

Instructions for reading the Section 5506 Final Awards spreadsheet - Round 6:

This spreadsheet contains the results of the FTE resident cap slot redistributions under the sixth round of section 5506 of the ACA, "Preservation of Resident Cap Positions from Closed Hospitals" due to the closures of Cooper Green Mercy Hospital in Birmingham, AL on January 1, 2013 and Sacred Heart Hospital in Chicago, IL on July 20, 2013.

There are three tabs in this spreadsheet with results from the sixth round. The second tab of this spreadsheet, labeled 'Cooper Green Mercy Awards', lists the hospitals that were awarded FTE resident cap slots from the closure of Cooper Green Mercy Hospital. The third tab of this spreadsheet, labeled 'Sacred Heart Awards', lists the hospitals that were awarded FTE resident cap slots from the closure of Sacred Heart Hospital. The fourth tab of this spreadsheet, labeled 'Remaining Applicants', lists the providers that were not awarded FTE resident cap slots under round 6.

On the 'Cooper Green Mercy Awards' tab of this spreadsheet, you will find the following information:

Column A contains the CMS Certification Numbers (CCNs), sorted in ascending order.

Column B contains the total IME slots awarded to the hospital.

Column C contains the total DGME slots awarded to the hospital.

Columns D through G contain the effective dates of the slots awarded.

Column H contains the Provider's Medicare Administrative Contractor (MAC).

On the 'Sacred Heart Awards' tab of this spreadsheet, you will find the following information:

Column A contains the CMS Certification Numbers (CCNs), sorted in ascending order.

Column B contains the total IME slots awarded to the hospital.

Column C contains the total DGME slots awarded to the hospital.

Columns D and E contain the effective dates of the slots awarded.

Column F contains the Provider's Medicare Administrative Contractor (MAC).

Please note that a hospital may be receiving FTE resident cap slots with staggered effective dates for various reasons. First, some of the effective dates of the slots awarded are tied to the closure date of the closed hospital. Second, some of the effective dates of the slots awarded are intended for use on an as needed basis. That is, the slots will become effective when the hospital can demonstrate to the Medicare contractor that the slots associated with a new program or program expansion are actually filled, and therefore, are needed as of a particular date. (Please refer to the August 31, 2012 final rule for a more detailed explanation of this policy (77 FR 53437-53445)). In addition, please note that there were no temporary cap adjustments awarded under 42 CFR 413.79(h) for displaced residents from Cooper Green Mercy Hospital or Sacred Heart Hospital.

Once you find the provider number you are looking for, please read across the entire row to find all of the effective dates for the hospital's total section 5506 IME and DGME slots awarded, respectively. The sum of all the IME amounts in the IME effective date fields equals the total IME slots awarded to the hospital in column B. Similarly, the sum of all the DGME amounts in the DGME effective date fields equals the total DGME slots awarded to the hospital in column C.
