

If you have a link in your favorites, it is probably using: <http://www.cms.gov/medicare-coverage-database/overview-and-quick-search.aspx>. However, the CMS MCD is redirecting you to: <https://www.cms.gov/medicare-coverage-database/overview-and-quick-search.aspx> (The difference between the two links is "http" vs "https").

To access the Attachments and/or the Downloads, use the following directions:

Attachments: On the CMS MCD Go into the LCD Details Page

- Click on the attachment.
- Copy the url in the error page.
- Paste the link into a new window/tab
- Change "https" to "http" and the attachment will display.

Downloads: Using either Firefox or Chrome (not Internet Explorer) go to the On the CMS MCD Downloads Page

- Select a dataset to Download (Ex. Current LCDs) and click the Submit button.
- An error message will display saying the webpage is unavailable.
- In the browser remove the "s" from the "https"
- The page will continue to display the error message; however, it will ask you to save the file.

If you have any questions or if you need further assistance please contact the LCD Helpdesk.
