Measure: M21 - Comprehensive Health Risk Assessment	3
Measure: M32 - Care Plan Completion	3
Measure: C10 - Care for Older Adults – Functional Status Assessment.....	4
DOMAIN: MANAGING CHRONIC (LONG TERM) CONDITIONS/HEALTH OUTCOMES	4
Measure: DMC14 - Initiation of Alcohol or other Drug Treatment.....	4
Measure: DMC15 - Engagement of Alcohol or other Drug Treatment	5
Measure: DMC02 - Antidepressant Medication Management (6 months)	5
Measure: DMC01 - Follow-up Visit after Hospital Stay for Mental Illness (within 30 days of discharge).....	6
Measure: C09 - Care for Older Adults – Medication Review	6
Measure: C11 - Care for Older Adults – Pain Assessment	7
Measure: C21 - Plan All-Cause Readmissions	8
Measure: C13 - Diabetes Care – Eye Exam.....	8
Measure: C14 - Diabetes Care – Kidney Disease Monitoring	9
Measure: C15 - Diabetes Care – Blood Sugar Controlled	10
Measure: C16 - Controlling Blood Pressure	10
Measure: D11 - Medication Adherence for Diabetes Medications.....	11
Measure: D12 - Medication Adherence for Hypertension (RAS antagonists)	13
Measure: D13 - Medication Adherence for Cholesterol (Statins)	14
Measure: C12 - Osteoporosis Management in Women who had a Fracture	16
Measure: C17 - Rheumatoid Arthritis Management.....	16
DOMAIN: MEMBER EXPERIENCE WITH INTEGRATED PLAN AND CARE PROVIDERS	17
Measure: OHP5 - Satisfaction with Care Coordination	17
Measure: C18 - Reducing the Risk of Falling	17
Measure: C19 - Improving Bladder Control	18
Measure: C20 - Medication Reconciliation Post-Discharge.....	19
Measure: CC14 - Access to Personal Care	19
Measure: CC10 - Access to Medical Equipment	20
Measure: MH3 - Access to Mental Health Treatment.....	20
Measure: C22 - Getting Needed Care	21
Measure: C23 - Getting Appointments and Care Quickly	21
Measure: C24 - Customer Service	22
Measure: C25 - Rating of Health Care Quality	23
Measure: C26 - Rating of Health Plan.....	23
Measure: C27 - Care Coordination	24
Measure: D08 - Rating of Drug Plan	24
Measure: D09 - Getting Needed Prescription Drugs.....	25

DOMAIN: STAYING HEALTHY: SCREENINGS, TESTS AND VACCINES26

- Measure: C01 - Breast Cancer Screening 26
- Measure: C02 - Colorectal Cancer Screening..... 26
- Measure: C03 - Annual Flu Vaccine..... 27
- Measure: C06 - Monitoring Physical Activity..... 27
- Measure: C07 - Adult BMI Assessment..... 28

DOMAIN: SAFETY OF CARE PROVIDED29

- Measure: D14 - MTM Program Completion Rate for CMR..... 29

DOMAIN: PLAN PERFORMANCE ON ADMINISTRATIVE MEASURES.....30

- Measure: C28 - Complaints about the Health Plan 30
- Measure: C29 - Members Choosing to Leave the Plan..... 31
- Measure: C32 - Plan Makes Timely Decisions about Appeals..... 32
- Measure: C33 - Reviewing Appeals Decisions 33
- Measure: D02 - Appeals Auto-Forward 33
- Measure: D03 - Appeals Upheld..... 34
- Measure: C34 - Call Center – Foreign Language Interpreter and TTY Availability 35
- Measure: D01 - Call Center – Foreign Language Interpreter and TTY Availability 35

ATTACHMENT J: STATE-SPECIFIC REQUIREMENTS FOR THE CARE PLAN COMPLETION MEASURE54

Introduction

Under the Medicare-Medicaid Financial Alignment Initiative (FAI) capitated model, the Centers for Medicare & Medicaid Services (CMS) is collecting a variety of measures that examine plan performance and the quality of care provided to enrollees. The Medicare-Medicaid Plan (MMP) performance data published here represent currently available data on MMP performance on certain Medicare Parts C and D quality measures as well as select CMS core and state-specific measures that MMPs are required to report. The data show MMP performance on quality measures during 2016 and the results of surveys of MMP enrollees conducted in 2016 or 2017. The measures are organized into six domains that track the potential domains under a future MMP star ratings system described in the [Medicare-Medicaid Plan Quality Ratings Strategy](#) published in November 2015.

The scope of the measures displayed here is limited, particularly in the area of long term services and supports. Our longer term intent is to add measures and use performance data in future years to help consumers select an MMP. For now, however, we urge caution in using any of this early data for comparative or MMP selection purposes.

In addition, we note that the differences in MMP eligibility across states participating in the FAI, and the differences in the characteristics of enrollees in particular MMPs, may limit the ability to compare MMP performance across demonstrations. For example, enrollment in MMPs in Massachusetts is limited to individuals under the age of 65 at the time of enrollment, while in South Carolina, only individuals aged 65 or older living in the community can enroll. In New York, only individuals who meet state criteria for requiring institutional or community-based long term care can enroll.

We also note that there are not yet available data based on the Health Outcomes Survey for MMPs that began enrolling members after January 1, 2015, and a number of MMPs had too limited enrollment to be able to report reliable data for a number of individual measures. Despite these limitations, we are publishing MMP performance data to provide greater transparency on MMP performance during the initial years of the FAI, and as a first step toward equipping the public with a robust set of performance data.

Questions about the MMP performance data should be addressed to: mmcocapsmodel@cms.hhs.gov.

State Weighted Averages

Within the MMP Performance Data File, state weighted averages are provided for each measure. Depending on the measure type, the averages are weighted by the enrollment of each MMP with valid data for the measure or by the eligible population for the measure as reported for each MMP. More specifically, averages for measures from the Health Outcomes Survey (HOS) and the Consumer Assessment of Healthcare Providers and Systems (CAHPS) survey are weighted using the total number of members enrolled in February 2016 and January 2017, respectively, to align with the timeframe during which each survey's sampling frame was drawn. Averages for the Call Center Foreign Language Interpreter and TTY Availability measures are weighted using the total number of members enrolled in February 2017 to align with the timeframe during which call center monitoring commenced. Averages for all other measures are weighted using each MMP's eligible population for the measure (i.e., the denominator for each MMP).

Differences between the 2017 and 2018 MMP Performance Data File and Technical Notes

There were several changes between the 2017 and 2018 versions of the MMP Performance Data File and Technical Notes. This section provides a summary of the notable differences.

Revisions:

- Where applicable, measure numbers and specifications were updated to comport with the Medicare 2018 Part C & D Star Ratings Technical Notes.
- The methodology for calculating state weighted averages was updated. Previously, all averages were weighted by the enrollment of MMPs with valid data for the measure. As of the 2018 MMP Performance Data File, averages are weighted using the most precise methodology for each measure, which includes weighting by the eligible population for the measure where appropriate (for more information, see the State Weighted Averages section above).

- The Plan All-Cause Readmissions (C21) measure was revised to calculate the ratio of the MMP’s observed readmission rate to the MMP’s expected readmission rate (observed-to-expected ratio) for all reported age bands. Previously, this measure was calculated using the Star Ratings methodology, which used the observed-to-expected ratio for members age 65 and older multiplied by the national average observed rate.

Additions:

- The following measures were added to the MMP Performance Data File and Technical Notes:
 - Monitoring Physical Activity (C06)
 - Reducing the Risk of Falling (C18)
 - Improving Bladder Control (C19)
 - Medication Reconciliation Post-Discharge (C20)

Removals:

- The High Risk Medication (D11) measure was removed from the MMP Performance Data File and Technical Notes, but data and specifications for this measure are available in the Display Measure file on the CMS website: <https://www.cms.gov/Medicare/Prescription-Drug-Coverage/PrescriptionDrugCovGenIn/PerformanceData.html>

Framework and Definitions for the Domain and Measure Details Section

This section contains the formatting framework and definition of each sub-section that is used to describe the domain and measure details on the following pages.

Domain: The name of the domain to which the measures following this heading belong

Measure: The measure ID and common name of the ratings measure

Title	Description
Label for Data:	Optional: The label that provides a fuller title for the measure.
Description:	The English language description shown for the measure.
HEDIS Label:	Optional – contains the full NCQA HEDIS measure name.
Measure Reference:	Optional – this sub-section contains the location of the detailed measure specification in the NCQA documentation for all HEDIS and HEDIS/HOS measures.
Metric:	Defines how the measure is calculated.
Primary Data Source:	The primary source of the data used in the measure.
Data Source Description:	Optional – contains information about additional data sources needed for calculating the measure.
Data Source Category:	The category of this data source.
Exclusions:	Optional – lists any exclusions applied to the data used for the measure.
General Notes:	Optional – contains additional information about the measure and the data used.
Data Time Frame:	The time frame of data used from the data source. In some HEDIS measures this date range may appear to conflict with the specific data time frame defined in the NCQA Technical Specifications. In those cases, the data used by CMS is unchanged from what was submitted to NCQA. CMS uses the data time frame of the overall HEDIS submission which is the HEDIS measurement year.
General Trend:	Indicates whether high values are better or low values are better for the measure.
Case Mix Adjusted:	Indicates if the data are case mix adjusted.
NQF #:	The National Quality Framework (NQF) number for the measure or “Not Applicable” if there is no equivalent measure with NQF endorsement.
Data Display:	The format used to the display the numeric data

Domain: Coordination of Care and Long Term Services and Supports

Measure: M21 - Comprehensive Health Risk Assessment

Title	Description
	Description: Percent of members who received a health risk assessment within 90 days of enrollment in the MMP.
	Metric: This measure captures the total number of members with a health risk assessment completed within the first 90 days of enrollment. When calculating the completion rate, the members that were unreachable (after at least three contact attempts) and the members that refused the assessment are subtracted from the denominator.
	Primary Data Source: Measure Core 2.1 from the Medicare-Medicaid Capitated Financial Alignment Model Core Reporting Requirements
	Data Source Category: Health and Drug Plans
	Exclusions: Members that were unreachable (after at least three contact attempts) and members that refused the assessment are subtracted from the denominator.
	General Notes: A full description of the measure specifications is available in the CY 2016 Core Reporting Requirements .
	Data Time Frame: 01/01/2016 - 12/31/2016 (dates vary for demonstrations that started in 2016)
	General Trend: Higher is better
	Case-mix adjusted: No
	NQF #: Not Applicable
	Data Display: Percentage with no decimal place

Measure: M32 - Care Plan Completion

Title	Description
	Description: Percent of members who had a care plan completed within the requisite timeframe.
	Metric: This measure captures the total number of members with a care plan completed within the requisite timeframe based on state-specific requirements (e.g., 90 days from enrollment, 30 days from assessment completion). When calculating the completion rate, the members that were unreachable (after the requisite number of contact attempts) and the members that refused the care plan are subtracted from the denominator. See Attachment J for the state-specific requirements for this measure.
	Primary Data Source: Various state-specific measures from the individual Medicare-Medicaid Capitated Financial Alignment Model State-Specific Reporting Requirements
	Data Source Category: Health and Drug Plans
	Exclusions: Members that were unreachable (after the requisite number of contact attempts) and members that refused the care plan are subtracted from the denominator.
	General Notes: Specifications for the care plan completion measure vary by state, and can be found in the individual State-Specific Reporting Requirements .
	Data Time Frame: 01/01/2016 - 12/31/2016 (dates vary for demonstrations that started in 2016)
	General Trend: Higher is better
	Case-mix adjusted: No
	NQF #: Not Applicable
	Data Display: Percentage with no decimal place

Measure: C10 - Care for Older Adults – Functional Status Assessment

Title	Description
	Description: Percent of members whose doctor has done a functional status assessment to see how well they are able to do “activities of daily living” (such as dressing, eating, and bathing).
	HEDIS Label: Care for Older Adults (COA) – Functional Status Assessment
	Measure Reference: NCQA HEDIS 2017 Technical Specifications Volume 2, page 86
	Metric: The percentage of MMP enrollees 66 years and older (denominator) who received at least one functional status assessment (Functional Status Assessment Value Set) during the measurement year (numerator).
	Primary Data Source: HEDIS
	Data Source Category: Health and Drug Plans
	Exclusions: MMPs whose enrollment was less than 30 as of February 2016 Monthly Enrollment Report were excluded from this measure.
	This measure is not included for Massachusetts MMPs because it is calculated for individuals age 66 and older and only individuals younger than 65 can enroll in Massachusetts MMPs.
	Data Time Frame: 01/01/2016 - 12/31/2016
	General Trend: Higher is better
	Case-mix adjusted: No
	NQF #: Not Applicable
	Data Display: Percentage with no decimal place

Domain: Managing Chronic (Long Term) Conditions/Health Outcomes

Measure: DMC14 - Initiation of Alcohol or other Drug Treatment

Title	Description
	Description: The percent of members who start alcohol or drug treatment within 14 days of being diagnosed as needing treatment.
	HEDIS Label: Initiation and Engagement of Alcohol and Other Drug Dependence Treatment (IET)
	Measure Reference: NCQA HEDIS 2017 Technical Specifications Volume 2, page 257
	Metric: The percentage of members who initiate treatment through an inpatient AOD admission, outpatient visit, intensive outpatient encounter or partial hospitalization within 14 days of the diagnosis.
	Exclusions: None listed.
	Primary Data Source: HEDIS
	Data Source Category: Health and Drug Plans
	Data Time Frame: 01/01/2016 - 12/31/2016
	General Trend: Higher is better
	Case Mix Adjusted: No
	NQF #: 0004
	Data Display: Percentage with no decimal place

Measure: DMC15 - Engagement of Alcohol or other Drug Treatment

Title	Description
	Description: The percent of members who started drug or alcohol treatment and had two or more services for alcohol or drug treatment within 30 days of their first visit.
	HEDIS Label: Initiation and Engagement of Alcohol and Other Drug Dependence Treatment (IET)
	Measure Reference: NCQA HEDIS 2017 Technical Specifications Volume 2, page 257
	Metric: The percentage of members who initiated treatment and who had two or more additional services with a diagnosis of AOD within 30 days of the initiation visit.
	Exclusions: None listed.
	Data Source: HEDIS
	Data Source Category: Health and Drug Plans
	Data Time Frame: 01/01/2016 - 12/31/2016
	General Trend: Higher is better
	Case Mix Adjusted: No
	NQF#: 0004
	Data Display: Percentage with no decimal place

Measure: DMC02 - Antidepressant Medication Management (6 months)

