

ICD-10 Procedure Coding System (ICD-10-PCS) 2019 Tables and Index

Introduction

The **ICD-10-PCS Tables** contains all valid codes in table format. The tables are arranged in alphanumeric order, and organized into separate tables according to the first three characters of the seven-character code.

The **ICD-10-PCS Index** contains entries based on the terms (known as values) used in the ICD-10-PCS Tables, as well as entries based on common procedure terms. Index entries either link directly to a PCS table or refer the user to another index entry.

The **ICD-10-PCS Definitions** contain the official definitions of ICD-10-PCS values in characters 3 through 7 of the seven-character code, and may also provide additional explanation or examples. The definitions are arranged in section order, and designate the section and the character within the section being defined.

The ICD-10-PCS **Body Part Key** contains entries that refer a common anatomical term to its corresponding ICD-10-PCS body part value(s).

The ICD-10-PCS **Device Key** contains entries that refer a common device term or manufacturer's device name to its corresponding ICD-10-PCS device value.

The ICD-10-PCS **Substance Key** contains entries that refer a common substance name or manufacturer's substance name to its corresponding ICD-10-PCS substance value.

The ICD-10-PCS **Device Aggregation Table** contains entries that correlate a specific ICD-10-PCS device value with a general device value to be used in tables containing only general device values.

Character 3 - Operation

| ICD-10-PCS Value | Definition |
|------------------|---|
| Alteration | <p>Definition: Modifying the anatomic structure of a body part without affecting the function of the body part</p> <p>Explanation: Principal purpose is to improve appearance</p> <p>Includes/Examples: Face lift, breast augmentation</p> |
| Bypass | <p>Definition: Altering the route of passage of the contents of a tubular body part</p> <p>Explanation: Rerouting contents of a body part to a downstream area of the normal route, to a similar route and body part, or to an abnormal route and dissimilar body part. Includes one or more anastomoses, with or without the use of a device</p> <p>Includes/Examples: Coronary artery bypass, colostomy formation</p> |
| Change | <p>Definition: Taking out or off a device from a body part and putting back an identical or similar device in or on the same body part without cutting or puncturing the skin or a mucous membrane</p> <p>Explanation: All CHANGE procedures are coded using the approach EXTERNAL</p> <p>Includes/Examples: Urinary catheter change, gastrostomy tube change</p> |
| Control | <p>Definition: Stopping, or attempting to stop, postprocedural or other acute bleeding</p> <p>Explanation: The site of the bleeding is coded as an anatomical region and not to a specific body part</p> <p>Includes/Examples: Control of post-prostatectomy hemorrhage, control of intracranial subdural hemorrhage, control of bleeding duodenal ulcer, control of retroperitoneal hemorrhage</p> |
| Creation | <p>Definition: Putting in or on biological or synthetic material to form a new body part that to the extent possible replicates the anatomic structure or function of an absent body part</p> <p>Explanation: Used for gender reassignment surgery and corrective procedures in individuals with congenital anomalies</p> <p>Includes/Examples: Creation of vagina in a male, creation of right and left atrioventricular valve from common atrioventricular valve</p> |
| Destruction | <p>Definition: Physical eradication of all or a portion of a body part by the direct use of energy, force, or a destructive agent</p> <p>Explanation: None of the body part is physically taken out</p> <p>Includes/Examples: Fulguration of rectal polyp, cautery of skin lesion</p> |

Section 0 - Medical and Surgical

Character 3 - Operation *(continued)*

| ICD-10-PCS Value | Definition |
|------------------|---|
| Detachment | <p>Definition: Cutting off all or a portion of the upper or lower extremities</p> <p>Explanation: The body part value is the site of the detachment, with a qualifier if applicable to further specify the level where the extremity was detached</p> <p>Includes/Examples: Below knee amputation, disarticulation of shoulder</p> |
| Dilation | <p>Definition: Expanding an orifice or the lumen of a tubular body part</p> <p>Explanation: The orifice can be a natural orifice or an artificially created orifice. Accomplished by stretching a tubular body part using intraluminal pressure or by cutting part of the orifice or wall of the tubular body part</p> <p>Includes/Examples: Percutaneous transluminal angioplasty, internal urethrotomy</p> |
| Division | <p>Definition: Cutting into a body part, without draining fluids and/or gases from the body part, in order to separate or transect a body part</p> <p>Explanation: All or a portion of the body part is separated into two or more portions</p> <p>Includes/Examples: Spinal cordotomy, osteotomy</p> |
| Drainage | <p>Definition: Taking or letting out fluids and/or gases from a body part</p> <p>Explanation: The qualifier DIAGNOSTIC is used to identify drainage procedures that are biopsies</p> <p>Includes/Examples: Thoracentesis, incision and drainage</p> |
| Excision | <p>Definition: Cutting out or off, without replacement, a portion of a body part</p> <p>Explanation: The qualifier DIAGNOSTIC is used to identify excision procedures that are biopsies</p> <p>Includes/Examples: Partial nephrectomy, liver biopsy</p> |
| Extirpation | <p>Definition: Taking or cutting out solid matter from a body part</p> <p>Explanation: The solid matter may be an abnormal byproduct of a biological function or a foreign body; it may be imbedded in a body part or in the lumen of a tubular body part. The solid matter may or may not have been previously broken into pieces</p> <p>Includes/Examples: Thrombectomy, choledocholithotomy</p> |
| Extraction | <p>Definition: Pulling or stripping out or off all or a portion of a body part by the use of force</p> <p>Explanation: The qualifier DIAGNOSTIC is used to identify extraction procedures that are biopsies</p> <p>Includes/Examples: Dilation and curettage, vein stripping</p> |

Section 0 - Medical and Surgical

Character 3 - Operation *(continued)*

| ICD-10-PCS Value | Definition |
|------------------|---|
| Fragmentation | <p>Definition: Breaking solid matter in a body part into pieces</p> <p>Explanation: Physical force (e.g., manual, ultrasonic) applied directly or indirectly is used to break the solid matter into pieces. The solid matter may be an abnormal byproduct of a biological function or a foreign body. The pieces of solid matter are not taken out</p> <p>Includes/Examples: Extracorporeal shockwave lithotripsy, transurethral lithotripsy</p> |
| Fusion | <p>Definition: Joining together portions of an articular body part rendering the articular body part immobile</p> <p>Explanation: The body part is joined together by fixation device, bone graft, or other means</p> <p>Includes/Examples: Spinal fusion, ankle arthrodesis</p> |
| Insertion | <p>Definition: Putting in a nonbiological appliance that monitors, assists, performs, or prevents a physiological function but does not physically take the place of a body part</p> <p>Includes/Examples: Insertion of radioactive implant, insertion of central venous catheter</p> |
| Inspection | <p>Definition: Visually and/or manually exploring a body part</p> <p>Explanation: Visual exploration may be performed with or without optical instrumentation. Manual exploration may be performed directly or through intervening body layers</p> <p>Includes/Examples: Diagnostic arthroscopy, exploratory laparotomy</p> |
| Map | <p>Definition: Locating the route of passage of electrical impulses and/or locating functional areas in a body part</p> <p>Explanation: Applicable only to the cardiac conduction mechanism and the central nervous system</p> <p>Includes/Examples: Cardiac mapping, cortical mapping</p> |
| Occlusion | <p>Definition: Completely closing an orifice or the lumen of a tubular body part</p> <p>Explanation: The orifice can be a natural orifice or an artificially created orifice</p> <p>Includes/Examples: Fallopian tube ligation, ligation of inferior vena cava</p> |
| Reattachment | <p>Definition: Putting back in or on all or a portion of a separated body part to its normal location or other suitable location</p> <p>Explanation: Vascular circulation and nervous pathways may or may not be reestablished</p> <p>Includes/Examples: Reattachment of hand, reattachment of avulsed kidney</p> |

