September 30, 2013

Note: This document revises the August 14, 2013 alert issued on this subject. The list of Diagnosis Codes that are considered invalid for No-Fault claims has been expanded to include ICD-10 codes that make up a cluster of codes related to diabetes. The newly added ICD-10 “cluster” diagnosis codes appear in the right-hand column of the “Excluded” table and are in bold font for ease of reference.

Implementation of Medicare Secondary Payer Mandatory Reporting Provisions in Section 111 of the Medicare, Medicaid, and SCHIP Extension Act (MMSEA) of 2007
(See 42 U.S.C. 1395y(b)(7) & (8))

Revised Technical ALERT: New Excluded ICD-9-CM Diagnosis Codes for No-Fault Claim Records

To ensure claims are not improperly denied, the Centers for Medicare & Medicaid Services (CMS) will no longer allow certain diagnosis codes to be posted within Non-Group Health Plan (NGHP) No-Fault Medicare Secondary Payer (MSP) records if a diagnosis code is not related to a No-Fault Accident.

As of January 6, 2014, the ICD-9-CM Diagnosis Codes, identified in the table below, will not be accepted when submitting a No-Fault Claim Input File Detail Record (Plan Insurance Type is equal to ‘D’ in Field 51). Records that are submitted with one of these codes in the Alleged Cause of Injury, Incident, or Illness field (Field 15) or in any ICD Diagnosis field (Field 18 to Field 36) when the Plan Insurance Type is equal to ‘D’ will be rejected. The record will be returned with an error corresponding to the field in which the excluded code was submitted, even if valid codes are supplied in one or more of any other ICD Diagnosis Code fields. Existing error code CI03 will be returned if an excluded code is submitted in Field 15 and error codes CI05-CI23 will be returned if an excluded code is submitted in Field 18 to Field 36.

Transition from ICD-9-CM to ICD-10-CM and Excluded Diagnosis Code Table

Beginning October 1, 2014, CMS will adopt the International Classification of Diseases, Tenth Revision, Clinical Modification (ICD-10-CM) for diagnosis coding in accordance with mandatory Health Insurance Portability and Accountability Act (HIPAA) administrative simplification requirements. More specific requirements for Section 111 MMSEA responsible reporting entities (RREs) may be referenced in the June 11, 2013 alert titled “Transition from ICD-9-CM to ICD-10-CM Diagnosis Codes” located at <http://cms.gov/Medicare/Coordination-of-Benefits-and-Recovery/Mandatory-Insurer-Reporting-For-Non-Group-Health-Plans/Downloads/New-Downloads/S111ICD10Alert.pdf>.

With this impending transition, CMS has identified the ICD-10-CM diagnosis codes that correspond to each excluded ICD-9-CM diagnosis code. The combined list of excluded ICD-9-

CM diagnosis codes and corresponding excluded ICD-10-CM codes that will not be accepted on a No-Fault Claim Input File Detail Record (Plan Insurance Type = 'D') is provided below.

Note: None of these codes will be accepted in the Alleged Cause of Injury, Incident or Illness (Field 15) or in the ICD Diagnosis Codes beginning in Field 18 as of January 6, 2014 (in test) and October 1, 2014 (in production) on a No-Fault Claim Input File Detail Record (Plan Insurance Type = 'D').