Title	Description
	Description: The percent of members with a diagnosis of major depression who received an antidepressant medication for at least 180 days.
	HEDIS Label: Antidepressant Medication Management (AMM)
	Measure Reference: NCQA HEDIS 2017 Technical Specifications Volume 2, page 162
	Metric: The percentage of members 18 years of age and older with a diagnosis of major depression (denominator) who were newly treated with antidepressant medication, and who remained on an antidepressant medication for at least 180 days (numerator).
	Exclusions: Exclude members who did not have a diagnosis of major depression in an inpatient, outpatient, ED, intensive outpatient or partial hospitalization setting during the 121-day period from 60 days prior to the IPSP, through the IPSP and the 60 days after the IPSP. Members who meet any of the following criteria remain in the eligible population: <ul style="list-style-type: none">• An outpatient visit, intensive outpatient encounter or partial hospitalization with any diagnosis of major depression. Either of the following code combinations meets criteria:<ul style="list-style-type: none">– AMM Stand Alone Visits Value Set with Major Depression Value Set.– AMM Visits Value Set with AMM POS Value Set and Major Depression Value Set.• An ED visit (ED Value Set) with any diagnosis of major depression (Major Depression Value Set).• An acute or nonacute inpatient discharge with any diagnosis of major depression (Major Depression Value Set). To identify acute and nonacute inpatient discharges:<ol style="list-style-type: none">1. Identify all acute and nonacute inpatient stays (Inpatient Stay Value Set).2. Identify the discharge date for the stay.For a direct transfer, use the discharge date from the last discharge.
	Data Source: HEDIS
	Data Source Category: Health and Drug Plans
	Data Time Frame: 01/01/2016 - 12/31/2016
	General Trend: Higher is better
	Case Mix Adjusted: No

Title	Description
NQF#: 0105	
Data Display: Percentage with no decimal place	

Measure: DMC01 - Follow-up Visit after Hospital Stay for Mental Illness (within 30 days of discharge)

Title	Description
Description:	The percent of members who were hospitalized for certain mental health disorders who received follow-up care within 30 days of leaving the hospital.
HEDIS Label:	Follow-Up After Hospitalization for Mental Illness (FUH)
Measure Reference:	NCQA HEDIS 2017 Technical Specifications Volume 2, page 171
Metric:	The percentage of discharges for members 6 years of age and older who were hospitalized for treatment of selected mental health disorders (denominator) and who had an outpatient visit, an intensive outpatient encounter or partial hospitalization with a mental health practitioner within 30 days of discharge (numerator).
Exclusions:	<p>Exclude discharges followed by readmission or direct transfer to a nonacute inpatient care setting within the 30-day follow-up period, regardless of principal diagnosis for the readmission. To identify readmissions to a nonacute inpatient care setting:</p> <ol style="list-style-type: none"> 1. Identify all acute and nonacute inpatient stays (Inpatient Stay Value Set). 2. Confirm the stay was for nonacute care based on the presence of a nonacute code (Nonacute Inpatient Stay Value Set) on the claim. 3. Identify the admission date for the stay. <p>Exclude discharges followed by readmission or direct transfer to an acute inpatient care setting within the 30-day follow-up period if the principal diagnosis was for non-mental health (any principal diagnosis code other than those included in the Mental Health Diagnosis Value Set). To identify readmissions to an acute inpatient care setting:</p> <ol style="list-style-type: none"> 1. Identify all acute and nonacute inpatient stays (Inpatient Stay Value Set). 2. Exclude nonacute inpatient stays (Nonacute Inpatient Stay Value Set). 3. Identify the admission date for the stay. <p>Organizations must identify “transfers” using their own methods and then confirm the acute inpatient care setting using the steps above.</p> <p>These discharges are excluded from the measure because rehospitalization or transfer may prevent an outpatient follow-up visit from taking place.</p>
Data Source:	HEDIS
Data Source Category:	Health and Drug Plans
Data Time Frame:	01/01/2016 - 12/31/2016
General Trend:	Higher is better
Case Mix Adjusted:	No
NQF#:	0576
Data Display:	Percentage with no decimal place

Measure: C09 - Care for Older Adults – Medication Review

Title	Description
Label for Data:	Yearly Review of All Medications and Supplements Being Taken
Description:	Percent of members whose doctor or clinical pharmacist has reviewed a list of everything they take (prescription and non-prescription drugs, vitamins, herbal remedies, other supplements) at least once a year.
HEDIS Label:	Care for Older Adults (COA) – Medication Review

Title	Description
Measure Reference:	NCQA HEDIS 2017 Technical Specifications Volume 2, page 86
Metric:	The percentage of MMP enrollees 66 years and older (denominator) who received at least one medication review (Medication Review Value Set) conducted by a prescribing practitioner or clinical pharmacist during the measurement year and the presence of a medication list in the medical record (Medication List Value Set) (numerator).
Primary Data Source:	HEDIS
Data Source Category:	Health and Drug Plans
Exclusions:	MMPs whose enrollment was less than 30 as of February 2016 Monthly Enrollment Report were excluded from this measure.
	This measure is not included for Massachusetts MMPs because it is calculated for individuals age 66 and older and only individuals younger than 65 can enroll in Massachusetts MMPs.
Data Time Frame:	01/01/2016 - 12/31/2016
Case-mix adjusted:	No
NQP #:	0553
Data Display:	Percentage with no decimal place

Measure: C11 - Care for Older Adults – Pain Assessment

Title	Description
Label for Data:	Yearly Pain Screening or Pain Management Plan
Description:	Percent of members who had a pain screening or pain management plan at least once during the year.
HEDIS Label:	Care for Older Adults (COA) – Pain Screening
Measure Reference:	NCQA HEDIS 2017 Technical Specifications Volume 2, page 86
Metric:	The percentage of MMP enrollees 66 years and older (denominator) who received at least one pain assessment (Pain Assessment Value Set) plan during the measurement year (numerator).
Primary Data Source:	HEDIS
Data Source Category:	Health and Drug Plans
Exclusions:	MMPs whose enrollment was less than 30 as of February 2016 Monthly Enrollment Report were excluded from this measure.
	This measure is not included for Massachusetts MMPs because it is calculated for individuals age 66 and older and only individuals younger than 65 can enroll in Massachusetts MMPs.
Data Time Frame:	01/01/2016 - 12/31/2016
General Trend:	Higher is better
Case-mix adjusted:	No
NQP #:	Not Applicable
Data Display:	Percentage with no decimal place

Measure: C21 - Plan All-Cause Readmissions

Title	Description
Label for Data:	Readmission to a Hospital within 30 Days of Being Discharged (lower ratios are better because it means fewer members are being readmitted than would be expected for the MMP's population)
Description:	The ratio of the MMP's observed readmission rate to the MMP's expected readmission rate. The readmission rate is based on the percent of members discharged from a hospital stay who were readmitted to a hospital within 30 days, either for the same condition as their recent hospital stay or for a different reason. (Patients may have been readmitted back to the same hospital or to a different one. Rates of readmission take into account how sick patients were when they went into the hospital the first time. This "risk-adjustment" helps make the comparisons between MMPs fair and meaningful.)
HEDIS Label:	Plan All-Cause Readmissions (PCR)
Measure Reference:	NCQA HEDIS 2017 Technical Specifications Volume 2, page 345
Metric:	<p>The MMP's observed readmission rate (i.e., the percentage of acute inpatient stays during the measurement year that were followed by an unplanned acute readmission for any diagnosis within 30 days), as compared to the readmission rate that the MMP is expected to have given its case mix. This analysis is referred to as the observed-to-expected (O/E) ratio.</p> <p>The O/E ratio is calculated as the observed readmission rate divided by the expected readmission rate. To calculate the observed readmission rate and expected readmission rate, the following formulas were used:</p> <ol style="list-style-type: none">1. The observed readmission rate equals the sum of the count of 30-day readmissions across all age bands divided by the sum of the count of index stays across all age bands.2. The expected readmission rate equals the sum of the average adjusted probabilities across all age bands, weighted by the percentage of index stays in each age band. <p>See Attachment C: Calculating Measure C21: Plan All-Cause Readmissions for the complete formula.</p>
Primary Data Source:	HEDIS
Data Source Category:	Health and Drug Plans
Exclusions:	As listed in the HEDIS Technical Specifications. Additionally, CMS has excluded contracts whose denominator (i.e., number of index stays) was 10 or less.
Data Time Frame:	01/01/2016 - 12/31/2016
General Trend:	Lower is better
Case-mix adjusted:	Yes
NQF #:	1768
Data Display:	Numeric with two decimal places

Measure: C13 - Diabetes Care – Eye Exam

Title	Description
Label for Data:	Eye Exam to Check for Damage from Diabetes
Description:	Percent of members with diabetes who had an eye exam to check for damage from diabetes during the year.
HEDIS Label:	Comprehensive Diabetes Care (CDC) – Eye Exam (Retinal) Performed
Measure Reference:	NCQA HEDIS 2017 Technical Specifications Volume 2, page 132

Title	Description
Metric:	The percentage of diabetic MMP enrollees 18-75 with diabetes (type 1 and type 2) (denominator) who had an eye exam (retinal) performed during the measurement year (numerator).
Primary Data Source:	HEDIS
Data Source Category:	Health and Drug Plans
Exclusions:	(optional) Members who do not have a diagnosis of diabetes (Diabetes Value Set), in any setting, during the measurement year or the year prior to the measurement year and who had a diagnosis of gestational diabetes or steroid-induced diabetes (Diabetes Exclusions Value Set), in any setting, during the measurement year or the year prior to the measurement year.
	Organizations that apply optional exclusions must exclude members from the denominator for all indicators. The denominator for all rates must be the same, with the exception of the HbA1c Control (<7.0%) for a Selected Population denominator. If the member was included in the measure based on claim or encounter data, as described in the event/ diagnosis criteria, the optional exclusions do not apply because the member had a diagnosis of diabetes.
Data Time Frame:	01/01/2016 - 12/31/2016
General Trend:	Higher is better
Case-mix adjusted:	No
NQF #:	0055
Data Display:	Percentage with no decimal place

Measure: C14 - Diabetes Care – Kidney Disease Monitoring

Title	Description
Label for Data:	Kidney Function Testing for Members with Diabetes
Description:	Percent of members with diabetes who had a kidney function test during the year.
HEDIS Label:	Comprehensive Diabetes Care (CDC) – Medical Attention for Nephropathy
Measure Reference:	NCQA HEDIS 2017 Technical Specifications Volume 2, page 132
Metric:	The percentage of diabetic MMP enrollees 18-75 with diabetes (type 1 and type 2) (denominator) who had medical attention for nephropathy during the measurement year (numerator).
Primary Data Source:	HEDIS
Data Source Category:	Health and Drug Plans
Exclusions:	(optional) Members who do not have a diagnosis of diabetes (Diabetes Value Set), in any setting, during the measurement year or the year prior to the measurement year and who had a diagnosis of gestational diabetes or steroid-induced diabetes (Diabetes Exclusions Value Set), in any setting, during the measurement year or the year prior to the measurement year.
	Organizations that apply optional exclusions must exclude members from the denominator for all indicators. The denominator for all rates must be the same, with the exception of the HbA1c Control (<7.0%) for a Selected Population denominator. If the member was included in the measure based on claim or encounter data, as described in the event/ diagnosis criteria, the optional exclusions do not apply because the member had a diagnosis of diabetes.
Data Time Frame:	01/01/2016 - 12/31/2016
General Trend:	Higher is better

Title	Description
Case-mix adjusted: No	
NQF #: 0062	
Data Display: Percentage with no decimal place	

Measure: C15 - Diabetes Care – Blood Sugar Controlled

Title	Description
Label for Data: Members with Diabetes whose Blood Sugar is Under Control	
Description: Percent of members with diabetes who had an A1C lab test during the year that showed their average blood sugar is under control.	
HEDIS Label: Comprehensive Diabetes Care (CDC) – HbA1c poor control (>9.0%)	
Measure Reference: NCQA HEDIS 2017 Technical Specifications Volume 2, page 132	
Metric: The percentage of diabetic MMP enrollees 18-75 (denominator) whose most recent HbA1c level is greater than 9%, or who were not tested during the measurement year (numerator). (This measure for public reporting is reverse scored so higher scores are better.) To calculate this measure, subtract the submitted rate from 100.	
Primary Data Source: HEDIS	
Data Source Category: Health and Drug Plans	
Exclusions: (optional) Members who do not have a diagnosis of diabetes (Diabetes Value Set), in any setting, during the measurement year or the year prior to the measurement year and who had a diagnosis of gestational diabetes or steroid-induced diabetes (Diabetes Exclusions Value Set), in any setting, during the measurement year or the year prior to the measurement year.	
Organizations that apply optional exclusions must exclude members from the denominator for all indicators. The denominator for all rates must be the same, with the exception of the HbA1c Control (<7.0%) for a Selected Population denominator. If the member was included in the measure based on claim or encounter data, as described in the event/ diagnosis criteria, the optional exclusions do not apply because the member had a diagnosis of diabetes.	
Data Time Frame: 01/01/2016 - 12/31/2016	
General Trend: Higher is better	
Case-mix adjusted: No	
NQF #: 0059	
Data Display: Percentage with no decimal place	

Measure: C16 - Controlling Blood Pressure

Title	Description
Label for Data: Controlling Blood Pressure	
Description: Percent of members with high blood pressure who got treatment and were able to maintain a healthy pressure.	
HEDIS Label: Controlling High Blood Pressure (CBP)	
Measure Reference: NCQA HEDIS 2017 Technical Specifications Volume 2, page 116	
Metric: The percentage of MMP members 18–85 years of age who had a diagnosis of hypertension (HTN) (denominator) and whose BP was adequately controlled (<140/90) for members 18-59 years of age and 60-85 years of age with diagnosis of diabetes or (150/90) for members 60-85 without a diagnosis of diabetes during the measurement year (numerator).	

Title	Description
Primary Data Source: HEDIS	
Data Source Category: Health and Drug Plans	
Exclusions: (optional)	<ul style="list-style-type: none"> • Exclude from the eligible population all members with evidence of end-stage renal disease (ESRD) (ESRD Value Set; ESRD Obsolete Value Set) or kidney transplant (Kidney Transplant Value Set) on or prior to December 31 of the measurement year. Documentation in the medical record must include a dated note indicating evidence of ESRD, kidney transplant or dialysis. • Exclude from the eligible population all members with a diagnosis of pregnancy (Pregnancy Value Set) during the measurement year. • Exclude from the eligible population all members who had a nonacute inpatient admission during the measurement year. To identify nonacute inpatient admissions: <ol style="list-style-type: none"> 1. Identify all acute and nonacute inpatient stays (Inpatient Stay Value Set). 2. Confirm the stay was for nonacute care based on the presence of a nonacute code (Nonacute Inpatient Stay Value Set) on the claim. 3. Identify the discharge date for the stay.

