of transactions |
| Trans-Count | 8 | Num | 22-29 | Numeric Value specifying the number of type 3 detail records sent |
| Batch File Type ** | 5 | Char | 30-34 | <u>Note:</u> “RETRO, POVER and SVIEW” submissions are special file submissions that are <u>initiated only with specific guidance from CMS</u> . “spaces” = Normal transaction which conforms to CMS CCM processing rules. “RETRO” = Retroactive Transaction Submission. “POVER” = Plan Rollover Transaction Submission “SVIEW” = Special Organizational Review Transaction Submission |
| CMS Approval Request ID *** | 10 | Char | 35-44 | Leave as spaces when Batch File Type is “spaces”. Otherwise, obtain the appropriate value from the CMS MARx UI screens when Batch File Type is “RETRO, POVER or SVIEW”. |
| Filler | 256 | Char | 45-300 | Spaces |

** If “RETRO” “POVER” or “SVIEW” is populated, only one Header record must be included in the file submission to Infocrossing.

*** Obtain the appropriate value for the CMS Approval Request ID from the CMS MARX screens when you need to submit a RETRO, POVER or SVIEW file to Infocrossing. Note: This value must be populated when Batch File Type is populated. Your file submission will be rejected if multiple header records are sent with the Batch File Type field populated or an invalid value is supplied in the Batch File Type.

Batch Enrollment/Disenrollment/Change/Cancellation transactions Detail Record

** The remarks section can be used to build your transaction records. The CMS Plan Communication User Guide document should be used primarily.

Note: For ease of reference, the “76” residential Address Change transaction layout has been defined in a separate section. Please keep in mind that all transaction types can be submitted together in one batch file to Infocrossing for processing.

Additional important notes:

- All references to Medicare and Medicaid Plans are used with the acronym: “MMP”
- The CMS MARx system input file layout requirement allows for many different types of organizations to submit data to CMS. While this document contains references to these organizations, Medicare and Medicaid Plan personnel should strictly concern themselves with data specific to MMP processing requirements. Some example acronyms of such organizations are: *MAs* (Medicare Advantage Plans), *MAPDs* (Medicare Advantage Prescription Drug Plans) and *PDPs* (Prescription Drug Plans)
- While the CMS MARx system processes several different types of transactions for various organizations concerned with the MARx processing interface, only the transactions that are applicable to MMPs are described in this document. Transaction types “74” (Employer Group Health Plan Change), “75” (Premium Payment Option Change) and “77” (Segment ID change) are excluded from this document and are not applicable to MMPs.

| Data Element | Size | Format | Position | Remarks |
|--------------------------------------|------|--------|----------|--|
| Record-Type | 1 | Num | 1 | '3'-transaction record. |
| Health Insurance Claim-Number (HICN) | 12 | Char | 2-13 | Valid Health insurance Claim Number. Must exist in CMS Eligibility for enrollments. Required on all transactions. |
| Surname | 12 | Char | 14-25 | Last name. No blank or spaces. Required on all transactions. |
| First Name | 7 | Char | 26-32 | First name. No blank or spaces. Required on all transactions. |
| Middle Initial | 1 | Char | 33 | Middle Initial. Can be a blank or space. Optional on all transactions. |
| Gender | 1 | Char | 34 | 1 = male, 2 = female, 0 = unknown. Required on all transactions. |
| Birth Date | 8 | Num | 35-42 | Birth date in CCYYMMDD format. Required on all transactions. |
| EGHP Flag | 1 | Char | 43 | To identify Employer Group Health Plan (EGHP). Values are 'Y' or blank as applicable. Used on '61' transactions. Report 'Y' for type "61" transactions if EGHP, otherwise leave blank. Leave blank for all other transactions. |
| PBP # | 3 | Char | 44-46 | Plan Benefit Package. Required on transactions '61', '51', '72', '73', '78', '81', '82', '83' if plan has PBPs. Leave field blank only if not applicable for the contract. Otherwise, PBP is required for all organizations to report a 3 character numeric number (zero-padded, 001-999). |

| Data Element | Size | Format | Position | Remarks |
|--------------------------|------|--------|----------|--|
| Election Type | 1 | Char | 47 | <p>While all election type values as explained below are valid in the CMS MARx system for many organizations, as far as the MMP plans are concerned, the appropriate election type value for all transactions is "U – LIS/Duals, Special Enrollment Period". Required on '61' and '51' transactions. Leave as space if not applicable.</p> <p>'A' – (AEP) Annual Enrollment: Oct 15 – Dec 07</p> <p>'D' – (MADP) 45-Day MA Disenrollment Period between January 1 and February 14 of each year with February 1 or March 1 effective dates.</p> <p>'E' – (IEP) Initial Enrollment Period is 3 months prior and 3 months after the 65th birthday.</p> <p>'F' – (IEP 2) Second Initial Enrollment Period for Part D.</p> <p>'I' – (ICEP) Initial Coverage Enrollment Period: 3 months prior to Eligibility Part A and Part B date</p> <p>'S' – (SEP) Special Election Period</p> <p>'T' – (OEPI) Open Enrollment for Institutionalized. First 3 months of the year.</p> <p>Additional Special Election types:</p> <p>'U' – SEP for Dual-eligible individuals or individuals who lose their Dual-Eligibility and SEP for Non-Dual Eligible individuals with LIS and individuals who lose LIS</p> <p>'V' – SEP for changes in Residence</p> <p>'W' – SEP EGHP</p> <p>'X' – Administrative Action SEP</p> <p>'Y' – Casework exceptional condition</p> <p>'Z' – MA Auto-Enrollment Period</p> <p>'R' – SEP enrollment into a 5-Star rated Plan.</p> |
| Plan-ID (Contract #) | 5 | Char | 48-52 | <p>Contract Number</p> <p>Required on all transactions:</p> <p>'61','51','72','73','78','81','82' and '83'</p> <p>H**** = identifies MMP plans (All asterisks must be replaced by valid CMS assigned numeric values)</p> |