Section 0 - Medical and Surgical

Character 3 - Operation *(continued)*

| ICD-10-PCS Value | Definition |
|------------------|--|
| Release | <p>Definition: Freeing a body part from an abnormal physical constraint by cutting or by the use of force</p> <p>Explanation: Some of the restraining tissue may be taken out but none of the body part is taken out</p> <p>Includes/Examples: Adhesiolysis, carpal tunnel release</p> |
| Removal | <p>Definition: Taking out or off a device from a body part</p> <p>Explanation: If a device is taken out and a similar device put in without cutting or puncturing the skin or mucous membrane, the procedure is coded to the root operation CHANGE. Otherwise, the procedure for taking out a device is coded to the root operation REMOVAL</p> <p>Includes/Examples: Drainage tube removal, cardiac pacemaker removal</p> |
| Repair | <p>Definition: Restoring, to the extent possible, a body part to its normal anatomic structure and function</p> <p>Explanation: Used only when the method to accomplish the repair is not one of the other root operations</p> <p>Includes/Examples: Colostomy takedown, suture of laceration</p> |
| Replacement | <p>Definition: Putting in or on biological or synthetic material that physically takes the place and/or function of all or a portion of a body part</p> <p>Explanation: The body part may have been taken out or replaced, or may be taken out, physically eradicated, or rendered nonfunctional during the Replacement procedure. A Removal procedure is coded for taking out the device used in a previous replacement procedure</p> <p>Includes/Examples: Total hip replacement, bone graft, free skin graft</p> |
| Reposition | <p>Definition: Moving to its normal location, or other suitable location, all or a portion of a body part</p> <p>Explanation: The body part is moved to a new location from an abnormal location, or from a normal location where it is not functioning correctly. The body part may or may not be cut out or off to be moved to the new location</p> <p>Includes/Examples: Reposition of undescended testicle, fracture reduction</p> |
| Resection | <p>Definition: Cutting out or off, without replacement, all of a body part</p> <p>Includes/Examples: Total nephrectomy, total lobectomy of lung</p> |
| Restriction | <p>Definition: Partially closing an orifice or the lumen of a tubular body part</p> <p>Explanation: The orifice can be a natural orifice or an artificially created orifice</p> <p>Includes/Examples: Esophagogastric fundoplication, cervical cerclage</p> |

Section 0 - Medical and Surgical

Character 3 - Operation *(continued)*

| ICD-10-PCS Value | Definition |
|------------------|---|
| Revision | <p>Definition: Correcting, to the extent possible, a portion of a malfunctioning device or the position of a displaced device</p> <p>Explanation: Revision can include correcting a malfunctioning or displaced device by taking out or putting in components of the device such as a screw or pin</p> <p>Includes/Examples: Adjustment of position of pacemaker lead, recementing of hip prosthesis</p> |
| Supplement | <p>Definition: Putting in or on biological or synthetic material that physically reinforces and/or augments the function of a portion of a body part</p> <p>Explanation: The biological material is non-living, or is living and from the same individual. The body part may have been previously replaced, and the Supplement procedure is performed to physically reinforce and/or augment the function of the replaced body part</p> <p>Includes/Examples: Herniorrhaphy using mesh, free nerve graft, mitral valve ring annuloplasty, put a new acetabular liner in a previous hip replacement</p> |
| Transfer | <p>Definition: Moving, without taking out, all or a portion of a body part to another location to take over the function of all or a portion of a body part</p> <p>Explanation: The body part transferred remains connected to its vascular and nervous supply</p> <p>Includes/Examples: Tendon transfer, skin pedicle flap transfer</p> |
| Transplantation | <p>Definition: Putting in or on all or a portion of a living body part taken from another individual or animal to physically take the place and/or function of all or a portion of a similar body part</p> <p>Explanation: The native body part may or may not be taken out, and the transplanted body part may take over all or a portion of its function</p> <p>Includes/Examples: Kidney transplant, heart transplant</p> |

Section 1 - Obstetrics

Character 3 - Operation

| ICD-10-PCS Value | Definition |
|------------------|---|
| Abortion | Definition: Artificially terminating a pregnancy |
| Change | Definition: Taking out or off a device from a body part and putting back an identical or similar device in or on the same body part without cutting or puncturing the skin or a mucous membrane |
| Delivery | Definition: Assisting the passage of the products of conception from the genital canal |
| Drainage | Definition: Taking or letting out fluids and/or gases from a body part |
| Extraction | Definition: Pulling or stripping out or off all or a portion of a body part by the use of force |
| Insertion | Definition: Putting in a nonbiological appliance that monitors, assists, performs, or prevents a physiological function but does not physically take the place of a body part |
| Inspection | Definition: Visually and/or manually exploring a body part Explanation: Visual exploration may be performed with or without optical instrumentation. Manual exploration may be performed directly or through intervening body layers |
| Removal | Definition: Taking out or off a device from a body part, region or orifice Explanation: If a device is taken out and a similar device put in without cutting or puncturing the skin or mucous membrane, the procedure is coded to the root operation CHANGE. Otherwise, the procedure for taking out a device is coded to the root operation REMOVAL |
| Repair | Definition: Restoring, to the extent possible, a body part to its normal anatomic structure and function Explanation: Used only when the method to accomplish the repair is not one of the other root operations |
| Reposition | Definition: Moving to its normal location, or other suitable location, all or a portion of a body part Explanation: The body part is moved to a new location from an abnormal location, or from a normal location where it is not functioning correctly. The body part may or may not be cut out or off to be moved to the new location |
| Resection | Definition: Cutting out or off, without replacement, all of a body part |
| Transplantation | Definition: Putting in or on all or a portion of a living body part taken from another individual or animal to physically take the place and/or function of all or a portion of a similar body part Explanation: The native body part may or may not be taken out, and the transplanted body part may take over all or a portion of its function |

| Clofarabine | Includes: Clolar |
| Glucarpidase | Includes: Voraxaze |
| Human B-type Natriuretic Peptide | Includes: Nesiritide |
| Other Thrombolytic | Includes: Tissue Plasminogen Activator (tPA)(r-tPA) |
| Oxazolidinones | Includes: Zyvox |
| Recombinant Bone Morphogenetic Protein | Includes: Bone morphogenetic protein 2 (BMP 2) rhBMP-2 |