Measure: D11 - Medication Adherence for Diabetes Medications

Title	Description
Label for Data: Taking Diabetes Medication as Directed	
Description:	<p>Percent of members with a prescription for diabetes medication who fill their prescription often enough to cover 80% or more of the time they are supposed to be taking the medication. One of the most important ways people with diabetes can manage their health is by taking their medication as directed. The MMP, the doctor, and the member can work together to find ways to do this. (“Diabetes medication” means a <i>biguanide drug</i>, a <i>sulfonylurea drug</i>, a <i>thiazolidinedione drug</i>, a <i>DPP-IV inhibitor</i>, an <i>incretin mimetic drug</i>, a <i>meglitinide drug</i>, or an <i>SGLT2 inhibitor</i>. Members who take insulin are not included.)</p>
Metric:	<p>This measure is defined as the percent of Medicare Part D beneficiaries 18 years and older who adhere to their prescribed drug therapy across classes of diabetes medications: biguanides, sulfonylureas, thiazolidinediones, and DiPeptidyl Peptidase (DPP)-IV Inhibitors, incretin mimetics, meglitinides, and sodium glucose cotransporter 2 (SGLT) inhibitors. This percentage is calculated as the number of member-years of enrolled beneficiaries 18 years and older with a proportion of days covered (PDC) at 80 percent or higher across the classes of diabetes medications during the measurement period (numerator) divided by the number of member-years of enrolled beneficiaries 18 years and older with at least two fills of diabetes medication(s) on unique dates of service during the measurement period (denominator).</p>
	<p>The PDC is the percent of days in the measurement period “covered” by prescription claims for the same medication or medications in its therapeutic category. Beneficiaries with one or more fills for insulin or with ESRD coverage dates anytime during the measurement period are excluded. Beneficiaries are only included in the measure calculation if the first fill of their medication occurs at least 91 days before the end of the enrollment period.</p>

Title	Description
	<p>The Medication Adherence measure is adapted from the Medication Adherence-Proportion of Days Covered measure that was developed and endorsed by the Pharmacy Quality Alliance (PQA). The PDC Adherence measures are also endorsed by the National Quality Forum (NQF).</p> <p>See the medication list for this measure. The Medication Adherence rate is calculated using the National Drug Code (NDC) list and obsolete NDC date methodology maintained by the PQA. The complete NDC list is posted along with these technical notes. NDCs with obsolete dates are included in the measure calculation if the obsolete dates as reported by PQA are within the period of measurement (measurement year) or within six months prior to the beginning of the measurement year.</p> <p>Primary Data Source: Prescription Drug Event (PDE) data</p> <p>Data Source Description: The data for this measure come from PDE data files submitted by drug plans to Medicare by June 30, 2017 with dates of service from January 1, 2016-December 31, 2016. Only final action PDE claims are used to calculate this measure. PDE claims are limited to members who received at least two prescriptions on unique dates of service for diabetes medication(s). PDE adjustments made post-reconciliation are not reflected in this measure.</p> <p>Additional data sources include the Common Medicare Environment (CME), the Medicare Enrollment Database (EDB), and the Common Working File (CWF).</p> <ul style="list-style-type: none"> • CME is used for enrollment information. • EDB is used for hospice enrollment and ESRD status (using the ESRD indicator). • CWF is used to identify inpatient stays for PDPs and MA-PDs, and skilled nursing facility stays for PDPs. <p>Data Source Category: Health and Drug Plans</p> <p>Exclusions: Contracts with 30 or fewer enrolled member-years (in the denominator)</p> <p>General Notes: Part D drugs do not include drugs or classes of drugs, or their medical uses, which may be excluded from coverage or otherwise restricted under section 1927(d)(2) of the Act, except for smoking cessation agents. As such, these drugs, which may be included in the medication or NDC lists, are excluded from CMS analyses. Also, the member-years of enrollment adjustment is made by CMS to account for partial enrollment within the benefit year. Enrollment is measured at the episode level, and inclusion in the measure is determined separately for each episode – i.e., to be included for a given episode, the beneficiary must meet the initial inclusion criteria for the measure during that episode.</p> <p>The measure is weighted based on the total number of member years for each episode in which the beneficiary meets the measure criteria. For instance, if a beneficiary is enrolled for a three-month episode, disenrolled for a six-month episode, reenrolled for a three-month episode, and meets the measure criteria during each enrollment episode, s/he will count as 0.5 member years in the rate calculation ($3/12 + 3/12 = 6/12$).</p> <p>The PDC calculation is adjusted for overlapping prescriptions for the same drug which is defined by the active ingredient at the generic name level using the Medi-Span generic ingredient name. The calculation also adjusts for Part D beneficiaries' stays in inpatient (IP) settings, hospice enrollments, and stays in skilled nursing facilities (SNFs). The SNF adjustment only applies to PDPs because SNF data are not currently available for MA-PDs. Please see Attachment D: Medication Adherence Measure Calculations for more information about these calculation adjustments.</p> <p>When available, beneficiary death date from the CME is the end date of a beneficiary's measurement period.</p> <p>Data Time Frame: 01/01/2016 - 12/31/2016</p> <p>General Trend: Higher is better</p>

Measure: D12 - Medication Adherence for Hypertension (RAS antagonists)

Title	Description
Label for Data: Taking Blood Pressure Medication as Directed	
Description:	Percent of members with a prescription for a blood pressure medication who fill their prescription often enough to cover 80% or more of the time they are supposed to be taking the medication. One of the most important ways people with high blood pressure can manage their health is by taking medication as directed. The MMP, the doctor, and the member can work together to do this. ("Blood pressure medication" means an <i>ACE (angiotensin converting enzyme) inhibitor</i> , an <i>ARB (angiotensin receptor blocker)</i> , or a <i>direct renin inhibitor</i> drug.
Metric:	<p>This measure is defined as the percent of Medicare Part D beneficiaries 18 years and older who adhere to their prescribed drug therapy for renin angiotensin system (RAS) antagonists: angiotensin converting enzyme inhibitor (ACEI), angiotensin receptor blocker (ARB), or direct renin inhibitor medications. This percentage is calculated as the number of member-years of enrolled beneficiaries 18 years and older with a proportion of days covered (PDC) at 80 percent or higher for RAS antagonist medications during the measurement period (numerator) divided by the number of member-years of enrolled beneficiaries 18 years and older with at least two blood pressure medication fills on unique dates of service during the measurement period (denominator).</p> <p>The PDC is the percent of days in the measurement period "covered" by prescription claims for the same medication or another in its therapeutic category. Beneficiaries with ESRD coverage dates or that received one or more prescriptions for sacubitril/valsartan anytime during the measurement period are excluded. Beneficiaries are only included in the measure calculation if the first fill of their medication occurs at least 91 days before the end of the enrollment period.</p> <p>The Part D Medication Adherence measure is adapted from the Medication Adherence-Proportion of Days Covered measure that was developed and endorsed by the Pharmacy Quality Alliance (PQA). The PDC Adherence measures are also endorsed by the National Quality Forum (NQF).</p> <p>See the medication list for this measure. The Part D Medication Adherence rate is calculated using the National Drug Code (NDC) list and obsolete NDC date methodology maintained by the PQA. The complete NDC list is posted along with these technical notes. NDCs with obsolete dates are included in the measure calculation if the obsolete dates as reported by PQA are within the period of measurement (measurement year) or within six months prior to the beginning of the measurement year.</p>
Primary Data Source:	Prescription Drug Event (PDE) data
Data Source Description:	<p>The data for this measure come from PDE data files submitted by drug plans to Medicare by June 30, 2017 with dates of service from January 1, 2016-December 31, 2016. Only final action PDE claims are used to calculate this measure. PDE claims are limited to members who received at least two prescriptions on unique dates of service for RAS antagonist medication(s). PDE adjustments made post-reconciliation are not reflected in this measure.</p> <p>Additional data sources include the Common Medicare Environment (CME), the Medicare Enrollment Database (EDB), and the Common Working File (CWF).</p>

Title	Description
-------	-------------

- CME is used for enrollment information.
- EDB is used for hospice enrollment and ESRD status (using the ESRD indicator).
- CWF is used to identify inpatient stays for PDPs and MA-PDs, and skilled nursing facility stays for PDPs.

Data Source Category: Health and Drug Plans

Exclusions: Contracts with 30 or fewer enrolled member-years (in the denominator)

General Notes: Part D drugs do not include drugs or classes of drugs, or their medical uses, which may be excluded from coverage or otherwise restricted under section 1927(d)(2) of the Act, except for smoking cessation agents. As such, these drugs, which may be included in the medication or NDC lists, are excluded from CMS analyses. Also, the member-years of enrollment adjustment is made by CMS to account for partial enrollment within the benefit year. Enrollment is measured at the episode level, and inclusion in the measure is determined separately for each episode – i.e., to be included for a given episode, the beneficiary must meet the initial inclusion criteria for the measure during that episode.

The measure is weighted based on the total number of member years for each episode in which the beneficiary meets the measure criteria. For instance, if a beneficiary is enrolled for a three-month episode, disenrolled for a six-month episode, reenrolled for a three-month episode, and meets the measure criteria during each enrollment episode, s/he will count as 0.5 member years in the rate calculation ($3/12 + 3/12 = 6/12$).

The PDC calculation is adjusted for overlapping prescriptions for the same drug which is defined by active ingredient at the generic name level using the Medi-Span generic ingredient name. The calculation also adjusts for Part D beneficiaries' stays in inpatient (IP) settings, hospice enrollments, and stays in skilled nursing facilities (SNFs). The SNF adjustment only applies to PDPs because SNF data are not currently available for MA-PDs. Please see [Attachment D: Medication Adherence Measure Calculations](#) for more information about these calculation adjustments.

When available, beneficiary death date from the CME is the end date of a beneficiary's measurement period.

Domain: Member Experience with Integrated Plan and Care Providers

Measure: OHP5 - Satisfaction with Care Coordination

Title	Description
Description:	Percent of members who are very satisfied with the help they received coordinating the care from different doctors and health providers.
Metric:	The percentage displayed for each measure is the percentage of respondents who answered "Very satisfied" to the measure question on how satisfied the respondent was with the care coordination services provided they received in the last 6 months. Only MMPs with at least 11 "Yes" answers to the screening question (In the last 6 months, did anyone from your health plan, doctor's office, or clinic help coordinate your care among these doctors or other health care providers?) and have at least 11 "very satisfied" responses on the measure question have a rate displayed. No case mix adjustment was applied to this measure.
Primary Data Source:	CAHPS Supplemental Question
Data Source Description:	CAHPS Survey Question: <ul style="list-style-type: none"> How satisfied are you with the help you received to coordinate your care in the last 6 months?
Data Source Category:	Survey of Enrollees

Measure: C18 - Reducing the Risk of Falling

Title	Description
Label for Data:	Reducing the Risk of Falling
Description:	Percent of members with a problem falling, walking, or balancing, who discussed it with their doctor and got treatment for it during the year.
HEDIS Label:	Fall Risk Management (FRM)
Measure Reference:	NCQA HEDIS 2016 Specifications for The Medicare Health Outcomes Survey Volume 6, page 36
Metric:	The percentage of members 65 years of age or older who had a fall or had problems with balance or walking in the past 12 months (denominator), who were seen by a practitioner in the past 12 months and who received fall risk intervention from their current practitioner (numerator).
Primary Data Source:	HEDIS / HOS
Data Source Description:	Cohort 19 Baseline data collection (2016).

Title	Description
	<p>HOS Survey Question 48: A fall is when your body goes to the ground without being pushed. In the past 12 months, did your doctor or other health provider talk with you about falling or problems with balance or walking?</p> <p>HOS Survey Question 49: Did you fall in the past 12 months?</p> <p>HOS Survey Question 50: In the past 12 months have you had a problem with balance or walking?</p> <p>HOS Survey Question 51: Has your doctor or other health provider done anything to help prevent falls or treat problems with balance or walking? Some things they might do include:</p> <ul style="list-style-type: none"> • Suggest that you use a cane or walker • Check your blood pressure lying or standing • Suggest that you do an exercise or physical therapy program • Suggest a vision or hearing testing
Data Source Category:	Survey of Enrollees
Exclusions:	Contracts must achieve a denominator of at least 100 to obtain a reportable result. If the denominator is less than 100, the measure result will be "Not enough data available."
Data Time Frame:	04/18/2016 – 07/31/2016
General Trend:	Higher is better
Case-mix adjusted:	No
NQF #:	0035

Measure: C19 - Improving Bladder Control

Title	Description
Label for Data:	Improving Bladder Control
Description:	Percent of members with a urine leakage problem in the past 6 months who discussed treatment options with a provider.
HEDIS Label:	Management of Urinary Incontinence in Older Adults (MUI)
Measure Reference:	NCQA HEDIS 2016 Specifications for The Medicare Health Outcomes Survey Volume 6, page 31
Metric:	The percentage of members 65 years of age or older who reported having any urine leakage in the past six months (denominator) and who discussed treatment options for their urinary incontinence with a provider (numerator).
Primary Data Source:	HEDIS / HOS
Data Source Description:	Cohort 19 Baseline data collection (2016).
	<p>HOS Survey Question 42: Many people experience leaking of urine, also called urinary incontinence. In the past six months, have you experienced leaking of urine?</p> <p>HOS Survey Question 45: There are many ways to control or manage the leaking of urine, including bladder training exercises, medication and surgery. Have you ever talked with a doctor, nurse, or other health care provider about any of these approaches?</p> <p>Member choices must be as follows to be included in the denominator:</p> <ul style="list-style-type: none"> • Q42 = "Yes." • Q45 = "Yes" or "No."

Title	Description
	<p>The numerator contains the number of members in the denominator who indicated they discussed treatment options for their urinary incontinence with a health care provider.</p> <p>Member choice must be as follows to be included in the numerator:</p> <ul style="list-style-type: none"> • Q45 = "Yes."