| Data Element | Size | Format | Position | Remarks |
|--------------------------|------|--------|----------|---|
| Application Receipt Date | 8 | Num | 53-60 | CCYYMMDD format. Required on 61 transactions. <u>For Passive MMP enrollments:</u> The Application Receipt date field is the date the transaction is submitted to CMS (which must be no later than 60 days before the effective date). For passive enrollments effective January 1, the application date will be October 14 of the current year. Use an enrollment Source Code value of 'J' – State submitted passive enrollment (see Enrollment Source Code in position 193). <u>For Beneficiary Elected MMP enrollments:</u> Application date is the date the Plan received the beneficiary's enrollment request. Refer to the CMS Enrollment guidance for additional detailed explanation. Use an enrollment Source Code value of 'L' – MMP beneficiary election. Not applicable on transactions 72 through 78, 81, 82, 83 and 51. |
| Transaction Code | 2 | Num | 61-62 | Enrollments: '61' Disenrollments: '51' 4rx Change: '72' Uncovered Months Change: '73' Part C Premium Change: '78' Disenrollment Cancellation: '81' MMP Enrollment Cancellation: "82" MMP Opt-Out Update: "83" |
| Disenrollment reason | 2 | Num | 63-64 | MMP disenrollment reasons: '11' – Voluntary disenrollment '63' – MMP Opt-Out After Enrolled '64' – Loss of Demonstration Eligibility '92' – Involuntary disenrollment for a move out of plan's service area Blank Valid only on transaction 51. Leave blank on all other transactions. Required for Involuntary Disenrollments |
| Effective Date | 8 | Num | 65-72 | Effective date in CCYYMMDD format. Required on all transactions. Day field must always contain the first of the month. |
| Segment ID | 3 | Char | 73-75 | This field is not applicable to Medicare & Medicaid Plans (MMPs). Leave it initialized to blank on all transactions. |

| Data Element | Size | Format | Position | Remarks |
|---|------|--------|----------|---|
| ESRD Override (Prior Commercial Override) | 1 | Char | 76 | Applicable to '61' transactions only. The override field is required if beneficiary has ESRD and wants to enroll in an MMP Plan. Not required if plan is special-needs-plan (SNP). Use Alpha-numeric, 1-9 and A-F to report ESRD override condition. Zero (0) and blank = no override to report. |
| Premium Payment Option / Parts C-D | 1 | Char | 77 | This field is not applicable to Medicare & Medicaid Plans (MMPs). Populate this field with a value of "N" (No Premium Applicable) |
| Part C Premium Amount | 6 | Num | 78-83 | For MMP Plans, initialize this field with zeroes during initial enrollment. The total Part C premium owed by the member; including amounts related to optional supplemental benefits. CMS collects the premiums from SSA/RRB/OPM and forwards them to the plan for members that elect to have them withheld from their benefit checks. 6-digits with leading zeroes, or blank if premium does not apply. Decimal point assumed 2-digits from right, XXXXvXX. A value of '000000' is an acceptable change-to value meaning \$0.00. A value of '003700' is \$37 and \$125 is 012500. Required on 61 and 78 transactions. Not applicable on all other transactions. |
| Creditable Coverage Flag | 1 | Char | 84 | Note for MMP enrollments: the creditable coverage field is always set to "Y" since uncovered months is not reported. Used in determining the higher premium charge for late enrollment. For 61 transactions, valid values are Y, N and blank. For 73 transactions, valid values are Y and N. Y - if covered N - if not covered. |

| Data Element | Size | Format | Position | Remarks |
|---|------|--------|----------|--|
| Number of Uncovered Months | 3 | Num | 85-87 | Note for MMP enrollments: The NUNCMO field is always set to "000". Count of total months without drug coverage. If a beneficiary fails to enroll in a Part D plan timely, a higher premium is assessed based on the number of months that the individual lacked drug coverage. This is used in determining the higher premium amount. Format 999 with leading zeroes, i.e. 3 is 003. When Creditable Coverage flag is "Y" or blank, value should be zero. Value should be greater than 0 if Creditable Coverage Flag is "N". Required on 61 and 73 transactions. |
| Employer Subsidy Enrollment Override Flag | 1 | Char | 88 | To allow enrollment into an MMP plan by an individual that is already covered by an employer subsidized by CMS to provide drug coverage. If the beneficiary is in a plan receiving an employer subsidy, but still wants to enroll, submit the enrollment with the override flag set to "Y"; otherwise, leave blank. Used on "61" transactions if beneficiary has Employer Subsidy status; otherwise leave blank. Not applicable on all other transactions. |
| Part D Opt-Out Flag | 1 | Char | 89 | Optional Field on a 51 transaction. Y = Beneficiary already has a third Party insurance that covers drugs and does not wish to be auto-enrolled in part D. Blank = leave field blank if beneficiary has not opted-out of Part D. |
| Part D Rx ID | 20 | Char | 90-109 | Not Required on Passive MMP enrollments. The member ID assigned to the Beneficiary. Required for all MAPD and Part D plans. Left-justified with trailing spaces. Uppercase alpha A-Z and/or numeric 0-9 only. Required for all part D plans on 61 and 72 transactions. Required on 72 transactions when changing primary Rx insurance. |

