

Questions and Answers about Remote Identity Proofing and Multi-Factor Authentication

About the Frequently Asked Questions

These Frequently Asked Questions include information about both the Remote Identity Proofing (RIDP) and Multi-Factor Authentication (MFA) services. The PV-PQRS application will be transitioning to a new identity management solution, Enterprise Identity Data Management (EIDM), provided by the Centers for Medicare & Medicaid Services (CMS). Part of this transition is the adoption of RIDP and MFA services. These services will help improve CMS' ability to reduce fraud and ensure system security by implementing security measures that enhance the ability of identifying a given individual and the type of data they are able to access.

2. When I click on an application, I am directed to the MFA Login Screen, what is this?	9

3. Are there any specific MFA service providers? What MFA devices can I link to my CMS user account?	9
4. How do we use MFA?	9
5. How do I get MFA credential?	10
6. Where can I get the MFA software?	10
7. How do I register for MFA if I receive an error when installing the software on my computer?	10
8. I cannot download Symantec VIP on my Blackberry.	11
9. I cannot use the desktop MFA software or the mobile phone MFA software.....	11
10. I am being asked to type a Credential ID. Where do I find the Credential ID?	12
11. How do I register additional devices to my user account?	12
12. I lost all of the MFA devices linked to my user account. How do I deactivate the linked devices and link new devices to my user account?	12
13. How do I use Multi-Factor Authentication?.....	13
14. What is a Security Code?	13
15. If my Credential ID is copied or stolen, can someone else access my CMS EIDM User account?.....	14
16. Can I access multiple Applications if I'm multi-factor authenticated?.....	14
17. How many MFA devices can I link to my EIDM user account?.....	14
18. Will I be charged cell phone time each time I use Symantec VIP MFA on my mobile device?	14
19. Do I need to use my MFA device every time I log in? How do I know if I need MFA?.....	14

A. REMOTE IDENTITY PROOFING

1. What is Remote Identity Proofing (RIDP)?

RIDP is the process of validating sufficient information about you (e.g., credit history, personal demographic information, and other indicators) to uniquely identify you. If you are requesting electronic access to protected CMS information or systems, you must be identity proofed to gain access. CMS uses Experian, an external identification verification provider, to remotely perform identity proofing.

You may have already encountered RIDP through various interactions with banking systems, credit reporting agencies, and shipping companies. The Experian identity verification service is used by CMS to confirm your identity when you need to access a protected CMS Application. When you log in to the CMS system and request access to Physician Quality and Value Programs, you will be prompted to RIDP if you have not been previously identity proofed to the level of assurance required by the Physician Quality and Value Programs. You will be asked to provide a set of core credentials which include:

- Full **Legal** Name
- Social Security Number (may be optional)
- Date of Birth
- Current **Residential** Address
- Personal Phone Number

The Experian identity verification service will use your core credentials to locate your personal information in Experian and generate a set of questions, referred to as out-of-wallet questions. Experian will attempt to verify your identity to the appropriate level of assurance with the information you provided. Most users are able to complete the ID proofing process in less than five minutes. If you encounter problems with RIDP, you will be asked to contact Experian Support Services via phone to resolve any issues. Please see the “[Remote Identity Proofing Tips for Success](#)” section below for some tips on navigating the ID proofing process successfully.

2. What happens to the data submitted for identify proofing?

Physician Quality and Value Programs application collects your personal information, described as data that is unique to you as an individual, such as name, address, telephone number, Social Security Number, and date of birth. Physician Quality and Value Programs application only collects personal information only to verify your identity. Your information will be sent to Experian, an external identity verification provider, to help us confirm your identity. If collected, we will validate your Social Security Number with Experian only for the purpose of verifying your identity. Experian verifies the information you give us against their records and may present you with questions based on your credit profile, called out-of-wallet questions. The out-of-wallet questions and answers, including financial history, are strictly between you and the RIDP service Experian; neither Physician Quality and Value Programs application nor the CMS will store them. Experian is required by law to securely maintain this data for seven years. For more information regarding how CMS uses the information you provide, please read the [CMS Privacy Act Statement](#)

3. Will my Social Security Number (SSN) be shared with any federal or private agency?

Your SSN will be used for verification purposes only. EIDM does not share your SSN with any federal or private agency.

4. I already provided my personal information during Registration to setup an EIDM user account. Why do I have to provide it again to access certain application?