Measure: C20 - Medication Reconciliation Post-Discharge

Title	Description
Label for Data:	The MMP Makes Sure Member Medication Records Are Up-to-Date After Hospital Discharge
Description:	This topic shows the percent of members whose medication records were updated within 30 days after leaving the hospital. To update the record, a doctor (or other health care professional) looks at the new medications prescribed in the hospital and compares them with the other medications the patient takes. Updating the medication records can help to prevent errors that can occur when medications are changed.
HEDIS Label:	Medication Reconciliation Post-Discharge (MRP)
Measure Reference:	NCQA HEDIS 2017 Technical Specifications Volume 2, page 202
Metric:	The percentage of discharges from January 1–December 1 of the measurement year for members 18 years of age and older for whom medications were reconciled the date of discharge through 30 days after discharge (31 total days).
Primary Data Source:	HEDIS
Data Source Category:	Health and Drug Plans
Data Time Frame:	01/01/2016 – 12/31/2016
General Trend:	Higher is better
Case-mix adjusted:	No

Measure: C22 - Getting Needed Care

Title	Description
Label for Data:	Ease of Getting Needed Care and Seeing Specialists (on a scale from 0 to 100)
Description:	Percent of the best possible score the MMP earned on how easy it is for members to get needed care, including care from specialists.
Metric:	This case-mix adjusted composite measure is used to assess how easy it was for a member to get needed care and see specialists. The Consumer Assessment of Healthcare Providers and Systems (CAHPS) score uses the mean of the distribution of responses converted to a scale from 0 to 100. The score shown is the percentage of the best possible score each contract earned.
Primary Data Source:	CAHPS
Data Source Description:	CAHPS Survey Questions (question numbers vary depending on survey type): <ul style="list-style-type: none"> In the last 6 months, how often was it easy to get appointments with specialists? In the last 6 months, how often was it easy to get the care, tests, or treatment you needed through your health plan?
Data Source Category:	Survey of Enrollees
General Notes:	CAHPS Survey results were sent to each contract. These reports provide further explanation of the CAHPS scoring methodology and provide detailed information on why a specific rating was assigned.
Data Time Frame:	03/2017 – 06/2017
General Trend:	Higher is better
Case-mix adjusted:	Yes
	NQF #: 0006

Measure: C23 - Getting Appointments and Care Quickly

Title	Description
Label for Data:	Getting Appointments and Care Quickly (on a scale from 0 to 100)
Description:	Percent of the best possible score the MMP earned on how quickly members get appointments and care.
Metric:	This case-mix adjusted composite measure is used to assess how quickly the member was able to get appointments and care. The Consumer Assessment of Healthcare Providers and Systems (CAHPS) score uses the mean of the distribution of responses converted to a scale from 0 to 100. The score shown is the percentage of the best possible score each contract earned.

Title	Description
Primary Data Source:	CAHPS
Data Source Description:	CAHPS Survey Questions (question numbers vary depending on survey type): <ul style="list-style-type: none"> • In the last 6 months, when you needed care right away, how often did you get care as soon as you thought you needed? • In the last 6 months, not counting the times when you needed care right away, how often did you get an appointment for your health care at a doctor's office or clinic as soon as you thought you needed? • In the last 6 months, how often did you see the person you came to see within 15 minutes of your appointment time?
Data Source Category:	Survey of Enrollees
General Notes:	CAHPS Survey results were sent to each contract. These reports provide further explanation of the CAHPS scoring methodology and provide detailed information on why a specific rating was assigned.
Data Time Frame:	03/2017 – 06/2017
General Trend:	Higher is better
Case-mix adjusted:	Yes
NQF #:	0006
Data Display:	Numeric with no decimal place

Measure: C24 - Customer Service

Title	Description
Label for Data:	Health Plan Provides Information or Help When Members Need It (on a scale from 0 to 100)
Description:	Percent of the best possible score the MMP earned on how easy it is for members to get information and help from the MMP when needed.
Metric:	This case-mix adjusted composite measure is used to assess how easy it was for the member to get information and help when needed. The Consumer Assessment of Healthcare Providers and Systems (CAHPS) score uses the mean of the distribution of responses converted to a scale from 0 to 100. The score shown is the percentage of the best possible score each contract earned.
Primary Data Source:	CAHPS
Data Source Description:	CAHPS Survey Questions (question numbers vary depending on survey type): <ul style="list-style-type: none"> • In the last 6 months, how often did your health plan's customer service give you the information or help you needed? • In the last 6 months, how often did your health plan's customer service treat you with courtesy and respect? • In the last 6 months, how often were the forms for your health plan easy to fill out?
Data Source Category:	Survey of Enrollees
General Notes:	CAHPS Survey results were sent to each contract. These reports provide further explanation of the CAHPS scoring methodology and provide detailed information on why a specific rating was assigned.
Data Time Frame:	03/2017 – 06/2017
General Trend:	Higher is better
Case-mix adjusted:	Yes
NQF #:	0006
Data Display:	Numeric with no decimal place

Measure: C25 - Rating of Health Care Quality

Title	Description
Label for Data:	Member's Rating of Health Care Quality (on a scale from 0 to 100)
Description:	Percent of the best possible score the MMP earned from members who rated the quality of the health care they received.
Metric:	This case-mix adjusted measure is used to assess members' view of the quality of care received from the health plan. The Consumer Assessment of Healthcare Providers and Systems (CAHPS) score uses the mean of the distribution of responses converted to a scale from 0 to 100. The score shown is the percentage of the best possible score each contract earned.
Primary Data Source:	CAHPS
Data Source Description:	CAHPS Survey Question (question numbers vary depending on survey type): <ul style="list-style-type: none">Using any number from 0 to 10, where 0 is the worst health care possible and 10 is the best health care possible, what number would you use to rate all your health care in the last 6 months?
Data Source Category:	Survey of Enrollees
General Notes:	CAHPS Survey results were sent to each contract. These reports provide further explanation of the CAHPS scoring methodology and provide detailed information on why a specific rating was assigned.
Data Time Frame:	03/2017 – 06/2017
General Trend:	Higher is better
Case-mix adjusted:	Yes
NQP #:	0006
Data Display:	Numeric with no decimal place

Measure: C26 - Rating of Health Plan

Title	Description
Label for Data:	Member's Rating of Health Plan (on a scale from 0 to 100)
Description:	Percent of the best possible score the MMP earned from members who rated the health plan.
Metric:	This case-mix adjusted measure is used to assess members' overall view of their health plan. The Consumer Assessment of Healthcare Providers and Systems (CAHPS) score uses the mean of the distribution of responses converted to a scale from 0 to 100. The score shown is the percentage of the best possible score each contract earned.
Primary Data Source:	CAHPS
Data Source Description:	CAHPS Survey Question (question numbers vary depending on survey type): <ul style="list-style-type: none">Using any number from 0 to 10, where 0 is the worst health plan possible and 10 is the best health plan possible, what number would you use to rate your health plan?
Data Source Category:	Survey of Enrollees
General Notes:	CAHPS Survey results were sent to each contract. These reports provide further explanation of the CAHPS scoring methodology and provide detailed information on why a specific rating was assigned.
Data Time Frame:	03/2017 – 06/2017

Case-mix adjusted:	Yes
NQP #:	0006
Data Display:	Numeric with no decimal place

Measure: C27 - Care Coordination

Title	Description
Label for Data:	Coordination of Members' Health Care Services (on a scale from 0 to 100)
Description:	Percent of the best possible score the MMP earned on how well the MMP coordinates members' care. (This includes whether doctors had the records and information they needed about members' care and how quickly members got their test results.)
Metric:	This case-mix adjusted composite measure is used to assess Care Coordination. The Consumer Assessment of Healthcare Providers and Systems (CAHPS) score uses the mean of the distribution of responses converted to a scale of 0 to 100. The score shown is the percentage of the best possible score each contract earned.
Primary Data Source:	CAHPS
Data Source Description:	CAHPS Survey Questions (question numbers vary depending on survey type):
	<ul style="list-style-type: none">• In the last 6 months, when you visited your personal doctor for a scheduled appointment, how often did he or she have your medical records or other information about your care?• In the last 6 months, when your personal doctor ordered a blood test, x-ray or other test for you, how often did someone from your personal doctor's office follow up to give you those results?• In the last 6 months, when your personal doctor ordered a blood test, x-ray or other test for you, how often did you get those results as soon as you needed them?• In the last 6 months, how often did you and your personal doctor talk about all the prescription medicines you were taking?• In the last 6 months, did you get the help you needed from your personal doctor's office to manage your care among these different providers and services?• In the last 6 months, how often did your personal doctor seem informed and up-to-date about the care you got from specialists?
Data Source Category:	Survey of Enrollees

Measure: D09 - Getting Needed Prescription Drugs

Title	Description
Label for Data:	Ease of Getting Prescriptions Filled When Using the Plan (on a scale from 0 to 100)
Description:	Percent of the best possible score the MMP earned on how easy it is for members to get the prescription drugs they need using the plan.
Metric:	This case-mix adjusted measure is used to assess the ease with which a beneficiary gets the medicines their doctor prescribed. The Consumer Assessment of Healthcare Providers and Systems (CAHPS) score uses the mean of the distribution of responses converted to a scale from 0 to 100. The score shown is the percentage of the best possible score each contract earned.
Primary Data Source:	CAHPS
Data Source Description:	CAHPS Survey Questions (question numbers vary depending on survey type): <ul style="list-style-type: none"> In the last 6 months, how often was it easy to use your prescription drug plan to get the medicines your doctor prescribed? In the last 6 months, how often was it easy to use your prescription drug plan to fill a prescription at your local pharmacy? In the last 6 months, how often was it easy to use your prescription drug plan to fill a prescription by mail?
Data Source Category:	Survey of Enrollees
General Notes:	CAHPS Survey results were sent to each contract. These reports provide further explanation of the CAHPS scoring methodology and provide detailed information on why a specific rating was assigned.

Domain: Staying Healthy: Screenings, Tests and Vaccines

Measure: C01 - Breast Cancer Screening

Title	Description
Label for Data: Breast Cancer Screening	
Description: Percent of female members aged 52-74 who had a mammogram during the past 2 years.	
HEDIS Label: Breast Cancer Screening (BCS)	
Measure Reference: NCQA HEDIS 2017 Technical Specifications Volume 2, page 74	
Metric: The percentage of women MMP enrollees 50 to 74 years of age (denominator) who had a mammogram to screen for breast cancer (numerator).	
Primary Data Source: HEDIS	
Data Source Category: Health and Drug Plans	
Exclusions: (optional) Bilateral mastectomy any time during the member's history through December 31 of the measurement year. Any of the following meet criteria for bilateral mastectomy:	
	<ul style="list-style-type: none">• Bilateral mastectomy (Bilateral Mastectomy Value Set).• Unilateral mastectomy (Unilateral Mastectomy Value Set) with a bilateral modifier (Bilateral Modifier Value Set).• Two unilateral mastectomies (Unilateral Mastectomy Value Set) with service dates 14 days or more apart. For example, if the service date for the first unilateral mastectomy was February 1 of the measurement year, the service date for the second unilateral mastectomy must be on or after February 15.• Both of the following (on the same or a different date of service):<ul style="list-style-type: none">– Unilateral mastectomy (Unilateral Mastectomy Value Set) with a right-side modifier (Right Modifier Value Set) (same date of service).– Unilateral mastectomy (Unilateral Mastectomy Value Set) with a left-side modifier (Left Modifier Value Set) (same date of service).• Absence of the left breast (Absence of Left Breast Value Set) and absence of the right breast (Absence of Right Breast Value Set) on the same or different date of service.• History of bilateral mastectomy (History of Bilateral Mastectomy Value Set).• Left unilateral mastectomy (Unilateral Mastectomy Left Value Set) and right unilateral mastectomy (Unilateral Mastectomy Right Value Set) on the same or different date of service.
Data Time Frame: 01/01/2016 - 12/31/2016	
General Trend: Higher is better	
Case-mix adjusted: No	
NQF #: 0031	
Data Display: Percentage with no decimal place	

Measure: C02 - Colorectal Cancer Screening

Title	Description
Label for Data: Colorectal Cancer Screening	
Description: Percent of members aged 50-75 who had appropriate screening for colon cancer.	
HEDIS Label: Colorectal Cancer Screening (COL)	
Measure Reference: NCQA HEDIS 2017 Technical Specifications Volume 2, page 80	

Title	Description
Metric:	The percentage of MMP enrollees aged 50 to 75 (denominator) who had appropriate screenings for colorectal cancer (numerator).
Primary Data Source:	HEDIS
Data Source Category:	Health and Drug Plans
Exclusions:	(optional) Refer to Administrative Specification for exclusion criteria. Exclusionary evidence in the medical record must include a note indicating colorectal cancer or total colectomy any time during the member's history through December 31 of the measurement year.
Data Time Frame:	01/01/2016 - 12/31/2016
General Trend:	Higher is better
NQF #:	0034
Data Display:	Percentage with no decimal place

Measure: C03 - Annual Flu Vaccine

Title	Description
Label for Data:	Annual Flu Vaccine
Description:	Percent of members who got a vaccine (flu shot) prior to flu season.
Metric:	The percentage of sampled Medicare enrollees (denominator) who received an influenza vaccination during the measurement year (numerator).
Primary Data Source:	CAHPS
Data Source Description:	CAHPS Survey Question (question number varies depending on survey type): <ul style="list-style-type: none"> • Have you had a flu shot since July 1, 2016?
Data Source Category:	Survey of Enrollees
General Notes:	This measure is not case-mix adjusted. CAHPS Survey results were sent to each contract. These reports provide further explanation of the CAHPS scoring methodology and provide detailed information on why a specific rating was assigned.
Data Time Frame:	03/2017 – 06/2017
General Trend:	Higher is better
CMS Framework Area:	Clinical care
Case-mix adjusted:	No
NQF #:	0040
Data Display:	Numeric with no decimal place

Measure: C06 - Monitoring Physical Activity

Title	Description
Label for Data:	Monitoring Physical Activity
Description:	Percent of members who discussed exercise with their doctor and were advised to start, increase, or maintain their physical activity during the year.
HEDIS Label:	Physical Activity in Older Adults (PAO)
Measure Reference:	NCQA HEDIS 2016 Specifications for The Medicare Health Outcomes Survey Volume 6, page 34

Title	Description
Metric:	The percentage of sampled members 65 years of age or older (denominator) who had a doctor's visit in the past 12 months and who received advice to start, increase or maintain their level exercise or physical activity (numerator).
Primary Data Source:	HEDIS / HOS
Data Source Description:	Cohort 19 Baseline data collection (2016).
	HOS Survey Question 46: In the past 12 months, did you talk with a doctor or other health provider about your level of exercise of physical activity? For example, a doctor or other health provider may ask if you exercise regularly or take part in physical exercise.
	HOS Survey Question 47: In the past 12 months, did a doctor or other health care provider advise you to start, increase or maintain your level of exercise or physical activity? For example, in order to improve your health, your doctor or other health provider may advise you to start taking the stairs, increase walking from 10 to 20 minutes every day or to maintain your current exercise program.
Data Source Category:	Survey of Enrollees
	Exclusions: Members who responded "I had no visits in the past 12 months" to Question 46 are excluded from results calculations for Question 47. Contracts must achieve a denominator of at least 100 to obtain a reportable result. If the denominator is less than 100, the measure result will be "Not enough data available."
Data Time Frame:	04/18/2016 – 07/31/2016
General Trend:	Higher is better
Case-mix adjusted:	No
NQF #:	0029
Data Display:	Percentage with no decimal place