Section 4 - Measurement and Monitoring

Character 3 - Operation

| ICD-10-PCS Value | Definition |
|------------------|---|
| Measurement | Definition: Determining the level of a physiological or physical function at a point in time |
| Monitoring | Definition: Determining the level of a physiological or physical function repetitively over a period of time |

Section 4 - Measurement and Monitoring

Character 5 - Approach

| ICD-10-PCS Value | Definition |
|--|--|
| External | Definition: Procedures performed directly on the skin or mucous membrane and procedures performed indirectly by the application of external force through the skin or mucous membrane |
| Open | Definition: Cutting through the skin or mucous membrane and any other body layers necessary to expose the site of the procedure |
| Percutaneous | Definition: Entry, by puncture or minor incision, of instrumentation through the skin or mucous membrane and any other body layers necessary to reach the site of the procedure |
| Percutaneous Endoscopic | Definition: Entry, by puncture or minor incision, of instrumentation through the skin or mucous membrane and any other body layers necessary to reach and visualize the site of the procedure |
| Via Natural or Artificial Opening | Definition: Entry of instrumentation through a natural or artificial external opening to reach the site of the procedure |
| Via Natural or Artificial Opening Endoscopic | Definition: Entry of instrumentation through a natural or artificial external opening to reach and visualize the site of the procedure |

Section 5 - Extracorporeal or Systemic Assistance and Performance

Character 3 - Operation

| ICD-10-PCS Value | Definition |
|------------------|--|
| Assistance | Definition: Taking over a portion of a physiological function by extracorporeal means |
| Performance | Definition: Completely taking over a physiological function by extracorporeal means |
| Restoration | Definition: Returning, or attempting to return, a physiological function to its original state by extracorporeal means. |

Section 6 - Extracorporeal or Systemic Therapies

Character 3 - Operation

| ICD-10-PCS Value | Definition |
|---------------------------|---|
| Atmospheric Control | Definition: Extracorporeal control of atmospheric pressure and composition |
| Decompression | Definition: Extracorporeal elimination of undissolved gas from body fluids |
| Electromagnetic Therapy | Definition: Extracorporeal treatment by electromagnetic rays |
| Hyperthermia | Definition: Extracorporeal raising of body temperature |
| Hypothermia | Definition: Extracorporeal lowering of body temperature |
| Perfusion | Definition: Extracorporeal treatment by diffusion of therapeutic fluid |
| Pheresis | Definition: Extracorporeal separation of blood products |
| Phototherapy | Definition: Extracorporeal treatment by light rays |
| Shock Wave Therapy | Definition: Extracorporeal treatment by shock waves |
| Ultrasound Therapy | Definition: Extracorporeal treatment by ultrasound |
| Ultraviolet Light Therapy | Definition: Extracorporeal treatment by ultraviolet light |

Section 7 - Osteopathic Character 3 - Operation

| ICD-10-PCS Value | Definition |
|------------------|---|
| Treatment | Definition: Manual treatment to eliminate or alleviate somatic dysfunction and related disorders |

Section 7 - Osteopathic Character 5 - Approach

| ICD-10-PCS Value | Definition |
|------------------|--|
| External | Definition: Procedures performed directly on the skin or mucous membrane and procedures performed indirectly by the application of external force through the skin or mucous membrane |

Section 8 - Other Procedures

Character 3 - Operation

| ICD-10-PCS Value | Definition |
|------------------|---|
| Other Procedures | Definition: Methodologies which attempt to remediate or cure a disorder or disease |

Section 8 - Other Procedures

Character 5 - Approach

| ICD-10-PCS Value | Definition |
|--|--|
| External | Definition: Procedures performed directly on the skin or mucous membrane and procedures performed indirectly by the application of external force through the skin or mucous membrane |
| Percutaneous | Definition: Entry, by puncture or minor incision, of instrumentation through the skin or mucous membrane and any other body layers necessary to reach the site of the procedure |
| Percutaneous Endoscopic | Definition: Entry, by puncture or minor incision, of instrumentation through the skin or mucous membrane and any other body layers necessary to reach and visualize the site of the procedure |
| Via Natural or Artificial Opening | Definition: Entry of instrumentation through a natural or artificial external opening to reach the site of the procedure |
| Via Natural or Artificial Opening Endoscopic | Definition: Entry of instrumentation through a natural or artificial external opening to reach and visualize the site of the procedure |

Section 9 - Chiropractic Character 3 - Operation

| ICD-10-PCS Value | Definition |
|------------------|--|
| Manipulation | Definition: Manual procedure that involves a directed thrust to move a joint past the physiological range of motion, without exceeding the anatomical limit |

Section 9 - Chiropractic

Character 5 - Approach

| ICD-10-PCS Value | Definition |
|------------------|--|
| External | Definition: Procedures performed directly on the skin or mucous membrane and procedures performed indirectly by the application of external force through the skin or mucous membrane |

Section B - Imaging

Character 3 - Type

| ICD-10-PCS Value | Definition |
|-----------------------------------|---|
| Computerized Tomography (CT Scan) | Definition: Computer reformatted digital display of multiplanar images developed from the capture of multiple exposures of external ionizing radiation |
| Fluoroscopy | Definition: Single plane or bi-plane real time display of an image developed from the capture of external ionizing radiation on a fluorescent screen. The image may also be stored by either digital or analog means |
| Magnetic Resonance Imaging (MRI) | Definition: Computer reformatted digital display of multiplanar images developed from the capture of radiofrequency signals emitted by nuclei in a body site excited within a magnetic field |
| Plain Radiography | Definition: Planar display of an image developed from the capture of external ionizing radiation on photographic or photoconductive plate |
| Ultrasonography | Definition: Real time display of images of anatomy or flow information developed from the capture of reflected and attenuated high frequency sound waves |

Section C - Nuclear Medicine

Character 3 - Type

| ICD-10-PCS Value | Definition |
|---|--|
| Nonimaging Nuclear Medicine Assay | Definition: Introduction of radioactive materials into the body for the study of body fluids and blood elements, by the detection of radioactive emissions |
| Nonimaging Nuclear Medicine Probe | Definition: Introduction of radioactive materials into the body for the study of distribution and fate of certain substances by the detection of radioactive emissions; or, alternatively, measurement of absorption of radioactive emissions from an external source |
| Nonimaging Nuclear Medicine Uptake | Definition: Introduction of radioactive materials into the body for measurements of organ function, from the detection of radioactive emissions |
| Planar Nuclear Medicine Imaging | Definition: Introduction of radioactive materials into the body for single plane display of images developed from the capture of radioactive emissions |
| Positron Emission Tomographic (PET) Imaging | Definition: Introduction of radioactive materials into the body for three dimensional display of images developed from the simultaneous capture, 180 degrees apart, of radioactive emissions |
| Systemic Nuclear Medicine Therapy | Definition: Introduction of unsealed radioactive materials into the body for treatment |
| Tomographic (Tomo) Nuclear Medicine Imaging | Definition: Introduction of radioactive materials into the body for three dimensional display of images developed from the capture of radioactive emissions |

