

Allowable DMEPOS HCPCs During an Open 60-Day Home Health Episode of Care

The following list of HCPCs depicts those DMEPOS codes that would be allowed to be billed separately during an open 60-day home health episode of care. Note that for the codes that fall under the "SU" category, these codes would only be allowed to be billed separately if the item were used with the DME by the patient in the home. The HH Agency may not bill separately for a supply code if the item is utilized as part of the skilled procedure performed by the agency staff. Below is a table that describes the categories of DMEPOS in the file described above:

Category	Description
CD	Customized DME
CR	Capped Rental
FS	Frequency Serviced
IN	Inexpensive or routinely purchased
MD	Miscellaneous DME
OX	Oxygen Accessories
PO	Prosthetics & Orthotics
RC	Repair Codes
SU	Supplies necessary for the effective use of DME
TE	TENS (Transcutaneous Electrical Nerve Stimulators)