Measure: C07 - Adult BMI Assessment

Title	Description
Label for Data:	Checking to See if Members Are at a Healthy Weight
Description:	Percent of members with an outpatient visit who had their "Body Mass Index" (BMI) calculated from their height and weight and recorded in their medical records.
HEDIS Label:	Adult BMI Assessment (ABA)
Measure Reference:	NCQA HEDIS 2017 Technical Specifications Volume 2, page 54
Metric:	The percentage of MMP enrollees 18-74 years of age (denominator) who had an outpatient visit and whose body mass index (BMI) was documented during the measurement year or the year prior the measurement year (numerator).
Primary Data Source:	HEDIS
Data Source Category:	Health and Drug Plans
Exclusions:	(optional) Members who have a diagnosis of pregnancy (Pregnancy Value Set) during the measurement year or the year prior to the measurement year.
Data Time Frame:	01/01/2016 - 12/31/2016
General Trend:	Higher is better
Case-mix adjusted:	No
NQF #:	0421
Data Display:	Percentage with no decimal place

Measure: D14 - MTM Program Completion Rate for CMR

Title	Description
Label for Data:	Members Who Had a Pharmacist (or Other Health Professional) Help them Understand and Manage Their Medications
Description:	Some members are in a program (called a <i>Medication Therapy Management</i> program) to help them manage their drugs. The measure shows how many members in the program had an assessment of their medications from the MMP. The assessment includes a discussion between the member and a pharmacist (or other health care professional) about all of the member’s medications. The member also receives a written summary of the discussion, including an action plan that recommends what the member can do to better understand and use his or her medications.
Metric:	This measure is defined as the percent of Medication Therapy Management (MTM) program enrollees who received a Comprehensive Medication Review (CMR) during the reporting period.
Numerator =	Number of beneficiaries from the denominator who received a CMR at any time during their period of MTM enrollment in the reporting period.
Denominator =	Number of beneficiaries who were at least 18 years or older as of the beginning of the reporting period and who were enrolled in the MTM program for at least 60 days during the reporting period. Only those beneficiaries who meet the contracts’ specified targeting criteria per CMS – Part D requirements pursuant to §423.153(d) of the regulations at any time in the reporting period are included in this measure. Beneficiaries who were in hospice at any point during the reporting period are excluded.
A beneficiary’s MTM eligibility, receipt of CMRs, etc., is determined for each contract he/she was enrolled in during the measurement period. Similarly, a contract’s CMR completion rate is calculated based on each of its eligible MTM enrolled beneficiaries. For example, a beneficiary must meet the inclusion criteria for the contract to be included in the contract’s CMR rate. A beneficiary who is enrolled in two different contracts’ MTM programs for 30 days each is therefore excluded from both contracts’ CMR rates.	
Beneficiaries may be enrolled in MTM based on the contracts’ specified targeting criteria per CMS – Part D requirements and/or based on expanded, other plan-specific targeting criteria. Beneficiaries who were initially enrolled in MTM due to other plan-specific (expanded) criteria and then later met the contracts’ specified targeting criteria per CMS – Part D requirements at any time in the reporting period are included in this measure. In these cases, a CMR received after the date of MTM enrollment but before the date the beneficiary met the specified targeting criteria per CMS – Part D requirements are included.	
Primary Data Source:	Part D Plan Reporting
Data Source Description:	Additional data sources used to calculate the measure: Medicare Enrollment Database (EDB) File. Data were reported by contracts to CMS per the Part D Reporting Requirements. Validation of these data was performed retrospectively during the 2017 Data Validation cycle.
Data Source Category:	Health and Drug Plans
Exclusions:	Contracts with an effective termination date on or before the deadline to submit data validation results to CMS (June 30, 2017) are excluded and listed as “No data available.”

Title	Description
	<p>MTM CMR rates are not provided for contracts that did not score at least 95% on data validation for the Medication Therapy Management Program reporting section or were not compliant with data validation standards/sub-standards for any the following Medication Therapy Management Program data elements:</p> <ul style="list-style-type: none"> • HICN or RRB Number (Element B) • Met the specified targeting criteria per CMS – Part D requirements (Element G) • Date of MTM program enrollment (Element I) • Date met the specified targeting criteria per CMS – Part D requirements (Element J) • Date of MTM program opt-out, if applicable (Element K) • Received annual CMR with written summary in CMS standardized format (Element O) • Date(s) of CMR(s) with written summary in CMS standardized format (Element Q) <p>MTM CMR rates are also not provided for contracts that failed to submit their MTM file and pass system validation by the reporting deadline or who had a missing data validation score for MTM. Contracts excluded from the MTM CMR Rates due to data validation issues are shown as “CMS identified issues with this plan's data.”</p> <p>Contracts can view their data validation results in HPMS (https://hpms.cms.gov/). From the home page, select Monitoring Plan Reporting Data Validation. If you cannot see the Plan Reporting Data Validation module, contact CMSHPMS_Access@cms.hhs.gov.</p> <p>Additionally, contracts must have 31 or more enrollees in the denominator in order to have a calculated rate. Contracts with fewer than 31 eligible enrollees are listed as "No data available."</p> <p>Data Time Frame: 01/01/2016 - 12/31/2016</p> <p>General Trend: Higher is better</p> <p>Case-mix adjusted: No</p> <p>NQF #: Not Applicable</p> <p>Data Display: Percentage with no decimal place</p>

Domain: Plan Performance on Administrative Measures

Measure: C28 - Complaints about the Health Plan

Title	Description
<p>Label for Data:</p> <p>Description:</p> <p>Metric:</p> <p>Primary Data Source:</p>	<p>Complaints about the Health Plan (number of complaints for every 1,000 members) (lower numbers are better because it means fewer complaints)</p> <p>How many complaints Medicare received about the health plan.</p> <p>Rate of complaints about the health plan per 1,000 members. For each contract, this rate is calculated as:</p> $\left[\frac{\text{(Total number of all complaints logged into the Complaint Tracking Module (CTM))}}{\text{(Average Contract enrollment)}} \right] * 1,000 * 30 / \text{(Number of Days in Period)}$ <p>Number of Days in Period = 366 for leap years, 365 for all other years.</p> <ul style="list-style-type: none"> • Complaints data are pulled after the end of the measurement timeframe to serve as a snapshot of CTM data. • Enrollment numbers used to calculate the complaint rate were based on the average enrollment for the time period measured for each contract. • A contract’s failure to follow CMS’ CTM Standard Operating Procedures will not result in CMS’ adjustment of the data used for these measures. <p>Complaints Tracking Module (CTM)</p>

Title	Description
Data Source Description:	Data were obtained from the CTM based on the contract entry date (the date that complaints are assigned or re-assigned to contracts; also known as the contract assignment/reassignment date) for the reporting period specified. The status of any specific complaint at the time the data are pulled stands for use in the reports. Any changes to the complaints data subsequent to the data pull cannot be excluded retroactively. CMS allows for an approximate 6-month “wash out” period to account for any adjustments per CMS’ CTM Standard Operating Procedures. Complaint rates per 1,000 enrollees are adjusted to a 30-day basis.
Data Source Category:	CMS Administrative Data
Exclusions:	Some complaints that cannot be clearly attributed to the MMP are excluded, please see Attachment B : Complaints Tracking Module Exclusion List.
	Complaint rates are not calculated for contracts with average enrollment of less than 800 enrollees during the measurement period.
Data Time Frame:	01/01/2016 - 12/31/2016
General Trend:	Lower is better
Case-mix adjusted:	No
NQF #:	Not Applicable
Data Display:	Numeric with two decimal places

Measure: C29 - Members Choosing to Leave the Plan

Title	Description
Label for Data:	Members Choosing to Leave the Plan (lower percentages are better because it means fewer members choose to leave the plan)
Description:	Percent of plan members who chose to leave the plan.
Metric:	The percent of members who chose to leave the contract comes from disenrollment reason codes in Medicare’s enrollment system. The percent is calculated as the number of members who chose to leave the contract between January 1, 2016–December 31, 2016 (numerator) divided by all members enrolled in the contract at any time during 2016 (denominator).
Primary Data Source:	MBDSS
Data Source Description:	Medicare Beneficiary Database Suite of Systems (MBDSS)
Data Source Category:	CMS Administrative Data
Exclusions:	<p>Members who involuntarily left their contract due to circumstances beyond their control are removed from the final numerator, specifically:</p> <ul style="list-style-type: none"> • Members affected by a contract service area reduction • Members affected by PBP termination • Members affected by LIS reassignments • Members who are enrolled in employer group plans • Members in PBPs that were granted special enrollment exceptions • Members who were passively enrolled into a Demonstration (MMP) • Contracts with less than 1,000 enrollees
General Notes:	<p>This measure includes members with a disenrollment effective date between 1/1/2016 and 12/31/2016 who disenrolled from the contract with any one of the following disenrollment reason codes:</p> <ul style="list-style-type: none"> 11 - Voluntary Disenrollment through plan 13 - Disenrollment because of enrollment in another Plan 14 - Retroactive 99 - Other (not supplied by beneficiary).

Title	Description
	<p>The Disenrollment Reasons Survey (DRS) data available in the HPMS plan preview, as part of Medicare Plan Finder and in the CMS downloadable Master Table, are not used in the calculation of this measure. The DRS data are presented in each of the systems for information purposes only.</p> <p>Data Time Frame: 01/01/2016 - 12/31/2016</p> <p>General Trend: Lower is better</p> <p>Case-mix adjusted: No</p> <p>NQF #: Not Applicable</p> <p>Data Display: Percentage with no decimal place</p>

Measure: C32 - Plan Makes Timely Decisions about Appeals

Title	Description
	<p>Label for Data: Health Plan Makes Timely Decisions about Appeals</p> <p>Description: Percent of members who got a timely response when they made an appeal request to the health plan about a decision to refuse payment or coverage.</p> <p>Metric: Percent of appeals timely processed by the MMP (numerator) out of all the MMP's appeals decided by the Independent Review Entity (IRE) (includes upheld, overturned and partially overturned appeals) (denominator). This is calculated as: $\left(\frac{\text{Number of Timely Appeals}}{[\text{Appeals Upheld}] + [\text{Appeals Overturned}] + [\text{Appeals Partially Overturned}]} \right) * 100.$</p> <p>Primary Data Source: Independent Review Entity (IRE)</p> <p>Data Source Description: Data were obtained from the Independent Review Entity (IRE) contracted by CMS for Part C appeals. The appeals used in this measure are based on the date in the calendar year the appeal was received (or should have been received) by the IRE, not the date a decision was reached by the IRE. If a Reopening occurs and is decided prior to May 1, 2017, the Reopened decision is used in place of the Reconsideration decision. Reopenings decided on or after May 1, 2017 are not reflected in these data, the original decision result is used. The results of appeals that occur beyond Level 2 (i.e., Administrative Law Judge or Medicare Appeals Council appeals) are not included in the data.</p> <p>Data Source Category: Data Collected by CMS Contractors</p> <p>Exclusions: If the denominator is ≤ 10, the result is —"Not enough data available." Dismissed and Withdrawn appeals are excluded from this measure.</p> <p>General Notes: This measure includes all Standard Coverage, Standard Claim, and Expedited appeals received by the IRE, regardless of the appellant. This includes appeals requested by a beneficiary, appeals requested by a party on behalf of a beneficiary, and appeals requested by non-contract providers.</p> <p>Data Time Frame: 01/01/2016 - 12/31/2016</p> <p>General Trend: Higher is better</p> <p>Case-mix adjusted: No</p> <p>NQF #: Not Applicable</p> <p>Data Display: Percentage with no decimal place</p>

Measure: C33 - Reviewing Appeals Decisions

Title	Description
Label for Data:	Fairness of the Health Plan’s Appeal Decisions, Based on an Independent Reviewer Description: This rating shows how often an <u>independent reviewer</u> thought the health plan’s decision to deny an appeal was fair. This includes appeals made by members and out-of-network providers. (This rating is not based on how often the MMP denies appeals, but rather <i>how fair</i> the MMP is when they do deny an appeal.) Metric: Percent of appeals where an MMP’s decision was “upheld” by the Independent Review Entity (IRE) (numerator) out of all the MMP’s appeals (upheld, overturned, and partially overturned appeals only) that the IRE reviewed (denominator). This is calculated as: $([\text{Appeals Upheld}] / ([\text{Appeals Upheld}] + [\text{Appeals Overturned}] + [\text{Appeals Partially Overturned}])) * 100$.
Primary Data Source:	Independent Review Entity (IRE)
Data Source Description:	Data were obtained from the Independent Review Entity (IRE) contracted by CMS for Part C appeals. The appeals used in this measure are based on the date in the calendar year the appeal was received (or should have been received) by the IRE, not the date a decision was reached by the IRE. If a Reopening occurs and is decided prior to May 1, 2017, the Reopened decision is used in place of the Reconsideration decision. Reopenings decided on or after May 1, 2017 are not reflected in these data, the original decision result is used. The results of appeals that occur beyond Level 2 (i.e., Administrative Law Judge or Medicare Appeals Council appeals) are not included in the data.
Data Source Category:	Data Collected by CMS Contractors
Exclusions:	If the minimum number of appeals (upheld + overturned + partially overturned) is ≤ 10 , the result is “Not enough data available.” Dismissed and Withdrawn appeals are excluded from this measure.
General Notes:	This measure includes all Standard Coverage, Standard Claim, and Expedited appeals received by the IRE, regardless of the appellant. This includes appeals requested by a beneficiary, appeals requested by a party on behalf of a beneficiary, and appeals requested by non-contract providers.
Data Time Frame:	01/01/2016 - 12/31/2016
General Trend:	Higher is better
Case-mix adjusted:	No
NQF #:	Not Applicable
Data Display:	Percentage with no decimal place

Measure: D02 - Appeals Auto-Forward

Title	Description
Label for Data:	Drug Plan Fails to Make Timely Decisions about Appeals (for every 10,000 members)
Description:	Percent of members who failed to get a timely response when they made an appeal request to the drug plan about a decision to refuse payment or coverage. If you would like more information about Medicare appeals, click on http://www.medicare.gov/claims-and-appeals/index.html
Metric:	This measure is defined as the rate of cases auto-forwarded to the Independent Review Entity (IRE) because the MMP exceeded decision timeframes for coverage determinations or redeterminations. This is calculated as: $[(\text{Total number of cases auto-forwarded to the IRE}) / (\text{Average Medicare Part D enrollment})] * 10,000$. There is no minimum number of cases required to receive a rating.
Primary Data Source:	Independent Review Entity (IRE)

