# About this document

The Medicare Code Editor (MCE) detects and reports errors in the coding claims data. This manual contains a description of each coding edit with corresponding ICD-9-CM code lists.

The coding edit information in this manual is effective from 10/01/2013 to 09/30/2014.

# Chapter 1: Edit code lists

Following is a list of current edits described in this chapter.

1. Invalid diagnosis or procedure code
2. E-code as principal diagnosis
3. Duplicate of PDX
4. Age conflict
5. Sex conflict
6. Manifestation code as principal diagnosis
7. Non-specific principal diagnosis (Discontinued as of 10/01/07)
8. Questionable admission
9. Unacceptable principal diagnosis
10. Non-specific O.R. procedure (Discontinued as of 10/01/07)
11. Non-covered procedure
12. Open biopsy check (Discontinued as of 10/01/10)
13. Bilateral procedure
14. Invalid age
15. Invalid sex
16. Invalid discharge status
17. Limited coverage
18. Wrong procedure performed
19. Procedure inconsistent with length of stay

## 1. Invalid diagnosis or procedure code

The Medicare Code Editor checks each diagnosis including the admitting diagnosis and each procedure against a table of valid ICD-9-CM codes. If an entered code does not agree with any code on the internal list, it is assumed to be invalid or that the 4th or 5th digit of the code is invalid or missing.

## 2. E-code as principal diagnosis

For a list of all valid ICD-9-CM codes, see volumes 2 (diseases) and 3 (procedures) of the *International Classification of Diseases, 9th Revision, Fourth Edition, Clinical Modification (ICD-9-CM)*.

E-codes are ICD-9-CM codes beginning with the letter E. They describe the circumstance causing an injury, not the nature of the injury, and therefore should not be used as a principal diagnosis.

For a list of all E-codes, see volume 2 (diseases) of the *International Classification of Diseases, 9th Revision, Fourth Edition, Clinical Modification (ICD-9-CM)*.

### 3. Duplicate of PDX

Whenever a secondary diagnosis is coded the same as the principal diagnosis, the secondary diagnosis is identified as a duplicate of the principal diagnosis.

### 4. Age conflict

The Medicare Code Editor detects inconsistencies between a patient's age and any diagnosis on the patient's record. For example, a five-year-old patient with benign prostatic hypertrophy or a 78-year-old patient coded with a delivery.

In the above cases, the diagnosis is clinically and virtually impossible in a patient of the stated age. Therefore, either the diagnosis or the age is presumed to be incorrect. There are four age categories for diagnoses in the program:

- **Newborn.** Age of 0 years; a subset of diagnoses intended only for newborns and neonates (e.g., fetal distress, perinatal jaundice).
- **Pediatric.** Age range is 0–17 years inclusive (e.g., Reye's syndrome, routine child health exam).
- **Maternity.** Age range is 12–55 years inclusive (e.g., diabetes in pregnancy, antepartum pulmonary complication).
- **Adult.** Age range is 15–124 years inclusive (e.g., senile delirium, mature cataract).

The following pages contain lists of ICD-9-CM diagnosis codes with corresponding English descriptions for each of the age categories described above.

## 5. Sex conflict

Medicare Code Editor detects inconsistencies between a patient's sex and any diagnosis or procedure on the patient's record. For example, a male patient with cervical cancer (diagnosis) or a female patient with a prostatectomy (procedure).

In both instances, the indicated diagnosis or the procedure conflicts with the stated sex of the patient. Therefore, either the patient's diagnosis, procedure or sex is presumed to be incorrect.

The following pages contain lists of male and female related ICD-9-CM diagnosis and procedure codes with corresponding English descriptions.

### Diagnoses for females only

01660	TB ovary & tube-unspec
01661	TB ovary & tube-no exam

## 6. Manifestation code as principal diagnosis

Manifestation codes describe the manifestation of an underlying disease, not the disease itself, and therefore should not be used as a principal diagnosis.

The following list contains ICD-9-CM diagnoses with corresponding English descriptions identified as manifestation codes.

### Manifestations not allowed as principal diagnosis

## 7. Non-specific principal diagnosis

Effective 10/01/07, the non-specific principal diagnosis edit was discontinued and will appear for claims processed using MCE version 2.0–23.0 only.

## 8. Questionable admission

Some diagnoses are not usually sufficient justification for admission to an acute care hospital. For example, if a patient is given code 4011 for benign hypertension, then the patient would have a questionable admission, since benign hypertension is not normally sufficient justification for admission to a hospital.

The following list contains diagnosis codes with corresponding English descriptions identified as questionable admission when used as a principal diagnosis.

### Questionable admission - principal diagnosis only

25000	DMII wo cmp nt st uncntr
27800	Obesity NOS
3804	Impacted cerumen
4011	Benign hypertension

V08	Asymp hiv infectn status
V5331	Ftng cardiac pacemaker
V5332	Ftng autmtc dfibrillator
V5339	Ftng oth cardiac device

## 9. Unacceptable principal diagnosis

There are selected codes that describe a circumstance which influences an individual's health status but not a current illness or injury, or codes that are not specific manifestations but may be due to an underlying cause. These codes are considered unacceptable as a principal diagnosis.