Section F - Physical Rehabilitation and Diagnostic Audiology

Character 3 - Type

| ICD-10-PCS Value | Definition |
|--|--|
| Activities of Daily Living Assessment | Definition: Measurement of functional level for activities of daily living |
| Activities of Daily Living Treatment | Definition: Exercise or activities to facilitate functional competence for activities of daily living |
| Caregiver Training | Definition: Training in activities to support patient's optimal level of function |
| Cochlear Implant Treatment | Definition: Application of techniques to improve the communication abilities of individuals with cochlear implant |
| Device Fitting | Definition: Fitting of a device designed to facilitate or support achievement of a higher level of function |
| Hearing Aid Assessment | Definition: Measurement of the appropriateness and/or effectiveness of a hearing device |
| Hearing Assessment | Definition: Measurement of hearing and related functions |
| Hearing Treatment | Definition: Application of techniques to improve, augment, or compensate for hearing and related functional impairment |
| Motor and/or Nerve Function Assessment | Definition: Measurement of motor, nerve, and related functions |
| Motor Treatment | Definition: Exercise or activities to increase or facilitate motor function |
| Speech Assessment | Definition: Measurement of speech and related functions |
| Speech Treatment | Definition: Application of techniques to improve, augment, or compensate for speech and related functional impairment |
| Vestibular Assessment | Definition: Measurement of the vestibular system and related functions |
| Vestibular Treatment | Definition: Application of techniques to improve, augment, or compensate for vestibular and related functional impairment |

Section F - Physical Rehabilitation and Diagnostic Audiology

Character 5 - Type Qualifier

| ICD-10-PCS Value | Definition |
|--|---|
| Acoustic Reflex Decay | Definition: Measures reduction in size/strength of acoustic reflex over time Includes/Examples: Includes site of lesion test |
| Acoustic Reflex Patterns | Definition: Defines site of lesion based upon presence/absence of acoustic reflexes with ipsilateral vs. contralateral stimulation |
| Acoustic Reflex Threshold | Definition: Determines minimal intensity that acoustic reflex occurs with ipsilateral and/or contralateral stimulation |
| Aerobic Capacity and Endurance | Definition: Measures autonomic responses to positional changes; perceived exertion, dyspnea or angina during activity; performance during exercise protocols; standard vital signs; and blood gas analysis or oxygen consumption |
| Alternate Binaural or Monaural Loudness Balance | Definition: Determines auditory stimulus parameter that yields the same objective sensation Includes/Examples: Sound intensities that yield same loudness perception |
| Anthropometric Characteristics | Definition: Measures edema, body fat composition, height, weight, length and girth |
| Aphasia (Assessment) | Definition: Measures expressive and receptive speech and language function including reading and writing |
| Aphasia (Treatment) | Definition: Applying techniques to improve, augment, or compensate for receptive/ expressive language impairments |
| Articulation/Phonology (Assessment) | Definition: Measures speech production |
| Articulation/Phonology (Treatment) | Definition: Applying techniques to correct, improve, or compensate for speech productive impairment |
| Assistive Listening Device | Definition: Assists in use of effective and appropriate assistive listening device/system |
| Assistive Listening System/Device Selection | Definition: Measures the effectiveness and appropriateness of assistive listening systems/devices |
| Assistive, Adaptive, Supportive or Protective Devices | Explanation: Devices to facilitate or support achievement of a higher level of function in wheelchair mobility; bed mobility; transfer or ambulation ability; bath and showering ability; dressing; grooming; personal hygiene; play or leisure |
| Auditory Evoked Potentials | Definition: Measures electric responses produced by the VIIIth cranial nerve and brainstem following auditory stimulation |
| Auditory Processing (Assessment) | Definition: Evaluates ability to receive and process auditory information and comprehension of spoken language |
| Auditory Processing (Treatment) | Definition: Applying techniques to improve the receiving and processing of auditory information and comprehension of spoken language |
| Augmentative/Alternative Communication System (Assessment) | Definition: Determines the appropriateness of aids, techniques, symbols, and/or strategies to augment or replace speech and enhance communication Includes/Examples: Includes the use of telephones, writing equipment, emergency equipment, and TDD |
| Augmentative/Alternative Communication System (Treatment) | Includes/Examples: Includes augmentative communication devices and aids |
| Aural Rehabilitation | Definition: Applying techniques to improve the communication abilities associated with hearing loss |
| Aural Rehabilitation Status | Definition: Measures impact of a hearing loss including evaluation of receptive and expressive communication skills |
| Bathing/Showering | Includes/Examples: Includes obtaining and using supplies; soaping, rinsing, and drying body parts; maintaining bathing position; and transferring to and from bathing positions |

Section F - Physical Rehabilitation and Diagnostic Audiology

Character 5 - Type Qualifier *(continued)*

| ICD-10-PCS Value | Definition |
|---|---|
| Bathing/Showering Techniques | Definition: Activities to facilitate obtaining and using supplies, soaping, rinsing and drying body parts, maintaining bathing position, and transferring to and from bathing positions |
| Bed Mobility (Assessment) | Definition: Transitional movement within bed |
| Bed Mobility (Treatment) | Definition: Exercise or activities to facilitate transitional movements within bed |
| Bedside Swallowing and Oral Function | Includes/Examples: Bedside swallowing includes assessment of sucking, masticating, coughing, and swallowing. Oral function includes assessment of musculature for controlled movements, structures and functions to determine coordination and phonation |
| Bekesy Audiometry | Definition: Uses an instrument that provides a choice of discrete or continuously varying pure tones; choice of pulsed or continuous signal |
| Binaural Electroacoustic Hearing Aid Check | Definition: Determines mechanical and electroacoustic function of bilateral hearing aids using hearing aid test box |
| Binaural Hearing Aid (Assessment) | Definition: Measures the candidacy, effectiveness, and appropriateness of a hearing aids Explanation: Measures bilateral fit |
| Binaural Hearing Aid (Treatment) | Explanation: Assists in achieving maximum understanding and performance |
| Bithermal, Binaural Caloric Irrigation | Definition: Measures the rhythmic eye movements stimulated by changing the temperature of the vestibular system |
| Bithermal, Monaural Caloric Irrigation | Definition: Measures the rhythmic eye movements stimulated by changing the temperature of the vestibular system in one ear |
| Brief Tone Stimuli | Definition: Measures specific central auditory process |
| Cerumen Management | Definition: Includes examination of external auditory canal and tympanic membrane and removal of cerumen from external ear canal |
| Cochlear Implant | Definition: Measures candidacy for cochlear implant |
| Cochlear Implant Rehabilitation | Definition: Applying techniques to improve the communication abilities of individuals with cochlear implant; includes programming the device, providing patients/families with information |
| Communicative/Cognitive Integration Skills (Assessment) | Definition: Measures ability to use higher cortical functions Includes/Examples: Includes orientation, recognition, attention span, initiation and termination of activity, memory, sequencing, categorizing, concept formation, spatial operations, judgment, problem solving, generalization and pragmatic communication |
| Communicative/Cognitive Integration Skills (Treatment) | Definition: Activities to facilitate the use of higher cortical functions Includes/Examples: Includes level of arousal, orientation, recognition, attention span, initiation and termination of activity, memory sequencing, judgment and problem solving, learning and generalization, and pragmatic communication |
| Computerized Dynamic Posturography | Definition: Measures the status of the peripheral and central vestibular system and the sensory/motor component of balance; evaluates the efficacy of vestibular rehabilitation |