| Data Element | Size | Format | Position | Remarks |
|-------------------------------|------|--------|----------|---|
| Part D Rx Group | 15 | Char | 110-124 | Not Required on Passive MMP demonstration enrollments. The identifying number assigned to the cardholder group or employer group. Optional field. Change-to-value (used by all MAPD and Part D plans). Left-justified with trailing spaces. Uppercase alpha A-Z and/or numeric 0-9 only. Applicable to 61 and 72 transactions. Not applicable on all other transactions. |
| Secondary Drug Insurance Flag | 1 | Char | 125 | To support coordination of benefits. Optional field on 61 and 72 transactions. Y = beneficiary has secondary drug insurance N = beneficiary does not have secondary drug insurance available. blank = do not know whether beneficiary has secondary drug insurance. Change-to-value on 72 transactions. |
| Secondary Rx ID | 20 | Char | 126-145 | The ID # assigned to the member by the secondary insurer. It supports coordination of benefits. Secondary insurance plan's ID number for beneficiary. Alphanumeric, upper case when alpha; left justified. Upper case printable characters and default value of spaces. Optional field used on 61and 72 transactions for if there is secondary insurance. |
| Secondary Rx Group | 15 | Char | 146-160 | The Group # assigned to the member by the secondary insurer. It supports coordination of benefits. Secondary insurance plan's group ID number for beneficiary. Alphanumeric, upper case when alpha; left justified. Upper case printable characters and default value of spaces. Optional field used on 61and 72 transactions if there is secondary insurance. |
| Part D Rx BIN | 6 | Char | 161-166 | Not Required on Passive MMP enrollments. The card issuer identifier or a Bank Identifying Number used for network routing. Required for all MAPD and PDP plans Right justified, zero filled. Numeric 0-9 only. Applicable for transaction types 61 and 72. |

| Data Element | Size | Format | Position | Remarks |
|--------------------------------|------|--------|----------|---|
| Part D Rx PCN | 10 | Char | 167-176 | Not Required on Passive MMP enrollments. The number assigned by the processor. Optional field. Change-to-value (used by all MAPD and Part D plans). Left-justified with trailing spaces. Uppercase alpha A-Z and/or numeric 0-9 only. Applicable for transaction types 61 and 72. |
| Secondary Drug BIN | 6 | Char | 177-182 | Applicable on 61 and 72 transactions for MA-PD and PDP if there is secondary insurance. If specified, field must be right justified, zero filled, numeric 0-9 only. Change if secondary Drug Insurance Flag change-to value is "Y". |
| Secondary Drug PCN | 10 | Char | 183-192 | Optional field used for MA-PD and PDP if there is secondary insurance. If specified, must be alphanumeric, uppercase when alpha and left justified. Applicable on 61 and 72 transactions for MA-PD and PDP if there is secondary insurance. |
| Enrollment Source | 1 | Char | 193 | 'A' – Auto-enrolled by CMS 'B' – Beneficiary election 'C' – Facilitated enrollment by CMS 'D' – CMS annual rollover 'E' – Plan-submitted auto-enrollment 'F' – Plan-submitted facilitated enrollment 'G' – Point of Sale (POS) submitted enrollment 'H' – CMS submitted reassignment enrollment 'J' – State submitted passive enrollment 'K' – CMS submitted passive enrollment 'L' – MMP beneficiary election Blank Valid on 61 enrollment transactions. |
| State * | 2 | Char | 194-195 | Numeric State code i.e. 05 for CA – *Use Optionally on 61 enrollments only. |
| County * | 3 | Char | 196-198 | Numeric County code – *Use Optionally on 61 enrollments only. |
| State/County Validation Flag * | 1 | Char | 199 | State and County validation indicator 'Y' – Validate State/County against CMS data blank or 'N' – Do not validate State/County – *Use Optionally on 61 enrollments only. |
| SNP ESRD override Flag | 1 | Char | 200 | 'S' for SNP plan to bypass Prior-Commercial-Override edit. |

| Data Element | Size | Format | Position | Remarks |
|------------------------------|------|--------|----------|--|
| PBP Change Flag | 1 | Char | 201 | Enter a value of 'Y' to indicate the "61" single enrollment transaction is a PBP change. Value of "Y" is required when submitting a PBP change with an election type of "Z" and an enrollment source code of "E". |
| MMP Opt-Out Flag | 1 | Char | 202 | Valid on 51, 82 and 83 transactions. Optional on 51 and 82 transactions, required on an 83 transaction. "Y" = Opted out of passive enrollment into MMP Plan "N"=Not opted out of passive enrollment into MMP plan. Spaces = Not Applicable |
| Filler | 81 | Char | 203- 283 | Spaces |
| Transaction Maintenance-Flag | 1 | Char | 284 | 'D' to delete transaction record 'U' to modify transaction record or else leave blank |
| Override-Flag | 1 | Char | 285 | Valid 'Y' to bypass edit or ' ' (space). |
| Transaction Tracking ID | 15 | Char | 286-300 | Must use the Infocrossing supplied account# (ex: HCF**** where the asterisks represent a unique Infocrossing assigned number) in the first 7 bytes. Positions 8 through 15 are optional and free-form. |

* Used if you wish to have state and county codes checked against the MBD eligibility database. Please contact the Infocrossing Help desk for further explanation.

