

Virginia Commonwealth Coordinated Care

This contract was amended on May 4, 2017 in order to:

- Update the three-way contract to incorporate Virginia's Addiction and Recovery Treatment Services (ARTS) benefit for expanded coverage of substance use disorder (SUD) treatment services. This also establishes Medicare-Medicaid Plan (MMP) requirements for SUD provider networks and credentialing, service authorization for ARTS services, and a stop-loss arrangement between the Commonwealth and the MMP for the delivery of ARTS services.
- Authorize CMS and the Department of Medical Assistance Services to passively enroll certain CCC enrollees into an MMP's corresponding Medicare Advantage Dual-Eligible Special Needs Plan participating in the Commonwealth's mandatory integrated care initiative known as CCC Plus at the end of the demonstration, subject to certain requirements regarding provider networks, covered benefits, and payment rates.
- Streamline signature requirements for completion of an enrollee's initial Plan of Care.