Section F - Physical Rehabilitation and Diagnostic Audiology

Character 5 - Type Qualifier *(continued)*

| ICD-10-PCS Value | Definition |
|--|---|
| Conditioned Play Audiometry | Definition: Behavioral measures using nonspeech and speech stimuli to obtain frequency-specific and ear-specific information on auditory status from the patient Explanation: Obtains speech reception threshold by having patient point to pictures of spondaic words |
| Coordination/Dexterity (Assessment) | Definition: Measures large and small muscle groups for controlled goal-directed movements Explanation: Dexterity includes object manipulation |
| Coordination/Dexterity (Treatment) | Definition: Exercise or activities to facilitate gross coordination and fine coordination |
| Cranial Nerve Integrity | Definition: Measures cranial nerve sensory and motor functions, including tastes, smell and facial expression |
| Dichotic Stimuli | Definition: Measures specific central auditory process |
| Distorted Speech | Definition: Measures specific central auditory process |
| Dix-Hallpike Dynamic | Definition: Measures nystagmus following Dix-Hallpike maneuver |
| Dressing | Includes/Examples: Includes selecting clothing and accessories, obtaining clothing from storage, dressing and, fastening and adjusting clothing and shoes, and applying and removing personal devices, prosthesis or orthosis |
| Dressing Techniques | Definition: Activities to facilitate selecting clothing and accessories, dressing and undressing, adjusting clothing and shoes, applying and removing devices, prostheses or orthoses |
| Dynamic Orthosis | Includes/Examples: Includes customized and prefabricated splints, inhibitory casts, spinal and other braces, and protective devices; allows motion through transfer of movement from other body parts or by use of outside forces |
| Ear Canal Probe Microphone | Definition: Real ear measures |
| Ear Protector Attenuation | Definition: Measures ear protector fit and effectiveness |
| Electrocochleography | Definition: Measures the VIIIth cranial nerve action potential |
| Environmental, Home and Work Barriers | Definition: Measures current and potential barriers to optimal function, including safety hazards, access problems and home or office design |
| Ergonomics and Body Mechanics | Definition: Ergonomic measurement of job tasks, work hardening or work conditioning needs; functional capacity; and body mechanics |
| Eustachian Tube Function | Definition: Measures eustachian tube function and patency of eustachian tube |
| Evoked Otoacoustic Emissions, Diagnostic | Definition: Measures auditory evoked potentials in a diagnostic format |
| Evoked Otoacoustic Emissions, Screening | Definition: Measures auditory evoked potentials in a screening format |
| Facial Nerve Function | Definition: Measures electrical activity of the VIIth cranial nerve (facial nerve) |
| Feeding/Eating (Assessment) | Includes/Examples: Includes setting up food, selecting and using utensils and tableware, bringing food or drink to mouth, cleaning face, hands, and clothing, and management of alternative methods of nourishment |
| Feeding/Eating (Treatment) | Definition: Exercise or activities to facilitate setting up food, selecting and using utensils and tableware, bringing food or drink to mouth, cleaning face, hands, and clothing, and management of alternative methods of nourishment |
| Filtered Speech | Definition: Uses high or low pass filtered speech stimuli to assess central auditory processing disorders, site of lesion testing |
| Fluency (Assessment) | Definition: Measures speech fluency or stuttering |
| Fluency (Treatment) | Definition: Applying techniques to improve and augment fluent speech |

Section F - Physical Rehabilitation and Diagnostic Audiology

Character 5 - Type Qualifier *(continued)*

| ICD-10-PCS Value | Definition |
|--|--|
| Gait and/or Balance | Definition: Measures biomechanical, arthrokinematic and other spatial and temporal characteristics of gait and balance |
| Gait Training/Functional Ambulation | Definition: Exercise or activities to facilitate ambulation on a variety of surfaces and in a variety of environments |
| Grooming/Personal Hygiene (Assessment) | Includes/Examples: Includes ability to obtain and use supplies in a sequential fashion, general grooming, oral hygiene, toilet hygiene, personal care devices, including care for artificial airways |
| Grooming/Personal Hygiene (Treatment) | Definition: Activities to facilitate obtaining and using supplies in a sequential fashion: general grooming, oral hygiene, toilet hygiene, cleaning body, and personal care devices, including artificial airways |
| Hearing and Related Disorders Counseling | Definition: Provides patients/families/caregivers with information, support, referrals to facilitate recovery from a communication disorder Includes/Examples: Includes strategies for psychosocial adjustment to hearing loss for clients and families/caregivers |
| Hearing and Related Disorders Prevention | Definition: Provides patients/families/caregivers with information and support to prevent communication disorders |
| Hearing Screening | Definition: Pass/refer measures designed to identify need for further audiologic assessment |
| Home Management (Assessment) | Definition: Obtaining and maintaining personal and household possessions and environment Includes/Examples: Includes clothing care, cleaning, meal preparation and cleanup, shopping, money management, household maintenance, safety procedures, and childcare/parenting |
| Home Management (Treatment) | Definition: Activities to facilitate obtaining and maintaining personal household possessions and environment Includes/Examples: Includes clothing care, cleaning, meal preparation and clean-up, shopping, money management, household maintenance, safety procedures, childcare/parenting |
| Instrumental Swallowing and Oral Function | Definition: Measures swallowing function using instrumental diagnostic procedures Explanation: Methods include videofluoroscopy, ultrasound, manometry, endoscopy |
| Integumentary Integrity | Includes/Examples: Includes burns, skin conditions, ecchymosis, bleeding, blisters, scar tissue, wounds and other traumas, tissue mobility, turgor and texture |
| Manual Therapy Techniques | Definition: Techniques in which the therapist uses his/her hands to administer skilled movements Includes/Examples: Includes connective tissue massage, joint mobilization and manipulation, manual lymph drainage, manual traction, soft tissue mobilization and manipulation |
| Masking Patterns | Definition: Measures central auditory processing status |
| Monaural Electroacoustic Hearing Aid Check | Definition: Determines mechanical and electroacoustic function of one hearing aid using hearing aid test box |
| Monaural Hearing Aid (Assessment) | Definition: Measures the candidacy, effectiveness, and appropriateness of a hearing aid Explanation: Measures unilateral fit |