2.2 MEDICARE TRANSACTION PROCESSING – “76” RESIDENTIAL ADDRESS CHANGE

The Interface to Medicare-solution document is intended for plans to use as a supplement to the CMS literature and should primarily be used as a guide to build the Infocrossing required record layout.

Batch Residential Address Change transaction Header Record

| Data Element | Size | Format | Position | Remarks |
|-----------------------|------|--------|----------|---|
| Record type | 1 | Num | 1 | '1' Header record |
| Account | 7 | Char | 2-8 | Account number assigned by Infocrossing. |
| Filler | 1 | Char | 9 | Space |
| Planid (contract#) | 5 | Char | 10-14 | Plan id supplied by CMS |
| Filler | 1 | Char | 15 | Space |
| Batch-Number | 6 | Num | 16-21 | Any Numeric Value identifying the group of transactions |
| Trans-Count | 8 | Num | 22-29 | Numeric Value specifying the number of type 3 detail records sent |
| Filler | 271 | Char | 30-300 | Spaces |

Batch Residential Address Change transaction Detail Record

** The remarks section can be used to build your transaction record. The CMS Plan Communication User Guide document should be used primarily.

| Data Element | Size | Format | Position | Remarks |
|--------------------------------------|------|--------|----------|---|
| Record-Type | 1 | Num | 1 | '3'-transaction record. |
| Health Insurance Claim-Number (HICN) | 12 | Char | 2-13 | Valid Claim Number. Must exist in CMS Eligibility for enrollments. Required on all transactions. |
| Surname | 12 | Char | 14-25 | Last name. No blank or spaces. Required on all transactions. |
| First Name | 7 | Char | 26-32 | First name. No blank or spaces. Required on all transactions |
| Middle Initial | 1 | Char | 33 | Middle Initial. Can be a blank or space. Optional on all transactions. |
| Gender | 1 | Char | 34 | 1 = male, 2 = female, 0 = unknown. Required on all transactions. |
| Birth Date | 8 | Num | 35-42 | Birth date in CCYYMMDD format. Required on all transactions. |
| Filler | 5 | Char | 43-47 | Leave blank on '76' transaction. |
| Plan-ID (Contract #) | 5 | Char | 48-52 | Contract Number Required on '76' transaction. H**** = identifies MMP plans. (All asterisks must be replaced by valid CMS assigned numeric values) |
| Filler | 8 | Char | 53-60 | Leave blank on '76' transaction. |
| Transaction Code | 2 | Num | 61-62 | Required: Residence Address Change code: '76' |
| Filler | 2 | Char | 63-64 | Leave blank on '76' transaction. |
| Effective Date | 8 | Num | 65-72 | Effective date in CCYYMMDD format. Required on all transactions. Day field must always contain the first of the month. |
| Filler | 3 | Char | 73-75 | Leave blank on '76' transaction |
| Residence Address Line1 | 65 | Char | 76-140 | Street Address. Required when Address Update/Delete Flag is "Update" |
| Residence Address Line2 | 65 | Char | 141-205 | Optional. Apartment or Suite number |
| Address Update/Delete Flag | 1 | Char | 206 | Required. 'U' = Adding a new address or modifying an existing address. 'D' = Deleting an existing address |
| Residence City | 57 | Char | 207-263 | City Name. Required when Address Update/Delete Flag is "Update". |

| Data Element | Size | Format | Position | Remarks |
|------------------------------|------|--------|----------|--|
| Residence State | 2 | Char | 264-265 | USPS two-character state abbreviation. Required when Address Update/Delete Flag is "Update". |
| Residence Zip Code | 5 | Num | 266-270 | USPS five-character numeric Zip Code. Required when Address Update/Delete Flag is "Update". |
| Residence Zip Code+4 | 4 | Num | 271-274 | USPS four-character numeric Zip Code+4. Optional field. |
| End Date | 8 | Num | 275-282 | Optional. CCYYMMDD format. Last day of the month in which the specific residence address was active. |
| Filler | 1 | Char | 283 | Spaces |
| Transaction Maintenance-Flag | 1 | Char | 284 | 'D' to delete transaction record 'U' to modify transaction record or else leave blank |
| Override-Flag | 1 | Char | 285 | Valid 'Y' to bypass edit or ' ' (space). |
| Transaction Tracking ID | 15 | Char | 286-300 | Must use the Infocrossing supplied account# (ex: HCF**** where the asterisks represent a unique Infocrossing assigned number) in the first 7 bytes. Positions 8 through 15 are optional and free-form. |

2.3 MEDICARE TRANSACTION PROCESSING – “90” REPORTING IDENTIFIED DRUG OVERUTILIZERS

The Interface to Medicare-solution document is intended for plans to use as a supplement to the CMS literature and should primarily be used as a guide to build the Infocrossing required record layout.