When you have selected an application or role that requires a higher level of security, you are required to complete identity verification. In most cases, you may need to provide a few more details (i.e. SSN, Date of Birth) to be able to request access to the selected application or role.

5. Will RIDP affect my credit?

No, this type of inquiry does not affect your credit score and you will not incur any charges related to this credit score inquiry. When you Identity proof, Experian creates something called a soft inquiry. Soft inquiries are visible only to you, the consumer, and no one else. Soft inquiries have no impact on your credit report, history, or score other than being recorded and maintained for 23 months.

6. What If I have problem completing Identity Verification? Is there an Experian Help Desk?

Yes, Experian Help Desk is a dedicated call center for individuals who have failed being proofed online while attempting to obtain a CMS EIDM credential. The Experian Help Desk can be contacted at 1-866-578-5409. The Experian Help Desk is open Monday through Friday from 8:30 a.m. to 10:00 p.m., Saturday from 10:00 a.m. to 8:00 p.m., and Sunday from 11:00 a.m. to 8:00 p.m., Eastern Standard Time.

For additional information, please see the Experian Consumer Assistance link: [Experian Customer Assistance](#).

7. What happens if my identity cannot be verified during the online RIDP process?

If Experian cannot identity proof you online, you will be asked to contact either the Experian Verification Support Services Help Desk or the QNET Help Desk, depending on the reason you failed RIDP. The system will provide you with a reference number to track your case. The Experian Help Desk cannot assist you if you do not have the reference number. If you are asked to contact the QNET Help Desk, you will be given a response code to help the QNET Help Desk perform the manual identity proofing process with you.

8. What happens if my identity cannot be verified during the Experian phone proofing RIDP process?

If you contact the Experian Help Desk and your identity cannot be verified, you will be referred to the QNET Help Desk to complete the manual identity proofing process.

9. How do I contact the QNET Help Desk?

The QNET Help Desk is open Monday through Friday: 8:00 am to 8:00 pm EST,
You can contact QNET Help Desk using any of the following methods:

- Phone: (866) 288-8912 (TTY 1-877-715-6222)
- Email: qnetsupport@hcqis.org

B. REMOTE IDENTITY PROOFING TIPS FOR SUCCESS

Name:

- You must use your full legal name. Refer to your Driver's License or financial account information.
- Your surname **HAS** to match the surname Experian has for you on file.
- Do not use nicknames.
- If you have a two-part name, enter the second part in the middle name field. (i.e., Billy Bob would have Billy in the first name field and Bob in the middle name field)

Address:

- Enter your current **residential** address:
 - Address where you receive financial statements including credit cards and/or utilities
 - Address you most consistently use for billing purposes
 - Address associated with your credit report
- If you have a recent change in address, you can try to ID proof with a prior address.
- Do not enter any extraneous symbols in the address field. If you want to confirm the correct format, visit [USPS Look up a Zip Code](#).

Phone:

- Enter a personal landline phone number (if you have one).
- A cell phone can be used, but a residential landline is preferred.

Out-of-Wallet Questions:

- You will be asked a series of questions regarding your personal financial transactions/information.
- Try to collect all of your information together before attempting the session.
- Download a free copy of your credit report at www.annualcreditreport.com.

Consent:

- You will be asked to give consent to verify your identity information from your credit report.

- The information is utilized only for purposes of **IDENTITY PROOFING** – “you are who you say you are.”
- The consent of utilizing the information **DOES** post as a **SOFT** inquiry on your credit report. The **SOFT** inquiry is visible **ONLY** to you.
- The consent/inquiry **does not** affect your credit score.

Exclusions:

- If you have a Victim’s Statement or a blocked or frozen file, you will **NOT** be able to complete the identity proofing process online. After attempting online, you will be directed to call Experian’s Consumer Services at **1-866-578-5409** to have the alert temporarily lifted so that you can attempt the ID proofing process.
- If you are listed as deceased on the Social Security Administration’s (SSA) Death Master File, you will **NOT** be able to complete the identity proofing process online. You may contact the SSA at **1-800-269-0271**. They will be able to make sure that your information is being reported correctly.
- If you have an address outside the U.S, you will not be able to complete the RIDP. RIDP only works for the user with a U.S. residential address and the user with a foreign address will go through manual identity proofing.

