§ 410.40 Coverage of ambulance services.

(a) Basic rules. Medicare Part B covers ambulance services if the following conditions are met:

1. The supplier meets the applicable vehicle, staff, and billing and reporting requirements of 410.41 and the service meets the medical necessity and origin and destination requirements of paragraphs (d) and (e) of this section.

2. Medicare Part A payment is not made directly or indirectly for the services.

(b) Levels of service. Medicare covers the following levels of ambulance service, which are defined in § 414.605 of this chapter:

1. Basic life support (BLS) (emergency and nonemergency).

2. Advanced life support, level 1 (ALS1) (emergency and nonemergency).

3. Advanced life support, level 2 (ALS2).

4. Paramedic ALS intercept (PI).

5. Specialty care transport (SCT).

6. Fixed wing transport (FW).

7. Rotary wing transport (RW).

(c) Paramedic ALS intercept services. Paramedic ALS intercept services must meet the following requirements:

1. Be furnished in an area that is designated as a rural area by any law or regulation of the State or that is located in a rural census tract of a metropolitan statistical area (as determined under the most recent Goldsmith Modification). (The Goldsmith Modification is a methodology to identify small towns and rural areas within large metropolitan counties that are isolated from central areas by distance or other features.)

2. Be furnished under contract with one or more volunteer ambulance services that meet the following conditions:

   (i) Are certified to furnish ambulance services as required under § 410.41.

   (ii) Furnish services only at the BLS level.

   (iii) Be prohibited by State law from billing for any service.

3. Be furnished by a paramedic ALS intercept supplier that meets the following conditions:

   (i) Is certified to furnish ALS intercept services as required under § 410.41(b)(2).

   (ii) Bills all the recipients who receive ALS intercept services from the entity, regardless of whether or not those recipients are Medicare beneficiaries.

4. Medical necessity requirements—(1) General rule. Medicare covers ambulance services, including fixed wing and rotary wing ambulance services, only if they are furnished to a beneficiary whose medical condition is such that other means of transportation are contraindicated; or, if his or her medical condition, regardless of bed confinement, is such that transportation by ambulance is medically required. Nonemergency transportation by ambulance is appropriate if either: the beneficiary is bed-confined, and it is documented that the beneficiary’s condition is such that other methods of transportation are contraindicated; or, if his or her medical condition, regardless of bed confinement, is such that transportation by ambulance is medically required. Thus, bed confinement is not the sole criterion in determining the medical necessity of ambulance transportation. It is one factor that is
considered in medical necessity determinations. For a beneficiary to be considered bed-confined, the following criteria must be met:

(i) The beneficiary is unable to get up from bed without assistance.

(ii) The beneficiary is unable to ambulate.

(iii) The beneficiary is unable to sit in a chair or wheelchair.

(2) Special rule for nonemergency, scheduled, repetitive ambulance services. Medicare covers medically necessary nonemergency, scheduled, repetitive ambulance services if the ambulance provider or supplier, before furnishing the service to the beneficiary, obtains a written order from the beneficiary’s attending physician certifying that the medical necessity requirements of paragraph (d)(1) of this section are met. The physician’s order must be dated no earlier than 60 days before the date the service is furnished.

(3) Special rule for nonemergency ambulance services that are either unscheduled or that are scheduled on a nonrepetitive basis. Medicare covers medically necessary ambulance services that are either unscheduled or that are scheduled on a nonrepetitive basis under one of the following circumstances:

(i) For a resident of a facility who is under the care of a physician if the ambulance provider or supplier obtains a written order from the beneficiary’s attending physician, within 48 hours after the transport, certifying that the medical necessity requirements of paragraph (d)(1) of this section are met.

(ii) For a beneficiary residing at home or in a facility who is not under the direct care of a physician. A physician certification is not required.

(iii) If the ambulance provider or supplier is unable to obtain a signed physician certification statement from the beneficiary’s attending physician or by the hospital or facility where the beneficiary is being treated and from which the beneficiary is transported. Medicare regulations for PAs, NPs, and CNSs apply and all applicable State licensure laws apply; or,

(iv) If the ambulance provider or supplier is unable to obtain the required certification within 21 calendar days following the date of the service, the ambulance supplier must document its attempts to obtain the requested certification and may then submit the claim. Acceptable documentation includes a signed return receipt from the U.S. Postal Service or other similar service that evidences that the ambulance supplier attempted to obtain the required signature from the beneficiary’s attending physician or other individual named in paragraph (d)(3)(iii) of this section.