Transaction Code 90 – Reporting Drug Overutilizers Header Record

| Data Element | Size | Format | Position | Remarks |
|-----------------------|------|--------|----------|---|
| Record type | 1 | Num | 1 | '1' Header record |
| Account | 7 | Char | 2-8 | Account number assigned by Infocrossing. |
| Filler | 1 | Char | 9 | Space |
| Planid (contract#) | 5 | Char | 10-14 | Plan id supplied by CMS |
| Filler | 1 | Char | 15 | Space |
| Batch-Number | 6 | Num | 16-21 | Any Numeric Value identifying the group of transactions |
| Trans-Count | 8 | Num | 22-29 | Numeric Value specifying the number of type 3 detail records sent |
| Filler | 271 | Char | 30-300 | Spaces |

Transaction Code 90 – Reporting Drug Overutilizers Detail Record

** The remarks section can be used to build your transaction record. The CMS Plan Communication User Guide document should be used primarily.

| Data Element | Size | Format | Position | Remarks |
|--------------------------------------|------|--------|----------|--|
| Record-Type | 1 | Num | 1 | '3'-transaction record. |
| Health Insurance Claim-Number (HICN) | 12 | Char | 2-13 | Valid Claim Number. Must exist in CMS Eligibility for enrollments. Required on all transactions. |
| Surname | 12 | Char | 14-25 | Last name. No blank or spaces. Required. |
| First Name | 7 | Char | 26-32 | First name. No blank or spaces. Required. |
| Middle Initial | 1 | Char | 33 | Middle Initial. Can be a blank or space. Optional. |
| Gender | 1 | Char | 34 | 1 = male, 2 = female, 0 = unknown. Required. |
| Birth Date | 8 | Num | 35-42 | Birth date in CCYYMMDD format. Required. |
| Filler | 5 | Char | 43-47 | Leave blank. |
| Plan-ID (Contract #) | 5 | Char | 48-52 | Contract Number. Required. H**** = identifies MMP plans. (All asterisks must be replaced by valid CMS assigned numeric values) |
| Filler | 8 | Char | 53-60 | Leave blank. |
| Transaction Code | 2 | Num | 61-62 | Required: '90' |
| Filler | 13 | Char | 63-75 | Leave blank |
| Update/Delete Flag | 1 | Char | 76 | Required. Values are: "U" update "D" delete |
| POS Drug Edit Status | 1 | Char | 77 | Required. Valid values are: "N" – Notification "I" – Implementation "T" – Termination |
| POS Drug Edit Class | 3 | Char | 78-80 | Required – Value of "OPI" |
| POS Drug Edit Code | 3 | Char | 81-83 | Required – Valid values are "PS1" or "PS2" |
| Notification Date | 8 | Num | 84-91 | Required. CCYYMMDD format. |
| Implementation Date | 8 | Num | 92-99 | Required when POS Drug Edit Status is "I". CCYYMMDD format. |
| Termination Date | 8 | Num | 100-107 | Required when POS Drug Edit Status is "T". CCYYMMDD format. |
| Filler | 176 | Char | 108-283 | Leave blank. |
| Transaction Maintenance-Flag | 1 | Char | 284 | 'D' to delete transaction record 'U' to modify transaction record or else leave blank |
| Override-Flag | 1 | Char | 285 | Valid 'Y' to bypass edit or ' ' (space). |
| Transaction Tracking ID | 15 | Char | 286-300 | Must use the Infocrossing supplied account# (ex: HCF**** where the asterisks represent a unique Infocrossing assigned number) in the first 7 bytes. Positions 8-15 are optional. |

2.4 MEDICARE TRANSACTION RESPONSE

Header Record

Header record: record length = 470

| DATA ELEMENT | SIZE | STARTING POSITION | REMARKS |
|-------------------------|------|-------------------|---|
| Record Type | 1 | 1 | Value '1'- copied from input |
| Account# | 7 | 2-8 | Account number assigned by Infocrossing – as submitted in the input file header |
| Filler | 1 | 9 | Space |
| Planid (Contract) | 5 | 10-14 | Plan id – as submitted in the input file header |
| Filler | 1 | 15 | Space |
| Batch-Number | 6 | 16-21 | Numeric value – as submitted in the input file header |
| Trans-Count | 8 | 22-29 | Numeric value – as submitted in the input file header |
| Batch File Type | 5 | 30-34 | File type value as submitted in the input file header |
| CMS Approval Request ID | 10 | 35-44 | CMS request ID as submitted in the input file header (if applicable) |
| Filler | 426 | 45-470 | Space |

Detail Record

File attributes: record length = 470

| DATA ELEMENT | SIZE | STARTING POSITION | REMARKS |
|------------------------------------|------|-------------------|--|
| Record Type | 1 | 1 | Value '3'. Copied from input |
| Claim Number (HICN#) | 12 | 2 | |
| Transaction Code | 2 | 14 | Values: 51, 61, 72 through 78, 81, 82, 83, '90'. |
| Last Name | 12 | 16 | |
| First Name | 7 | 28 | |
| Middle Initial | 1 | 35 | |
| Gender | 1 | 36 | |
| Birth Date | 8 | 37 | CCYYMMDD |

| Residence End Date | 8 | 413 | |
| Transaction Tracking ID | 15 | 421 | |
| Filler | 15 | 436 | |
| Error Codes | 20 | 451 | Up to 10 occurrences of 2 position error codes |

Notes:

The information in each field (HICN, Last Name, etc.) is the same value sent on the input record.