C. MULTI-FACTOR AUTHENTICATION

1. What is Multi-Factor Authentication (MFA)?

MFA is an approach to security authentication that requires you to provide more than one form of a credential in order to prove your identity. CMS policy specifies that all users who request access to a CMS Application designated a level of assurance (LOA) 3 security rating must be identity proofed to LOA 3 and are also required to be authenticated using MFA. CMS uses Symantec's Validation and Identity Protection (VIP) service to add a layer of protection for your online identity. Symantec's VIP utilizes government-certified technology and techniques to provide this multi-factor authentication.

2. When I click on an application, I am directed to an MFA Login Screen, what is this?

The MFA Login screen is displayed when a user attempts to access a MFA-protected application. If the user has MFA credentials, they will be able to access the application. If the user does not have MFA credentials, they will have to register MFA through their phone or computer.

3. Are there any specific MFA service providers? What MFA devices can I link to my CMS user account?

Yes. There are various MFA service providers. Symantec is the MFA service provider for EIDM accounts. Symantec provides validation and identity protection using one of the following: a computer-based application, smartphone-based app, one-time email password, or one-time SMS password.

4. How do we use MFA?

CMS uses MFA to grant access to a protected CMS Application designated by the Information Systems Security Officer (ISSO) to be an LOA 3 Application. You will be asked to enter your username and password and a One Time Password (OTP) that is generated by Symantec VIP software to gain access to the CMS Application. The OTP can be generated by a free Symantec application that can be downloaded to your desktop or smartphone, or alternatively, you can receive an OTP via a Short Message Service (SMS), Email, or voice phone call once you have registered your phone in Physician Quality and Value Programs application.

The “[Where can we get the MFA software?](#)” section will provide the necessary information to install the Symantec application on your desktop or smartphone.

5. How do I get MFA credential?

Physician Quality and Value Programs application will prompt you to register an MFA credential when you request access to protected information that requires LOA 3, and you have not already registered an MFA credential in Physician Quality and Value Programs application. You will be given a choice of MFA token delivery methods. The primary MFA token delivery method is to download software and install it on your computer or a mobile device. Alternatively, if you require special support, you can set up SMS, Email, or voice token to deliver your MFA credential. Where to get the MFA software is discussed below.

6. Where can I get the MFA software?

You will need MFA software if you choose to receive your MFA credential on a computer or laptop or a mobile device. You will be required to download the MFA software from Symantec and install it in your device of choice.

To download the desktop software for Windows or Mac, navigate to <https://idprotect.vip.symantec.com/desktop/home.v> and follow the instructions.

If using an iPhone, Android, Blackberry, or other mobile device, use your device to navigate to <https://m.vip.symantec.com/home.v> and follow the instructions.

SMS OTP and Voice OTP options do not require a software download.

7. How do I register for MFA if I receive an error when installing the software on my computer?

If you are having trouble downloading and installing the MFA software on your desktop or laptop, it is possibly due to your company’s IT policy that disables users from installing any software on their company-provided machines. Check with your company’s IT department for assistance. If your company does not allow you to install MFA software, one alternative is to use a mobile device that you control, or you can also use a voice call to obtain the OTP. You can refer to other instructions in this FAQ document for information on cell phone installation and voice token usage.

8. I cannot download Symantec VIP on my Blackberry.

If your Blackberry is a company-provided BlackBerry, your IT department may have locked down your device and disallowed users from loading applications. Check with your IT department to see if you have the required permissions to download an application on your BlackBerry. Some companies have also allowed the download of applications on their Blackberries but only over Wi-Fi networks. If this is the case, connect your BlackBerry to a Wi-Fi network to download Symantec VIP by typing <https://m.vip.symantec.com/home.v> in the BlackBerry browser.

9. I cannot use the desktop MFA software or the mobile phone MFA software.

Physician Quality and Value Programs application allows you to set up a voice or SMS delivery method for your OTP that does not require an MFA software download. You can register a phone number and select SMS or Voice OTP, and then Physician Quality and Value Programs application can register your phone number and delivery method with Symantec. After your MFA is activated, when you request access to Physician Quality and Value Programs application you will receive either a phone call or text message that contains your OTP, depending on the delivery method that you select.

The SMS and Voice OTP expire within 30 minutes of when they are sent, so please make sure you provide a phone number that will be accessible to you during your typical work hours. As an example, do not use a residential phone number if you will normally log in from your place of employment.

10. I am being asked to type a Credential ID. Where do I find the Credential ID?

The Credential ID is the 12-digit alpha-numeric number on the top of the soft token that was downloaded to your device from Symantec. The Credential ID begins with four letters and ends with eight numbers. In the example below, the token displays the credential ID as VSST57144377.