Title	Description
Data Source Description:	Data were obtained from the Independent Review Entity (IRE) contracted by CMS.
Data Source Category:	Data Collected by CMS Contractors
Exclusions:	Rates are not calculated for contracts with average enrollment less than 800 enrollees during the measurement period. Cases the IRE remands back to the MMP are not included in these data.
Data Time Frame:	01/01/2016 - 12/31/2016
General Trend:	Lower is better
Case-mix adjusted:	No
NQF #:	Not Applicable
Data Display:	Numeric with 1 decimal place

Measure: D03 - Appeals Upheld

Title	Description
Label for Data:	Fairness of Drug Plan's Appeal Decisions, Based on an Independent Reviewer
Description:	How often an <u>Independent Reviewer</u> thought the drug plan's decision to deny an appeal was fair. This includes appeals made by members and out-of-network providers. (This rating is not based on how often the MMP denies appeals, but rather <i>how fair</i> the MMP is when they do deny an appeal.)
Metric:	This measure is defined as the percent of IRE confirmations of upholding the MMPs' decisions. This is calculated as: $[(\text{Number of cases upheld}) / (\text{Total number of cases reviewed})] * 100.$ <p>Total number of cases reviewed is defined as all cases received by the IRE during the timeframe and receiving a decision before May 1, 2017. The denominator is equal to the number of cases upheld, fully reversed, and partially reversed. Dismissed, remanded, and withdrawn cases are not included in the denominator. Auto-forwarded cases are included, as these are considered to be adverse decisions per Subpart M rules. If a Reopening occurs and is decided prior to May 1, 2017, the Reopened decision is used in place of the Reconsideration decision. Reopenings decided on or after May 1, 2016 are not reflected in these data, the original decision result is used. The results of appeals that occur beyond Level 2 (i.e., Administrative Law Judge or Medicare Appeals Council appeals) are not included in the data. Contracts with no IRE cases reviewed will not receive a score in this measure.</p>
Primary Data Source:	Independent Review Entity (IRE)
Data Source Description:	Data were obtained from the Independent Review Entity (IRE) contracted by CMS for Part D reconsiderations. The appeals used in this measure are based on the date they were received by the IRE, not the date a decision was reached by the IRE.
Data Source Category:	Data Collected by CMS Contractors
Exclusions:	Contracts with fewer than 10 cases reviewed by the IRE.
Data Time Frame:	01/01/2016 - 12/31/2016
General Trend:	Higher is better
Case-mix adjusted:	No
NQF #:	Not Applicable
Data Display:	Percentage with no decimal place

Measure: C34 - Call Center – Foreign Language Interpreter and TTY Availability

Title	Description
Label for Data:	Availability of TTY Services and Foreign Language Interpretation When Prospective Members Call the Health Plan
Description:	Percent of time that TTY services and foreign language interpretation were available when needed by prospective members who called the health plan's prospective enrollee customer service phone number.
Metric:	The calculation of this measure is the number of successful contacts with the interpreter and TTY divided by the number of attempted contacts. Successful contact with an interpreter is defined as establishing contact with an interpreter and beginning the first of three survey questions. Interpreters must be able to communicate responses to the call surveyor in the call center's non-primary language about the plan sponsor's Medicare benefits. (The primary language is Spanish in Puerto Rico and English elsewhere.) Successful contact with a TTY service is defined as establishing contact with and confirming that the TTY operator can answer questions about the plan's Medicare Part C benefit.
Primary Data Source:	Call Center
Data Source Description:	Call center monitoring data collected by CMS. The Customer Service Contact for Prospective Members phone number associated with each contract was monitored.
Data Source Category:	Data Collected by CMS Contractors
Exclusions:	Data were not collected from MA-PDs and PDPs under sanction or from organizations that did not have a phone number accessible to survey callers.
General Notes:	Specific questions about Call Center Monitoring and requests for detail data should be directed to the CallCenterMonitoring@cms.hhs.gov
Data Time Frame:	02/13/2017 - 06/02/2017
General Trend:	Higher is better
Case-mix adjusted:	No
NQF #:	Not Applicable
Data Display:	Percentage with no decimal place

Measure: D01 - Call Center – Foreign Language Interpreter and TTY Availability

Title	Description
Label for Data:	Availability of TTY Services and Foreign Language Interpretation When Prospective Members Call the Drug Plan
Description:	Percent of time that TTY services and foreign language interpretation were available when needed by prospective members who called the drug plan's prospective enrollee customer service phone number.
Metric:	The calculation of this measure is the number of successful contacts with the interpreter and TTY divided by the number of attempted contacts. Successful contact with an interpreter is defined as establishing contact with an interpreter and beginning the first of three survey questions. Interpreters must be able to communicate responses to the call surveyor in the call center's non-primary language about the plan sponsor's Medicare benefits. (The primary language is Spanish in Puerto Rico and English elsewhere.) Successful contact with a TTY service is defined as establishing contact with and confirming that the TTY operator can answer questions about the plan's Medicare Part D benefit.
Primary Data Source:	Call Center
Data Source Description:	Call center monitoring data collected by CMS. The Customer Service Contact for Prospective Members phone number associated with each contract was monitored.

Title	Description

Attachment A: CAHPS Case-Mix Adjustment

Most Part C and D CAHPS measures are case-mix adjusted to take into account the mix of enrollees. Case-mix variables include dual eligibility and education among other variables. The tables below include the case-mix variables and shows the case-mix coefficients for each of the Part C and D CAHPS measures included in the MMP Performance Data File. The coefficients indicate how much higher or lower people with a given characteristic tend to respond compared to others with the baseline value for that characteristic, on the 0-100 scale used in consumer reports.

For example, for the measure "Customer Service," the coefficient for "age 80-84" is +0.0029, indicating that respondents in that age range tend to score their plans 0.0029 point higher than otherwise similar people in the 70-74 age range (the baseline or reference category). Similarly, dual eligible beneficiaries tend to respond - 0.0077 points lower on this item than otherwise similar non-duals. Contracts with higher proportions of beneficiaries who are in the 80-84 age range will be adjusted downwards on this measure to compensate for the positive response tendency of their respondents. Similarly, contracts with higher proportions of respondents who are dual eligible beneficiaries will be adjusted upwards on this measure to compensate for their respondents' negative response tendency. The case-mix patterns are not always consistent across measures.

The composites consist of multiple items, each of which is adjusted separately before combining the adjusted scores into a composite score. In the tables we report the average of the coefficients for these several items, for each of the categories (rows) of the table, as a summary of the adjustment for the composite.

Note: The measures derived from the supplemental questions on the MMP CAHPS survey (OHP5: Satisfaction with Care Coordination, CC14: Access to Personal Care, CC10: Access to Medical Equipment and MH3: Access to Mental Health Treatment) are not case-mix adjusted.

Attachment B: Complaints Tracking Module Exclusion List

Some complaints that cannot be clearly attributed to the MMP are excluded; these include the following complaint types: enrollment or MMP change issues outside available enrollment period; disenrollment due to loss of Medicare entitlement; IRMAA equitable relief or good cause requests; MMP premium good cause requests; contractor or partner performance; program integrity issues; and Medicaid eligibility issues. Complaints flagged as CMS issue or requiring CMS review will also be excluded.

Table B-1 contains the exclusions applied to the CTM based on the revised categories and subcategories that were applied between September 25, 2010 and March 17, 2017.

Table B-1: Exclusions between September 25, 2010 and March 17, 2017

Category ID	Category Description	Subcategory ID	Subcategory Description	Effective Date	
11	Enrollment/Disenrollment	16	Facilitated/Auto Enrollment issues	September 25, 2010	
		18	Enrollment Exceptions (EE)		
13	Pricing/Co-Insurance	06	Beneficiary has lost LIS Status/Eligibility or was denied LIS		
		16	Part D IRMAA		
30	Beneficiary Needs Assistance with Acquiring Medicaid Eligibility Information	01	Beneficiary Needs Assistance with Acquiring Medicaid Eligibility Information		
		90	Other Beneficiary Needs Assistance with Acquiring Medicaid Eligibility Information Issue		
38	Contractor/Partner Performance	90	Other Contractor/Partner Performance		
26	Contractor/Partner Performance	90	Other Contractor/Partner Performance		December 16, 2011
44	Equitable Relief/Good Cause Requests	01	Good Cause - Disenrollment for Failure to Pay Premiums		
		90	Other Equitable Relief/Good Cause Request		
45	Equitable Relief/Good Cause Requests	01	Good Cause - Disenrollment for Failure to Pay Premiums		
		02	Refund/Non-Receipt Part D IRMAA		
		03	Good Cause Part D IRMAA		
		04	Equitable Relief Part D IRMAA		
		90	Other Equitable Relief/Good Cause Request		
49	Contractor/Partner Performance	90	Other Contractor/Partner Performance		
50	Contractor/Partner Performance	90	Other Contractor/Partner Performance		
03	Enrollment/ Disenrollment	11	Disenrollment Due to Loss of Entitlement	June 1, 2013	
11	Enrollment/ Disenrollment	24	Disenrollment Due to Loss of Entitlement		

Note: Program Integrity complaints, which are in the CTM but not viewable by MMPs, are excluded as well.

Table B-2 contains the categories and subcategories that are excluded if they were entered into the CTM prior to current exclusion criteria.

Table B-2: Exclusions prior to September 25, 2010

Category ID	Category Description	Subcategory ID	Subcategory Description
03	Enrollment/Disenrollment	06	Enrollment Exceptions (EE)
		07	Retroactive Disenrollment (RD)
		09	Enrollment Reconciliation - Dissatisfied with Decision
		10	Retroactive Enrollment (RE)
		12	Missing Medicaid/ Medicare Eligibility in MBD
05	Program Integrity Issues/Potential Fraud, Waste and Abuse	01	Program Integrity Issues/Potential Fraud, Waste and Abuse

		03	Beneficiary Double Billed (both premium withhold and direct pay)
		04	Premium Withhold Amount not going to Plan
		05	Part B Premium Reduction Issue
		90	Other Premium Withhold Issue

Note: Program Integrity Complaints, which are in the CTM but not viewable by MMPs, are excluded as well.

Attachment C: Calculating Measure C21: Plan All-Cause Readmissions

All data come from the HEDIS 2017 M17_PCR and HEDIS 2017 M17_PCRb data files. The CMS SNP HEDIS Public Use File (PUF) data, which include MMPs, can be found on this page: [Medicare Advantage/Part D Contract and Enrollment Data](#).

The following fields and formulas were used to calculate each MMP's performance rate for the Plan All-Cause Readmissions (PCR) measure. For MMPs in demonstrations that target populations either over or under age 65, the formulas were modified to use only the applicable age bands.

Formula Value	PCR Field	Field Description	PUF Field
A	is1844	Count of Index Stays (Denominator) Age 18-44	UOS524-0510
G	r1844	Count of 30-Day Readmissions (Numerator) Age 18-44	UOS524-0520
M	ap1844	Average Adjusted Probability Age 18-44	UOS524-0530
B	is4554	Count of Index Stays (Denominator) Age 45-54	UOS524-0540
H	r4554	Count of 30-Day Readmissions (Numerator) Age 45-54	UOS524-0550
N	ap4554	Average Adjusted Probability Age 45-54	UOS524-0560
C	is5564	Count of Index Stays (Denominator) Age 55-64	UOS524-0570
I	r5564	Count of 30-Day Readmissions (Numerator) Age 55-64	UOS524-0580
O	ap5564	Average Adjusted Probability Age 55-64	UOS524-0590
Formula Value	PCRb Field	Field Description	PUF Field
D	is6574	Count of Index Stays (Denominator) Age 65-74	UOS524-0010
J	r6574	Count of 30-Day Readmissions (Numerator) Age 65-74	UOS524-0020
P	ap6574	Average Adjusted Probability Age 65-74	UOS524-0030
E	is7584	Count of Index Stays (Denominator) Age 75-84	UOS524-0040
K	r7584	Count of 30-Day Readmissions (Numerator) Age 75-84	UOS524-0050
Q	ap7584	Average Adjusted Probability Age 75-84	UOS524-0060
F	is85	Count of Index Stays (Denominator) Age 85+	UOS524-0070
L	r85	Count of 30-Day readmissions (Numerator) Age 85+	UOS524-0080
R	ap85	Average Adjusted Probability Age 85+	UOS524-0090

$$\text{Observed} = \frac{G+H+I+J+K+L}{A+B+C+D+E+F}$$

$$\text{Expected} = \left(\frac{A}{A+B+C+D+E+F} \times M \right) + \left(\left(\frac{B}{A+B+C+D+E+F} \right) \times N \right) + \left(\left(\frac{C}{A+B+C+D+E+F} \right) \times O \right) + \left(\left(\frac{D}{A+B+C+D+E+F} \right) \times P \right) + \left(\left(\frac{E}{A+B+C+D+E+F} \right) \times Q \right) + \left(\left(\frac{F}{A+B+C+D+E+F} \right) \times R \right)$$

$$\text{Final Rate} = \frac{\text{Observed}}{\text{Expected}}$$

Attachment D: Medication Adherence Measure Calculations

Part D sponsors currently have access to monthly Patient Safety Reports via the Patient Safety Analysis Website to compare their performance to overall averages and monitor their progress in improving the Part D patient safety measures over time. Sponsors are required to use the website to view and download the reports and should be engaged in performance monitoring.

Report User Guides are available on the website under Help Documents and provide detailed information about the measure calculations and reports. The following information is an excerpt from the Adherence Measures Report Guide (Appendices B and C) and illustrates the days covered calculation and the modification for inpatient stays, hospice enrollments, and skilled nursing facility stays.

Proportion of Days Covered Calculation

In calculating the Proportion of Days Covered (PDC), we first count the number of days the patient was “covered” by at least one drug in the target drug class. The number of days is based on the prescription fill date and days’ supply. PDC is calculated by dividing the number of covered days by the number of days in the measurement period. Both of these numbers may be adjusted for IP stays, as described in the ‘Days Covered Modification for Inpatient Stays, Hospice Enrollment, and Skilled Nursing Facility Stays’ section that follows.

Example 1: Non-Overlapping Fills of Two Different Drugs

In this example, a beneficiary fills Benazepril and Captopril, two drugs in the RAS antagonist hypertension target drug class. The covered days do not overlap, meaning the beneficiary filled the Captopril prescription after the days’ supply for the Benazepril medication ended.