Record Type: The value of '1' is used for the header record. This is the same header record sent to Infocrossing in the batch upload file. Some customers use the header for auditing and/or balancing purposes.

Transaction Code: The value in this field corresponds to the type of CMS transaction record: '51' = disenrollment, '61' = enrollment, '72' = 4Rx Change, '73' = Uncovered Months Change, '76' = Residence Address Change, '78' = Part C premium Change, '81' = Disenrollment Cancellation, '82' = MMP Enrollment Cancellation, '83' = MMP Opt-OUT Update, '90' = Reporting Identified Drug Overutilizers.

2.5 TRANSACTION ERROR CODES

These error codes represent a list of all the possible error code values that Infocrossing generates when processing input transactions received from various organizations including but not limited to MMP plans. Only some of these error codes will apply to MMP concerned organizations (those that do not apply, have the designation “(Can be ignored by MMP processing)”.

Transactions that are returned to you with a “00” or “99” code (records accepted or accepted with an override) are automatically sent to CMS for processing. **All others must be addressed for correction and re-sent to Infocrossing for eventual acceptance and submission to the CMS MARx system.**

| Error Code and Message | Data Element Name | Transaction Code |
|---|----------------------|--|
| 00 RECORD ACCEPTED | does not map | All Transactions |
| 99 RECORD ACCEPTED – OVERRIDE | does not map | All Transactions |
| 01 LAST NAME MBD DATABASE MISMATCH | Surname | 61 |
| 02 FIRST NAME MBD DATABASE MISMATCH | First Name | 61 |

3. WEB SERVICE

The real time eligibility inquiry web service is a SOAP based interface. The following method is provided for eligibility verification. Web Service calls are secured by using the HTTPS protocol, authentication is performed on the User Id and Password included on the Web Service call.

3.1 MEDICARE ELIGIBILITY – ELIGIBILITYQUERY METHOD

Eligibility Query Input Data

| Field | Description |
|-------------|--|
| userID | Web Service User Id |
| Password | Web Service Password |
| hicNbr | Medicare ID |
| lastName | First 6 characters of member last name |
| birthDate * | Birth Date (CCYYMMDD) |

* The eligibility process will first attempt to find a match by using the HICN and the last name provided. If no match is obtained and the optional Date of Birth field is provided, a second attempt will be made by using the HICN and the Date of Birth.

If prior match attempts using the HICN are unsuccessful, one more attempt will be made to match the plan provided HICN and last name against the MBD XREF claim number.

** The BENEFICIARY NOT FOUND condition should be determined by looking at the foundHicNbr and foundNameorDOB fields. Fields other than txnDate, mbdLoadDate, requestHicNbr, and requestLastName will only be populated if foundHicNbr is set to 'Y' or 'X' and foundNameorDOB is set to 'Y'.

Eligibility Query Return Data

| Field | Description |
|-----------------|---|
| txnDate | Date the transaction was made Current Date/Time formatted as CCYYMMDDHHMMSS |
| mbdLoadEffDate | Date of the MBD load (CCYYMMDD) ** |
| requestHicNbr | The Hic Nbr from the request |
| requestLastName | The Last Name from the request |
| requestDOB | The Date of Birth from the request |
| foundHicNbr | Y= found, X=Match on XRef Hic Nbr, N= not found ** |
| foundNameorDOB | Y= found, N= not found ** |
| inquiryResponse | 'M' = Membership, 'E' = Eligibility |
| hicNbr | Current Medicare ID of the member, may be different that the requested Hic Number if match is found on the XRef Hic Number |
| lastName | Member Last Name |
| firstName | Member First Name |
| middleInitial | Member Middle Initial |
| genderCd | Gender Code 1 – Male 2 – Female |
| raceCd | Values as supplied by CMS are: '0' or blank = unknown, '1' = White, '2' = Black, '3' = other, '4' = Asian, '5' = Hispanic, '6' = North American Native |

| Field | Description |
|----------------------------|--|
| birthDate | Birth Date (CCYYMMDD) |
| prtAEntitlementDate | Part A Entitlement Date (CCYYMMDD) |
| prtAEntitleEndDate | Part A Entitlement End Date (CCYYMMDD) |
| prtBEntitlementDate | Part B Entitlement Date (CCYYMMDD) |
| prtBEntitleEndDate | Part B Entitlement End Date (CCYYMMDD) |
| stateCd | State Code – 2 digit postal code |
| countyCd | County Code – 3 digit postal code |
| hospiceStatus | Hospice Status Y/spaces |
| hospiceStartDate | Hospice Start date (CCYYMMDD) |
| hospiceEndDate | Hospice End date (CCYYMMDD) |
| instStatus | Institutionalized Status Y/spaces |
| instStartDate | Institutionalized Start date (CCYYMMDD) |
| instEndDate | Institutionalized End date (CCYYMMDD) |
| esrdStatus | ESRD Status Y/spaces |
| esrdStartDate | ESRD Start date (CCYYMMDD) |
| esrdEndDate | ESRD End date (CCYYMMDD) |
| medicaidStatus | Medicaid Status Y/spaces |
| medicaidStartDate | Medicaid Start date (CCYYMMDD) |
| medicaidEndDate | Medicaid End date (CCYYMMDD) |
| livingStatus | Living Status (A/D) |
| deathDate | Death Date (CCYYMMDD) |
| xrefHicNbr | Previously Known Claim Number as supplied by CMS |
| enrollmentInfo | 0 to 2 occurrences of Enrollment Data |
| priorenrollmentInfo | 0 to 2 occurrences of Prior Enrollment Data |
| potentialUncvrMths | Potential number of uncovered Months |
| potentialUncvrMthsEff Date | Date for which the potential uncovered month field applies to (CCYYMM) |
| prtDEligibleDate | Part D Eligible Start Date |
| lisInfo | 2 occurrences of LIS Data |
| prtDHistInfo | 0 to 10 occurrences of Part D History |
| nuncMoInfo | 0 to 20 occurrences of nuncMo Data |
| rdsHistInfo | 0 to 10 occurrences of RDS History |
| MedicareIneligibilityInfo | 0 to 10 occurrences of Unlawful presence History |

