Version 5010 and ICD-10 They're coming. Will you be ready?

News Updates | September 28, 2011

Version 5010 Testing Week Shows Promising Version 5010 Testing Results

The CMS Version 5010 team held its second National Testing event the week of Monday, August 22 to Friday, August 26, 2011. During National Testing Week, 1,252 Medicare Fee-For-Service (FFS) trading partners conducted testing with the Medicare Administrative Contractors using the Version 5010 format that all covered entities are required to use beginning January 1, 2012.

Results

These 1,252 trading partners submitted a total of 67,782 test files and no significant error scenarios were reported. Additionally, 74 trading partners responded to a follow-up survey about National Testing Week that found:

- 45% of those surveyed responded that they were testing the 837I with Medicare;
- 72% responded they were testing the 837P with Medicare;
- 43% responded they were testing the 835 with Medicare;
- 24% responded they were testing the 276/277 with Medicare; and
- 54% responded they were exchanging test files with payers other than Medicare.

Additional results show that transition to production is progressing. Twenty-six percent of trading partners stated they were currently in production status, with an additional 42% stating that they expect to be in production status within the next month. Most respondents (72%) stated that they were able to receive and process a 277CA while testing.
