Skilled Nursing Facility Consolidated Billing and Preventive/Screening Services

Keywords

SE0436, Skilled, Nursing, Facilities, Consolidated, Billing, Screening, Preventive, SNF, Exclusion

Provider Types Affected

Skilled Nursing Facilities (SNFs), physicians, suppliers, and providers

Key Points

- SE0436 is an informational article that describes SNF Consolidated Billing (CB) as it applies to preventive and screening services provided to SNF residents.
- The SNF CB requirement makes the SNF itself responsible for including on the Part A bill that it submits to its Medicare intermediary almost all of the services that a resident receives during the course of a Medicare-covered stay, except for a small number of services that are specifically excluded from this provision.
- These "excluded" services can be separately furnished to the resident and billed under Medicare Part B by a variety of outside sources.
- These sources can include other providers of service (such as hospitals), which would submit the bill for Part B services to their Medicare intermediary, as well as practitioners and suppliers who would generally submit their bills to a Medicare Part B carrier. (Bills for certain types of items or equipment would be submitted by the supplier to their Durable Medical Equipment Medicare Administrative Contractor.

Background

- When the SNF prospective payment system (PPS) was introduced in the Balanced Budget Act of 1997 (BBA, P.L. 105-33, Section 4432), it changed the way SNFs are paid, and the way SNFs must work with suppliers, physicians, and other practitioners.

- CB assigns to the SNF itself the Medicare billing responsibility for virtually all of the services that the SNF's residents receive during the course of a covered Part A stay.

Preventive and Screening Services

- The BBA identified a list of services that are excluded from SNF CB. These services are primarily those provided by physicians and certain other types of medical practitioners, and they can be separately billed to Medicare Part B carriers directly by the outside entity that furnishes them to the SNF's resident (Social Security Act, Section 1888(e)(2)(A)(ii)).
- Since the BBA did not list preventive and screening services among the services identified for exclusion, these services are included within the scope of the CB provision.
- However, reimbursement for covered preventive and screening services, such as vaccines and mammographies, is subject to special billing procedures.
- As discussed in the May 12, 1998, Federal Register (63 FR 26296), since preventive services (such as vaccinations) and screening services (such as screening mammographies) do not appear on the exclusion list, they are subject to CB.
- Accordingly, if an SNF resident receives, for example, a flu vaccine during a covered Part A stay, the SNF itself is responsible for billing Medicare for the vaccine, even if it is furnished to the resident by an outside entity.

Billing for Preventive and Screening Services

- Even though the CB requirement makes the SNF itself responsible for billing Medicare for a preventive or screening service furnished to its Part A resident, the SNF would not include the service on its Part A bill, but would instead submit a separate bill for the service.
- This is because the Part A SNF benefit is limited to coverage of "diagnostic or therapeutic" services (i.e., services that are reasonable and necessary to diagnose or treat a condition that has already manifested itself). (See Sections 1861(h) following (7), 1861(b)(3), and 1862(a)(1) of the Social Security Act.)
- Accordingly, the Part A SNF benefit does not encompass screening services (which serve to check for the possible presence of a specific condition while it is still in an early, asymptomatic stage) or preventive services (which serve to ward off the occurrence of a condition altogether).
- As discussed below, such services are always covered under the applicable Part B benefit (or, in certain circumstances, under the Part D drug benefit), even when furnished to a beneficiary during the course of a covered Part A SNF stay.

Priority of Payments

- Priority of payment between the various parts of the Medicare law (Title XVIII of the Social Security Act) basically proceeds in alphabetical order: Part A is primary to Part B (see Section 1833(d) of the Social Security Act). Both Parts A and B are primary to Part D (see Section 1860D-2(e)(2)(B) of the Social Security Act).

- In the case of a vaccine, for example, this means that Part B can cover the vaccine only to the extent that it is not already coverable under Part A. Similarly, the Part D drug benefit can cover such a vaccine only to the extent that it is not already coverable under either Part A or Part B.
- Therefore, when an SNF's Part A resident receives a preventive vaccine for which a specific Part B benefit category exists (i.e., pneumococcal pneumonia, hepatitis B, or influenza), the vaccine would be covered under Part B.
- It would not be covered under Part A (because, as explained above, the scope of the Part A SNF benefit does not encompass preventive services).
- It also would not be covered under Part D (because Part B already includes a specific benefit category that covers each of these three types of vaccines; and, as discussed above, Part B is primary to Part D).
- Similarly, a preventive vaccine (such as poliomyelitis) for which no Part B benefit category exists would be coverable under the Part D drug benefit when administered to the SNF's Part A resident, rather than being covered under the Part A SNF benefit.

Example of Special Circumstance

- There are certain limited circumstances in which a vaccine would no longer be considered preventive in nature, and this can affect how the vaccine is covered.
- For example, while a booster shot of tetanus vaccine would be considered preventive if administered routinely in accordance with a recommended schedule, it would not be considered preventive when administered in response to an actual exposure to the disease (such as an animal bite, or a scratch on a rusty nail).
- In the latter situation, such a vaccine furnished to an SNF's Part A resident would be considered reasonable and necessary to treat an existing condition and, accordingly, would be included within the SNF's global Part A per diem payment for the resident's Medicare-covered stay.
- In terms of billing for an SNF's Part A resident, a vaccine that is administered for therapeutic rather than preventive purposes (such as a tetanus booster shot given in response to an actual exposure to the disease) would be included on the SNF's global Part A bill for the resident's covered stay.
- Alternatively, if a vaccine is preventive in nature and is one of the three types of vaccines for which a Part B benefit category exists (i.e., pneumococcal pneumonia, hepatitis B, or influenza), then the SNF would submit a separate Part B bill to its fiscal intermediary for the vaccine. (Under Section 1888(e)(9) of the Social Security Act, payment for an SNF's Part B services is made in accordance with the applicable fee schedule for the type of service being billed.)
- Finally, if the resident receives a type of preventive vaccine for which no Part B benefit category exists (e.g., poliomyelitis), then the vaccine would not be covered under either Parts A or B, and so would be coverable under the Part D drug benefit.