Section F - Physical Rehabilitation and Diagnostic Audiology

Character 5 - Type Qualifier *(continued)*

| ICD-10-PCS Value | Definition |
|--------------------------------------|---|
| Monaural Hearing Aid (Treatment) | Explanation: Assists in achieving maximum understanding and performance |
| Motor Function (Assessment) | Definition: Measures the body's functional and versatile movement patterns Includes/Examples: Includes motor assessment scales, analysis of head, trunk and limb movement, and assessment of motor learning |
| Motor Function (Treatment) | Definition: Exercise or activities to facilitate crossing midline, laterality, bilateral integration, praxis, neuromuscular relaxation, inhibition, facilitation, motor function and motor learning |
| Motor Speech (Assessment) | Definition: Measures neurological motor aspects of speech production |
| Motor Speech (Treatment) | Definition: Applying techniques to improve and augment the impaired neurological motor aspects of speech production |
| Muscle Performance (Assessment) | Definition: Measures muscle strength, power and endurance using manual testing, dynamometry or computer-assisted electromechanical muscle test; functional muscle strength, power and endurance; muscle pain, tone, or soreness; or pelvic-floor musculature Explanation: Muscle endurance refers to the ability to contract a muscle repeatedly over time |
| Muscle Performance (Treatment) | Definition: Exercise or activities to increase the capacity of a muscle to do work in terms of strength, power, and/or endurance Explanation: Muscle strength is the force exerted to overcome resistance in one maximal effort. Muscle power is work produced per unit of time, or the product of strength and speed. Muscle endurance is the ability to contract a muscle repeatedly over time |
| Neuromotor Development | Definition: Measures motor development, righting and equilibrium reactions, and reflex and equilibrium reactions |
| Non-invasive Instrumental Status | Definition: Instrumental measures of oral, nasal, vocal, and velopharyngeal functions as they pertain to speech production |
| Nonspoken Language (Assessment) | Definition: Measures nonspoken language (print, sign, symbols) for communication |
| Nonspoken Language (Treatment) | Definition: Applying techniques that improve, augment, or compensate spoken communication |
| Oral Peripheral Mechanism | Definition: Structural measures of face, jaw, lips, tongue, teeth, hard and soft palate, pharynx as related to speech production |
| Orofacial Myofunctional (Assessment) | Definition: Measures orofacial myofunctional patterns for speech and related functions |
| Orofacial Myofunctional (Treatment) | Definition: Applying techniques to improve, alter, or augment impaired orofacial myofunctional patterns and related speech production errors |
| Oscillating Tracking | Definition: Measures ability to visually track |
| Pain | Definition: Measures muscle soreness, pain and soreness with joint movement, and pain perception Includes/Examples: Includes questionnaires, graphs, symptom magnification scales or visual analog scales |

Section F - Physical Rehabilitation and Diagnostic Audiology

Character 5 - Type Qualifier *(continued)*

| ICD-10-PCS Value | Definition |
|---|---|
| Perceptual Processing (Assessment) | Definition: Measures stereognosis, kinesthesia, body schema, right-left discrimination, form constancy, position in space, visual closure, figure-ground, depth perception, spatial relations and topographical orientation |
| Perceptual Processing (Treatment) | <p>Definition: Exercise and activities to facilitate perceptual processing</p> <p>Explanation: Includes stereognosis, kinesthesia, body schema, right-left discrimination, form constancy, position in space, visual closure, figure-ground, depth perception, spatial relations, and topographical orientation</p> <p>Includes/Examples: Includes stereognosis, kinesthesia, body schema, right-left discrimination, form constancy, position in space, visual closure, figure-ground, depth perception, spatial relations, and topographical orientation</p> |
| Performance Intensity Phonetically Balanced Speech Discrimination | Definition: Measures word recognition over varying intensity levels |
| Postural Control | Definition: Exercise or activities to increase postural alignment and control |
| Prosthesis | <p>Definition: Artificial substitutes for missing body parts that augment performance or function</p> <p>Includes/Examples: Limb prosthesis, ocular prosthesis</p> |
| Psychosocial Skills (Assessment) | <p>Definition: The ability to interact in society and to process emotions</p> <p>Includes/Examples: Includes psychological (values, interests, self-concept); social (role performance, social conduct, interpersonal skills, self expression); self-management (coping skills, time management, self-control)</p> |
| Psychosocial Skills (Treatment) | <p>Definition: The ability to interact in society and to process emotions</p> <p>Includes/Examples: Includes psychological (values, interests, self-concept); social (role performance, social conduct, interpersonal skills, self expression); self-management (coping skills, time management, self-control)</p> |
| Pure Tone Audiometry, Air | Definition: Air-conduction pure tone threshold measures with appropriate masking |
| Pure Tone Audiometry, Air and Bone | Definition: Air-conduction and bone-conduction pure tone threshold measures with appropriate masking |
| Pure Tone Stenger | Definition: Measures unilateral nonorganic hearing loss based on simultaneous presentation of pure tones of differing volume |

Section F - Physical Rehabilitation and Diagnostic Audiology

Character 5 - Type Qualifier *(continued)*

| ICD-10-PCS Value | Definition |
|--|--|
| Range of Motion and Joint Integrity | Definition: Measures quantity, quality, grade, and classification of joint movement and/or mobility Explanation: Range of Motion is the space, distance or angle through which movement occurs at a joint or series of joints. Joint integrity is the conformance of joints to expected anatomic, biomechanical and kinematic norms |
| Range of Motion and Joint Mobility | Definition: Exercise or activities to increase muscle length and joint mobility |
| Receptive/Expressive Language (Assessment) | Definition: Measures receptive and expressive language |
| Receptive/Expressive Language (Treatment) | Definition: Applying techniques to improve and augment receptive/expressive language |
| Reflex Integrity | Definition: Measures the presence, absence, or exaggeration of developmentally appropriate, pathologic or normal reflexes |
| Select Picture Audiometry | Definition: Establishes hearing threshold levels for speech using pictures |
| Sensorineural Acuity Level | Definition: Measures sensorineural acuity masking presented via bone conduction |
| Sensory Aids | Definition: Determines the appropriateness of a sensory prosthetic device, other than a hearing aid or assistive listening system/device |
| Sensory Awareness/Processing/Integrity | Includes/Examples: Includes light touch, pressure, temperature, pain, sharp/dull, proprioception, vestibular, visual, auditory, gustatory, and olfactory |
| Short Increment Sensitivity Index | Definition: Measures the ear's ability to detect small intensity changes; site of lesion test requiring a behavioral response |
| Sinusoidal Vertical Axis Rotational | Definition: Measures nystagmus following rotation |
| Somatosensory Evoked Potentials | Definition: Measures neural activity from sites throughout the body |
| Speech and/or Language Screening | Definition: Identifies need for further speech and/or language evaluation |
| Speech Threshold | Definition: Measures minimal intensity needed to repeat spondaic words |
| Speech-Language Pathology and Related Disorders Counseling | Definition: Provides patients/families with information, support, referrals to facilitate recovery from a communication disorder |
| Speech-Language Pathology and Related Disorders Prevention | Definition: Applying techniques to avoid or minimize onset and/or development of a communication disorder |
| Speech/Word Recognition | Definition: Measures ability to repeat/identify single syllable words; scores given as a percentage; includes word recognition/speech discrimination |
| Staggered Spondaic Word | Definition: Measures central auditory processing site of lesion based upon dichotic presentation of spondaic words |
| Static Orthosis | Includes/Examples: Includes customized and prefabricated splints, inhibitory casts, spinal and other braces, and protective devices; has no moving parts, maintains joint(s) in desired position |
| Stenger | Definition: Measures unilateral nonorganic hearing loss based on simultaneous presentation of signals of differing volume |
| Swallowing Dysfunction | Definition: Activities to improve swallowing function in coordination with respiratory function Includes/Examples: Includes function and coordination of sucking, mastication, coughing, swallowing |
| Synthetic Sentence Identification | Definition: Measures central auditory dysfunction using identification of third order approximations of sentences and competing messages |
| Temporal Ordering of Stimuli | Definition: Measures specific central auditory process |