LIS Data

| Field | Description |
|------------------|--------------------------------|
| subsidyStartDate | Subsidy Start Date |
| subsidyEndDate | Subsidy End Date |
| copayLevel | Copay Level |
| prtDPremSubPct | Part D Premium Subsidy Percent |

Current Enrollment Data

| Field | Description |
|--------------------|--|
| planId | Plan Id |
| pbpld | Plan Benefit Package |
| eghplnd | Employer Group Health Plan Indicator (Y/space) |
| planType | Plan Type |
| planEnrollmentDate | Plan Enrollment Date (CCYYMMDD) |
| drugPlanInd | Y / N |
| enrollSourceCode | Enrollment Source Code |

Prior Enrollment Data

| Field | Description |
|----------------------------|--|
| priorPlanId | Plan Id |
| priorPbpld | Plan Benefit Package |
| priorEghplnd | Employer Group Health Plan Indicator (Y/space) |
| priorPlanType | Plan Type |
| priorPlanEnrollmentDate | Plan Enrollment Date (CCYYMMDD) |
| priorPlanEnrollmentEndDate | Plan Enrollment End Date (CCYYMMDD) |
| priorDrugPlanInd | Y / N |
| priorEnrollSourceCode | Enrollment Source Code |

Part D History

| Field | Description |
|---------------|------------------------------|
| prtDStartDate | Part D Start Date (CCYYMMDD) |
| prtDEndDate | Part D End Date (CCYYMMDD) |

RDS History

| Field | Description |
|--------------|---------------------------------------|
| rdsStartDate | Retiree Subsidy Start Date (CCYYMMDD) |
| rdsEndDate | Retiree Subsidy End Date (CCYYMMDD) |

NUNCMO Data
(Number of Uncovered Months)

| Field | Description |
|--------------------|--|
| uncovMthsStartDate | Uncovered months start date (CCYYMMDD) |
| uncovMths | Number of uncovered months |
| nuncmoInd | Number of uncovered months indicator |
| totUncovMths | Total number of uncovered months |

Medicare Ineligibility due to Unlawful Presence

| Field | Description |
|--------------------------------|--|
| MedicareIneligibilityStartDate | Medicare Ineligibility Start Date (CCYYMMDD) |
| MedicareIneligibilityEndDate | Medicare ineligibility End Date (CCYYMMDD) |

3.2 WEB SERVICE ERRORS

Errors can be detected by checking the faultcode and faultstring objects in the soap return envelope.

Errors occurring in the Eligibility Service will have a fault code from the table listed below. Fault codes of SOAP-ENV:Server or SOAP-ENV:Client are internal SOAP messaging errors. The fault string will contain the description of the fault. The variety of possible messages prevents listing in the table. Fault codes from the Eligibility Service will have a format “MSS-nnnnn”

Eligibility Inquiry Error Code Table

| SOAP Fault Code | SOAP Fault Message |
|-----------------|-----------------------------|
| SOAP-ENV:Server | |
| SOAP-ENV:Client | |
| MSS-00090 | System In Maintenance Mode |
| MSS-00100 | Invalid Logon Id / Password |
| MSS-00105 | User id is not active |
| MSS-00110 | Password Expired |
| MSS-00115 | Configuration Error |
| MSS-00120 | Internal Processing Error |
| MSS-00125 | Internal Processing Error |

4. CMS SUBMISSION

4.1 TRANSMISSION SCHEDULE

- Infocrossing submits all received and accepted Medicare transactions in the required CMS MARx format three times per day, seven days per week. The transmission times occur at 07:00 A.M., 04:00 P.M. and 08:00 P.M., all times are PST.
- Calendar month-end submission. This schedule will occur on the last day of each calendar month to accommodate the CMS MARx system CCM rules (Current Calendar Month): There will be one morning transmission and a second 02:00 P.M. PST transmission.

4.2 BLACKOUT DATES

There will be no data file transmission to CMS on scheduled CMS blackout dates. The data will be accumulated and transmitted to CMS on the next non-blackout day.

4.3 RESPONSE FROM CMS

- CMS performs a preliminary validation of Marx transaction data files and returns any potential failed transactions in a “batch completion status summary file”. This file will be available to download in the rare instance where a file submission does not pass the initial CMS validation.
- CMS generates the “Daily Transaction Reply Report” (DTRR) data file on a nightly basis, detailing all accepted and rejected records. This file will be available to download on the Infocrossing web portal and designated FTP servers.
- CMS generates many monthly files that are made available on the Infocrossing web portal. Additional information on these files can be obtained from the CMS Plan Communications User Guide document (PCUG) in the appendices section.

