

**September 2007**

**ANNOUNCEMENT**

**Deductible Amount for Medigap High Deductible Options F & J  
For Calendar Year 2008**

**SUMMARY:** There are two Medicare supplemental (Medigap) plans that can be sold with a high deductible option – Plans F and J. This notice announces that, effective January 1, 2008, the annual deductible amount for those two plans is \$1,900. The deductible amount for the high deductible version of plans F and J represents the annual out-of-pocket expenses (excluding premiums) that a beneficiary who chooses one of these policies must pay before the policy begins paying benefits. We update the annual deductible amount for Medigap plans F and J each year, after release of the August CPI-U figures by the Bureau of Labor Statistics, which generally occurs in mid-September.

**CALCULATION OF THE DEDUCTIBLE:** The deductible for plans F and J is determined in accordance with section 1882(p)(11)(C)(i) of the Social Security Act (the Act). That provision prescribed a deductible of \$1500 for 1998 and 1999, and directed that the amount increase each subsequent year by the percent increase in the Consumer Price Index for all urban consumers (CPI-U) (all items, U.S. city average). For 2007, the deductible amount was \$1,860. For 2008, the deductible amount is increased by the percent increase in the CPI-U for the 12-month period ending August 2007. As reported by the Bureau of Labor Statistics, Department of Labor, the CPI-U index was 203.9 in August 2006 and 207.917 in August 2007, resulting in a 1.97 percent increase from the 2007 deductible amount of \$1,860. A 1.97 percent increase in \$1,860.00 is \$1,896.64. Section 1882(p)(11)(C)(ii) of the Act stipulates that this amount be rounded to the nearest multiple of \$10. After rounding \$1,896.64 to the nearest \$10 multiple, the 2008 deductible for the Medigap high deductible options is \$1,900.