Section F - Physical Rehabilitation and Diagnostic Audiology

Character 5 - Type Qualifier *(continued)*

| ICD-10-PCS Value | Definition |
|--|--|
| Therapeutic Exercise | <p>Definition: Exercise or activities to facilitate sensory awareness, sensory processing, sensory integration, balance training, conditioning, reconditioning</p> <p>Includes/Examples: Includes developmental activities, breathing exercises, aerobic endurance activities, aquatic exercises, stretching and ventilatory muscle training</p> |
| Tinnitus Masker (Assessment) | Definition: Determines candidacy for tinnitus masker |
| Tinnitus Masker (Treatment) | Explanation: Used to verify physical fit, acoustic appropriateness, and benefit; assists in achieving maximum benefit |
| Tone Decay | Definition: Measures decrease in hearing sensitivity to a tone; site of lesion test requiring a behavioral response |
| Transfer | Definition: Transitional movement from one surface to another |
| Transfer Training | Definition: Exercise or activities to facilitate movement from one surface to another |
| Tympanometry | Definition: Measures the integrity of the middle ear; measures ease at which sound flows through the tympanic membrane while air pressure against the membrane is varied |
| Unithermal Binaural Screen | Definition: Measures the rhythmic eye movements stimulated by changing the temperature of the vestibular system in both ears using warm water, screening format |
| Ventilation, Respiration and Circulation | <p>Definition: Measures ventilatory muscle strength, power and endurance, pulmonary function and ventilatory mechanics</p> <p>Includes/Examples: Includes ability to clear airway, activities that aggravate or relieve edema, pain, dyspnea or other symptoms, chest wall mobility, cardiopulmonary response to performance of ADL and IAD, cough and sputum, standard vital signs</p> |
| Vestibular | Definition: Applying techniques to compensate for balance disorders; includes habituation, exercise therapy, and balance retraining |
| Visual Motor Integration (Assessment) | Definition: Coordinating the interaction of information from the eyes with body movement during activity |
| Visual Motor Integration (Treatment) | Definition: Exercise or activities to facilitate coordinating the interaction of information from eyes with body movement during activity |
| Visual Reinforcement Audiometry | <p>Definition: Behavioral measures using nonspeech and speech stimuli to obtain frequency/ear-specific information on auditory status</p> <p>Includes/Examples: Includes a conditioned response of looking toward a visual reinforcer (e.g., lights, animated toy) every time auditory stimuli are heard</p> |
| Vocational Activities and Functional Community or Work Reintegration Skills (Assessment) | <p>Definition: Measures environmental, home, work (job/school/play) barriers that keep patients from functioning optimally in their environment</p> <p>Includes/Examples: Includes assessment of vocational skill and interests, environment of work (job/school/play), injury potential and injury prevention or reduction, ergonomic stressors, transportation skills, and ability to access and use community resources</p> |

Section F - Physical Rehabilitation and Diagnostic Audiology

Character 5 - Type Qualifier *(continued)*

| ICD-10-PCS Value | Definition |
|---|--|
| Vocational Activities and Functional Community or Work Reintegration Skills (Treatment) | Definition: Activities to facilitate vocational exploration, body mechanics training, job acquisition, and environmental or work (job/school/play) task adaptation Includes/Examples: Includes injury prevention and reduction, ergonomic stressor reduction, job coaching and simulation, work hardening and conditioning, driving training, transportation skills, and use of community resources |
| Voice (Assessment) | Definition: Measures vocal structure, function and production |
| Voice (Treatment) | Definition: Applying techniques to improve voice and vocal function |
| Voice Prosthetic (Assessment) | Definition: Determines the appropriateness of voice prosthetic/adaptive device to enhance or facilitate communication |
| Voice Prosthetic (Treatment) | Includes/Examples: Includes electrolarynx, and other assistive, adaptive, supportive devices |
| Wheelchair Mobility (Assessment) | Definition: Measures fit and functional abilities within wheelchair in a variety of environments |
| Wheelchair Mobility (Treatment) | Definition: Management, maintenance and controlled operation of a wheelchair, scooter or other device, in and on a variety of surfaces and environments |
| Wound Management | Includes/Examples: Includes non-selective and selective debridement (enzymes, autolysis, sharp debridement), dressings (wound coverings, hydrogel, vacuum-assisted closure), topical agents, etc. |

Section G - Mental Health

Character 3 - Type

| ICD-10-PCS Value | Definition |
|---------------------------|---|
| Biofeedback | Definition: Provision of information from the monitoring and regulating of physiological processes in conjunction with cognitive-behavioral techniques to improve patient functioning or well-being Includes/Examples: Includes EEG, blood pressure, skin temperature or peripheral blood flow, ECG, electrooculogram, EMG, respirometry or capnometry, GSR/EDR, perineometry to monitor/regulate bowel/bladder activity, electrogastrogram to monitor/regulate gastric motility |
| Counseling | Definition: The application of psychological methods to treat an individual with normal developmental issues and psychological problems in order to increase function, improve well-being, alleviate distress, maladjustment or resolve crises |
| Crisis Intervention | Definition: Treatment of a traumatized, acutely disturbed or distressed individual for the purpose of short-term stabilization Includes/Examples: Includes defusing, debriefing, counseling, psychotherapy and/or coordination of care with other providers or agencies |
| Electroconvulsive Therapy | Definition: The application of controlled electrical voltages to treat a mental health disorder Includes/Examples: Includes appropriate sedation and other preparation of the individual |
| Family Psychotherapy | Definition: Treatment that includes one or more family members of an individual with a mental health disorder by behavioral, cognitive, psychoanalytic, psychodynamic or psychophysiological means to improve functioning or well-being Explanation: Remediation of emotional or behavioral problems presented by one or more family members in cases where psychotherapy with more than one family member is indicated |
| Group Psychotherapy | Definition: Treatment of two or more individuals with a mental health disorder by behavioral, cognitive, psychoanalytic, psychodynamic or psychophysiological means to improve functioning or well-being |
| Hypnosis | Definition: Induction of a state of heightened suggestibility by auditory, visual and tactile techniques to elicit an emotional or behavioral response |
| Individual Psychotherapy | Definition: Treatment of an individual with a mental health disorder by behavioral, cognitive, psychoanalytic, psychodynamic or psychophysiological means to improve functioning or well-being |
| Light Therapy | Definition: Application of specialized light treatments to improve functioning or well-being |
| Medication Management | Definition: Monitoring and adjusting the use of medications for the treatment of a mental health disorder |
| Narcosynthesis | Definition: Administration of intravenous barbiturates in order to release suppressed or repressed thoughts |

| ICD-10-PCS Value | Definition |
|---------------------|---|
| Psychological Tests | Definition: The administration and interpretation of standardized psychological tests and measurement instruments for the assessment of psychological function |

