

## November 2012

### Diabetes and the Seasonal Flu

November is National Diabetes Awareness Month. Diabetes can weaken the immune system, which can put seniors and others with diabetes at greater risk for flu-related complications like pneumonia.

Medicare provides coverage for one seasonal influenza virus vaccine per influenza season for all Medicare beneficiaries. Medicare generally provides coverage of pneumococcal vaccination and its administration once in a lifetime for all Medicare beneficiaries. Medicare may provide coverage of additional pneumococcal vaccinations based on risk or uncertainty of beneficiary pneumococcal vaccination status. Medicare provides coverage for the seasonal flu and pneumococcal vaccines and their administration for seniors and others with Medicare with no co-pay or deductible. And remember, seasonal flu vaccine is particularly important for health care workers, who may spread the flu to their patients. Don't forget to immunize yourself and your staff. Protect your patients. Protect your family. Protect yourself. *Know what to do about the flu.*

Remember – Influenza vaccine plus its administration and pneumococcal vaccine plus its administration are covered Part B benefits. Influenza vaccine and pneumococcal vaccine are NOT Part D-covered drugs. CMS has posted the 2012-2013 [Seasonal Influenza Vaccines Pricing](#). You may also refer to the [MLN Matters® Article #MM8047](#), "Influenza Vaccine Payment Allowances - Annual Update for 2012-2013 Season."

For more information on coverage and billing of the flu vaccine and its administration, please visit the [CMS Medicare Learning Network® Preventive Services Educational Products](#) and [CMS Immunizations](#) web pages. And, while some providers may offer the flu vaccine, others can help their patients locate a vaccine provider within their local community. [HealthMap Vaccine Finder](#) is a free, online service where users can search for locations offering flu vaccines.