There are a few usually unacceptable principal diagnosis codes that are considered "acceptable" when a secondary diagnosis is also coded on the record. If no secondary diagnosis is present for this subset of codes, the message REQUIRES SECONDARY DX will appear.

The following pages contain a list of codes with corresponding English descriptions identified as unacceptable when entered as principal diagnosis.

**Note:** Codes that require a secondary diagnosis are indicated with an asterisk (\*).

### Unacceptable principal diagnoses

## 10. Non-specific O.R. procedure

Effective 10/01/07, the non-specific O.R. procedure edit was discontinued and will appear for claims processed using MCE version 2.0–23.0 only.

## 11. Non-covered procedure

There are some procedures for which Medicare does not provide reimbursement. There are also procedures that would normally not be reimbursed by Medicare but due to the presence of certain diagnoses are reimbursed.

The following page contains lists of non-covered procedure codes with corresponding English descriptions, and explains the circumstances in which the edit is applied.

### Non-covered procedures

**1. The following criteria are retroactive effective November 6, 2006.**

The procedure shown below is identified as a non-covered procedure **except** when combined with non-operating room procedure code 0065 (Perc ins intracran stent).

**Procedure**

0062 Perc angio intracran ves

**2. The following criteria are retroactive effective April 26, 2006.**

ICD-9-CM procedure codes 5280 (Pancreat transplant NOS) and 5282 (Pancreatic homotransplan) alone [without 5569 (Kidney transplant NEC)] are considered "Non-covered procedures" **except** for the following condition:

When either 5280 or 5282 is combined with at least one principal or secondary diagnosis code from the following diagnoses list:

**Diagnoses list**

25001	DMI wo cmp nt st uncntrl
25003	DMI wo cmp uncntrld
25011	DMI keto nt st uncntrl
25013	DMI ketoacd uncontrold

20700	Ac erth/erlk wo ach rmsn
20800	Ac leu un cl wo ach rmsn

The procedures shown below are identified as non-covered procedures **only** when any code from the diagnoses list shown below is present as either a principle or secondary diagnosis.

**Procedures**

4102	Alo bone marrow trnsplnt
4103	Allogrft bone marrow NOS
4105	Allo hem stem ct w/o pur
4108	Allo hem stem ct w purg

### Diagnoses

20300	Mult mye w/o achv rmson
20301	Mult myelm w remission

The procedure shown below is identified as a "Non-covered procedure" when the beneficiary is over age 60.

### Procedure

8465	Ins totl disc pros lumb
------	-------------------------

## Open biopsy check

Effective 10/01/10, the open biopsy check edit was discontinued and will appear for claims processed using MCE version 2.0–26.0 only.

## 13. Bilateral procedure

Certain codes do not accurately reflect procedures performed in one admission on two or more *different* bilateral joints of the lower extremities. A combination of these codes shows a bilateral procedure when they could be procedures performed on a single joint (i.e., duplicate procedures). For example, if 8151 (Total hip replacement) and 8152 (Partial hip replacement) are both coded on the claim, the edit "bilateral procedure" will appear.

This edit instructs the fiscal intermediary to ensure that these procedures were performed on two separate joints. However, if 8151 (Total hip replacement) is coded twice, the edit would not appear because this signifies a true bilateral procedure.

The following list contains the joint replacement procedure codes with corresponding English descriptions identified as "bilateral procedure" whenever two or more *different* joint procedures are coded, and the principal diagnosis causes assignment to MDC 8.

### Bilateral procedure codes

0070	Rev hip repl-acetab/fem
0080	Rev knee replacemt-total
0085	Resrf hip,total-acet/fem
0086	Resrf hip,part-fem head
0087	Resrf hip,part-acetabulum
8151	Total hip replacement
8152	Partial hip replacement
8154	Total knee replacement
8156	Total ankle replacement

## 14. Invalid age

A patient's age may be necessary for appropriate DRG determination. If the age reported is not between 0 years and 124 years, the Medicare Code Editor will assume the age is in error.

## 15. Invalid sex

A patient's sex (gender) may be necessary for appropriate DRG determination. The sex code reported must be either 1 (male) or 2 (female).