Section G - Mental Health

Character 4 - Qualifier

| ICD-10-PCS Value | Definition |
|--------------------------------------|---|
| Behavioral | Definition: Primarily to modify behavior Includes/Examples: Includes modeling and role playing, positive reinforcement of target behaviors, response cost, and training of self-management skills |
| Cognitive | Definition: Primarily to correct cognitive distortions and errors |
| Cognitive-Behavioral | Definition: Combining cognitive and behavioral treatment strategies to improve functioning Explanation: Maladaptive responses are examined to determine how cognitions relate to behavior patterns in response to an event. Uses learning principles and information-processing models |
| Developmental | Definition: Age-normed developmental status of cognitive, social and adaptive behavior skills |
| Intellectual and Psychoeducational | Definition: Intellectual abilities, academic achievement and learning capabilities (including behaviors and emotional factors affecting learning) |
| Interactive | Definition: Uses primarily physical aids and other forms of non-oral interaction with a patient who is physically, psychologically or developmentally unable to use ordinary language for communication Includes/Examples: Includes the use of toys in symbolic play |
| Interpersonal | Definition: Helps an individual make changes in interpersonal behaviors to reduce psychological dysfunction Includes/Examples: Includes exploratory techniques, encouragement of affective expression, clarification of patient statements, analysis of communication patterns, use of therapy relationship and behavior change techniques |
| Neurobehavioral and Cognitive Status | Definition: Includes neurobehavioral status exam, interview(s), and observation for the clinical assessment of thinking, reasoning and judgment, acquired knowledge, attention, memory, visual spatial abilities, language functions, and planning |
| Neuropsychological | Definition: Thinking, reasoning and judgment, acquired knowledge, attention, memory, visual spatial abilities, language functions, planning |
| Personality and Behavioral | Definition: Mood, emotion, behavior, social functioning, psychopathological conditions, personality traits and characteristics |
| Psychoanalysis | Definition: Methods of obtaining a detailed account of past and present mental and emotional experiences to determine the source and eliminate or diminish the undesirable effects of unconscious conflicts Explanation: Accomplished by making the individual aware of their existence, origin, and inappropriate expression in emotions and behavior |

Section G - Mental Health

Character 4 - Qualifier *(continued)*

| ICD-10-PCS Value | Definition |
|---------------------|---|
| Psychodynamic | Definition: Exploration of past and present emotional experiences to understand motives and drives using insight-oriented techniques to reduce the undesirable effects of internal conflicts on emotions and behavior Explanation: Techniques include empathetic listening, clarifying self-defeating behavior patterns, and exploring adaptive alternatives |
| Psychophysiological | Definition: Monitoring and alteration of physiological processes to help the individual associate physiological reactions combined with cognitive and behavioral strategies to gain improved control of these processes to help the individual cope more effectively |
| Supportive | Definition: Formation of therapeutic relationship primarily for providing emotional support to prevent further deterioration in functioning during periods of particular stress Explanation: Often used in conjunction with other therapeutic approaches |
| Vocational | Definition: Exploration of vocational interests, aptitudes and required adaptive behavior skills to develop and carry out a plan for achieving a successful vocational placement Includes/Examples: Includes enhancing work related adjustment and/or pursuing viable options in training education or preparation |

Section H - Substance Abuse Treatment

Character 3 - Type

| ICD-10-PCS Value | Definition |
|--------------------------|---|
| Detoxification Services | Definition: Detoxification from alcohol and/or drugs Explanation: Not a treatment modality, but helps the patient stabilize physically and psychologically until the body becomes free of drugs and the effects of alcohol |
| Family Counseling | Definition: The application of psychological methods that includes one or more family members to treat an individual with addictive behavior Explanation: Provides support and education for family members of addicted individuals. Family member participation is seen as a critical area of substance abuse treatment |
| Group Counseling | Definition: The application of psychological methods to treat two or more individuals with addictive behavior Explanation: Provides structured group counseling sessions and healing power through the connection with others |
| Individual Counseling | Definition: The application of psychological methods to treat an individual with addictive behavior Explanation: Comprised of several different techniques, which apply various strategies to address drug addiction |
| Individual Psychotherapy | Definition: Treatment of an individual with addictive behavior by behavioral, cognitive, psychoanalytic, psychodynamic or psychophysiological means |
| Medication Management | Definition: Monitoring and adjusting the use of replacement medications for the treatment of addiction |
| Pharmacotherapy | Definition: The use of replacement medications for the treatment of addiction |

Section X - New Technology

Character 3 - Operation

| ICD-10-PCS Value | Definition |
|------------------|---|
| Assistance | Definition: Taking over a portion of a physiological function by extracorporeal means |
| Destruction | Definition: Physical eradication of all or a portion of a body part by the direct use of energy, force, or a destructive agent Explanation: None of the body part is physically taken out Includes/Examples: Fulguration of rectal polyp, cautery of skin lesion |
| Extirpation | Definition: Taking or cutting out solid matter from a body part Explanation: The solid matter may be an abnormal byproduct of a biological function or a foreign body; it may be imbedded in a body part or in the lumen of a tubular body part. The solid matter may or may not have been previously broken into pieces Includes/Examples: Thrombectomy, choledocholithotomy |
| Fusion | Definition: Joining together portions of an articular body part rendering the articular body part immobile Explanation: The body part is joined together by fixation device, bone graft, or other means Includes/Examples: Spinal fusion, ankle arthrodesis |
| Introduction | Definition: Putting in or on a therapeutic, diagnostic, nutritional, physiological, or prophylactic substance except blood or blood products |
| Monitoring | Definition: Determining the level of a physiological or physical function repetitively over a period of time |
| Replacement | Definition: Putting in or on biological or synthetic material that physically takes the place and/or function of all or a portion of a body part Explanation: The body part may have been taken out or replaced, or may be taken out, physically eradicated, or rendered nonfunctional during the Replacement procedure. A Removal procedure is coded for taking out the device used in a previous replacement procedure Includes/Examples: Total hip replacement, bone graft, free skin graft |
| Reposition | Definition: Moving to its normal location, or other suitable location, all or a portion of a body part Explanation: The body part is moved to a new location from an abnormal location, or from a normal location where it is not functioning correctly. The body part may or may not be cut out or off to be moved to the new location Includes/Examples: Reposition of undescended testicle, fracture reduction |

Section X - New Technology

Character 5 - Approach

| ICD-10-PCS Value | Definition |
|--|--|
| External | Definition: Procedures performed directly on the skin or mucous membrane and procedures performed indirectly by the application of external force through the skin or mucous membrane |
| Open | Definition: Cutting through the skin or mucous membrane and any other body layers necessary to expose the site of the procedure |
| Percutaneous | Definition: Entry, by puncture or minor incision, of instrumentation through the skin or mucous membrane and any other body layers necessary to reach the site of the procedure |
| Percutaneous Endoscopic | Definition: Entry, by puncture or minor incision, of instrumentation through the skin or mucous membrane and any other body layers necessary to reach and visualize the site of the procedure |
| Via Natural or Artificial Opening Endoscopic | Definition: Entry of instrumentation through a natural or artificial external opening to reach and visualize the site of the procedure |

Section X - New Technology
