

2005 ICD-10-PCS Tables in Text Format – Text files

The ICD-10-PCS descriptions consists of 3 zipped text files

Medical and Surgical procedures	Record count: 146,144
Ancillary procedures, except Radiation Oncology	Record count: 30,393
Radiation Oncology procedures (extended)	Record count: 309,156

The following describes the record layout for the ICD-10-PCS tables in text format files.

Each character of the 7-character ICD-10-PCS code is represented by a 1-character value, followed by a space, followed by it's corresponding descriptive term, as it appears in the Tables.

Each character value and description is delimited by a slash (“/”).

For example:

```
/0 Medical and Surgical/F Hepatobiliary System & Pancreas/1 Bypass/4 Gallbladder/0 Open/  
D Intraluminal Device/3 Duodenum/
```

where:

Character 1	0 Medical and Surgical
Character 2	F Hepatobiliary System & Pancreas
Character 3	1 Bypass
Character 4	4 Gallbladder
Character 5	0 Open
Character 6	D Intraluminal Device
Character 7	3 Duodenum

The first character of the code identifies the section; the codes in each section are in the order in which they appear in the Tables Listings.