Table L-1: No Adjustment

Drug	January		February			March
	1/1/2016	1/16/2016	2/1/2016	2/16/2016	3/1/2016	3/16/2016
Benazepril	15	16	15	13		
Captopril					15	16

PDC Calculation

Covered Days: 90

Measurement Period: 90

PDC: 90/90 = 100%

Example 2: Overlapping Fills of the Same Generic Ingredient across Single and Combination Products

In this example, a beneficiary fills a drug with the same target generic ingredient prior to the end of the days’ supply of the first fill. In rows one and two, there is an overlap between a single and combination drug product, both containing Lisinopril. For this scenario, the overlapping days are shifted because the combination drug product includes the targeted generic ingredient. An adjustment is made to the PDC to account for the overlap in days covered.

In rows two and three, there is an overlap between two combination drug products, both containing Hydrochlorothiazide. However, Hydrochlorothiazide is not a RAS antagonist or targeted generic ingredient, so this overlap is not shifted.

Table L-2: Before Overlap Adjustment

Drug	January		February		March	
	1/1/2016	1/16/2016	2/1/2016	2/16/2016	3/1/2016	3/16/2016
Lisinopril	15	16				
Lisinopril & HCTZ		16	15			
Benazepril & HCTZ			15	13		

PDC Calculation
 Covered Days: 59
 Measurement Period: 90
 PDC: 59/90 = 66%

Table L-3: After Overlap Adjustment

Drug	January		February		March	
	1/1/2016	1/16/2016	2/1/2016	2/16/2016	3/1/2016	3/16/2016
	15	16				
Lisinopril & HCTZ			15	13	3	
Benazepril & HCTZ			15	13		

PDC Calculation
 Covered Days: 62
 Measurement Period: 90
 PDC: 62/90 = 69%

Example 3: Overlapping Fills of the Same and Different Target Drugs

In this example, a beneficiary is refilling both Lisinopril and Captopril. When a single and combination product both containing Lisinopril overlap, there is an adjustment to the PDC. When Lisinopril overlaps with Captopril, we do not make any adjustment to the days covered.

Table L-4: Before Overlap Adjustment

Drug	January		February		March		April	
	1/1/2016	1/16/2016	2/1/2016	2/16/2016	3/1/2016	3/16/2016	4/1/2016	4/16/2016
Lisinopril	15	16						
Lisinopril & HCTZ		16	15					
Captopril					15	16		
Lisinopril						16	15	

PDC Calculation
 Covered Days: 92
 Measurement Period: 120
 PDC: 92/120: 77%

Table L-5: After Overlap Adjustment

Drug	January		February		March		April	
	1/1/2016	1/16/2016	2/1/2016	2/16/2016	3/1/2016	3/16/2016	4/1/2016	4/16/2016
Lisinopril	15	16						
Lisinopril & HCTZ			15	13	3			
Captopril					15	16		
Lisinopril						16	15	

PDC Calculation
 Covered Days: 105
 Measurement Period: 120
 PDC: 105/120: 88%

PDC Adjustment for Inpatient, Hospice, and Skilled Nursing Facility Stays Examples

In response to Part D sponsor feedback, CMS modified the PDC calculation, starting with the 2013 Star Ratings (using 2011 PDE data) to adjust for beneficiary stays in inpatient (IP) facilities, and with the 2015 Star Ratings (using 2013 PDE data) to also adjust for hospice enrollments and beneficiary stays in skilled nursing facilities (SNF). These adjustments account for periods that the Part D sponsor would not be responsible for providing prescription fills for targeted medications or more accurately reflect drugs covered under the hospice benefit or waived through the beneficiary's hospice election; thus, their medication fills during an IP or SNF stay or during hospice enrollment would not be included in the PDE claims used to calculate the Patient Safety adherence measures.

The PDC modification for IP stays, hospice enrollments, and SNF stays reflects this situation. Please note that while this modification will enhance the adherence measure calculation, extensive testing indicates that most Part D contracts will experience a negligible impact on their adherence rates. On average, the 2011 adherence rates increased 0.4 to 0.6 percentage points due to the inpatient stay adjustment, and the adjustment may impact the rates positively or negatively.

The hospice and SNF adjustments were tested on 2013 PDE data and overall increased the rates by 0.13 to 0.15 percentage points and 0.29 to 0.35 percentage points, respectively. While hospice information from the Medicare Enrollment Database (EDB) and inpatient claims from the Common Working File (CWF) are available for both PDPs and MA-PDs, SNF claims are only available for Medicare Fee-for-Service (FFS) beneficiaries who are also enrolled in PDPs. Therefore, the SNF adjustment will only impact PDP sponsors at this time.

Calculating the PDC Adjustment for IP Stays, Hospice Enrollments, and SNF Stays

The PDC modification for IP stays, hospice enrollments, and SNF stays is based on two assumptions: 1) a beneficiary receives their medications through the facility during IP or SNF stay or has drugs covered under the hospice benefit or waived through the beneficiary's hospice election, and 2) if a beneficiary accumulates an extra supply of their Part D medication during an IP stay, hospice enrollment, or SNF stay, that supply can be used once he/she returns home. The modification is applied using the steps below:

1. Identify start and end dates of relevant types of stays or hospice enrollments for beneficiaries included in adherence measures.
 - Use IP claims from the CWF to identify IP stays.
 - Use SNF claims with positive payment amounts from the CWF to identify SNF stays.
 - Use hospice records from the EDB to identify hospice enrollments.
2. Remove days of relevant stays occurring during the measurement period from the numerator and denominator of the proportion-of-days covered calculation.
3. Shift days' supply from Part D prescription fills that overlap with the stay to uncovered days after the end of the relevant stay, if applicable. This assumes the beneficiary receives the relevant medication from a different source during the stay and accumulates the Part D prescription fills for later use.

The following examples provide illustrations of the implementation of these assumptions when calculating PDC.

Example 1: Gap in Coverage after IP Stay

In this example, the measurement period is 15 days and the beneficiary qualifies for inclusion in the measure by receiving at least 2 fills. This beneficiary had drug coverage on days 1-8 and 12-15 and an IP stay on days 5 and 6, as illustrated in Table L-6.

Table L-6: Before Adjustment

Day	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
Drug Coverage	X	X	X	X	X	X	X	X				X	X	X	X
Inpatient Stay					+	+									

PDC Calculation:
 Covered Days: 12
 Measurement Period: 15
 PDC: 12/15 = 80%

With the adjustment for the IP stay, days 5 and 6 are deleted from the measurement period. Additionally, the drug coverage during the IP stay is shifted to subsequent days of no supply (in this case, days 9 and 10), based on the assumption that if a beneficiary received his/her medication through the hospital on days 5 and 6, then he/she accumulated two extra days' supply during the IP stay. The two extra days' supply is used to cover the gaps in Part D drug coverage in days 9 and 10. This is illustrated in Table L-7.

Table L-7: After Adjustment

Day	1	2	3	4	7	8	9	10	11	12	13	14	15
Drug Coverage	X	X	X	X	X	X	X	X		X	X	X	X
Inpatient Stay													

PDC Calculation:
 Covered Days: 12
 Measurement Period: 13
 PDC: 12/15 = 92%

Example 2: Gap in Coverage before IP Stay

In this example, the measurement period is 15 days and the beneficiary qualifies for inclusion in the measure by receiving at least 2 fills. This beneficiary had drug coverage from days 1-7 and 12-15, and an IP stay on days 12 and 13, as illustrated in Table L-8.

Table L-8: Before Adjustment:

Day	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
Drug Coverage	X	X	X	X	X	X	X					X	X	X	X
Inpatient Stay												+	+		

PDC Calculation:
 Covered Days: 11
 Measurement Period: 15
 PDC: 11/15 = 73%

With the adjustment for the IP stay, days 12 and 13 are deleted from the measurement period. While there are two days' supply from the IP stay on days 12 and 13, there are no days without drug coverage after the IP stay. Thus, the extra days' supply are not shifted. This is illustrated in Table L-9.

Table L-9: After Adjustment

Day	1	2	3	4	5	6	7	8	9	10	11	14	15
Drug Coverage	X	X	X	X	X	X	X					X	X
Inpatient Stay													

PDC Calculation:
 Covered Days: 9
 Measurement Period: 13
 PDC: 9/13 = 69%

Example 3: Gap in Coverage Before and After IP Stay

In this example, the measurement period is 15 days and the beneficiary qualifies for inclusion in the measure by receiving at least 2 fills. This beneficiary had drug coverage from days 1-3, 6-9, and 12-15, and an IP stay on days 6-9, as illustrated in Table L-10.

Table L-10: Before Adjustment

Day	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
Drug Coverage	X	X	X			X	X	X	X			X	X	X	X
Inpatient Stay						+	+	+	+						

PDC Calculation:
 Covered Days: 11
 Measurement Period: 15
 PDC: 11/15 = 73%

With the adjustment for the IP stay, days 6-9 are deleted from the measurement period. Additionally, the drug coverage during the IP stay can be applied to any days without drug coverage after the IP stay, based on the assumption that the beneficiary received his/her medication through the hospital on days 6-9. In this case, only days 10 and 11 do not have drug coverage and are after the IP stay, so two days' supply are shifted to days 10 and 11. This is illustrated in Table L-11.

Table L-11: After Adjustment

Day	1	2	3	4	5	10	11	12	13	14	15
Drug Coverage	X	X	X			X	X	X	X	X	X
Inpatient Stay											

PDC Calculation:
 Covered Days: 9
 Measurement Period: 11
 PDC: 9/11 = 82%

Attachment E: MTM CMR Completion Rate Measure Scoring Methodologies

Medicare Part D Reporting Requirements Measure (D14: MTM CMR Completion Rate Measure)

- Step 1: Start with all contracts that enrolled beneficiaries in MTM at any point during contract year 2016.
- Step 2: Exclude contracts that did not enroll 31 or more beneficiaries in their MTM program who met the measure denominator criteria during contract year 2016.

Next, exclude contracts with an effective termination date on or before the deadline to submit data validation results to CMS (June 30, 2017), or that were not required to participate in data validation.

Additionally, exclude contracts that did not score at least 95% on data validation for their MMP reporting of the MTM Program section and contracts that scored 95% or higher on data validation for the MTM Program section but that were not compliant with data validation standards/sub-standards for at least one of the following MTM data elements:

- HICN or RRB Number (Element B)
- Met the specified targeting criteria per CMS – Part D requirements (Element G)
- Date of MTM program enrollment (Element I)
- Date met the specified targeting criteria per CMS – Part D requirements (Element J)
- Date of MTM program opt-out, if applicable (Element K)
- Received annual CMR with written summary in CMS standardized format (Element O)
- Date(s) of CMR(s) with written summary in CMS standardized format (Element Q)

- Step 3: After removing contracts' and beneficiaries' data excluded above, suppress contract rates based on the following rules:

File DV failure: Contracts that failed to submit the CY 2016 MTM Program Reporting Requirements data file or who had a missing DV score for MTM are listed as “CMS identified issues with this plan's data.”

Section-level DV failure: Contracts that score less than 95% in DV for their CY 2016 MTM Program Reporting Requirements data are listed as “CMS identified issues with this plan's data.”

Element-level DV failure: Contracts that score 95% or higher in DV for their CY 2016 MTM Program Reporting Requirements data but that failed at least one of the four data elements are listed as “CMS identified issues with this plan's data.”

Small size: Contracts that have not yet been suppressed and have fewer than 31 beneficiaries enrolled are listed as “Not enough data available.”

Organizations can view their own MMP reporting data validation results in HPMS (<https://hpms.cms.gov/>). From the home page, select Monitoring | Plan Reporting Data Validation.

- Step 4: Calculate the rate for the remaining contracts using the following formula:

Number of beneficiaries from the denominator who received a CMR at any time during their period of MTM enrollment in the reporting period / Number of beneficiaries who were at least 18 years or older as of the beginning of the reporting period, met the specified targeting criteria per CMS during the reporting period, weren't in hospice at any point during the reporting period, and who were enrolled in the MTM program for at least 60 days during the reporting period.

Attachment F: Missing Data Messages

CMS uses a standard set of messages in the MMP Performance Data File when there are no numeric data available for a contract. This attachment provides the rules for assignment of those messages.

Measure level messages

Table P-1 contains all of the possible messages that could be assigned to missing data at the measure level.

Table P-1: Measure level missing data messages

Message	Measure Level
Not enough data available	There were data for the contract, but not enough to pass the measure exclusion rules
CMS identified issues with this plan's data	Data were materially biased, erroneous and/or not reported by a contract required to report
Plan too new to be measured	The contract is too new to have submitted measure data
No data available	There were no data for the contract included in the source data for the measure
Plan too small to be measured	The contract had data but did not have enough enrollment to pass the measure exclusion rules
Plan not required to report measure	The contract was not required to report the measure due to low plan enrollment.

Assignment rules for Part C measure messages

Appeals (IRE) measures (C32 & C33):

Has CMS identified issues with the contract's data?

Yes: Display message: CMS identified issues with this plan's data

No: Is there a valid numeric measure rate?

Yes: Display the numeric measure rate

No: Is the contract effective date > 01/01/2016?

Yes: Display message: Plan too new to be measured

No: Display message: Not enough data available

CAHPS measures (C03, C22, C23, C24, C25, C26, & C27):

Is there a valid numeric CAHPS measure rate?

Yes: Display the numeric CAHPS measure rate

No: Is the contract effective date > 07/01/2016?

Yes: Display message: Plan too new to be measured

No: Is the CAHPS measure rate NR?

Yes: Display message: Not enough data available

No: Is the CAHPS measure rate NA?

Yes: Display message: No data available

No: Display message: Plan too small to be measured

Call Center – Foreign Language Interpreter and TTY Availability measure (C34):

Is there a valid call center numeric rate?

Yes: Display the call center numeric rate

No: Is the organization type 1876 Cost?

Yes: Display message: Plan not required to report measure

No: Is the contract effective date > 05/31/2016?

Yes: Display message: Plan too new to be measured

No: Display message: Not enough data available

Complaints (CTM) measure (C28):

Is the contract effective date > 01/01/2016?

Yes: Display message: Plan too new to be measured

No: Was the average contract enrollment < 800 in 2016?

- Yes: Display message: Not enough data available
- No: Is there a valid numeric CTM rate?
 - Yes: Display the numeric CTM rate
 - No: Display message: No data available

HEDIS measures (C01, C02, C07, C12 – C17, C20, DMC01, DMC02, DMC14, & DMC15):

Is the contract effective date > 01/01/2016?