## 16. Invalid discharge status

A patient's discharge status may be necessary for appropriate DRG determination. Discharge status must be coded according to the UB-04 conventions. Valid values are:

01 = Home or self-care

02 = Disch/trans to another short term hospital

03 = Disch/trans to SNF

04 = Disch/trans to ICF (valid until 9/30/09)

04 = Cust/supp care (added 10/01/09)

05 = Disch/trans to another type of facility (valid until 03/31/08)

05 = Disch/trans to a designated cancer center or children's hospital (added 04/01/08)

06 = Care of home health service

07 = Left against medical advice

08 = Home IV service (valid until 09/30/05)

20 = Died

21 = Court/law enfrc (added 10/1/09)

30 = Still a patient

43 = Fed hospital (added 10/01/03)

50 = Hospice-home

51 = Hospice-medical facility

61 = Swing Bed (added 10/01/2001)

62 = Rehab facility/rehab unit (added 10/01/2001)

63 = Long term care hospital (added 10/01/2001)

64 = Nursing facility–Medicaid certified (added 10/01/02)

- 65 = Psych hosp/unit (added 10/01/03)
- 66 = Critical access hospital (added 10/01/05)
- 69 = Designated Disaster Alternative Care Site (added 10/01/13)
- 70 = Discharge/transfer to another type of health care institution not defined elsewhere in the code list (added 04/01/08)
- 71 = Outpatient services-other facility (10/01/01–09/30/03 only)
- 72 = Outpatient services-this facility (10/01/01–09/30/03 only)
- 81 = Home-Self care w Planned Readmission (added 10/01/13)
- 82 = Short Term Hospital w Planned Readmission (added 10/01/13)
- 83 = SNF w Planned Readmission (added 10/01/13)
- 84 = Cust/supp care w Planned Readmission (added 10/01/13)
- 85 = Canc/child hosp w Planned Readmission (added 10/01/13)
- 86 = Home Health Service w Planned Readmission (added 10/01/13)
- 87 = Court/law enfrc w Planned Readmission (added 10/01/13)
- 88 = Federal Hospital w Planned Readmission (added 10/01/13)
- 89 = Swing Bed w Planned Readmission (added 10/01/13)
- 90 = Rehab Facility/ Unit w Planned Readmission (added 10/01/13)

- 92 = Nursg Fac-Medicaid Cert w Planned Readmission (added 10/01/13)
- 93 = Psych Hosp/Unit w Planned Readmission (added 10/01/13)
- 94 = Crit Acc Hosp w Planned Readmission (added 10/01/13)
- 95 = Oth Institution w Planned Readmission (added 10/01/13)

## 17. Limited coverage

For certain procedures whose medical complexity and serious nature incur extraordinary associated costs, Medicare limits coverage to a portion of the cost.

The limited coverage edit indicates the type of limited coverage. (e.g., Heart transplant-Limited coverage, Lung transplant-Limited coverage, etc.)

The following is a list of limited coverage procedure codes with corresponding English descriptions.

### Limited coverage

3222	Lung vol reduction surg
3350	Lung transplant NOS
3351	Unilat lung transplant
3352	Bilat lung transplant
336	Comb heart/lung transpla
3751	Heart transplantation
3766	Implantable hrt assist
4697	Transplant of intestine
5059	Liver transplant NEC
5280	Pancreat transplant NOS
5282	Pancreatic homotransplan
5569	Kidney transplant NEC

The following criteria are retroactive effective May 1, 2008.

The procedure shown below is identified as a limited coverage procedure **when combined** with diagnosis code V707 (Exam-clinical trial).

#### Procedure

3752	Imp tot int bi ht rp sys
------	--------------------------

## 18. Wrong procedure performed

Certain E-codes indicate that the wrong procedure was performed.

The following list contains the codes, with corresponding English descriptions, that indicate the wrong procedure was performed.

### Wrong procedure performed

E8765	Perfrm wrong op/right pt
E8766	Proc-pt not sched surg
E8767	Rt proc-wrong side/part

## 19. Procedure inconsistent with length of stay

The following procedure code should only be coded on claims with a length of stay of four days or greater.

### **Procedure inconsistent with length of stay**

9672      Continuous invasive mechanical ventilation for 96 consecutive hours or more

# Chapter 2: Code list changes

This chapter summarizes the changes in the edit code lists from the last release of the Medicare Code Editor (MCE) software to the current one. The code lists are part of chapter 1 in this manual.

## Changes to existing edits

Codes 7511 Atresia small intestine, 7512 Atresia large intestine, and 75161 Biliary atresia were removed from the pediatric edit effective 10/01/13.

The following discharge status codes were added effective 10/01/13:

- 69 Designated Disaster Alternative Care Site
- 81 Home-Self care w Planned Readmission
- 82 Short Term Hospital w Planned Readmission
- 83 SNF w Planned Readmission
- 84 Cust/supp care w Planned Readmission
- 85 Canc/child hosp w Planned Readmission
- 86 Home Health Service w Planned Readmission
- 87 Court/law enfrc w Planned Readmission
- 88 Federal Hospital w Planned Readmission
- 89 Swing Bed w Planned Readmission
- 90 Rehab Facility/ Unit w Planned Readmission
- 91 LTCH w Planned Readmission
- 92 Nursg Fac-Medicaid Cert w Planned Readmiss
- 93 Psych Hosp/Unit w Planned Readmission
- 94 Crit Acc Hosp w Planned Readmission
- 95 Oth Institution w Planned Readmission