(v) In all cases, the provider or supplier must keep appropriate documentation on file and, upon request, present it to the contractor. The presence of the signed certification statement or signed return receipt does not alone demonstrate that the ambulance transport was medically necessary. All other program criteria must be met in order for payment to be made.

(e) Origin and destination requirements. Medicare covers the following ambulance transportation:

(1) From any point of origin to the nearest hospital, CAH, or SNF that is capable of furnishing the required level and type of care for the beneficiary’s illness or injury. The hospital or CAH must have available the type of physician or physician specialist needed to treat the beneficiary’s condition.

(2) From a hospital, CAH, or SNF to the beneficiary’s home.

(3) From a SNF to the nearest supplier of medically necessary services not available at the SNF where the beneficiary is a resident, including the return trip.

(4) For a beneficiary who is receiving renal dialysis for treatment of ESRD, from the beneficiary’s home to the nearest facility that furnishes renal dialysis, including the return trip.

(5) Specific limits on coverage of ambulance services outside the United States. If services are furnished outside the
United States, Medicare Part B covers ambulance transportation to a foreign hospital only in conjunction with the beneficiary’s admission for medically necessary inpatient services as specified in subpart H of part 424 of this chapter.

§ 410.41 Requirements for ambulance suppliers.

(a) Vehicle. A vehicle used as an ambulance must meet the following requirements:

(1) Be specially designed to respond to medical emergencies or provide acute medical care to transport the sick and injured and comply with all State and local laws governing an emergency transportation vehicle.

(2) Be equipped with emergency warning lights and sirens, as required by State or local laws.

(3) Be equipped with telecommunications equipment as required by State or local law to include, at a minimum, one two-way voice radio or wireless telephone.

(4) Be equipped with a stretcher, linens, emergency medical supplies, oxygen equipment, and other lifesaving emergency medical equipment as required by State or local laws.

(b) Vehicle staff—(1) BLS vehicles. A vehicle furnishing ambulance services must be staffed by at least two people, one of whom must meet the following requirements:

(i) Be certified as an emergency medical technician by the State or local authority where the services are furnished.

(ii) Be legally authorized to operate all lifesaving and life-sustaining equipment on board the vehicle.

(2) ALS vehicles. In addition to meeting the vehicle staff requirements of paragraph (b)(1) of this section, one of the two staff members must be certified as a paramedic or an emergency medical technician, by the State or local authority where the services are being furnished, to perform one or more ALS services.

(c) Billing and reporting requirements. An ambulance supplier must comply with the following requirements:

(1) Bill for ambulance services using CMS-designated procedure codes to describe origin and destination and indicate on claims form that the physician certification is on file.

(2) Upon a carrier’s request, complete and return the ambulance supplier form designated by CMS and provide the Medicare carrier with documentation of compliance with emergency vehicle and staff licensure and certification requirements in accordance with State and local laws.

(3) Upon a carrier’s request, provide additional information and documentation as required.

[64 FR 3648, Jan. 25, 1999]

§ 410.42 Limitations on coverage of certain services furnished to hospital outpatients.

(a) General rule. Except as provided in paragraph (b) of this section, Medicare Part B does not pay for any item or service that is furnished to a hospital outpatient (as defined in § 410.2) during an encounter (as defined in § 410.2) by an entity other than the hospital unless the hospital has an arrangement (as defined in § 409.3 of this chapter) with that entity to furnish that particular service to its patients. As used in this paragraph, the term “hospital” includes a CAH.

(b) Exception. The limitations stated in paragraph (a) of this section do not apply to the following services:

(1) Physician services that meet the requirements of § 415.102(a) of this chapter for payment on a fee schedule basis.

(2) Physician assistant services, as defined in section 1861(s)(2)(K)(i) of the Act.

(3) Nurse practitioner and clinical nurse specialist services, as defined in section 1861(s)(2)(K)(ii) of the Act.

(4) Certified nurse mid-wife services, as defined in section 1861(gg) of the Act.

(5) Qualified psychologist services, as defined in section 1861(ii) of the Act.

(6) Services of an anesthetist, as defined in § 410.69.

(7) Services furnished to SNF residents as defined in § 411.15(p) of this chapter.