- Yes: Display message: Plan too new to be measured
- No: Was the contract required to report HEDIS?
 - Yes: What is the HEDIS measure audit designation?
 - BD: Display message: CMS identified issues with this plan's data
 - BR: Display message: CMS identified issues with this plan's data
 - NA: Display message: Not enough data available
 - NB: Display message: Benefit not offered by plan
 - NR: Display message: CMS identified issues with this plan's data
 - NQ: Display message: Plan not required to report measure
 - R: Was a valid patient level detail file 1 submitted and the measure data usable?
 - Yes: Display the HEDIS measure numeric rate
 - No: Display message: CMS identified issues with this plan's data
 - No: Display message: Plan not required to report measure

HEDIS PCR measure (C21)

Is the contract effective date > 01/01/2016?

- Yes: Display message: Plan too new to be measured
- No: Was the contract required to report HEDIS?
 - Yes: What is the HEDIS measure audit designation?
 - BD: Display message: CMS identified issues with this plan's data
 - BR: Display message: CMS identified issues with this plan's data
 - NA: Display message: Not enough data available
 - NB: Display message: Benefit not offered by plan
 - NR: Display message: CMS identified issues with this plan's data
 - NQ: Display message: Plan not required to report measure
 - R: Was a valid patient level detail file 2 submitted and the measure data usable?
 - Yes: Display the HEDIS measure numeric rate
 - No: Display message: CMS identified issues with this plan's data
 - No: Display message: Plan not required to report measure

HEDIS SNP measures (C09, C10, & C11):

Does the contract have fewer than 30 members enrolled as of February of the measurement year?

- Yes: Display message: Plan not required to report measure
- No: Is the contract effective date > 01/01/2016?
 - Yes: Display message: Plan too new to be measured
 - No: What is the HEDIS measure audit designation?
 - BD: Display message: CMS identified issues with this plan's data
 - BR: Display message: CMS identified issues with this plan's data
 - NA: Display message: Not enough data available
 - NB: Display message: Benefit not offered by plan
 - NR: Display message: CMS identified issues with this plan's data
 - NQ: Display message: Plan not required to report measure
 - R: Is there a valid HEDIS measure numeric rate?
 - Yes: Display the HEDIS measure numeric rate
 - No: Display message: No data available

HEDIS / HOS measures (C06, C18, & C19):

Is there a valid HEDIS / HOS numeric rate?

- Yes: Display the HEDIS / HOS numeric rate
- No: Is the contract effective date > 01/01/2015?
 - Yes: Display message: Plan too new to be measured
 - No: Is the contract enrollment < 500?
 - Yes: Display message: Plan too small to be measured
 - No: Is there a HEDIS / HOS rate code?
 - Yes: Assign message according to value below:
 - NA: Display message: Not enough data available
 - NB: Display message: Benefit not offered by plan
- No: Display message: No data available

Members Choosing to Leave the Plan (C29):

- Is there a valid numeric voluntary disenrollment rate?
 - Yes: Display the numeric voluntary disenrollment rate
 - No: Is the contract effective date ≥ 01/01/2017?
 - Yes: Display message: Plan too new to be measured
 - No: Display message: Not enough data available

Assignment rules for Part D measure messages

Appeals Auto-Forward (IRE) measure (D02):

- Has CMS identified issues with the contract's data?
 - Yes: Display message: CMS identified issues with this plan's data
 - No: Was the average contract enrollment < 800 in 2016?
 - Yes: Display message: Not enough data available
 - No: Is the contract effective date > 12/31/2016?
 - Yes: Display message: Plan too new to be measured
 - No: Is there a valid numeric measure rate?
 - Yes: Display numeric measure rate
 - No: Display message: No data available

Appeals Upheld (IRE) measure (D03):

- Has CMS identified issues with the contract's data?
 - Yes: Display message: CMS identified issues with this plan's data
 - No: Is the contract effective date > 01/01/2016?
 - Yes: Display message: Plan too new to be measured
 - No: Were fewer than 10 cases reviewed by the IRE?
 - Yes: Display message: Not enough data available
 - No: Is there a valid numeric measure percentage?
 - Yes: Display numeric measure percentage
 - No: Display message: No data available

CAHPS measures (D08, D09):

- Is there a valid numeric CAHPS measure rate?
 - Yes: Display the numeric CAHPS measure rate
 - No: Is the contract effective date > 07/01/2016?
 - Yes: Display message: Plan too new to be measured
 - No: Is the CAHPS measure rate NR?
 - Yes: Display message: Not enough data available
 - No: Is the CAHPS measure rate NA?
 - Yes: Display message: No data available
 - No: Display message: Plan too small to be measured

Call Center – Foreign Language Interpreter and TTY Availability measure (D01):

- Is there a valid call center numeric rate?
 - Yes: Display the call center numeric rate

- No: Is the organization type 1876 Cost?
- Yes: Display message: Plan not required to report measure
- No: Is the contract effective date > 05/31/2016?
- Yes: Display message: Plan too new to be measured
- No: Display message: Not enough data available

Patient Safety measures – Adherence (D11 – D13):

- Is the contract effective date > 12/31/2016?
- Yes: Display message: Plan too new to be measured
- No: Does contract have 30 or fewer enrolled beneficiary member years (measure denominator)?
- Yes: Display message: Not enough data available
- No: Display numeric percentage

Patient Safety measure – MTM CMR (D14)

- Is the contract effective date > 12/31/2016?
- Yes: Display message: Plan too new to be measured
- No: Is Part D Offered=False?
- Yes: Display message: Plan not required to report measure
- No: Is there a numeric rate?
- Yes: Display numeric measure percentage
- No: Is there a Reason(s) for Display Message?
- Yes: Display appropriate message per table P-2

Table P-2: MTM CMR Reason(s) for Display Message conversion

Reason(s) for Display Message	Data File Message
Contract failed to submit file and pass system validation by the reporting deadline	CMS identified issues with this plan's data
Contract did not pass element-level DV for at least one element	CMS identified issues with this plan's data
Contract had missing score on MTM section DV	CMS identified issues with this plan's data
Contract scored less than 95% on MTM section DV	CMS identified issues with this plan's data
Contract had all plans terminate by validation deadline	No data available
Contract had no MTM enrollees to report	No data available
Contract has 0 Part D enrollees	No data available
Contract had 30 or fewer beneficiaries meeting denominator criteria	Not enough data available
Contract not required to submit MTM program	Not required to report

Assignment rules for MMP measure messages

Comprehensive Health Risk Assessment and Care Plan Completion (M21 & M32):

- Has CMS identified issues with the contract's data?
- Yes: Display message: CMS identified issues with this plan's data
- No: Display the numeric measure rate

Supplemental CAHPS measures (CC10, CC14, MH3, & OHP5):

- Is there a valid numeric CAHPS measure rate?
- Yes: Display the numeric CAHPS measure rate
- No: Is the contract effective date > 07/01/2016?
- Yes: Display message: Plan too new to be measured
- No: Is the CAHPS measure rate NR?
- Yes: Display message: Not enough data available
- No: Is the CAHPS measure rate NA?
- Yes: Display message: No data available
- No: Display message: Plan too small to be measured

Attachment G: Contract Enrollment Data

The enrollment data used in the Part C "Complaints about the Health Plan" and Part D "Appeals Auto-Forward" measures are pulled from the HPMS. These enrollment files represent the number of enrolled beneficiaries the contract was paid for in a specific month. For these measures, twelve months of enrollment files are pulled (January 2016 through December 2016) and the average enrollment across those months is used in the calculations.

Enrollment data are also used when combining the plan-level data into contract-level data in the three Part C "Care for Older Adults" Healthcare Effectiveness Data and Information Set (HEDIS) measures. When there is a reported rate, the eligible population in the plan benefit package (PBP) submitted with the HEDIS data is used. If the audit designation for the PBP level HEDIS data is set to "Not Reported" (NR) or "Biased Rate" (BR) by the auditor, there is no value in the eligible population field. In these instances, twelve months of PBP-level enrollment files are pulled (January 2016 through December 2016), and the average enrollment in the plan across those months is used in calculating the combined rate.

Attachment H: Rounding Rules for Measure Scores

Measure scores are rounded to the precision indicated next to the label "Data Display" within the detailed description of each measure. Measure scores are rounded using standard round to nearest rules. Measure scores that end in 0.49 (0.049, 0.0049) or less are rounded down and measure scores that end in 0.50 (0.050, 0.0050) or more are rounded up. For example, a measure listed with a Data Display of "Percentage with no decimal place" that has a value of 83.49 rounds down to 83, while a value of 83.50 rounds up to 84.

Attachment I: Glossary of Terms

CAHPS	The term CAHPS refers to a comprehensive and evolving family of surveys that ask consumers and patients to evaluate the interpersonal aspects of health care. CAHPS surveys probe those aspects of care for which consumers and patients are the best and/or only source of information, as well as those that consumers and patients have identified as being important. CAHPS initially stood for the Consumer Assessment of Health Plans Study, but as the products have evolved beyond health plans, the acronym now stands for Consumer Assessment of Healthcare Providers and Systems.
Cohort	A cohort is a group of people who share a common designation, experience, or condition (e.g., Medicare beneficiaries). For the HOS, a cohort refers to a random sample of Medicare beneficiaries that is drawn from each Medicare Advantage Organization (MAO) with a minimum of 500 enrollees and surveyed every spring (i.e., a baseline survey is administered to a new cohort each year). Two years later, the baseline respondents are surveyed again (i.e., follow up measurement). For data collection years 1998-2006, the MAO sample size was 1,000. Effective 2007, the MAO sample size was increased to 1,200.
Disability Status	Based on the original reason for entitlement for Medicare.
Dual eligible	Individuals who are entitled to Medicare Part A and/or Part B and are eligible for some form of Medicaid benefit.
Euclidean distance	The absolute value of the difference between two points, x-y.
HEDIS	The Healthcare Effectiveness Data and Information Set (HEDIS) is a widely used set of performance measures in the managed care industry, developed and maintained by the National Committee for Quality Assurance (NCQA).

HOS	The Medicare Health Outcomes Survey (HOS) is the first patient reported outcomes measure used in Medicare managed care. The goal of the Medicare HOS program is to gather valid, reliable, and clinically meaningful health status data in the Medicare Advantage (MA) program for use in quality improvement activities, pay for performance, program oversight, public reporting, and improving health. All managed care organizations with MA contracts must participate.
IRE	The Independent Review Entity (IRE) is an independent entity contracted by CMS to review Medicare health and drug plans' adverse reconsiderations of organization determinations.
IVR	Interactive voice response (IVR) is a technology that allows a computer to interact with humans through the use of voice and dual-tone multi-frequency keypad inputs.
LIS	The Low Income Subsidy (LIS) from Medicare provides financial assistance for beneficiaries who have limited income and resources. Those who receive the LIS get help paying for their monthly premium, yearly deductible, prescription coinsurance, and copayments and they will have no gap in coverage.
LIS/DE	Beneficiaries who qualify at any point in the year for a low income subsidy through the application process and/or who are full or partial Dual (Medicare and Medicaid) beneficiaries.
MA	A Medicare Advantage (MA) organization is a public or private entity organized and licensed by a State as a risk-bearing entity (with the exception of provider-sponsored organizations receiving waivers) that is certified by CMS as meeting the MA contract requirements.
Percentage	A part of a whole expressed in hundredths. For example, a score of 45 out of 100 possible points is the same as 45%.
Percentile	The value below which a certain percent of observations fall. For example, a score equal to or greater than 97 percent of other scores attained on the same measure is said to be in the 97th percentile.
Reliability	A measure of the fraction of the variation among the observed measure values that is due to real differences in quality ("signal") rather than random variation ("noise"). On a scale from 0 (all differences among plans are due to randomness of sampling) to 1 (every plan's quality is measured with perfect accuracy).
Sponsor	An entity that sponsors a health or drug plan.
Statistical Significance	Statistical significance assesses how likely differences observed are due to chance when plans are actually the same. CMS uses statistical tests (e.g., t-test) to determine if a contract's measure value is statistically significantly greater or less than the national average for that measure, or whether conversely the observed differences from the national average could have arisen by chance.
Sum of Squares	Method used to measure variation or deviation from the mean.
TTY	A teletypewriter (TTY) is an electronic device for text communication via a telephone line, used when one or more of the parties has hearing or speech difficulties.
Very Low Reliability	For CAHPS, an indication that reliability is less than 0.6, indicating that 40% or more of observed variation is due to random noise.

Attachment J: State-Specific Requirements for the Care Plan Completion Measure

The following table provides information about the state-specific measures that were used to calculate the care plan completion rate. Full specifications for these measures are included in the individual State-Specific Reporting Requirements documents, which are available on the CMS website at the following link:

<https://www.cms.gov/Medicare-Medicaid-Coordination/Medicare-and-Medicaid-Coordination/Medicare-Medicaid-Coordination-Office/FinancialAlignmentInitiative/MMPInformationandGuidance/MMPReportingRequirements.html>

State	Measure Number	Measure Name
California*	CA1.2	High-risk members with an Individualized Care Plan (ICP) within 30 working days after the completion of the initial Health Risk Assessment (HRA).
	CA1.4	Low-risk members with an Individualized Care Plan (ICP) within 30 working days after the completion of the initial Health Risk Assessment (HRA).
Illinois	IL3.1	Members with care plans within 90 days of enrollment.
Massachusetts	MA1.1	Members with care plans within 90 days of enrollment.
Michigan	MI2.1	Members with an Individual Integrated Care and Supports Plan (IICSP) within 90 days of enrollment.
New York FIDA	NY2.1	Participants with Person-Centered Service Plans (PCSPs) completed within 90 days of enrollment and PCSPs updated within 30 days of a reassessment.
New York FIDA-IDD	IDD1.1	Participants with Life Plans (LPs) completed within 60 days of Comprehensive Service Planning Assessment (CSPA) completion and LPs updated within 30 days of a Comprehensive Reassessment (CR).
Ohio	OH1.1	Members with care plans within 90 days of enrollment.
Rhode Island	RI1.1	Members with Interdisciplinary Care Plans or Wellness Plans within 15 days of a completed assessment.
South Carolina	SC2.1	Low-, moderate-, and high-risk members with an Individualized Care Plan (ICP) completed within 90 days of enrollment.
Texas	TX1.1	Members with Plans of Care within 90 days of enrollment.
Virginia	VA2.1	Community Well members, vulnerable subpopulation members, EDCCD members, and nursing facility members with a Plan of Care (POC) completed within the required timeframe.

* For California MMPs, the care plan completion rate was calculated using both CA1.2 and CA1.4. Corresponding data elements for each measure were summed across 2016 quarterly reporting periods in order to calculate the annual rate.
