* These amounts reflect the latest data available. There was no new data available from the 2008 AMGA survey.

** Branch is defined by AMGA as: These specialties have the same basic definition as the main specialty. These physicians are located in small satellite or branch offices at least five miles from the main campus. The branch office practices primarily as its own separate entity, and often has different compensation and/or performance expectations than its main campus colleagues. There would not be teaching responsibilities at these locations.

The information included in this document was obtained from the 2008 Medical Group Compensation and Financial Survey published by the American Medical Group Association® (AMGA). For further information, visit AMGA's Web site at <http://www.amga.org/>