4.4 CMS TRANSACTION TRANSMISSION DATA FILE LAYOUT

This service provides you with a detail of all Medicare transactions that were submitted to CMS. This data file complements the report file version and gets generated every time Medicare transactions are sent to CMS. This file does not contain a header record.

CMS Transmission Layout

RECORD FORMAT = FB LENGTH = 600

DETAIL RECORD

5. ELIGIBILITY+

5.1 ELIGIBILITY+ PLAN ENROLLMENT (FROM CMS MBD EXTRACT) LAYOUT

This service provides you with a Medicare membership roster of all your contracted Medicare plans in your organization. Two separate files are produced. The first file, a 1300 byte file as shown below, will report all the beneficiaries that are enrolled in your organization according to the CMS MBD extract. The second file, as shown in section 5.2, will report the changes for each beneficiary in your PLAN between the prior CMS MBD extract and current MBD extract.

| FIELD NAME | SIZE | POSITION | FORMAT | COMMENT |
|---|------|-----------|---------|--|
| PARTD ELIGIBLE START DATE | 08 | 243 – 250 | Numeric | CCYYMMDD. This field identifies the date the beneficiary became eligible for Part D Benefits. |
| DEEMED/LOW INCOME SUBSIDY START DATE (OCCURRENCE 1) | 08 | 251 – 258 | Numeric | CCYYMMDD. Effective start date of the deeming period or Low Income Subsidy. This will be the first day of the month in which the deeming was made or the start date of the Low Income Subsidy (most recent or presently active). |
| DEEMED/LOW INCOME SUBSIDY END DATE (OCCURRENCE 1) | 08 | 259 – 266 | Numeric | CCYYMMDD. The end date of the Deemed period or Low Income Subsidy (most recent or presently active). |
| CO-PAYMENT LEVEL IDENTIFIER (OCCURRENCE 1) | 01 | 267 – 267 | Char | This field indicates the Co-Payment level for the beneficiary. |
| PRTD PREMIUM SUBSIDY PERCENT (OCCURRENCE 1) | 03 | 268 – 270 | Char | If beneficiary is Deemed, subsidy is 100 percent. If beneficiary is LIS, this field identifies the portion of Part D Premium subsidized. |
| DEEMED/LOW INCOME SUBSIDY START DATE (OCCURRENCE 2) | 08 | 271 – 278 | Numeric | CCYYMMDD. Effective start date of the deeming period or Low Income Subsidy. This will be the first day of the month in which the deeming was made or the start date of the Low Income Subsidy (second most recent). |
| DEEMED/LOW INCOME SUBSIDY END DATE (OCCURRENCE 2) | 08 | 279 – 286 | Numeric | CCYYMMDD. The end date of the Deemed period or Low Income Subsidy (second most recent). |
| CO-PAYMENT LEVEL IDENTIFIER (OCCURRENCE 2) | 01 | 287 – 287 | Char | This field indicates the Co-Payment level for the beneficiary. |
| PRTD PREMIUM SUBSIDY PERCENT (OCCURRENCE 2) | 03 | 288 – 290 | Char | If beneficiary is Deemed, subsidy is 100 percent. If beneficiary is LIS, this field identifies the portion of Part D Premium subsidized. |

6. ENROLLMENT RECONCILIATION EXTRACT

6.1 ENROLLMENT RECONCILIATION EXTRACT LAYOUT

This process can be requested on an ADHOC basis to get a listing of all the transactions that were sent to CMS based on a desired date range. Any matching TRR transactions that are returned from CMS are also reported on.

Enrollment Reconciliation Extract Layout

RECORD FORMAT = FB LENGTH = 402

| Data Element | Size | Format | Position | Remarks |
|--------------------------|------|--------|----------|--|
| Source code | 1 | Char | 1 | 'T' – Enrollment transaction sent to CMS 'C' – CMS TRR sent back |
| PlanID (Contract#) | 5 | Char | 2-6 | Contract ID |
| Effective date | 8 | Char | 7-14 | Enrollment Effective date |
| HICN number | 12 | Char | 15-26 | Beneficiary Medicare ID |
| Transaction code | 2 | Char | 27-28 | '01' – MCO Correction '41' – Update to Opt-Out Flag Submitted by CMS '42' – MMP Opt-Out Update (1-800-Medicare) '61' – Enrollment '51' – Disenrollment '54' – Disenrollment (1-800-Medicare) '72' – 4Rx Record Change '73' – Uncovered Months Change '76' – Residential Address Change '78' – Part C premium Change '81' – Disenrollment Cancellation '82' – MMP Enrollment Cancellation '83' – MMP Opt Out Update '90' – POS Drug Edit |
| Filler | 1 | Char | 29 | Spaces |
| Application Receipt date | 8 | Char | 30-37 | |
| Election type | 1 | Char | 38 | |
| PBP # | 3 | Char | 39-41 | Plan Benefit Package |
| PBP Segment ID | 3 | Char | 42-44 | |
| Transaction Reply Code | 3 | Char | 45-47 | If source code is 'C' (CMS TRR record) then the TRC code is the actual value from the TRR record. If source code is 'T' (Enrollment transaction sent to CMS) then this field will be blank. |
| Last name | 12 | Char | 48-59 | |
| First name | 7 | Char | 60-66 | |