11. How do I register additional devices to my user account?

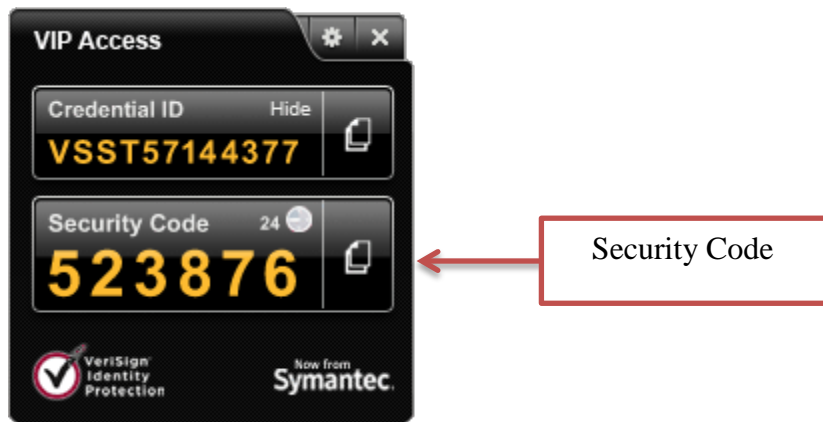

You can register up to five MFA credentials in your user account. Additional MFA credentials can be added to your account after you have been prompted by Physician Quality and Value Programs application to set up the first MFA credential. The “Register your Smartphone or Computer” hyperlink on the “My Profile” page will appear once you have successfully set up your first MFA credential. You can click on the link and add additional MFA devices to your user account.

12. I lost all of the MFA devices linked to my user account. How do I deactivate the linked devices and link new devices to my user account?

The QNET Help Desk should be able to assist you in removing/deactivating the registered devices and registering new devices to your user account.

13. How do I use Multi-Factor Authentication?

When you access Physician Quality and Value Programs application, the system will display the MFA login screen. You will be required to enter your user EIDM ID, EIDM password, and the VIP security code. If you have registered an MFA token device, enter your user ID and password and the security code that is displayed on your MFA token device.

For your protection, an MFA device automatically generates a new security code each time it counts down from a 30-second timer.

If you have registered an MFA SMS token or MFA Voice token, when you access Physician Quality and Value Programs application, the system will send you a security code via text message or voice call to the number you registered in EIDM .

For your protection a security code sent via SMS or Voice counts down from a 30-minute timer.

14. What is a Security Code?

A Security Code is a numeric code that appears under the label 'Security Code' on your MFA device. This Security Code is mapped to your EIDM User ID and is used as a second-factor authentication to confirm your identity. The automatically rotating code on an MFA token device or software changes every 30 seconds. If you elect to have a one-time password sent by email or SMS, that password is valid for 30 minutes.

15. If my Credential ID is copied or stolen, can someone else access my CMS EIDM User account?

No. A Credential ID cannot be used to access an EIDM user account.

16. Can I access multiple Applications if I'm multi-factor authenticated?

Yes, you can work on multiple applications if you have been Multi-Factor Authenticated. MFA serves as a Single Sign on (SSO) and allows you to work on multiple CMS applications during a valid EIDM session.

17. How many MFA devices can I link to my EIDM user account?

EIDM allows you to link a maximum of five distinct devices which can either be a Computer or a Smartphone.

18. Will I be charged cell phone time each time I use Symantec VIP MFA on my mobile device?

It depends on what delivery method you use. The Symantec VIP MFA software is free. Once the Symantec VIP MFA application is downloaded and installed on the phone it does not utilize any cell time to generate the six-digit security code. Cell or network traffic is used to download the application to one's mobile device. There are no recurring charges associated the use of either software option. If you choose not to use the software option and select SMS or Voice OTP, carrier charges may apply.

19. Do I need to use my MFA device every time I log in? How do I know if I need MFA?

MFA is required for specific applications that require higher level of authentication. Not all applications require MFA for a user. This is decided on the basis of application access a user has. For example: A user has access to App1 and App2. App1 requires MFA and App2 does not. A user logs in using single factor authentication, i.e. the user id and password. A user is allowed to access App2, but the moment user tries to access App1, EIDM triggers second factor authentication; that is, the user has to submit the User ID, Password and Security Code.
